**Innovations in Smart Cities
Applications Edition 2 -**

Mohamed Ben Ahmed
2019-02-06
This book highlights cutting-
edge research presented at the
third installment of the
International Conference on
Smart City Applications
(SCA2018), held in Tétouan,
Morocco on October 10-11,

2018. It presents original research results, new ideas, and practical lessons learned that touch on all aspects of smart city applications. The respective papers share new and highly original results by leading experts on IoT, Big Data, and Cloud technologies, and address a broad range of key challenges in smart cities, including Smart Education and Intelligent Learning Systems, Smart Healthcare, Smart Building and Home Automation, Smart Environment and Smart Agriculture, Smart Economy and Digital Business, and Information Technologies and Computer Science, among others. In addition, various novel proposals regarding smart cities are discussed. Gathering peer-reviewed chapters written by prominent researchers from around the globe, the book offers an invaluable instructional and research tool for courses on computer and urban sciences; students and practitioners in computer science, information science, technology studies and

urban management studies will find it particularly useful. Further, the book is an excellent reference guide for professionals and researchers working in mobility, education, governance, energy, the environment and computer sciences.

Principles of Management - Openstax 2022-03-25

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as

human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Educational Technology in Practice - Wanjira Kinuthia 2010-05-01

The field of educational technology is one that requires a high level of problem solving critical thinking, and interpersonal skills to solve problems that are often complex and multi-dimensional. Analyzing cases provides an opportunity to explore professional issues through an environment that allows action researchers, practitioners and students to analyze and reflect on relevant theories and techniques to understand a real problem, ponder solutions and consequences, and develop responses. Hence, this book seeks to provide relevant authentic and realistic cases for such exploration. This book is guided by the premise that the cases presented will serve as a platform for researchers, practitioners and students to share experiences and best practices in both developing and developed contexts, in an endeavor to bridge the knowledge divide. Throughout the book, various challenges

are addressed and educational technology tools and strategies are subsequently employed in an effort to minimize the issues. Notwithstanding, the book also highlights successes and accomplishments in areas and contexts in which educational technology is being harnessed, including reaching more learners, providing more affordable options, and building capacity. Because of the interdisciplinary and multidisciplinary nature of the field and the cases, this book is useful not only in educational technology, but also in other fields. A “Facilitator Guide” is provided for each chapter for educators with their learners.

Handbook of Research on Virtual Training and Mentoring of Online Instructors -

Keengwe, Jared 2018-07-06

To meet the dynamic academic demands of twenty-first century digital learners, many institutions of higher learning are offering more online classes than ever before that are accessible to both traditional and non-traditional learners. As such, a growing

demand for online courses implies that participating institutions provide faculty with appropriate professional development programs to ensure the design and delivery of quality online courses. The Handbook of Research on Virtual Training and Mentoring of Online Instructors is a critical scholarly resource that highlights the issues, challenges, and online engagement experiences to enhance effective teaching and learning in this learning environment. Featuring coverage on a broad range of topics such as media literacy, professional development, and virtual learning environments, this book is geared towards educational administrators, educators, and instructional designers interested in quality online instruction.

interconnected people, robots, gadgets, content, and services all determined by digital transformation. The role of digital technologies in children's, adolescent's, and young adult's lives is significantly increasing across the world. New and emerging devices and services promise to make their lives easier as they create new ways of connecting, creating, and relaxing. They also promise to support learning at home and school by enabling ready access to information and new and exciting pathways for young people to follow their interests. Yet, alongside these conveniences come trade-offs with implications for privacy, safety, health, and well-being. *Impact and Role of Digital Technologies in Adolescent Lives* provides a deeper understanding of how digital technologies impact the lives of children, adolescents, and young adults; this includes the navigation of developmental tasks and the issues faced when utilizing these technologies. Covering topics

such as adolescent stress, cyberbullying, intellectual disabilities, mental health, obesity, social media, and mindfulness practices, this text is essential for sociologists, psychologists, media analysts, technologists, academicians, researchers, students, non-government and government organizations, and professors.

Handbook of Research on Mobile Devices and

Applications in Higher Education Settings - Briz-

Ponce, Laura 2016-07-13

Mobile phones have become an integral part of society, as their convenience has helped democratize and revolutionize communication and the marketplace of ideas. Because of their ubiquity in higher education, undergraduate classrooms have begun to utilize smartphones and tablets as tools for learning. The Handbook of Research on Mobile Devices and

Applications in Higher Education Settings explores and fosters new perspectives on the use of mobile applications in a classroom context. This timely publication will demonstrate the challenges that universities face when introducing new technologies to students and instructors, as well as the rewards of doing so in a thoughtful manner. This book is meant to present the latest research and become a source of inspiration for educators, administrators, researchers, app developers, and students

Handbook of Research on
Entrepreneurship Development
and Opportunities in Circular
Economy - Baporikar, Neeta
2020-06-26

With the need for sustainability, a focus on developing an economic system that aims at minimizing waste, commonly referred to as the circular economy, is emerging. Circular economy and studies related to it have gained worldwide attention, as it seems to be an effective alternative economic system. Naturally, the circular economy will impact enterprises and will shift how entrepreneurship development and entrepreneurial opportunities are perceived, developed, and resourced. The Handbook of Research on Entrepreneurship Development and Opportunities in Circular Economy is a collection of pioneering research that advances the understanding of entrepreneurship development, identifies the opportunities, and manages the entrepreneurship development,

policies, and programs in order to further a circular economy. In addition to entrepreneurship development and entrepreneurial opportunities, the book will cover and discuss a number of other factors necessary for a successful transformation, such as entrepreneurship and innovation, entrepreneurship and change, and entrepreneurship education. While highlighting topics including consumer consumption, knowledge management, and linear economics, this book is ideally designed for entrepreneurs, small business owners, managers, consultants, organization development specialists, policymakers, researchers, industry experts, academicians, and students. *Albion's Seed* - David Hackett Fischer 1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed

through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Introduction to Sociology 2e

- Heather Griffiths 2017-12-31
Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers

comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

The Political Economy of Africa

- Vishnu Padayachee

2010-06-10

The Political Economy of Africa addresses the real possibilities for African development in the coming decades when seen in the light of the continent's economic performance over the last half-century. This involves an effort to emancipate our thinking from the grip of western economic models that have often ignored Africa's diversity in their rush to peddle simple nostrums of dubious merit. The book addresses the seemingly intractable economic problems of the African continent, and traces their origins. It also brings out the instances of successful economic change, and the possibilities for economic revival and renewal. As well as surveying the variety of contemporary situations, the text will provide readers with a firm grasp of the historical background to the topic. It explores issues such as: employment and poverty social policy and security structural adjustment programs and neo-liberal globalization majority rule and democratization

taxation and resource mobilization. It contains a selection of country specific case studies from a range of international contributors, many of whom have lived and worked in Africa. The book will be of particular interest to higher level students in political economy, development studies, area studies (Africa) and economics in general.

Patrolling Epistemic Borders in a World of Borderless Pandemics - Artwell

Nhemachena 2021-11-19

The global epistemological gendarmerie do not only police epistemologies but they also infect the world with infectious epidemics of laughter targeted at those people whose epistemologies are offhandedly condemned as sterile and useless in controlling and containing pandemics.

Patrolling epistemic borders in ways that demobilise indigenous epistemologies, the global epistemological policemen have ironically managed to prevent "transgressive" epistemologies from crossing borders but they

have fatally failed to prevent the transgressive COVID-19 from recurrently crossing borders, be they bodily, national or continental. Brandishing fetishised degree and diploma certificates, African comprador academics, who are more interested in fetishised ranks and titles than in creativity and innovation, have also fatally failed to help African communities by producing vaccines for Africans by Africans. Arguing that Eurocentric epistemologies have become sterile fetishes, the book contends that such epistemologies have disabled African scholars from actively producing vaccines on a continent where there are paradoxically more epidemics of mimetic laughter than there are efforts at creativity and innovation. The book is useful for scholars in sociology, anthropology, development studies, languages and communication, natural sciences, historical studies and social work.

Applied Ethnomusicology -
Klisala Harrison 2010-08-11

Applied ethnomusicology is an approach guided by principles of social responsibility, which extends the usual academic goal of broadening and deepening knowledge and understanding toward solving concrete problems and toward working both inside and beyond typical academic contexts (International Council for Traditional Music 2007). This edited volume is based on the first symposium of the ICTM's Study Group on Applied Ethnomusicology in Ljubljana, Slovenia in 2008 that brought together more than thirty specialists from sixteen countries worldwide. It contains a Preface, an extensive Introduction, and twelve selected peer-reviewed articles by authors from Australia, Austria, Canada, Germany, Slovenia, Serbia, South Africa, the United Kingdom, and the United States of America, divided into four thematic groups. These groups encompass: diverse perspectives on the growing field of applied ethnomusicology in various

geographical and problem-solving contexts; research and teaching-related connotations; the potential in contributing to sustainable music cultures; and the use of music in conflict resolution situations. The edited volume *Applied Ethnomusicology: Historical and Contemporary Approaches* brings together previously dispersed knowledge and perspectives, and offers new insights to various disciplines within the humanities and social sciences. Rooted in diverse scholarly traditions, it addresses a variety of challenges in today's world and aims to benefit the quality of human existence.

Application of Nanotechnology in Mining Processes

Elvis Fosso-Kankeu 2022-01-31
Application of Nanotechnology in Mining Processes
Nanotechnology has revolutionized processes in many industries but its application in the mining industry has not been widely discussed. This unique book provides an overview of the

successful implementation of nanotechnology in some of the key environmental and beneficiation mining processes. This book explores extensively the potential of nanotechnology to revolutionize the mining industry which has been relying for a very long on processes with limited efficiencies. The nine specialized chapters focus on applying nanoflotation to improve mineral processing, effective extraction of metals from leachates or pregnant solutions using nanoscale supramolecular hosts, and development of nano-adsorbents or nano-based strategies for the remediation or valorization of AMD. The application of nanotechnology in mining has so far received little attention from the industry and researchers and this groundbreaking book features critical issues so far under-reported in the literature: Application of nanotechnology in mineral processing for the enhancement of froth flotation
Development of smart

nanomaterials and application for the treatment of acid mine drainage Recovery of values from pregnant solutions using nanoadsorbents Valorization of AMD through formation of multipurpose nanoproducts. Audience Industrial interest will be from mining plant operators, environmental managers, water treatment plants managers, and operators. Researchers in nanotechnology, environmental science, mining, and metallurgy engineering will find the book valuable, as will government entities such as regulatory bodies officers and environmentalists.

Gendered Institutions and Women's Political Representation in Africa -
Diana Højlund Madsen
2020-12-24

During the course of the past three decades efforts of democratisation and institutional reforms have characterised the African continent, including demands for gender equality and women's political representation. As a result, some countries have introduced affirmative action measures, either in the aftermath of conflicts or as part of broader constitutional reforms, whereas others are falling behind this fast track to women's political representation. Utilising a

range of case studies spanning both the success cases and the less successful cases from different regions, this work examines the uneven developments on the continent. By mapping, analysing and comparing women's political representation in different African contexts, this book sheds light on the formal and informal institutions and the interplay between these that are influencing women's political representation and can explain the development on women's political representation across the continent and present perspectives on an 'African feminist institutionalism'.

Research Anthology on Business Continuity and Navigating Times of Crisis -

Information Resources Management Association
2022-01-07

When the COVID-19 pandemic caused a halt in global society, many business leaders found themselves unprepared for the unprecedented change that swept across industry. Whether the need to shift to remote

work or the inability to safely conduct business during a global pandemic, many businesses struggled in the transition to the "new normal." In the wake of the pandemic, these struggles have created opportunities to study how businesses navigate these times of crisis. The Research Anthology on Business Continuity and Navigating Times of Crisis discusses the strategies, cases, and research surrounding business continuity throughout crises such as pandemics. This book analyzes business operations and the state of the economy during times of crisis and the leadership involved in recovery. Covering topics such as crisis management, entrepreneurship, and business sustainability, this four-volume comprehensive major reference work is a valuable resource for managers, CEOs, business leaders, entrepreneurs, professors and students of higher education, researchers, and academicians.

Literacy Skills Through Game-Based Learning - Lane, Carol-Ann 2022-01-07

Emerging technologies are becoming more prevalent in global classrooms. Traditional literacy pedagogies are shifting toward game-based pedagogy, addressing 21st century learners. Therefore, within this context there remains a need to study strategies to engage learners in meaning-making with some element of virtual design. Technology supports the universal design learning framework because it can increase the access to meaningful engagement in learning and reduce barriers. The Handbook of Research on Acquiring 21st Century Literacy Skills Through Game-Based Learning provides theoretical frameworks and empirical research findings in digital technology and multimodal ways of acquiring literacy skills in the 21st century. This book gains a better understanding of how technology can support learner frameworks and highlights research on discovering new

pedagogical boundaries by focusing on ways that the youth learn from digital sources such as video games. Covering topics such as elementary literacy learning, indigenous games, and student-worker training, this book is an essential resource for educators in K-12 and higher education, school administrators, academicians, pre-service teachers, game developers, researchers, and libraries.

Digital Dissidence and Social Media Censorship in Africa - Farooq A. Kperogi 2022-07-27

This book reflects on the rapid rise of social media across the African continent and the legal and extra-legal efforts governments have invented to try to contain it. The relentless growth of social media platforms in Africa has provided the means of resistance, self-expression, and national self-fashioning for the continent's restlessly energetic and contagiously creative youth. This has provided a profound challenge to the

African "gatekeeper state", which has often responded with strategies to constrict and constrain the rhetorical luxuriance of the social media and digital sphere. Drawing on cases from across the continent, contributors explore the form and nature of social media and government censorship, often via antisocial media laws, or less overt tactics such as state cybersurveillance, spyware attacks on social media activists, or the artful deployment of the rhetoric of "fake news" as a smokescreen to muzzle critical voices. The book also reflects on the Chinese influence in African governments' clampdown on social media and the role of Israeli NSO Group Technologies, as well as the tactics and technologies which activists and users are deploying to resist or circumvent social media censorship. Drawing on a range of methodologies and disciplinary approaches, this book will be an important contribution to researchers

with an interest in social media activism, digital rebellion, discursive democracy in transitional societies, censorship on the Internet, and Africa more broadly.

Geographic Information Systems and Crime Analysis -

Fahui Wang 2005-01-01

Computerized crime mapping or GIS in law enforcement agencies has experienced rapid growth, particularly since the mid 1990s. There has also been increasing interests in GIS analysis of crime from various academic fields including criminology, geography, urban planning, information science and others. This book features a diverse array of GIS applications in crime analysis, from general issues such as GIS as a communication process and inter-jurisdictional data sharing to specific applications in tracking serial killers and predicting juvenile violence. Geographic Information Systems and Crime Analysis showcases a broad range of methods and techniques from typical GIS tasks such as geocoding and

hotspot analysis to advanced technologies such as geographic profiling, agent-based modeling and web GIS. Contributors range from university professors, criminologists in research institutes to police chiefs, GIS analysts in police departments and consultants in criminal justice.

Examining the Impact of Industry 4.0 on Academic Libraries - Josiline Phiri Chigwada 2021-01-08

Due to the rapid acceleration of industry 4.0, it is more important than ever to understand the impact of technological revolutions on the academic library. This edited collection showcases the effects on how libraries function, manage processes and continue to deliver products and services on a day to day basis.

Computer-Mediated Communication - Indrakshi Dey 2022-01-07

This book is an anthology of present research trends in Computer-mediated Communications (CMC) from

the point of view of different application scenarios. Four different scenarios are considered: telecommunication networks, smart health, education, and human-computer interaction. The possibilities of interaction introduced by CMC provide a powerful environment for collaborative human-to-human, computer-mediated interaction across the globe.

Quality Management Implementation in Higher Education: Practices, Models, and Case Studies - Sony, Michael 2019-08-02

Although initially utilized in business and industrial environments, quality management systems can be adapted into higher education to assess and improve an institution's standards. These strategies are now playing a vital role in educational areas such as teaching, learning, and institutional-level practices. However, quality management tools and models must be adapted to fit with the culture of higher education. Quality Management Implementation

in Higher Education: Practices, Models, and Case Studies is a pivotal reference source that explores the challenges and solutions of designing quality management models in the current educational culture. Featuring research on topics such as Lean Six Sigma, distance education, and student supervision, this book is ideally designed for school board members, administrators, deans, policymakers, stakeholders, professors, graduate students, education professionals, and researchers seeking current research on the applications and success factors of quality management systems in various facets of higher education.

Journalism and Ethics: Breakthroughs in Research and Practice - Management Association, Information Resources 2019-05-03

In the modern hyperconnected society, consumers are able to access news from a variety of channels, including social media, television, mobile devices, the internet, and

more. From sensationalist headlines designed to attract click-throughs to accusations of bias assigned to specific news sources, it is more important now than ever that the media industry maintains best practices and adheres to ethical reporting. By properly informing citizens of critical national concerns, the media can help to transform society and promote active participation. *Journalism and Ethics: Breakthroughs in Research and Practice* examines the impacts of journalism on society and the media's responsibility to accurately inform citizens of government and non-government activities in an ethical manner. It also provides emerging research on multimedia journalism across various platforms and formats using digital technologies. Highlighting a range of pertinent topics such as investigative journalism, freedom of expression, and media regulation, this publication is an ideal reference source for media

professionals, public relations officers, reporters, news writers, scholars, academicians, researchers, and upper-level students interested in journalism and journalistic ethics.

Are Prisons Obsolete? -

Angela Y. Davis 2011-01-04

With her characteristic brilliance, grace and radical audacity, Angela Y. Davis has put the case for the latest abolition movement in American life: the abolition of the prison. As she quite correctly notes, American life is replete with abolition movements, and when they were engaged in these struggles, their chances of success seemed almost unthinkable. For generations of Americans, the abolition of slavery was sheerest illusion. Similarly, the entrenched system of racial segregation seemed to last forever, and generations lived in the midst of the practice, with few predicting its passage from custom. The brutal, exploitative (dare one say lucrative?) convict-lease system that

succeeded formal slavery reaped millions to southern jurisdictions (and untold miseries for tens of thousands of men, and women). Few predicted its passing from the American penal landscape. Davis expertly argues how social movements transformed these social, political and cultural institutions, and made such practices untenable. In *Are Prisons Obsolete?*, Professor Davis seeks to illustrate that the time for the prison is approaching an end. She argues forthrightly for "decarceration", and argues for the transformation of the society as a whole.

Digital Transformation for Promoting Inclusiveness in Marginalized Communities -

Zhou, Munyaradzi 2022-06-24

One of the realities characterizing the globe is the exclusion of marginalized communities in digital transformation. Their exclusion has resulted in a lack of participation in the digital space, which has catastrophic consequences on the digital economy. To promote digital inclusiveness in marginalized communities, there is a need to deconstruct the illusion that digital transformation is an urban phenomenon. Digital Transformation for Promoting Inclusiveness in Marginalized Communities discusses how digital transformation can be utilized to promote inclusiveness in marginalized communities by exploring opportunities and challenges and determining change mechanisms required to enhance digital transformation in marginalized communities. Covering a range of topics such as augmented reality and remote communities, this

reference work is ideal for government employees, technologists, policymakers, industry professionals, researchers, scholars, academicians, instructors, and students.

Handbook of Research on Advocacy, Promotion, and Public Programming for Memory Institutions -

Ngulube, Patrick 2019-01-11

Memory institutions such as archives, libraries, and museums collect, arrange, describe, and preserve their collections and holdings in order to make them accessible to the community. However, these institutions remain underutilized and are struggling to raise awareness of their existence and attract users and funders. The Handbook of Research on Advocacy, Promotion, and Public Programming for Memory Institutions is a collection of innovative research on emerging strategies such as advocacy, outreach, marketing, and public programming to promote memory institutions

and engage the community. While highlighting topics including customer service solutions, social media, and collection development strategies, this book is ideally designed for heritage management and information professionals, curators, museum management, archival specialists, librarians, policymakers, researchers, and academicians.

Emerging Challenges, Solutions, and Best Practices for Digital Enterprise Transformation -

Sandhu, Kamaljeet 2021-06-18

As organizations continue to move towards digital enterprise, the need for digital transformation continues to grow especially due to the COVID-19 pandemic. These impacts will last far into the future, as newer digital technologies continue to be accepted, used, and developed. These digital tools will forever change the face of business and management. However, on the road to digital enterprise transformation there are many successes, difficulties,

challenges, and failures. Finding solutions for these issues through strategic thinking and identification of the core issues facing the enterprise is of primary concern. This means modernizing management and strategies around the digital workforce and understanding digital business at various levels. These key areas of digitalization and global challenges, such as those during or derived from the pandemic, are new and unique; They require new knowledge gained from a deep understanding of complex issues that have been examined and the solutions being discovered. Emerging Challenges, Solutions, and Best Practices for Digital Enterprise Transformation explores the key challenges being faced as businesses undergo digital transformation. It provides both solutions and best practices for not only handling and solving these key issues, but for becoming successful in digital enterprise. This includes topics such as security and

privacy in technologies, data management, information and communication technologies, and digital marketing, branding, and commerce. This book is ideal for managers, business professionals, government, researchers,

students, practitioners, stakeholders, academicians, and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective.
