[A Wrinkle in Time](#) - Madeleine L'Engle
2019-07-18

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Voyages in World History - Valerie Hansen
2016-01-01

The authors of VOYAGES IN WORLD HISTORY never forget that history is made up of the stories of people. Each chapter of the text centers on a story -- a traveler's account that highlights the book's main theme, the constant movement of people, goods, and ideas. The travelers include merchants, poets, rulers, explorers, soldiers, missionaries, and scholars, and their voyages provide a framework for each chapter that will capture students' interest and draw them into the stories of the people, places, and events crucial to understanding world history. Special features highlight connections across chapters, societies, and periods, helping students understand historical events in a global context. Available in the following split options: VOYAGES IN WORLD HISTORY, Third Edition Complete, Volume 1: To 1600, and Volume 2: Since 1500. The American Yawp - Joseph L. Locke
2019-01-22

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over

the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass*
The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

U.S. History - P. Scott Corbett 2017-12-19
Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Teaching About Evolution and the Nature of Science - National Academy of Sciences 1998-05-06

Today many school students are shielded from one of the most important concepts in modern science: evolution. In engaging and conversational style, *Teaching About Evolution and the Nature of Science* provides a well-structured framework for understanding and teaching evolution. Written for teachers, parents, and community officials as well as scientists and educators, this book describes how evolution reveals both the great diversity and similarity among the Earth's organisms; it explores how scientists approach the question of evolution; and it illustrates the nature of science as a way of knowing about the natural world. In addition, the book provides answers to frequently asked questions to help readers understand many of the issues and misconceptions about evolution. The book includes sample activities for teaching about evolution and the nature of science. For example, the book includes activities that investigate fossil footprints and population

growth that teachers of science can use to introduce principles of evolution. Background information, materials, and step-by-step presentations are provided for each activity. In addition, this volume: Presents the evidence for evolution, including how evolution can be observed today. Explains the nature of science through a variety of examples. Describes how science differs from other human endeavors and why evolution is one of the best avenues for helping students understand this distinction. Answers frequently asked questions about evolution. *Teaching About Evolution and the Nature of Science* builds on the 1996 National Science Education Standards released by the National Research Council and offers detailed guidance on how to evaluate and choose instructional materials that support the standards. Comprehensive and practical, this book brings one of today's educational challenges into focus in a balanced and reasoned discussion. It will be of special interest to teachers of science, school administrators, and interested members of the community.

World History, Culture, and Geography - 1995 This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

Atlanta Compromise - Booker T. Washington 2014-03

The Atlanta Compromise was an address by African-American leader Booker T. Washington on September 18, 1895. Given to a predominantly White audience at the Cotton States and International Exposition in Atlanta, Georgia, the speech has been recognized as one of the most important and influential speeches in American history. The compromise was announced at the Atlanta Exposition Speech. The primary architect of the compromise, on behalf of the African-Americans, was Booker T. Washington, president of the Tuskegee Institute. Supporters of Washington and the Atlanta compromise were termed the "Tuskegee Machine." The agreement was never written down. Essential elements of the agreement were that blacks would not ask for the right to vote, they would not retaliate against racist behavior, they would tolerate segregation and

discrimination, that they would receive free basic education, education would be limited to vocational or industrial training (for instance as teachers or nurses), liberal arts education would be prohibited (for instance, college education in the classics, humanities, art, or literature). After the turn of the 20th century, other black leaders, most notably W. E. B. Du Bois and William Monroe Trotter - (a group Du Bois would call The Talented Tenth), took issue with the compromise, instead believing that African-Americans should engage in a struggle for civil rights. W. E. B. Du Bois coined the term "Atlanta Compromise" to denote the agreement. The term "accommodationism" is also used to denote the essence of the Atlanta compromise. After Washington's death in 1915, supporters of the Atlanta compromise gradually shifted their support to civil rights activism, until the modern Civil rights movement commenced in the 1950s. Booker Taliaferro Washington (April 5, 1856 - November 14, 1915) was an African-American educator, author, orator, and advisor to presidents of the United States. Between 1890 and 1915, Washington was the dominant leader in the African-American community. Washington was of the last generation of black American leaders born into slavery and became the leading voice of the former slaves and their descendants, who were newly oppressed by disfranchisement and the Jim Crow discriminatory laws enacted in the post-Reconstruction Southern states in the late 19th and early 20th centuries. In 1895 his Atlanta compromise called for avoiding confrontation over segregation and instead putting more reliance on long-term educational and economic advancement in the black community.
