The Fountainhead - Ayn Rand 2005-04-26

The revolutionary literary vision that sowed the seeds of Objectivism, Ayn Rand's groundbreaking philosophy, and brought her immediate worldwide acclaim. This modern classic is the story of

intransigent young architect Howard Roark, whose integrity was as unyielding as granite...of Dominique Francon, the exquisitely beautiful woman who loved Roark passionately, but married his worst enemy...and of the fanatic denunciation unleashed by an enraged society against a great creator. As fresh today as it was then, Rand's provocative novel presents one of the most challenging ideas in all of fiction—that man's ego is the fountainhead of human progress... "A writer of great power. She has a subtle and ingenious mind and the capacity of writing brilliantly, beautifully, bitterly...This is the only novel of ideas written by an American woman that I can recall."—The New York Times

Ryan's Woods - Patrick Creevy 2014-11-30

The year is 1962. The family of fourteen-year-old Kevin Collins, caught in white flight, has moved from Beverly, its South Side of Chicago neighborhood, to the city's northern suburbs. The field of Kevin's most

formative boyhood adventures was Ryan's Woods, the great South Side forest preserve, mysterious, beautiful, running along the city's western edge a full mile from 83rd Street to 91st. It now serves as the frame for his memories.

Memories of a villain enemy, of games hard-fought as wars, of moments of fear or courage, of moments that transcend racial division, and of first love in all the pure strength of its innocence. Memories, still fresh, of best friendships that Kevin now feels will be forever unrecoverable. And memories especially of his greatest friend, Jackie Leonard, whose death at age thirteen has moved Kevin to turn memory into story.

The Space Within - Patrick F. Cannon 2016-03-15

For the first time, the interiors of some of the Chicago area's greatest buildings, designed by celebrated architects, are brought together and featured in truly stunning original photographs. These Chicago-area homes, religious spaces, and commercial and public structures give visual meaning to Frank Lloyd Wright's belief that "the space within becomes the reality of the building." Text by author Patrick F. Cannon, who has lived and worked in Chicago and its suburbs for more than sixty years, discusses each building's architecture, architect, and place in history. James Caulfield, a noted architectural photographer, leads a visual tour into both the intimate and grand interiors of the Chicago area's finest buildings. Now the

duo's fifth book, *The Space Within* demonstrates that good design comes in many styles. While many of these architectural masterpieces are open to the public, others particularly the private homes can only be seen here.

[A Gift of Angels](#) - Bernard L. Fontana 2010-09-20

It rises suddenly out of the Sonoran Desert landscape, towering over the tallest tree or cactus, a commanding building with a sensuous dome, elliptical vaults, and sturdy bell towers. There is nothing else like it around, nor does it seem there should be. This incongruity of setting is what strikes first-time visitors to Mission San Xavier del Bac. This great church is of another place and another time, while its beauty is universal and timeless. Mission San Xavier del Bac is a two-century-old Spanish church in southern Arizona located just a few miles

from downtown Tucson, a metropolis of more than half a million people in the American Southwest. A National Historic Landmark since 1963, the mission's graceful baroque art and architecture have drawn visitors from all over the world. Now Bernard Fontana—the leading expert on San Xavier—and award-winning photographer Edward McCain team up to bring us a comprehensive view of the mission as we've never seen it before. With 200 stunning full-color photographs and incisive text illuminating the religious, historical, and motivational context of these images, *A Gift of Angels* is a must-have for tourists, scholars, and other visitors to San Xavier. From its glorious architecture all the way down to the finest details of its art, Mission San Xavier del Bac is indeed a gift of angels.

Chicago Architecture and Design (3rd edition) - Jay

Pridmore 2018-09-18

The birthplace of the skyscraper, Chicago is famous for an architectural tradition that has influenced building around the globe. It is the cradle of modern architecture. It gave rise to the urban office building and to the flowing, open floor plans of today's homes. Chicago Architecture and Design chronicles the city's architecture from the 19th through the early 21st century: from the structural simplicity of Chicago School commercial building to the low-slung Prairie School house, from the streamlined Art Deco skyscraper to the minimalist Miesian tower of glass and steel, and all the way through to the strikingly original, diverse designs of the present day's second modern period. It examines the evolution of modern architecture in the context of broader historical, social, technological, and artistic currents and explores innovations that pushed buildings ever higher. This

third edition adds 10 new buildings from the last decade, including Renzo Piano's Modern Wing of the Art Institute, John Ronan's Poetry Foundation, and Helmut Jahn's Mansueto Library at the University of Chicago.

Intralingual Translation of British Novels - Linda Pillière 2021-04-22

Building on an upsurge of interest in the Americanisation of British novels triggered by the Harry Potter series, this book explores the various ways that British novels, from children's fiction to travelogues and Book Prize winners, have been adapted and rewritten for the US market. Drawing on a vast corpus of over 80 works and integrating the latest research in multimodality and stylistics, Linda Pillière analyses the modifications introduced to make British English texts more culturally acceptable and accessible to

the American English reader. From paratextual differences in cover, illustrations, typeface and footnotes to dialectal changes to lexis, tense, syntax and punctuation, Pillière explores the sociocultural and ideological pressures involved in intralingual translation and shows how the stylistic effects of such changes - including loss of meaning, voice, rhythm and word play - often result in a more muted American edition. In doing so, she reveals how homing in on numerous small adjustments can provide fascinating insights into the American publishing process and readership.

Phrasal and Clausal Architecture - Simin Karimi
2007

The present collection includes papers that address a wide range of syntactic phenomena. In some, the authors discuss such major syntactic properties as clausal architecture, syntactic labels and derivation, and the nature of features and their role with respect to movement, agreement, and event-related constructions. In addition, several papers offer

syntax-based discussions of aspects of acquisition, pedagogy, and neurolinguistics, addressing issues related to case marking, negation, thematic relations, and more. Several papers report on new findings relevant to less commonly investigated languages, and all provide valuable observations related to natural language syntactic properties, many of which are universal in their implications. The authors challenge several aspects of recent syntactic theory, broaden the applicable scope of others, and introduce important and provocative analyses that bear on current issues in linguistics.

Sears Tower - Jay Pridmore 2002

The Nation's Largest Retailer wanted the largest headquarters in the nation, and they got it -- in spades. Designed by Skidmore, Owings & Merrill (SOM), the 110-story, anodized aluminum-clad Sears Tower occupies three acres in the West Loop. The bundled-tube construction allowed for more windows and more corner offices per square foot. The total area within the Tower is 4.4 million square feet; the Sky Deck on the 103rd floor offers tremendous views and welcomes more than 1 million visitors yearly. When SOM realized that their design was only ten stories short of what

was supposed to be the record-breaking height of the World Trade Center then under construction (1,368 feet), they broke the record, coming in at 1,454 feet. The move of Sears and Roebuck employees into the Tower was the biggest corporate move in American history. In the late 1980s Sears

and Roebuck left the building, but it continues to thrive, a timeless monument to American ingenuity.
