- Barbara Pease 2004-01-13

Do you know the top seven things men do that drive women nuts? Or the real reason women cry more than men do? What are men really looking for in a woman—both at first sight and for the long-term? These are only the starting points for Barbara and Allan Pease as they discuss the very real—and often very funny—differences between the sexes. Why Men Don't Have a Clue and Women Always Need More Shoes takes a look at some of the issues that have confused men and women for centuries.

Using new findings on the brain, studies of social changes, evolutionary biology, and psychology, the Peases teach you how to make the most of your relationships—or at least begin to understand where your partner is coming from. They help women understand why men avoid commitment, what drives them to lie, and how to decode male speech to find out what they are really saying. They explain to men why women nag, how they use emotional blackmail, and how to understand (and take advantage of!) the top-secret scoring system all women apply. They also dish about the top turn-ons--and turn-offs--for both sexes. Pain and Prejudice - Gabrielle Jackson 2021-03-08

"[A] powerful account of the sexism cooked into medical care ... will motivate readers to advocate for themselves."—Publishers Weekly
STARRED Review A groundbreaking and feminist work of investigative reporting: Explains why women experience healthcare differently than men Shares the author's journey of fighting for an endometriosis diagnosis In Pain and Prejudice, acclaimed investigative reporter Gabrielle Jackson takes readers behind the scenes of doctor's offices, pharmaceutical companies, and research labs to show that—at nearly every level of healthcare—men's health claims are treated as default, whereas women's are often viewed as atypical, exaggerated, and even completely fabricated. The impacts of this bias? Women are losing time,

money, and their lives trying to navigate a healthcare system designed for men. Almost all medical research today is performed on men or male mice, making most treatments tailored to male bodies only. Even conditions that are overwhelmingly more common in women, such as chronic pain, are researched on mostly male bodies. Doctors and researchers who do specialize in women's healthcare are penalized financially, as procedures performed on men pay higher. Meanwhile, women are reporting feeling ignored and dismissed at their doctor's offices on a regular basis. Jackson interweaves these and more stunning revelations in the book with her own story of suffering from endometriosis, a condition that affects up to 20% of American women but is poorly understood and frequently misdiagnosed. She also includes an up-to-the-minute epilogue on the ways that Covid-19 are impacting women in different and sometimes more long-lasting ways than men. A rich combination of journalism and personal narrative, Pain and Prejudice reveals a dangerously flawed system and offers solutions for a safer, more equitable future.

WHY MEN DON'T LISTEN AND WOMEN CAN'T READ MAPS - Allan Pease 2013-12

That's What She Said - Joanne Lipman 2018-01-30

Going beyond the message of Lean In and The Confidence Code, Gannett's Chief Content Officer contends that to achieve parity in the office, women don't have to change—men do—and in this inclusive and realistic handbook, offers solutions to help professionals solve gender gap issues and achieve parity at work. Companies with more women in senior leadership perform better by virtually every financial measure, and women employees help boost creativity and can temper risky behavior—such as the financial gambles behind the 2008 economic collapse. Yet in the United States, ninety-five percent of Fortune 500 chief executives are men, and women hold only seventeen percent of seats on corporate boards. More men are reaching across the gender

divide, genuinely trying to reinvent the culture and transform the way we work together. Despite these good intentions, fumbles, missteps, frustration, and misunderstanding continue to inflict real and lasting damage on women's careers. What can the Enron scandal teach us about the way men and women communicate professionally? How does brain circuitry help explain men's fear of women's emotions at work? Why did Kimberly Clark blindly have an all-male team of executives in charge of their Kotex tampon line? In *That's What She Said*, veteran media executive Joanne Lipman raises these intriguing questions and more to find workable solutions that individual managers, organizations, and policy makers can employ to make work more equitable and rewarding for all professionals. Filled with illuminating anecdotes, data from the most recent relevant studies, and stories from Lipman's own journey to the top of a male-dominated industry, *That's What She Said* is a book about success that persuasively shows why empowering women as true equals is an essential goal for us all—and offers a roadmap for getting there.

You're Not Listening - Kate Murphy 2020-01-07

When was the last time you listened to someone, or someone really listened to you? "If you're like most people, you don't listen as often or as well as you'd like. There's no one better qualified than a talented journalist to introduce you to the right mindset and skillset—and this book does it with science and humor." -Adam Grant, #1 New York Times

bestselling author of *Originals* and *Give and Take* **Hand picked by Malcolm Gladwell, Adam Grant, Susan Cain, and Daniel Pink for Next Big Ideas Club** "An essential book for our times." -Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone* At work, we're taught to lead the conversation. On social media, we shape our personal narratives. At parties, we talk over one another. So do our politicians. We're not listening. And no one is listening to us. Despite living in a world where technology allows constant digital communication and opportunities to connect, it seems no one is really listening or even knows how. And it's making us lonelier, more isolated, and less tolerant than ever before. A listener by trade, New York Times contributor Kate Murphy wanted to know how we got here. In this always illuminating and often humorous deep dive, Murphy explains why we're not listening, what it's doing to us, and how we can reverse the trend. She makes accessible the psychology, neuroscience, and sociology of listening while also introducing us to some of the best listeners out there (including a CIA agent, focus group moderator, bartender, radio producer, and top furniture salesman). Equal parts cultural observation, scientific exploration, and rousing call to action that's full of practical advice, *You're Not Listening* is to listening what Susan Cain's *Quiet* was to introversion. It's time to stop talking and start listening.

You Just Don't Understand - Deborah Tannen 2013-04-23

This is the book that brought gender differences in ways of speaking to the forefront of public awareness. With a rare combination of scientific insight and delightful, humorous writing, Tannen shows why women and men can walk away from the same conversation with completely different impressions of what was said. Studded with lively and

entertaining examples of real conversations, this book gives you the tools to understand what went wrong -- and to find a common language in which to strengthen relationships at work and at home. A classic in the field of interpersonal relations, this book will change forever the way you approach conversations.

The Man Who Hated Women - Amy Sohn 2021-07-06

Smithsonian Magazine, 10 Best History Books of 2021 • "Fascinating . . . Purity is in the mind of the beholder, but beware the man who vows to protect yours." —Margaret Talbot, The New Yorker Anthony Comstock, special agent to the U.S. Post Office, was one of the most important men in the lives of nineteenth-century women. His eponymous law, passed in 1873, penalized the mailing of contraception and obscenity with long sentences and steep fines. The word Comstockery came to connote repression and prudery. Between 1873 and Comstock's death in 1915, eight remarkable women were charged with violating state and federal Comstock laws. These "sex radicals" supported contraception, sexual education, gender equality, and women's right to pleasure. They took on the fearsome censor in explicit, personal writing, seeking to redefine work, family, marriage, and love for a bold new era. In *The Man Who Hated Women*, Amy Sohn tells the overlooked story of their valiant attempts to fight Comstock in court and in the press. They were publishers, writers, and doctors, and they included the first woman presidential candidate, Victoria C. Woodhull; the virgin sexologist Ida C. Craddock; and the anarchist Emma Goldman. In their willingness to oppose a monomaniac who viewed reproductive rights as a threat to the American family, the sex radicals paved the way for second-wave feminism. Risking imprisonment and death, they redefined birth control access as a civil liberty. *The Man Who Hated Women* brings these

women's stories to vivid life, recounting their personal and romantic travails alongside their political battles. Without them, there would be no Pill, no Planned Parenthood, no *Roe v. Wade*. This is the forgotten history of the women who waged war to control their bodies.

The Authority Gap - Mary Ann Sieghart 2021-07-01

A WATERSTONES 'BEST POLITICAL BOOK OF THE YEAR' *A TIMES 'BEST PHILOSOPHY AND IDEAS' BOOK OF 2021* *A GUARDIAN 'BEST POLITICS BOOKS OF THE YEAR'* 'A brilliant manifesto explaining why women are still so underestimated and overlooked in today's world, but how we can also be hopeful for change' - Philippa Perry 'An impassioned, meticulously argued and optimistic call to arms for anyone who cares about creating a fairer society' - Observer _____ Imagine living in a world in which you were routinely patronised by women. Imagine having your views ignored or your expertise frequently challenged by them. Imagine people always addressing the woman you are with before you. Now imagine a world in which the reverse of this is true. The Authority Gap provides a startling perspective on the unseen bias at work in our everyday lives, to reveal the scale of the gap that still persists between men and women. Would you believe that US Supreme Court Justices are interrupted four times more often than male ones... 96% of the time by men? Or that British parents, when asked to estimate their child's IQ will

place their son at 115 and their daughter at 107? Marshalling a wealth of data with precision and insight, and including interviews with pioneering women such as Baroness Hale, Mary Beard and Bernadine Evaristo, Mary Ann exposes unconscious bias in this fresh feminist take on how to address and counteract systemic sexism in ways that benefit us all. Includes interviews with pioneering women such as: Baroness Hale Mary Beard Bernadine Evaristo Mary McAleese Julia Gillard Dolly Alderton and Pandora Sykes Cherie Blair Liz Truss Amber Rudd Frances Morris Laura Bates _____ 'Hugely exciting' - Emily Maitlis 'Deeply researched, profoundly thoughtful and a book very much for the here and now: Mary Ann Sieghart's *The Authority Gap* is the book she was probably born to write' - Andrew Marr 'At last here is a credible roadmap that is capable of taking women from the margins to the centre by bridging the authority gap that holds back even the best and most talented of women.' - Mary McAleese, Former President of Ireland

Ask Me About My Uterus - Abby Norman 2018-03-06

For any woman who has experienced illness, chronic pain, or endometriosis comes an inspiring memoir advocating for recognition of women's health issues In the fall of 2010, Abby Norman's strong dancer's body dropped forty pounds and gray hairs began to sprout from her temples. She was repeatedly hospitalized in excruciating pain, but the doctors insisted it was a urinary tract infection and sent her home with antibiotics. Unable to get out of bed, much less attend class, Norman dropped out of college and embarked on what would become a years-long journey to discover what was wrong with her. It wasn't until she took matters into her own hands--securing a job in a hospital and educating herself over lunchtime reading in the medical library--that she found an accurate diagnosis of endometriosis. In *Ask Me About My Uterus*, Norman describes what it was like to have her pain dismissed, to be told it was all in her head, only to be taken seriously when she was accompanied by a boyfriend who confirmed that her sexual performance was, indeed, compromised. Putting her own trials into a broader historical, sociocultural, and political context, Norman shows that women's bodies have long been the battleground of a never-ending war

for power, control, medical knowledge, and truth. It's time to refute the belief that being a woman is a preexisting condition.

Men Don't Listen - Wayne L. Misner 2000-03

Men do listen! They don't feel! As they grow up an anesthetizing of feelings takes place. They're suppressing not only negative emotions, but also the positive emotions. The Author uses extensive lists to get the readers ideas flowing. Within each chapter are jokes and popular quotations from a wide variety of sources to add a little punch. Some are humorous and others profound. "Marriage, which makes two one, is a lifelong struggle to discover which is that one." Dozens of case studies demonstrating where things went wrong and how they could erode your relationship.

Summary of Allan Pease & Barbara Pease's Why Men Don't Listen and Women Can't Read Maps - Everest Media, 2022-05-07T22:59:00Z

Please note: This is a companion version & not the original book. Sample Book Insights: #1 Men use toilets as social lounges and therapy rooms. Women use toilets as strangers, and can come out best friends and lifelong buddies. Men are amazed how a woman can't see a red flashing oil light on the car dashboard, but can spot a dirty sock in a dark corner 50 metres away. #2 Men and women have evolved differently because they had to. Men hunted, while women gathered. Men protected, while women nurtured. As a result, their bodies and brains evolved in different ways. #3 The way our brains are wired and the hormones pulsing through our bodies are the two factors that largely dictate how we will think and behave. Our instincts are simply our genes determining how our bodies will behave in given circumstances. #4 The study of how the

brain works now gives us many answers. Men and women are not identical, and they should be equal in terms of their opportunities to exercise their full potential, but they are definitely not identical in their innate abilities.

The Likeability Trap - Alicia Menendez 2019-11-05

Be nice, but not too nice. Be successful, but not too successful. Just be likeable. Whatever that means? Women are stuck in an impossible bind. At work, strong women are criticized for being cold, and warm women are seen as pushovers. An award-winning journalist examines this fundamental paradox and empowers readers to let go of old rules and reimagine leadership rather than reinventing themselves. Consider that even competent women must appear likeable to successfully negotiate a salary, ask for a promotion, or take credit for a job well done—and that studies show these actions usually make them less likeable. And this minefield is doubly loaded when likeability intersects with race, ethnicity, sexual orientation, and parental status. Relying on extensive research and interviews, and carefully examined personal experience, *The Likeability Trap* delivers an essential examination of the pressure put on women to be amiable at work, home, and in the public sphere, and explores the price women pay for internalizing those demands. Rather than advising readers to make themselves likeable, Menendez empowers them to examine how they perceive themselves and others and explores how the concept of likeability is riddled with cultural biases. Our demands for likeability, she argues, hinder everyone's progress and power. Inspiring, thoughtful and often funny, *The Likeability Trap* proposes surprising, practical solutions for confronting the cultural patterns holding us back, encourages us to value unique talents and styles instead of muting them, and to remember that while likeability is part of the game, it will not break you.

Men to Avoid in Art and Life - Nicole Tersigni 2020-08-11

Men to Avoid in Art and Life pairs classical fine art with modern captions that epitomize the spirit of mansplaining. This hilarious book perfectly captures those relatable moments when a man explains to a woman a subject about which he knows considerably less than she does. Situations include men sharing keen insight on the female anatomy, an eloquent defense of catcalling, or offering sage advice about horseback riding to

the woman who owns the horse. • These less qualified men of antiquity dish out mediocrity as if it's pure genius • For the women who have endured overbearing men over the centuries • Written with hilariously painful accuracy "Now, when you're riding a horse, you need to make sure to keep a good grip on the reins." "These are my horses." Through cringe-induced empathy, this timeless gift book of shared experiences unites women across history in one of the most powerful forms of resistance: laughter. • Started as a Twitter thread and quickly gained widespread popularity. • Makes a perfect book for women and feminists with a wry sense of humor, millennials, anyone who loves memes and Internet humor, as well as history and art buffs. • You'll love this book if you love books like Men Explain Things to Me by Rebecca Solnit, Milk and Vine: Inspirational Quotes from Classic Vines by Emily Beck, and Awards For Good Boys: Tales Of Dating, Double Standards, And Doom by Shelby Lorman.

Power of a Woman - Robert Fripp 2007-03-15

Description: The feminine spirit soars in Power of a Woman as Eleanor of Aquitaine, toughest of medieval women, relates her memoirs: of caring and loyalties, triumphs and trials; of her marriages to two warring kings, Louis VII of France, then Henry II of England. She speaks intimately, emotionally of her too many quarreling sons, including Richard the Lionheart and John, of Magna Carta fame. A patron of troubadours, Eleanor commissions poetry as propaganda. She regales her readers with intrigues, crusades and tales of ruthless diplomacy against barons, kings, popes and Thomas Becket, while confessing her loves, her hopes for her many children, and their fates. In midlife her sense of community leads her to set up her Court of Ladies to balance male-dominated worlds of Church and state. Her mission: to empower women with the Grace she enjoyed as the femme fatale of her day. Eleanor's power of a woman lets her pluck triumph from her defeats as well as her victories. Reviews: Those of you who know me know that for me to give a work of historical fiction a high rating, it has to offer something extraordinary. This Robert Fripp has done in Power of a Woman. In this highly unusual fictional autobiography, Mr. Fripp tells Eleanor of Aquitaine's story in her own

words, as if she is dictating to a young lady in her household. At eighty-one, she hasn't much time. We feel her urgency, the chill in her bones. Impeccable research and storytelling combine to make this a must for all who want to know more about this fascinating woman. Her definition of love survives to this day! What a great read. This is so gripping. I got so totally caught up in this story one night that I woke up with images of Eleanor in my mind, and Kate Hepburn's voice in my ear. I love this tale. -Veronica Prior, Round Rock, TX Power of a Woman is gripping in its wealth of detail. It makes me feel like I am in the midst of the action. Of all books I have read, this is the only one that makes me experience what it must have felt like to have lived through those troublesome, exciting times. Such a wonderful, exciting book! -Lady Shirley Cassidy, Dublin, Ireland Author Bio: British-born Robert Fripp gained a medieval outlook from five years on a choral scholarship in the choir of Salisbury Cathedral, the model for Lord of the Flies. He went on to study earth sciences before producing current affairs television for CBC in Toronto. The Well of Ascension - Brandon Sanderson 2010-04-01

From #1 New York Times bestselling author Brandon Sanderson, the Mistborn series is a heist story of political intrigue and magical, martial-arts action. The impossible has been accomplished. The Lord Ruler -- the man who claimed to be god incarnate and brutally ruled the world for a thousand years -- has been vanquished. But Kelsier, the hero who

masterminded that triumph, is dead too, and now the awesome task of building a new world has been left to his young protégé, Vin, the former street urchin who is now the most powerful Mistborn in the land, and to the idealistic young nobleman she loves. As Kelsier's protégé and slayer of the Lord Ruler she is now venerated by a budding new religion, a distinction that makes her intensely uncomfortable. Even more worrying, the mists have begun behaving strangely since the Lord Ruler died, and seem to harbor a strange vaporous entity that haunts her. Stopping assassins may keep Vin's Mistborn skills sharp, but it's the least of her problems. Luthadel, the largest city of the former empire, doesn't run itself, and Vin and the other members of Kelsier's crew, who lead the revolution, must learn a whole new set of practical and political skills to help. It certainly won't get easier with three armies - one of them composed of ferocious giants - now vying to conquer the city, and no sign of the Lord Ruler's hidden cache of atium, the rarest and most powerful allomantic metal. As the siege of Luthadel tightens, an ancient legend seems to offer a glimmer of hope. But even if it really exists, no one knows where to find the Well of Ascension or what manner of power it bestows. Women Don't Ask - Linda Babcock 2021-01-05

The groundbreaking classic that explores how women can and should negotiate for parity in their workplaces, homes, and beyond When Linda Babcock wanted to know why male graduate students were teaching their own courses while female students were always assigned as assistants, her dean said: "More men ask. The women just don't ask." Drawing on psychology, sociology, economics, and organizational behavior as well as dozens of interviews with men and women in different fields and at all stages in their careers, *Women Don't Ask* explores how our institutions, child-rearing practices, and implicit assumptions discourage women from asking for the opportunities and resources that they have earned and deserve—perpetuating inequalities that are fundamentally unfair and economically unsound. *Women Don't Ask* tells women how to ask, and why they should.

Gender Intelligence - Barbara Annis 2014-05-13

World-renowned experts on gender intelligence Barbara Annis and Keith Merron suggest it's time to move beyond arguments based on politics and fairness, building an economic business case for gender diversity in the workplace. Despite forty years of laws, quotas, diversity training, and legal expenses aimed toward equalizing pay, opportunities, and working conditions between the sexes, the glass ceiling remains firmly intact. For too long, companies have played the "numbers game"—attempting to tackle gender imbalance by forcing affirmative action policies and

numeric standards on organizations to increase the representation of women in management. Yet, these efforts have rarely been sustained. In this groundbreaking comprehensive analysis, based on more than twenty-five years of in-depth surveys involving 100,000 men and women across dozens of Fortune 500 companies, Barbara Annis and Keith Merron provide a deeper understanding of the multiplicity of forces that have combined to create and perpetuate gender inequality. *Gender Intelligence* exposes common false assumptions that prevent men and women from successfully performing together at work—myths exacerbated by worn-out theories of gender blindness and sameness thinking. It shows how a small but growing number of courageous, leading-edge companies have broken through the barriers to successfully advance women, making the remarkable transformation from compliance to choice—from pressure to preference—and show how it can be done in any business. *Gender Intelligence* features 17 illustrations.

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions.
