Sustainable Water Resources in the Built Environment - Marilyn Waite 2010-04-29

Sustainable Water Resources in the Built Environment covers elements of water engineering and policy making in the sustainable construction of buildings with a focus on case studies from Panama and Kenya. It provides comprehensive information based on case studies, experimental data, interviews, and in-depth research. The book focuses on the water aspects of sustainable construction in less economically developed environments. It covers the importance of sustainable construction in developing country contexts with particular reference to what is meant by the water and wastewater aspects of sustainable buildings, the layout, climate, and culture of sites, the water quality tests performed and results obtained, the design of rainwater harvesting systems and policy considerations. The book is a useful resource for practitioners in the field working on the water aspects of sustainable construction (international aid agencies, engineering firms working in developing contexts, intergovernmental organizations and NGOs). It is also useful as a text for water and sanitation practices in developing countries. Visit the IWA WaterWiki to read and share material related to this title:

Improving Water, Sanitation, and Hygiene in Schools - Kevin Tayler 2020-04-01

Good water, sanitation, and hygiene (WASH) services protect health and the environment. Such services are particularly important in schools to instill lifelong proper hygiene habits in children and provide them access to the requisite facilities. Many schools in Mongolia face significant challenges in improving WASH due to physical and demographic conditions. The country's harsh winters require sustainable WASH facilities that can withstand extended periods of below-freezing temperatures. This publication provides essential information for national and local administrators, engineers, field practitioners, and policy makers to plan, implement, and manage improved WASH in schools, particularly in small and isolated rural settlements. It covers WASH standards and norms, design and technology options, operation and maintenance, hygiene education approaches, and cost estimation.

Principles of Real Estate Practice in North Carolina: 2nd Edition Update - Stephen Mettling 2020-02

Principles of Real Estate Practice in North Carolina contains the essentials of the national and North Carolina real estate law, principles, and practices necessary for basic competence as a real estate professional and as mandated by North Carolina license law. Water for Life - James L. Wescoat, Jr 2003-10-16

Successful water management is crucial for the proper operation of natural environmental systems and for the support of human society. These two aspects are interdependent, but decisions about one are often made without regard to effects upon the other. A persistent challenge is to consider them together. This book fully analyzes the relationship between water management, environmental conditions and public policy. It combines a careful review of the character and evolution of water management and evaluates management from the standpoint of the quality of the natural environment. Topics covered include domestic and industrial water supply and waste disposal, groundwater use, river channel and floodplain management, and integrated river basins. The processes of social decision-making are examined against a backdrop of plant-soil-water-ecosystem relationships and ecosystem change. Examples are drawn from around the world, from local watershed management to international river basin planning, with emphasis on integrative approaches.

Sanitation for Primary Schools in Africa - R. A. Reed 2008

Produced as part of WEDC's contribution to the International Year of Sanitation 2008, this book provides easy-to-use tools for assessing sanitation, water supply and hygiene facilities in primary schools in Africa so that appropriate decisions can be made about sanitation improvements. It also presents guidelines for rehabilitating or decommissioning existing latrines; for choosing the right type of latrine where new facilities are required; for siting latrines appropriately within a school compound; and for the operation and maintenance of these facilities. A number of low-cost toilet designs suitable for many rural and peri-rural locations in Africa are also included. Written in a readable style and copiously illustrated, the book has been designed primarily for school managers and headteachers but it will also be of interest to planners, architects and engineers.

Water and Sanitation in the World's Cities - United Nations Human Settlements Programme 2003

This is surely the most impressive and important publication to come out of the UN system for many years. Peter Adamson, founder, New Internationalist, and author and researcher of UNICEF's The State of the World's Children from 1980 to 1995. The world's governments agreed at the Millennium Summit to halve, by 2015, the number of people who lack access to safe water. With rapidly growing urban populations the challenge is immense. Water and Sanitation in the World's Cities is a comprehensive and authoritative assessment of the problems and how they can be addressed. This influential publication b. *Food Distribution Facilities for Memphis, Tennessee, 1976-2000* - Lydia Ray Balderston 1979

The United Nations world water development report 2015: water for a sustainable world - Connor, Richard 2015-03-23

The United Nations World Water Assessment Programme (WWAP) is hosted and led by UNESCO. WWAP brings together the work of 31 UN-Water Members as well as 37 Partners to publish the United Nations World Water Development Report (WWDR) series. Under the theme Water for Sustainable Development, the WWDR 2015 has been prepared as a contribution from UN-Water to the discussions surrounding the post-2015 framework for global sustainable development. Highlighting water's unique and often complex role in achieving various sustainable development objectives, the WWDR 2015 is addressed to policy- and decision-makers inside and outside the water community, as well as to anyone with an interest in freshwater and its many life-giving benefits. The report sets an aspirational yet achievable vision for the future of water towards 2050 by describing how water supports healthy and prosperous human communities, maintains well functioning ecosystems and ecological services, and provides a cornerstone for short and long-term economic development. It provides an overview of the challenges, issues and trends in terms of water resources, their use and water-related services like water supply and sanitation. The report also offers, in a rigorous yet accessible manner, guidance about how to address these challenges and to seize the opportunities that sound water management provides in order to achieve and maintain economic, social and environmental sustainability.

Management of Laboratory Animal Care and Use Programs - Mark A. Suckow 2001-11-28

The management of biomedical research using animals has become increasingly complex due to new technology, increased regulatory oversight, and recognition of the need for animals free of disease and distress. Within this changing environment, individuals charged with the management of laboratory animal facilities have a substantial responsibility to the institution, the public, and the animals. Management of Laboratory Animals Care and Use Programs provides both factual and theoretical information drawn from the substantial experience of authors who are noted experts in the field. This book will provide individuals with the basic knowledge and information necessary to meet typical professional challenges. A co-publication with the American Association for Laboratory Animal Science, this valuable book serves as the text for the Certified Manager Animal Resources (CMAR) exam.

Industrial Uses of Agricultural Products - United States. Congress. Senate. Agriculture and Forestry Committee 1956

Water and Human Health - Frederick Eugene McJunkin 1983

All Hands On Deck - Emmanuel Skoufias 2019-07-15

In Sub-Saharan Africa, the scale of undernutrition is staggering; 58 million children under the age of five are too short for their age (stunted), and 14 million weigh too little for their height (wasted). Poor diets in terms of diversity, quality, and quantity, combined with illness and poor water and sanitation facilities, are linked with deficiencies of micronutrients—such as iodine, vitamin A, and iron—associated with growth, development, and immune function. In the short term, inequities in access to the determinants of nutrition increase the incidence of undernutrition and diarrheal disease. In the long term, the chronic undernutrition of children has important consequences for individuals and societies: a high risk of stunting, impaired cognitive development, lower school attendance rates, reduced human capital attainment, and a higher risk of chronic disease and health problems in adulthood. Inequities in access to services early in life contribute to the intergenerational transmission of poverty. Recent World Bank estimates suggest that the income penalty a country incurs for not having eliminated stunting when today's workers were children is about 9%–10 percent of gross domestic product per capita in Sub-Saharan Africa. Much of the effort to date has focused on the costing, financing, and impact of nutrition-specific interventions delivered mainly through the health sector to reach the global nutrition targets for stunting, anemia, and breastfeeding, and interventions for treating wasting. However, the determinants of undernutrition are multisectoral, and the solution to undernutrition requires multisectoral approaches. An acceleration of the progress to reduce stunting in Sub-Saharan Africa requires engaging additional sectors—such as agriculture; education; social protection; and water, sanitation, and hygiene (WASH)—to improve nutrition. This book lays the groundwork for more effective multisectoral action by analyzing and generating empirical evidence to inform the joint targeting of nutrition-sensitive interventions. Using information from 33 recent Demographic and Health Surveys (DHS), measures are constructed to capture a child's access to food security, care practices, health care, and WASH, to identify gaps in access among different socioeconomic groups; and to relate access to these nutrition drivers to nutrition outcomes. All Hands on Deck: Reducing Stunting through Multisectoral Efforts in Sub-Saharan Africa addresses three main questions: • Do children have inadequate access to the underlying determinants of nutrition? • What is the association between

stunting and inadequate food, care practices, health, and WASH access? • Can the sectors that have the greatest impact on stunting be identified? This book provides country authorities with a holistic picture of the gaps in access to the drivers of nutrition within countries to assist them in the formulation of a more informed, evidence-based, and balanced multisectoral strategy against undernutrition.

Principles of Real Estate Practice in Mississippi - Stephen Mettling 2019-05-29

Features of Principles of Real Estate Practice in Mississippi: Principles of Real Estate Practice in Mississippi contains the essentials of the national and Mississippi real estate law, principles, and practices necessary for basic competence as a real estate professional and as mandated by Mississippi license law. Water, Sanitation, Hygiene, and Nutrition in Bangladesh - Iffat Mahmud 2015-11-10

Since the 1960s, it has been known that poor water and sanitation causes diarrhea, which consequently compromises child growth and leads to undernutrition. Ample evidence shows that poor water and sanitation causes diarrhea, but there is a growing body of knowledge discussing the magnitude of the impact of diarrhea on undernutrition. A recent hypothesis by Humphrey (2009), for example, states that the predominant impact of contaminated water and poor sanitation on undernutrition is via tropical/environmental enteropathy (triggered by exposure to fecal matter) rather than mediated by diarrhea. This new hypothesis has generated much debate, especially in the South Asia region, on the contribution of water and sanitation to the South Asian Nutrition Enigma. The region is characterized by unusually high rates of child undernutrition relative to its income level, as well as a slow reduction in undernutrition. Practitioners have struggled to decipher the reasons behind this 'anomaly.' This report provides a systematic review of the evidence to date, both published and grey literature, on the relationship between water and sanitation and nutrition. We also survey the potential impact of improved water, sanitation, and hygiene (WASH) on undernutrition. This is the first report that undertakes a thorough review and discussion of WASH and nutrition in Bangladesh. The report is meant to serve two purposes. First, it synthesizes the results/evidence evolving on the pathway of WASH and undernutrition for use by practitioners working in the nutrition and water and sanitation sectors to stimulate technical discussions and effective collaboration among stakeholders. Second, this report serves as an advocacy tool, primarily for policy makers, to assist them in formulating a multisectoral approach to tackling the undernutrition problem.

Water and Sanitation in the World's Cities - Un-Habitat 2013-06-17

'This is surely the most impressive and important publication to come out of the UN system for many years.' Peter Adamson, founder, New Internationalist, and author and researcher of UNICEF's The State of the World's Children from 1980 to 1995 The world's governments agreed at the Millennium Summit to halve, by 2015, the number of people who lack access to safe water. With rapidly growing urban populations the challenge is immense. Water and Sanitation in the World's Cities is a comprehensive and authoritative

assessment of the problems and how they can be addressed. This influential publication by the United Nations Human Settlements Programme (UN-HABITAT) sets out in detail the scale of inadequate provision of water and sanitation. It describes the impacts on health and economic performance, showing the potential gains of remedial action; it analyses the proximate and underlying causes of poor provision and identifies information gaps affecting resource allocation; it outlines the consequences of further deterioration; and it explains how resources and institutional capacities - public, private and community - can be used to deliver proper services through integrated water resource management.

Water, Sanitation and Hygiene Standards for Schools in Low-cost Settings - Jamie Bartram 2009

"Diseases related to inadequate water, sanitation and hygiene are a huge burden in developing countries. It is estimated that 88% of diarrhoeal disease is caused by unsafe water supply, and inadequate sanitation and hygiene (WHO, 2004c). Many schools serve communities that have a high prevalence of diseases related to inadequate water supply, sanitation and hygiene, and where child malnutrition and other underlying health problems are common. Schools, particularly those in rural areas, often completely lack drinking-water and sanitation and handwashing facilities; alternatively, where such facilities do exist they are often inadequate in both quality and quantity. Schools with poor water, sanitation and hygiene conditions, and intense levels of person-to-person contact, are high-risk environments for children and staff, and exacerbate children's particular susceptibility to environmental health hazards. Children's ability to learn may be affected by inadequate water, sanitation and hygiene conditions in several ways. These include helminth infections (which affect hundreds of millions of school-age children), long-term exposure to chemical contaminants in water (e.g. lead and arsenic), diarrhoeal diseases and malaria infections, all of which force many schoolchildren to be absent from school. Poor environmental conditions in the classroom can also make both teaching and learning very difficult. Girls and boys are likely to be affected in different ways by inadequate water, sanitation and hygiene conditions in schools, and this may contribute to unequal learning opportunities. Sometimes, girls and female teachers are more affected than boys because the lack of sanitary facilities means that they cannot attend school during menstruation. The international policy environment increasingly reflects these issues. Providing adequate levels of water supply, sanitation and hygiene in schools is of direct relevance to the United Nations (UN) Millennium Development Goals of achieving universal primary education, promoting gender equality and reducing child mortality. It is also supportive of other goals, especially those on major diseases and infant mortality." - p. iii
