Trends and Prospects in Metacognition Research - Anastasia Efklides 2010-09-08
Trends and Prospects in Metacognition presents a collection of chapters dealing principally with independent areas of empirical Metacognition research. These research foci, such as animal metacognition, neuropsychology of metacognition, implicit learning, metacognitive experiences, metamemory, young children's Metacognition, theory of mind, metacognitive knowledge, decision making, and interventions for the enhancement of metacognition, have all emerged as trends in the field of metacognition. Yet, the resulting research has not converged, precluding an integration of concepts and findings. Presenting a new theoretical framework, Trends and Prospects in Metacognition extends the classical definitions offered by Flavell and Nelson to carry the prospect of more integrated work into the future. By opening the possibility to cross the boundaries posed by traditionally independent research areas, this volume provides a foundation for the integration of research paradigms and concepts and builds on the relationship between metacognition and consciousness, while integrating basic with applied research.

The Greatest General Knowledge Quiz Book - Chris Cowlin 2011-06-16

What does the average human head weigh? From where in the United Kingdom did the Titanic set off on her maiden voyage? Can you name the manager who took charge of the England football team in 1977? In which year did the United Kingdom first win the Eurovision Song Contest with Sandie Shaw's 'Puppet on a String'? If you can answer these questions and more like them, then The Greatest General Knowledge Quiz Book is for you. You'll never realise how much you don't know until you have dipped inside this book and tried to answer the 250 questions, designed to test your knowledge on a broad range of subjects. Packed with fascinating facts, this book aims to be educational as well as fun and is an easy way to learn. So whether you want to test yourself against the kids or broaden your general knowledge in time for the next pub quiz, this book is a must have for all ages.

GMAT with Online Test - Bobby Umar
2017-01-01

Barron's GMAT is designed to give you the best balance in both the depth of content and breadth of strategies. Written by two of North America's leading GMAT experts and award-winning instructors, this edition gives you the confidence to tackle every GMAT problem. You will know what to expect, what theory each question tests, what strategies you have in your arsenal and the step-by-step processes to get the correct answer quickly and efficiently. This book provides a comprehensive review of all four content areas on the GMAT. Most importantly, it offers solid strategies for managing the particular challenges presented by this high-stakes, computer adaptive exam. For each of the GMAT sections (Verbal, Quantitative, Integrated Reasoning, and the Analytical Writing Assessment), Barron's GMAT provides: One full-length online practice test Diagnostic Skills Tests—initial quizzes that accurately and quickly assess strengths and weaknesses within a topic area Targeted Review Questions—additional questions for the frequent problem subject areas (probability, parallelism, data sufficiency) allowing test-takers to focus on their specific needs Strategic Step-by-Step Methods—approaches to each question type field tested by the authors on a wide range of test-takers with differing abilities and goals Full-Range Content—questions, strategies, and tips for all test-takers, whether they are aiming for a 70th or 95th percentile score, studying while undergrads or after years in the business world Barron's GMAT includes more strategies, theory, and methodologies than any other stand-alone GMAT book on the market! All questions come with answers and explanations.

Principles of Forecasting - J.S. Armstrong
2001-05-31

Principles of Forecasting: A Handbook for Researchers and Practitioners summarizes knowledge from experts and from empirical studies. It provides guidelines that can be applied in fields such as economics, sociology, and psychology. It applies to problems such as those in finance (How much is this company worth?), marketing (Will a new product be successful?), personnel (How can we identify the best job candidates?), and production (What level of inventories should be kept?). The book is edited by Professor J. Scott Armstrong of the Wharton School, University of Pennsylvania. Contributions were written by 40 leading experts in forecasting, and the 30 chapters cover all types of forecasting methods. There are judgmental methods such as Delphi, role-playing, and intentions studies. Quantitative methods include econometric methods, expert systems, and extrapolation. Some methods, such as conjoint analysis, analogies, and rule-based forecasting, integrate quantitative and judgmental procedures. In each area, the authors identify what is known in the form of 'if-then principles', and they summarize evidence on these principles. The project, developed over a four-year period, represents the first book to summarize all that is known about forecasting and to present it so that it can be used by researchers and practitioners. To ensure that the principles are correct, the authors reviewed one another's papers. In addition, external reviews were provided by more than 120 experts, some of whom reviewed many of the papers. The book includes the first comprehensive forecasting dictionary.

Just pop this book in your bag or coat pocket, and learn something new and interesting while waiting for that delayed train. Knowledge is power!

Bonus and Penalty Incentives - Joan Luise

Luft 1992

Scientific Collaboration and Collective Knowledge - Thomas Boyer-Kassem 2018

Current scientific research almost always requires collaboration among several (if not several hundred) specialized researchers. When scientists co-author a journal article, who deserves credit for discoveries or blame for errors? How should scientific institutions promote fruitful collaborations among scientists? In this work, leading philosophers of science address these critical questions

Business Research Methods - Emma Bell 2018-11-05

Business Research Methods is the complete introduction to doing business research and is an ideal guide for students embarking on a research project. Developed specifically with business and management students in mind, this textbook explores the nature and purpose of business research and the issues it entails, while also providing students with practical advice through "Tips and skills" boxes. In addition to a broad range of relevant examples, the book features a substantial discussion of ethics, and a strong emphasis on the most frequent challenges faced by students, such as choosing a research question, planning a project, and writing it up. Fresh voices and perspectives run throughout this edition. New author, Bill Harley, further internationalizes the book's coverage, based on his expertise in the Australian business and management context. Also hear from Amrit, Jordan, Anna, Ed, and Alex - an additional five students whose personal insights and advice in the "student experience" feature help you avoid common mistakes, and follow their successful strategies when undertaking your own research project. This edition has been extensively revised, updated, and streamlined. Coverage of E-Research is now woven throughout the entire book to reflect the centrality of internet-based research methods. The book is accompanied by a suite of online resources that include: For students: * Multiple choice questions * Research Project guide * Interviews with students * Data sets * Using Excel in data analysis (in Excel)* Web links For lecturers: * Test bank * Discussion questions * PowerPoint slides * Lecturer's guide * Case studies * Figures and plates from the text*

Liar's Poker - Michael Lewis 2010-03-15

The time was the 1980s. The place was Wall Street. The game was called Liar's Poker. Michael Lewis was fresh out of Princeton and the London School of Economics when he landed a job at Salomon Brothers, one of Wall Street's premier investment firms. During the next three years, Lewis rose from callow trainee to bond salesman, raking in millions for the firm and cashing in on a modern-day gold rush. Liar's Poker is the culmination of those heady, frenzied years—a behind-the-scenes look at a unique and turbulent time in American business. From the frat-boy camaraderie of the forty-first-floor trading room to the killer instinct that made ambitious young men gamble everything on a high-stakes game of bluffing and deception, here is Michael Lewis's knowing and hilarious insider's account of an unprecedented era of greed, gluttony, and outrageous fortune.

The Elephant Tourism Business - Eric Laws 2020-11-23

Elephant tourism is a growing activity in many countries across Asia and Africa and is popular with tourists from all parts of the world. Elephant tourism has grown rapidly, providing the only viable way for elephants and their owners to survive since the banning of logging. Old logging camps have been developed into sanctuaries for some elephants, but many other camps were established as entertainment

centres, resulting in serious welfare issues for the elephants and their mahouts. The profits from elephant tourism in Asia have encouraged African operators to follow a similar business model. This book draws attention to the need for a comprehensive and rigorous focus on local solutions to improve the welfare of captive elephants, their mahouts and local residents, and to enhance tourists' experiences of elephant tourism.

1500 True Or False General Knowledge Quiz Questions and Answers - Terry Dolan 2015-07-07

Answer each of these questions true or false. Sample questions - Anne Bronte wrote "Wuthering Heights." False: "Wuthering Heights" was written by Emily Bronte Arboreal creatures live in trees. True A lobster's blood is coloured yellow. False: A lobster's blood is coloured blue

Business Information Systems - Witold Abramowicz 2020-07-21

This book constitutes the proceedings of the 23rd International Conference on Business Information Systems, BIS 2020, which was planned to take place in Colorado Springs, CO, USA. Due to the COVID-19 pandemic, the conference was held fully online during June 8-10, 2020. This year's theme was "Data Science and Security in Business Information Systems". The 30 contributions presented in this volume were carefully reviewed and selected from 86 submissions. The book also contains two contributions from BIS 2019. The papers were organized in the following topical sections: Data Security, Big Data and Data Science, Artificial Intelligence, ICT Project Management, Applications, Social Media, Smart Infrastructures.

Beyond Algorithms - James Luke 2022-05-29
With so much artificial intelligence (AI) in the headlines, it is no surprise that businesses are scrambling to exploit this exciting and transformative technology. Clearly, those who are the first to deliver business-relevant AI will gain significant advantage. However, there is a problem! Our perception of AI success in society is primarily based on our experiences with consumer applications from the big web companies. The adoption of AI in the enterprise

has been slow due to various challenges. Business applications address far more complex problems and the data needed to address them is less plentiful. There is also the critical need for alignment of AI with relevant business processes. In addition, the use of AI requires new engineering practices for application maintenance and trust. So, how do you deliver working AI applications in the enterprise? Beyond Algorithms: Delivering AI for Business answers this question. Written by three engineers with decades of experience in AI (and all the scars that come with that), this book explains what it takes to define, manage, engineer, and deliver end-to-end AI applications that work. This book presents: Core conceptual differences between AI and traditional business applications A new methodology that helps to prioritise AI projects and manage risks Practical case studies and examples with a focus on business impact and solution delivery Technical Deep Dives and Thought Experiments designed to challenge your brain and destroy your weekends

Report on the Grain Trade - 1920

Abstracted Indian Trust Bonds ... - United

States. Congress. House. Select Committee on the Fraudulent Abstraction of Bonds from the Interior Department 1861

The report details the practices of John B. Floyd, then Secretary of War, concerning Indian trust bonds and securities.

Entrepreneurial Education - Kristiina Erkkilä 2000

"The study finds that arguments supporting or opposing entrepreneurial education are highly contextual. According to the literature studied, entrepreneurship education is more directly focused upon small business and entrepreneurship, whereas enterprise education is aimed at the development of enterprising behavior, skills and attributes, not only for business use. Furthermore, debates on entrepreneurial education are more complex than shown in previous studies. The debate in the United States is more diverse and practice-driven than those are in the United Kingdom and Finland. In addition, the discourse of each country has unique categories." "The book includes suggestions for future research and gives recommendations particularly for Finnish practice, which could also benefit other societies just starting their path in entrepreneurial education. The study serves as a comprehensive literature source for future interests and research."--BOOK JACKET.

Global Competitiveness: Business Transformation in the Digital Era - Ade Gafar Abdullah 2019-07-09

The proceedings of the "Economics and Business Competitiveness International Conference" (EBCICON) provides a selection of papers, either research results or literature reviews, on business transformation in the digital era. Nine major subject areas, comprising accounting and governance, customer relations, entrepreneurship, environmental issues, finance and investment, human capital, industrial revolution 4.0, international issues, and operations and supply chain management are presented in the proceedings. These papers will provide new insights into the knowledge and practice of business and economics in the digital era. Therefore, parties involved in business and economics such as academics, practitioners, business leaders, and others will be interested in the contents of the proceedings.
