Budweisers Into Czechs and Germans -

Jeremy King 2005

This history of a single town in Bohemia casts new light on nationalism in Central Europe between the Springtime of Nations in 1848 and the Cold War. Jeremy King tells the story of both German and Czech-speaking Budweis/Budějovice, which belonged to the Habsburg Monarchy until 1918, and then to Czechoslovakia, Hitler's Third Reich, and Czechoslovakia again. Residents, at first simply Budweisers, or Habsburg subjects with mostly local loyalties, gradually became Czechs or Germans. Who became Czech, though, and who German? What did it mean to be one or the other? In answering these questions, King shows how an epochal, region-wide contest for power found expression in Budweis/Budějovice not only through elections but through clubs, schools, boycotts, breweries, a remarkable constitutional experiment, a couple of riots, and much more. In tracing the nationalization of politics from small and sometimes comic beginnings to the genocide and mass expulsions of the 1940s, he also rejects traditional interpretive frameworks. Writing not a national history but a history of nationhood, both Czech and German, King recovers a nonnational dimension to the past. Embodied locally by Budweisers and more generally by the Habsburg state, that dimension has long been blocked from view by a national rhetoric of race and

ethnicity. King's Czech-Habsburg-German narrative, in addition to capturing the dynamism and complexity of Bohemian politics, participates in broader scholarly discussions concerning the nature of nationalism.

The Politics of Ethnic Survival - Gary B. Cohen 2006

The German-speaking inhabitants of the Bohemian capital developed a group identification and defined themselves as a minority as they dealt with growing Czech political and economic strength in the city and with their own sharp numerical decline: in the 1910 census only seven percent of the metropolitan population claimed that they spoke primarily German. The study uses census returns, extensive police and bureaucratic records, newspaper accounts, and memoirs on local social and political life to show how the German minority and the Czech majority developed demographically and economically in relation to each other and created separate social and political lives for their group members. The study carefully traces the roles of occupation, class, religion, and political ideology in the formation of German group loyalties and social solidarities.

Creative Approaches to Planning and Local Development - Abdelillah Hamdouch
2016-07-15

This book project highlights creative approaches to planning and local development. The dynamic complexity, diversity and fluidity which characterize contemporary society represent challenges for planning and development endeavours. While research and policy work has extensively focused on large cities and on metropolitan regions, there has been relatively little work on 'smaller places'. This book shows that if these new challenges affect all places and regions, small and medium-sized towns (SMSTs) are suffering many specific problems that call imperatively for the design and implementation of very imaginative, creative approaches to planning and local development. What could enhance creativity in local development and planning? Is it possible to talk about creative capacity building at the level of a town that might release imaginative and innovative activities? Under what local and non-local conditions is creativity being initiated and flourishing? What are the major obstacles and in what way can these be contained in order to safeguard pockets of creative action?

Interdisciplinary and with case studies from France, Norway and other European countries, this volume presents a wide range of approaches and territorial contexts of small cities and towns in which spatial dynamics and the consequences of the city-region for urban planning theory and practice in Europe are highlighted, with a special focus on the challenges for - and understanding of - planning and development of SMSTs. It provides a significant body of critical, comparative and contextual perspectives on the quest for urban sustainability and resilience in SMSTs, therefore emphasizing collaborative and potentially innovative approaches that can be detected, but also the shortcomings, pitfalls and 'traps' that can lie behind the approaches aimed

at concerting ecological, economic, and socio-cultural concerns, and the discourses promoting them.

Voyager from Xanadu - Morris Rossabi
2010-02-10

Toward the end of the thirteenth century, at about the time Marco Polo was being received

by the great Khubilai Khan, a Nestorian Christian monk from China called Rabban Sauma was making the reverse journey from the Mongol capital (what is now Beijing) to Jerusalem. Upon reaching Baghdad—the first traveler to arrive from China—Sauma learned that his pilgrimage could not be fulfilled because of Islamic control of the Holy Land. In *Voyager from Xanadu*, Morris Rossabi traces Sauma's trans-Eurasian travels against the turbulent era of the Mongol Empire and the last Crusades. His indispensable book provides a unique first-hand Asian perspective on Europe and illuminates a crucial period in the early history of global, diplomatic, and commercial networking.

Guardians of the Nation - Pieter M. Judson 2006

New Rural Geographies in Europe - Annett Steinführer

This edited volume is the sixth publication of the series "Rural areas: Issues of local and regional development". It aims at intensifying scholarly exchange on topical questions of social, political, economic and landscape-related transformations of rural areas in Germany and Europe. Europe is a meaningful frame and research topic for rural geography. This edited volume assembles 14 contributions from various countries that shed light on the variety, as well as the differences and commonalities of rural regions in Europe. The volume aims at initiating general reflections about common development mechanisms and structures in the European context in contrast with specific national conditions and path dependencies. By assembling both regional and country case studies as well as cross-national comparisons, the anthology provides a sound basis for future European research in rural

geography. It pleads for more cross-national and comparative approaches.

Cultural Political Economy of Small Cities - Anne Lorentzen 2012-02-13

The volume highlights ongoing changes in the political economy of small cities in relation to the field of culture and leisure. Culture and leisure are focal points both to local entrepreneurship and to planning by city governments, which means that these developments are subject to market dynamics as well as to political discourse and action. Public-private partnerships as well as conflicts of interests characterise the field, and a major issue related to the strategic development of culture and leisure is the balance between market and welfare. This field is gaining importance in most cities today in planning, production and consumption, but to the extent that these changes have drawn academic attention it has focused on large, metropolitan areas and on creative clusters and flagship high culture projects. Smaller cities and their often substantively different cultural strategies have been largely ignored, thus leading to a huge gap in our knowledge on contemporary urban change. By bringing together a number of case studies as well as theoretical reflections on the cultural political economy of small cities, this volume contributes to an emerging small cities research agenda and to the development of policy-relevant expertise that is sensitive to place-specific cultural dynamics. In taking this approach, the volume hopes to contribute to emerging research on culture and leisure economies by developing a differentiated spatial dimension to it, without which sustainable urban strategies cannot be developed. This book integrates perspectives of economic development with questions of governance and equity in relation to the fields of culture and leisure planning and development. This book should be of interest to students and researchers of Urban Studies and Planning, Regional Studies and Economics, as well as Sociology and Geography.

Small Town Sustainability - Paul Knox 2013-09-03

In an age where the globalization process is threatening the uniqueness and vitality of small towns, and where most urban planning

discourse is directed at topics such as metropol-regions or mega-regions and world cities, the authors here emphasize the need to critically reflect on the potential of small towns. They illustrate how small towns can meet the challenge of a fast-paced, globalized world, and based on case studies, movements, programs, and strategies, present the local cultures that effectively and sustainably promote traditions and identities. Small towns often play a critical role in regional economies. When small towns focus on their specific characteristics and exploit their opportunities, they can become stable niches within regional, national, and global economies, and thus contribute significantly to shaping their future. The second edition is expanded to cover the intensive development of small towns in China and Korea. In addition, the authors examine the impact of the economic crisis on small towns and the recent development of the Slow City movement.

Under Suspicion - Boris Groys 2012-05-01

The public generally regards the media with suspicion and distrust. Therefore, the media's primary concern is to regain that trust through the production of sincerity. Advancing the field of media studies in a truly innovative way, Boris Groys focuses on the media's affect of sincerity and its manufacture of trust to appease skeptics. Groys identifies forms of media sincerity and its effect on politics, culture, society, and conceptions of the self. He relies on different philosophical writings thematizing the gaze of the other, from the theories of Heidegger, Sartre, Mauss, and Bataille to the poststructuralist formulations of Lacan and Derrida. He also considers media "states of exception" and their creation of effects of sincerity—a strategy that feeds the media's predilection for the extraordinary and the sensational, further fueling the public's suspicions. Emphasizing the media's production of emotion over the presentation (or lack thereof) of "facts," Groys launches a timely study boldly challenging the presumed authenticity of the media's worldview.

Kidnapped Souls - Tara Zahra 2011-05-02

Throughout the nineteenth and into the early decades of the twentieth century, it was common for rural and working-class parents in the Czech-German borderlands to ensure that their children were bilingual by sending them to live with families who spoke the "other" language. As nationalism became a more potent force in Central Europe, however, such practices troubled pro-German and pro-Czech activists, who feared that the children born to their nation could literally be "lost" or "kidnapped" from the national community through such experiences and, more generally, by parents who were either flexible about national belonging or altogether indifferent to it. Highlighting this indifference to nationalism—and concerns about such apathy among nationalists—*Kidnapped Souls* offers a surprising new perspective on Central European politics and society in the first half of the twentieth century. Drawing on Austrian, Czech, and German archives, Tara Zahra shows how nationalists in the Bohemian Lands worked to forge political cultures in which children belonged more rightfully to the national collective than to their parents. Through their educational and social activism to fix the boundaries of nation and family, Zahra finds, Czech and German nationalists reveal the set of beliefs they shared about children, family, democracy, minority rights, and the relationship between the individual and the collective. Zahra shows that by 1939 a vigorous tradition of Czech-German nationalist competition over children had created cultures that would shape the policies of the Nazi occupation and the Czech response to it. The book's concluding chapter weighs the prehistory and consequences of the postwar expulsion of German families from the Bohemian Lands. *Kidnapped Souls* is a significant contribution to our understanding of the genealogy of modern nationalism in Central Europe and a groundbreaking exploration of the ways in which children have been the objects of political contestation when national communities have sought to shape, or to reshape, their futures.

The Routledge Handbook of Small Towns -

Jerzy Bański 2021-08-16

The Routledge Handbook of Small Towns addresses the theoretical, methodical, and practical issues related to the development of small towns and neighbouring countryside. Small towns play a very important role in spatial structure by performing numerous significant developmental functions for rural areas. At the local scale, they act as engines for economic growth of rural regions and as a link in the system of connections between large urban centres and the countryside. The book addresses the role of small towns in the local development of regions in countries with different levels of development and economic systems, including those in Europe, Africa, South America, Asia, and Australia. Chapters address the functional structure of small towns, relations between small towns and rural areas, and the challenges of spatial planning in the context of shaping the development of small towns. Students and scholars of urban planning, urban geography, rural geography, political geography, historical geography, and population geography will learn about the role of small towns in the local development of countries representing different economic systems and developmental conditions. Confrontations - Jacques Vallee 2015-06-01

ASCIENTIFICDETECTIVESTORY In Confrontations, the second volume of his Alien Contact Trilogy, Dr. Jacques Vallee personally investigates forty astonishing UFO cases from around the world. He finds it shocking that professional scientists have never seriously examined this material. This book is about the hopes, experiences, and the frustrations of a scientist who has gone into the field to investigate a bizarre, seductive, and often terrifying phenomenon reported by many witnesses as a contact with an alien form of intelligence. Dr. Jacques Vallee was born in France, where he received a Bachelor of Science degree in mathematics from the Sorbonne and a Master of Science in astrophysics from the University of Lille. He began his professional life as an astronomer at the Paris Observatory in 1961. While on the staff of the French Space

Committee, he witnessed the destruction of the tracking tapes of unknown objects orbiting the earth, initiating a lifelong interest in the UFO phenomenon. Vallee arrived in the U.S. in 1962, worked in astronomy at the University of Texas at Austin, and wrote two highly respected scientific examinations arguing for the Extraterrestrial Hypothesis (ETH) of UFO origins. In 1967, he received a Ph.D. in computer science from Northwestern University, where he became a close associate of J. Allen Hynek, then scientific consultant for the U.S. Air Force on Project Blue Book. Eventually concluding that the ETH was too narrow to encompass the burgeoning UFO data, he conducted his own extensive global research, resulting in the "Alien Contact Trilogy." Dr. Vallee is presently a venture capitalist living in San Francisco. His website is www.jacquesvallee.com.

Architecture and Elite Culture in the United Provinces, England and Ireland, 1500-1700 - Hanneke Ronnes 2006

Architecture and Order - Michael Parker Pearson 2003-09-02

Architecture is a powerful medium for representing, ordering and classifying the world, and understanding the use of space is fundamental to archaeological inquiry. Architecture and Order draws on the work of archaeologists, social theorists and architects to explore the way in which people relate to the architecture which surrounds them. In many societies, houses and tombs have encoded cultural meanings and values which are invoked and recalled through the practices of daily life. Chapters include explorations of the early farming r archi*eye of Europe, from before the use of metals, to the Classical and Medieval worlds of the Mediterranean and Europe. Research of the recent past and present include an overview of hunter-gatherers' camp organization, a reassessment of the use of space amongst the Dogon of West Africa and an

examination of mental disorders relating to the use of space in Britain. The volume goes beyond the implication that culture determines form to develop an approach that integrates meaning and practice.

Behind the Castle Gate - Matthew Johnson

2013-04-15

In this engaging book Matthew Johnson looks 'behind the castle gate' to discover the truth about castles in England at the end of the Middle Ages. Traditional studies have seen castles as compromises between the needs of comfort and of defence, and as statements of wealth or power or both. By encouraging the reader to view castles in relation to their inhabitants, Matthew Johnson uncovers a whole new vantage point. He shows how castles functioned as stage-settings against which people played out roles of lord and servant, husband and wife, father and son. Building, rebuilding and living in a castle was as complex an experience as a piece of medieval art. Behind the Castle Gate brings castles and their inhabitants alive. Combining ground-breaking scholarship with fascinating narratives it will be read avidly by all with an interest in castles.

Residential Change and Demographic

Challenge - Dr Annegret Haase 2012-11-28

Going beyond the assumption that East Central European cities are still 'in transition' this book draws on the postsocialism paradigm to ask new questions about the impact of demographic change on residential developments in this region. Focussing on four second-order cities in this region, it examines Gdansk and Łódź in Poland and Brno and Ostrava in the Czech Republic as examples and deals with the nexus between urban development and demographic change for the context of East Central European cities. It provides a framework for linking urban and demographic research. It discusses how residential areas and urban developments cope with changes in population development, household types and different forms of in- and out-migration and goes on to explore parallels and differences in comparison with broader European patterns. This book will be useful to academics of urban planning and development especially in transition areas, Central and Eastern European studies, demographics and population studies, and sociology/social exclusion.

The Idea of Decline in Western History - Arthur Herman 2010-06-15

Historian Arthur Herman traces the roots of declinism and shows how major thinkers, past and present, have contributed to its development as a coherent ideology of cultural pessimism. From Nazism to the Sixties counterculture, from Britain's Fabian socialists to America's multiculturalists, and from Dracula and Freud to Robert Bly and Madonna, this work examines the idea of decline in Western history and sets out to explain how the conviction of civilization's inevitable end has become a fixed part of the modern Western imagination. Through a series of biographical portraits spanning the 19th and 20th centuries, the author traces the roots of declinism and aims to show how major thinkers of the past and present, including Nietzsche, DuBois, Sartre, and Foucault, have contributed to its development as a coherent ideology of cultural pessimism.
