## **Public Administration in Times of**

**Transnationalisation and Crisis** - Martina McCowan

2019-02-15

Koordination in

Ministerialbürokratien hat sich gewandelt. Das Buch analysiert den Wandel in

Organisationsstrukturen und im Akteursverhalten in Zeiten von Transnationalisierung und der globalen Finanz- und Eurozonenkrise. Es geht damit einen Schritt weiter als die meisten existierenden Studien, welche vorwiegend formale Organisationsstrukturen und Transnationalisierungs- oder Kriseneinflüsse untersuchen. Dieser "inklusive" Forschungsansatz ermöglicht es, ein differenziertes Bild von

Wandel im dänischen und deutschen Finanzministerium zu zeichnen. Während kooperative Koordination auf tiefgreifenden Wandel zu Krisenzeiten hindeutet, erkennbar in einer Stärkung der "kosmopolitischen Identität" von Akteuren, so vermag Transnationalisierung nicht die "lokalen Identitäten" von Akteuren zu verändern, beobachtbar in der Kontinuität hierarchischer Koordination. Das Buch zeigt folglich, dass Krise eine notwendige Bedingung für Transnationalisierung ist, um ihr transformatives Potential zu entfalten.

**New Scientist** - 1963-03-07  
New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

**Achieving Sustainable E-Government in Pacific Island States** - Rowena Cullen  
2017-02-17

This book analyzes the common set of obstacles to the development and integration of government Information and Communication Technology (ICT) projects and effective e-government initiatives in developing countries. It draws on the expertise and experience of more developed states in the Pacific, notably Australia and New Zealand, both highly rated in global rankings for e-government and active in a variety of e-government development projects across the region. There has been a general failure to identify priorities and align projects with local needs in ICT/e-government projects. Small Island Developing States (or SIDS) present a unique problem in terms of e-government. Not only do they suffer from a common set of barriers to ICT development

*Downloaded from  
[latitudenews.com](http://latitudenews.com) on by  
guest*

such as their remoteness, geographical dispersion, moist tropical climates, largely rural populations, and lack of ICT capacity and infrastructure, but are also dependent on external agencies for investment, and must negotiate with powerful donors who have conflicting agendas. E-government is widely regarded as 'transformational', increasing efficiency, productivity, accountability, economic growth, and citizen involvement. But while the governments of SIDS are committed to harnessing ICTs for effective government and economic development, they face major challenges in establishing successful e-government initiatives, due to the problems outlined above, coupled with a lack of HR capacities and appropriate strategies and policies. Drawing on the experience of the states mentioned above, as well as regional quasi-governmental bodies, nongovernmental organizations (NGOs), aid agencies, and the private sector, the book will be

of interest to researchers and students in the fields of e-government, public administration, political science, communication, information science, and social media.

### **New Scientist** - 1977-09-08

### *Japan's New Economy* -

Magnus Blomström 2001-01-25  
Japan's economy stumbled in the 1990s. After four decades of rapid growth that transformed Japan into a wealthy country at the world's technological frontier, the last decade brought prolonged economic stagnation. The rapid run-up in asset prices in the late 1980s, followed by their collapse in the early 1990s, left

a debt overhang that paralyzed the banking sector. Policy reforms were initially half-hearted, and businesses were slow to restructure as the global economy changed. The lagging economy has seemed impervious to aggressive fiscal stimulus measures and is still plagued by ongoing price deflation. Japan's struggle has called into question the ability of the country's economic institutions - originally designed to support factor accumulation and rapid development - to adapt to the new economic environment of the 21st century. Yet Japan's economy is already changing. Driven by an aging population, rapid technological change, and increasing global competition, the country's public and private institutions are being slowly reshaped. This volume explores the forces that will drive structural and institutional change in three areas over the next decade: the macroeconomy, the organization of industry, and the global economic and political environment.

Economists, demographers, and Japan specialists examine key aspects of the economy that will be transformed in coming years, including population and savings, the public pension system, labor markets, financial reforms, deregulation of service industries, productivity performance, foreign investment, trade, and the impact of an emerging China. The volume fills an important gap in the existing economic literature. While much has been written about Japan's pre-1990s institutions and economic performance, this volume is unique in its forward-looking orientation - trying to understand not only the institutional and structural changes that have already reshaped Japan in the 1990s, but to identify the critical trends and institutional changes that will mould Japan's new economy over the next decade.

**Police Funding, Dark Money, and the Greedy Institution** - Randy K. Lippert  
2022-05-06

Police Funding, Dark Money, and the Greedy Institution is about a pervasive but little-studied phenomenon. Private funding of public police entails private entities sending resources to police through unconventional or hidden channels, sometimes for suspect reasons. The book argues police acquisition of this "dark money" befits the notion of a "greedy institution" that pursues resources beyond ample public funding and needs, and seeks ever more loyal members beyond its traditional boundaries to reproduce itself. The book focuses on private police foundations, corporate sponsorships, and paid detail arrangements primarily in North America, how these funding networks operate and are framed for audiences, and the forms and volumes of capital they generate. Based on interviews with police representatives, sponsors, funders, and foundation representatives as well as records from over 100 police departments, this book

examines key issues in private funding of public police, including corporatization, accountability, corruption, and the rule of law. It documents and analyzes the troubling explosion of police foundations and sponsors and corporate paid detail brokers unknown to the public as a social and policy issue and a hidden response to the global police defunding movement. The book also considers potential policy responses and community safety alternatives in a more generous society. An accessible and compelling read, students and scholars in criminology, criminal justice, law, sociology, political science, anthropology, geography, as well as policymakers, will find this timely book revealing of a neglected, growing area of police practice spanning multiple themes and jurisdictions.

### **Key Aspects of German Employment and Labour**

**Law** - Jens Kirchner

2010-06-16

This publication gives an overview of all key aspects of German labour and employment law as well as adjoining fields. Legal professionals with expert knowledge and many years of experience explain the legal

basis of these aspects of German law, point out typical practical problems and suggest solutions to those problems. In addition, examples are given on how to best manage legal pitfalls to minimize risks. This book translates employment and labour law for foreign in-house counsels and human resources managers at international companies and provides a clear understanding of the complex legal regulations in Germany. All three editors of the book, Dr. Jens Kirchner, Pascal R. Kremp and Michael Magotsch, are key legal professionals working at the Frankfurt office of DLA Piper, one of the largest legal services providers in the world ([www.dlapiper.com](http://www.dlapiper.com)), with national and multinational clients. Their experience includes the management of cross-border restructurings, outsourcing and transfer of undertaking measures, as well as the management of national and multi-jurisdictional merger and acquisitions projects, including post-merger integration processes.

## **International Business: Concepts, Methodologies, Tools, and Applications -**

Management Association,  
Information Resources  
2016-03-17

Business transactions and partnerships across borders have become easier than ever due to globalization and global digital connectivity. As part of this shift in the business sphere, managers, executives, and strategists across industries must acclimate themselves with the challenges and opportunities for conducting business globally.

International Business: Concepts, Methodologies, Tools, and Applications presents the latest research innovations focusing on cross-cultural communications and training, international relations, multinational enterprises, outsourcing, international business strategies, and competitive advantage in the global marketplace. This publication is an exhaustive multi-volume work essential to academic and corporate libraries who serve

researchers, scholars, business executives and professionals, and graduate-level business students.

*The Competitive Strength of the Information and Communication Industry in Europe* - H. van Houten  
2013-06-29

In front of us lies a rather unique study. Unique in respect of both its initiative and its set up. This study is the result of a private initiative of an international organization of management consultancy firms. It is the first time that such a broad international study was undertaken jointly by individual consulting firms in many different countries. Moreover the method used can be characterized as 'from the

bottom up'. Representatives of almost 100 organizations in seven European countries were interviewed by seven individual management consultancy firms on the basis of their own reputation and contacts. Not only the well-known multinationals in the information and communication industry participated, but also medium-sized and small companies as well as government agencies. The study focuses on one sector of industry that is considered to be of prime importance for employment in Europe, viz. the information and communication industry. It is generally assumed that important instruments for the stimulation and strengthening of Europe's position in this field are: reduction of competition within Europe better coordination of R&D efforts improved harmonization of rules, standards and regulations better coordination and education programmes increased stimulation and guidance by governments. This study puts these assumptions

Downloaded from  
[latitudenews.com](http://latitudenews.com) on by  
guest

to the test. It assesses the state of the art regarding these instruments and identifies the actions needed to improve the present situation.

**The role of the FCO in UK government -**

Great Britain: Parliament: House of Commons: Foreign Affairs Committee 2011-05-12

The Foreign Affairs Committee believes the Foreign and Commonwealth Office (FCO) will not be back at the centre of Government and able to lead UK foreign policy, in line with the Foreign Secretary's ambitions, unless it can provide deep foreign policy expertise and judgement to underpin and

implement Government decision-making. The FCO must have the resources and skills required to fulfil this role, especially specialist geographical expertise and knowledge of foreign languages. The FCO has a vital role to play for the Government, namely the timely provision of world-class foreign policy information, analysis, judgement and execution. Finances, people and buildings must be well-managed, but managerial requirements must not divert time and focus disproportionately from the FCO's core foreign policy functions. Given the resource constraints facing the FCO, however, there is doubt whether the department can achieve the Government's ambitions for enhanced commercial work while maintaining its core foreign policy functions at the required standard. The committee regards the FCO's network of overseas posts as integral to the department's ability to discharge its functions, and recommends that the FCO

should seek to maintain a global UK presence. The committee also called "confusing" the fact that under the current Government the FCO has three sets of priorities: the Foreign Secretary's, the Cabinet Office's Business Plan for the department, and the 2010 Strategic Defence and Security Review.

### **E-Commerce and V-Business**

- Stuart Barnes 2013-06-17  
E-Commerce and V-Business examines the impact of the Internet and associated technologies on two related aspects of business: electronic commerce and virtual organisation. Using a combination of recent theory and empirical evidence it demonstrates how forward thinking organisations are reaping considerable strategic advantage from exciting new business models in these areas. Such models require radical rethinking of many aspects of traditional business. The book covers many of the critical and contemporary issues stemming from these important new developments.

### **Distance and E-learning in Transition** - András Szücs

2013-03-01

The rushed development of information and communication technologies and their impact on the world of learning in the last decade have profoundly changed the paradigms, scenarios and values at all levels of education. The professionalization of tools and practices, in addition to the consolidation of academic and practical knowledge, has been a major continuing issue throughout these years. The annual conferences of the largest European professional community in distance and e-learning have been setting the landmarks in this process. The selection from this unique knowledge pool demonstrates the deepening and

consolidation of knowledge and experience. This book presents the developments in the field of open, distance and e-learning, through new technologies, methodologies and tools, which have profoundly changed the paradigms, scenarios and values at all levels of education over the last decade.

## **The Applications of Radar and Other Electronic Systems in the Royal Navy in World War 2 - F.A.**

Kingsley 2016-07-27

This book presents a collection of authoritative accounts of the evolution and application of Royal Naval shipborne radars during World War 2 in the fields of weapon control, weapon direction, action information and fighter direction. Accounts are also presented of the successful pioneering activities at the Admiralty Signal Establishment in the fields of counter-measures against various enemy electronic systems in active operations, and also of high-frequency direction-finding, ashore and afloat, which, in conjunction with radar, contributed substantially to winning the Battle of the Atlantic.
