Health Aspects of Plumbing - World Health Organization 2006-03-03

This publication describes the processes involved in the design installation and maintenance of modern plumbing systems. It recommends a number of plumbing system design and installation specifications that have demonstrated their validity from years of experience. It also examines the microbiological chemical physical and financial risks associated with plumbing and outlines the major risk management strategies that are used in the plumbing industry and emphasizes the importance of measures to conserve supplies of clean water. This work is dedicated to assisting developing countries in achieving the best possible plumbing levels to ensure the highest health benefits from use of sound plumbing practices. It is aimed at administrators and plumbers working in areas that are served by a mains drinking- water supply or sewerage system or are about to install a mains drinking- water supply or sewerage system. It should be of particular value to those working in countries or areas that are in the early stages of introducing modern plumbing systems. While it draws attention to the problems of drinking- water supply and waste removal in developing countries and outlines some of the strategies currently used it does not systematically cover issues specific to developing countries.

The Recovery of Gold from Secondary Sources - Syed Sabir 2016-06-29

New discoveries of the properties of gold at a nanoscale, and its effective use in modern technologies, have been driving a virtual "gold rush". Depleting natural resources has meant that the recovery of gold continues to grow in importance and relevance. The Recovery of Gold from Secondary Sources analyses the most advanced technology in gold recovery and recycling from spent sources of mobile phones, unwanted

electronic equipment and waste materials. State-of-the-art techniques of hydrometallurgical and bio-metallurgical processing, leaching, cementing, adsorbing and separation through bio-sorbents are all described in detail, providing a guide for students and researchers. Discussion of environmentally friendly methods of recovery are presented, in order to provide modern-day alternatives to previous techniques. For those interested in the study of gold recovery this book gives a comprehensive overview of current recovery, making it the ultimate source of information for students, researchers, chemists, metallurgists, environmental scientists and electronic waste recovery experts. Contents: Introduction (S Syed)Leaching of Gold from the Spent/End-of-Life Mobile Phone-PCBs using "Greener Reagents" (Jae-chun Lee and Rajiv R Srivastava)Electroless Displacement Deposition of Gold from Aqueous Source — Recovery from Waste Electrical and Electronic Equipment (WEEE) using Waste Silicon Powder (Kenji Fukuda and Shinji Yae)Adsorption of Gold on Granular Activated Carbons and New Sources of Renewable and Eco-Friendly Activated Carbons (Gerrard Eddy Jai Poinern, Shashi Sharma, and Derek Fawcett)Development of Novel Biosorbents for Gold and Their Application for the Recovery of Gold from Spent Mobile Phones (Katsutoshi Inoue, Manju Gurung, Hidetaka Kawakita, Keisuke Ohto, Durga Parajuli, Bimala Pangen, and Shafiq Alam)Environmentally Friendly Processes for the Recovery of Gold from Waste Electrical and Electronic Equipment (WEEE): A Review (Isabella Lancellotti, Roberto Giovanardi, Elena Bursi, and Luisa Barbieri)Study on the Influence of Various Factors in the Hydrometallurgical Processing of Waste Electronic Materials for Gold Recovery (I Birloaga and F Vegliò) Readership: Students, researchers, chemists, metallurgists, environmental scientists and electronic waste recovery experts.

Pacemakers and ICDs - Jonathan Timperley 2019

This specialist handbook is a practical, comprehensive, and concise training guide on how to implant, follow-up, and troubleshoot pacemakers and ICDs, fully updated with new technologies and the latest international guidelines.

#IsraeliJudaism - Shmuel Rosner 2019-08-29

A new kind of Judaism is emerging in the 21st century. In Israel, the state of the Jewish people, Judaism is undergoing one of its greatest transformations since biblical times. This transformation is rooted in a unique and vibrant culture, which is different from all other Jewish cultures, past and present. Israelis have forged a new way of being Jewish, by confronting and over-coming the great challenges of modernity, secularism, assimilation, and apathy. In this book, Shmuel Rosner, a senior fellow at the Jerusalem based Jewish People Policy Institute, and Camil Fuchs, a Tel Aviv University professor of statistics and pollster, make the first serious attempt to explain this revolutionary process. Using stories, numbers, and insights, the authors sketch the outlines of a culture in which Israeliness and Jewishness are becoming one and the same. #IsraeliJudaism is a book about a fascinating phenomenon. It introduces Israeli culture to the non-Israeli reader in a fresh way, while shedding light on why Israel and the Diaspora face a great divide. #IsraeliJudaism is a must-read for anyone seeking to understand Israel, Judaism, and the Jewish people.

Clinical Tuberculosis - John Crofton 1999

This is a guide to the diagnosis of all forms of tuberculosis (TB). The second edition of the text includes a rewritten and enlarged section on HIV infection in relation to TB as well as the recommendations from experts from the World Health Organization and the International Union against Tuberculosis and Lung Disease. An outline of the WHO DOTS (Directly Observed Treatment Shortcourse) programme is included

and the whole text reviewed and updated. Case studies are used to demonstrate points raised.

The Logic of the History of Ideas - Mark Bevir 2002-06-20

Human cultures generate meanings, and the history of ideas, broadly conceived, is the study of these meanings. An adequate theory of culture must therefore rest on a suitable philosophical enquiry into the nature of the history of ideas. Mark Bevir's book explores the forms of reasoning appropriate to the history of ideas, enhancing our understanding by grappling with central questions such as: What is a meaning? What constitutes objective knowledge of the past? What are beliefs and traditions? How can we explain why people held the beliefs they did? The book ranges widely over issues and theorists associated with post-analytic philosophy, post-modernism, hermeneutics, literary theory, political thought, and social theory.

The Protectors - Jolynn Angelini 2019-03-13

Angie and her husband, Jeff, seemingly have it all: they are working professionals with their own successful business, have a good marriage and great children. As things unfold in the family business, Angie quickly finds out that Jeff is keeping secrets from her. Jeff buys a business from Carl's family and keeps Carl on as an employee. When Carl goes missing, Angie trusts that Jeff will handle the situation but when Jeff also goes missing, she realizes that that won't be happening. Carl's disappearance unravels lies and unimaginable deceit. Nothing is as it seems and no one can be trusted. Anna, Carl's wife, and Angie grow close after they find themselves in an uncomfortable situation. They wonder who's behind it all as they discover that they both have been hiding some things that might change everyone's lives-possibly forever. In this fast-paced thriller, a wife and mother must learn to rely on her intuition and the protection of her friends as she is surrounded by secrets and chaos.

Multisensory Imagery - Simon Lacey 2013-01-19

Is a pear sweeter than a peach? Which of Mona Lisa's hands is crossed over the other? What would the Moonlight Sonata sound like played by a brass band? Although these are questions that appeal to mental imagery in a variety of sensory modalities, mental imagery research has been dominated by visual imagery. With the emergence of a well-established multisensory research community, however, it is time to look at

mental imagery in a wider sensory context. Part I of this book provides overviews of unisensory imagery in each sensory modality, including motor imagery, together with discussions of multisensory and cross-modal interactions, synesthesia, imagery in the blind and following brain damage, and methodological considerations. Part II reviews the application of mental imagery research in a range of settings including individual differences, skilled performance such as sports and surgical training, psychopathology and therapy, through to stroke rehabilitation. This combination of comprehensive coverage of the senses with reviews from both theoretical and applied perspectives not only complements the growing multisensory literature but also responds to recent calls for translational research in the multisensory field.

Globalization - George Ritzer 2019-02-26

A concise exploration of globalization and its role in the contemporary era Driven by technological advancements and global corporations, more and more people are swept up by globalizing processes, creating new winners and losers. Extensively revised and updated, this second edition includes expanded coverage of human trafficking and migration, global climate change, fake news and information wars, and transnational social movements with increased emphasis on examples from Central and South America, Africa, and Asia: Offers a straightforward approach to the multiple facets of globalization and their positive and negative influences on contemporary society Employs unique metaphors and a coherent narrative structure to promote intuitive understanding of abstract concepts Introduces cutting-edge research, updated statistics, and real-world examples in areas such as rising global populism, social justice movements, blockchain technology, and cryptocurrencies Provides an efficient and flexible pedagogical structure, allowing integration with instructor's own course material Emphasizing student comprehension, a wide range of source material is incorporated including empirical research, relevant theories, newspaper and magazine articles, and popular books and monographs. Examples of current research and recent global developments, such as emerging economies and global health concerns, encourage classroom discussion and promote independent study. Globalization: The Essentials — a compact edition of the authors' full-sized textbook Globalization: A Basic Text — provides concise coverage of the central concepts of this dynamic field. Offering a multidisciplinary approach, this textbook is an invaluable primary or supplemental resource for undergraduate study in any social science field, as well as coursework on economics, migration, inequality and stratification, and politics.

State of the Art Surgical Coronary Revascularization - David P. Taggart 2021

This is the most authoritative textbook ever dedicated to the art and science of surgical coronary revascularization, with 71 chapters, organized in 9 sections, and written by over 100 recognized world experts. It covers every aspect of the surgical management of coronary artery pathology and ischaemic heart disease.

Applied Interdisciplinarity in Scholar Practitioner Programs - Siomonn Pulla 2017-10-27

This book examines the experiences of the first graduates from The Doctor of Social Sciences (DSocSci) program at Royal Roads University, Canada's first applied research doctorate designed exclusively for working professionals. The program was developed in response to a growing demand nationally and internationally for scholar-practitioners who are leaders in their professional fields and who want to incorporate dedicated research and writing into their professional lives. Contributors describe their unique experiences in framing and conducting research that was outside the boundaries of discipline-based research and that was driven by issues on the ground.

The Four Color Personalities for MLM - Tom "Big Al" Schreiter 2018-03-20

Instant bonding, instant communication, and how to get your network marketing prospects to fully understand and act on your message = fun! This is the most fun of the 25 skills of network marketing. Our prospects have a different point-of-view than we do. So how do we give them our message in a way they "get it" and enjoy it? By quickly identifying their color personality. This isn't a boring research textbook on the four different personalities. This book is a fun, easy way to know how your prospects think, and the

precise magic words to say to each of the four personalities. The results are stunning. Shy distributors become confident when they understand how their prospects think. Experienced distributors have short conversations that get prospects to join immediately. Why be frustrated with prospects? Instead, quickly discover the four personalities in a fun way that you will always remember. You will enjoy observing and analyzing your friends, co-workers and relatives, and you'll see the way they see the world. It feels like you have 3-D glasses in your network marketing career. Of the 25 skills, this is the first skill that new distributors should learn. Why? It gives new distributors instant confidence. It eliminates rejection. It helps prospects listen with open minds. It gets instant results. What could be better than that? You won't have to look for great prospects when you know the four color personalities. You will have the ability to turn ordinary people into hot prospects by knowing their color personality and by saying the right words. By using humorous, slightly exaggerated examples of the four personality traits, you will remember and use this skill immediately. Life is more fun when you are the only one with the 3-D glasses. This is the one skill that you'll use every day for the rest of your life! Get ready to smile and achieve quicker rapport and results.

WHO consolidated guidelines on tuberculosis. Module 2 - 2021-03-22

The WHO consolidated guidelines on tuberculosis. Module 2: screening – systematic screening for tuberculosis disease is an updated and consolidated summary of WHO recommendations on systematic screening for tuberculosis (TB) disease, containing 17 recommendations for populations in which TB screening should be conducted and tools to be used for TB screening. TB screening is strongly recommended for household and close contacts of individuals with TB, people living with HIV, miners exposed to silica dust, and prisoners. In addition, screening is conditionally recommended for people with risk factors for TB attending health care, and for communities with risk factors for TB and limited access to care (e.g. homeless, urban poor, refugees, migrants). General population screening is recommended in high-burden settings (0.5% prevalence or higher). Symptoms, chest radiography (CXR), and molecular WHO-recommended rapid diagnostic tests for TB are recommended as screening tools for all adults eligible for screening. Computer-aided detection programmes are recommended as alternatives to human interpretation of CXR in settings where trained personnel are scarce. For people living with HIV, C-reactive protein is also a good screening tool. This guideline document is accompanied by an operational handbook, the WHO operational handbook on tuberculosis. Module 2: screening – systematic screening for tuberculosis disease, that presents principles of screening, steps in planning and implementing a screening programme, and algorithm options for screening different populations.

Research and Publishing in Neurosurgery - Yücel Kanpolat 2012-12-06

"Research" and "Publishing" are phrases familiar to all neurosurgeons and neuroscientists. Many young

neurosurgeons struggle with them on a trial-and-error basis at first, and there are not structured education programs providing information on standard methods. The European Association of Neurosurgical Societies Research Committee has developed a course on research and publication methods for residents in neurosurgery who have not yet completed training. This supplement includes selected contributions from this course and will serve as an essential handbook providing basic tools to guide research and publication work, presenting time-saving advice, and resulting in the most beneficial contributions in experimental and clinical research.

Foundations of Augmented Cognition - Dylan D. Schmorow 2015-07-07

This book constitutes the proceedings of the 9th International Conference on the Foundations of Augmented Cognition, AC 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCI 2015, which took place in Los Angeles, CA, USA, in August 2015. HCI 2015 received a total of 4843 submissions, of which 1462 papers and 246 posters were accepted for publication after a careful reviewing process. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The 78 papers presented in the AC 2015 proceedings address the following major topics: cognitive performance and work load, BCI and operational neuroscience, cognition, perception and emotion measurement, adaptive and tutoring training, applications of augmented cognition.

Medical Entomology - B.F. Eldridge 2012-12-06

This book is designed primarily as a textbook for graduate and postgraduate courses in Medical, Public Health and Veterinary Entomology. Its uniqueness is that its emphasis is on disease as opposed to arthropods. It includes general discussions of epidemiology, transmission, disease control, vector control and disease surveillance. In addition, it contains chapters oriented towards the many specific arthropod-borne diseases. Furthermore, the book discusses the many direct impacts that parasitic insects have on human and animal health. The arthropods themselves are dealt with in two introductory chapters.

Electronic Waste and Printed Circuit Board Recycling Technologies - Muammer Kaya 2019-10-17

This book covers state-of-the-art technologies, principles, methods and industrial applications of electronic waste (e-waste) and waste PCB (WPCB) recycling. It focuses on cutting-edge mechanical separation processes and pyro- and hydro-metallurgical treatment methods. De-soldering, selective dismantling, and dry separation methods (including the use of gravity, magnetic and electrostatic techniques) are discussed in detail, noting the patents related to each. The volume discusses the available industrial equipment and plant flowsheets used for WPCB recycling in detail, while addressing potential future directions of the field. This practical, comprehensive, and multidisciplinary reference will appeal to professionals throughout global industrial, academic and government institutions interested in addressing the growing problem of e-waste. Covers principles, methods and industrial applications of e-waste and PCB recycling; Details state-of-the-art mechanical separation processes and pyro- and hydro-metallurgical treatment methods; Describes the available industrial equipment used and plant flowsheets for PCB recycling and addresses potential future developments of this important field.

Guidelines on the Management of Latent Tuberculosis Infection - World Health Organization 2015-01-15

BACKGROUND: Latent tuberculosis infection (LTBI), defined as a state of persistent immune response to

prior-acquired Mycobacterium tuberculosis antigens without evidence of clinically manifested active TB, affects about one-third of the world's population. Approximately 10% of people with LTBI will develop active TB disease in their lifetime, with the majority developing it within the first five years after initial infection. Currently available treatments have an efficacy ranging from 60% to 90%. Systematic testing and treatment of LTBI in at-risk populations is a critical component of WHO's eight-point framework adapted from the End TB Strategy to target pre-elimination and, ultimately, elimination in low incidence countries. OVERVIEW: Recognizing the importance of expanding the response to LTBI, in 2014 WHO developed Guidelines on the Management of Latent Tuberculosis Infection. The guidelines are primarily targeted at high-income or upper middle-income countries with an estimated TB incidence rate of less than 100 per 100 000 population, because they are most likely to benefit from it due to their current TB epidemiology and resource availability. The overall objective of the guidelines is to provide public health approach guidance on evidence-based practices for testing, treating and managing LTBI in individuals with the highest risk of progression to active disease. Specific objectives include identifying and prioritizing at-risk population groups for targeted intervention of LTBI testing and treatment, including defining an algorithm, and recommending specific treatment options. The guidelines are expected to provide the basis and rationale for the development of national guidelines for LTBI management based on available resources, epidemiology of TB including intensity of transmission, the health-care delivery system of the country, and other national and local determinants.

Subways are for Sleeping - Edmund G. Love 1957

Lectures on Venereal and Other Diseases Arising from Sexual Intercourse - Ph Ricord 1849

Playmaking - Daniel Judah Sklar 1991

Sklar's personal account of teaching dramatic writing, direction, and performance, to a group of 7th graders in the South Bronx, reveals the planning and execution of his lessons. It also addresses the reception such lessons received-including resistance. Teachers and Artists-in-Residence stand to gain much from this book, since it deals with real life dynamics in the classroom and necessary strategies for getting through a project in a thought-provoking, fun, and creative way for everyone participating. "I love this book. It's a great read, and it taught me a lot about playwriting, theater, and young people."-Pat Conroy, author of *The Prince of Tides*.

Impact Networks - David Ehrlichman 2021-10-12

This practical guide shows how to facilitate collaboration among diverse individuals and organizations to navigate complexity and create change in our interconnected world. The social and environmental challenges we face today are not only complex, they are also systemic and structural and have no obvious solutions. They require diverse combinations of people, organizations, and sectors to coordinate actions and work together even when the way forward is unclear. Even so, collaborative efforts often fail because they attempt to navigate complexity with traditional strategic plans, created by hierarchies that ignore the way people naturally connect. By embracing a living-systems approach to organizing, impact networks bring people together to build relationships across boundaries; leverage the existing work, skills, and motivations of the group; and make progress amid unpredictable and ever-changing conditions. As a powerful and flexible organizing system that can span regions, organizations, and silos of all kinds, impact networks underlie some of the most impressive and large-scale efforts to create change across the globe. David Ehrlichman draws on his experience as a network builder; interviews with dozens of network leaders; and insights from the fields of network science, community building, and systems thinking to provide a clear process for creating and developing impact networks. Given the increasing complexity of our society and the issues we face, our ability to form, grow, and work through networks has never been more essential.

Mini-Scripts for the Four Color Personalities - Keith Schreiter 2019-11-01

The perfect prospect. The perfect presentation. And our prospect says, "No." What happened? Our prospect did not connect with or understand our presentation. Our presentation is clear to us, but our prospect understands the world differently. Yes, our prospect understands a different language. There are four different color personalities, and each of those personalities interprets our world differently. They have

their own viewpoint and their own language. They make their decisions based upon their viewpoint, and the language we use to present to them has to match their personality. When we talk their language, magic happens. Our prospects understand and appreciate what we offer them. Once we have this connection, prospecting, selling, sponsoring, and presenting are easy. Learning the other color personalities' languages is easy. We simply modify our most common phrases to match their viewpoints. If our yellow personality prospect wants to serve and help the world, then why not present our opportunity from that viewpoint? It is just that easy. In this book we will quickly learn the different personalities and how to identify them. Then, we will learn proven phrases for connecting, prospecting, selling, and sponsoring for each color personality. The reactions of our prospects will be amazing. As network marketing leaders, we want to move people to take positive actions. Using their own color language is how we will do it.

The 7 Laws of Network Marketing - Anthony Powell 2017-03-28

A network marketing legend, Anthony Powell started in the industry at the age of 19 and by the time he was 26 years old, was financially retired. Anthony built one of the largest international organizations in the industry and eventually became one of the top earners. As a result of his leadership, many of those he's coached have gone on to become multiple 6 and 7 figure earners in the industry. If you're looking to go to the next level, here's your chance to work with a living legend.

Tuberculosis in Adults and Children - Dorothee Heemskerk 2015-07-17

This work contains updated and clinically relevant information about tuberculosis. It is aimed at providing a succinct overview of history and disease epidemiology, clinical presentation and the most recent scientific developments in the field of tuberculosis research, with an emphasis on diagnosis and treatment. It may serve as a practical resource for students, clinicians and researchers who work in the field of infectious diseases.

Wireless Sensor Networks and Ecological Monitoring - Subhas C Mukhopadhyay 2013-02-11

This book presents the state of the art technologies and solutions to tackle the critical challenges faced by the building and development of the WSN and ecological monitoring system but also potential impact on society at social, medical and technological level. This book is dedicated to Sensing systems for Sensors, Wireless Sensor Networks and Ecological Monitoring. The book aims at Master and PhD degree students, researchers, practitioners, especially WSN engineers involved with ecological monitoring. The book will provide an opportunity of a dedicated and a deep approach in order to improve their knowledge in this specific field.

Strain Variation in the Mycobacterium tuberculosis Complex: Its Role in Biology, Epidemiology and Control - Sebastien Gagneux 2018-08-31

Until about 10 years ago, the general view in the field was that Mycobacterium tuberculosis, the causative agent of human tuberculosis was a "clone" with insufficient natural sequence variation between clinical strains to be considered biologically and epidemiologically "relevant". This view has now changed quite dramatically thanks to the -omics revolution, particularly the advent of next generation DNA sequencing. Large-scale comparative genomic studies over the last few years have revealed that M. tuberculosis clinical strains are more genetically diverse than appreciated previously. Moreover, an increasing number of experimental and epidemiological studies are showing that this genetic diversity also translates into important phenotypic variation. Taken together, these findings have led to a paradigm shift, such that currently phylogenetic diversity among M. tuberculosis clinical strains is being considered in the development of new tools to combat tuberculosis. The purpose of this book is to bring together a series of contributions from some of the most influential groups working on various aspects of M. tuberculosis diversity, and which through their work have contributed to the this paradigm shift. This includes authors focusing on the evolution of M. tuberculosis in relation to other members of the M. tuberculosis complex adapted to animals, the co-evolution between M. tuberculosis and humans, the phenotypic consequences of strains diversity both from an experimental and epidemiological point of view, the ecology and evolution of drug resistant tuberculosis, the diversity and evolution of the BCG vaccine strains, and the use of mathematical modelling to study strain diversity and drug resistance in human tuberculosis. No such book has ever been published, and given the paradigm shift described above, this book will be a valuable resource both for established researchers as well as new scientists, clinicians and public health officials

joining the growing field of tuberculosis research.
