[A Close Look At Close Reading](#)  
- Diane Lapp 2015-01-29  
The Common Core State Standards have put close reading in the spotlight as never before. While elementary school teachers are certainly willing to teach students to closely read both literary and

informational text, many are wondering what, exactly, this involves. Is there a process to follow? How is close reading different from guided reading or other common literacy practices? How do you prepare students to have their ability to analyze complex texts measured by Common Core assessments? Is it even possible for students in grades K-5 to “read to learn” when they’re only just learning to

read? Literacy experts Diane Lapp, Barbara Moss, Maria Grant, and Kelly Johnson answer these questions and more as they explain how to teach young learners to be close readers and how to make close reading a habit of practice in the elementary classroom. Informed by the authors' extensive field experience and enriched by dozens of real-life scenarios and downloadable tools and templates, this book explores \*Text complexity and how to determine if a particular text is a right for your learning purposes and your students. \* The process and purpose of close reading in the elementary grades, with an emphasis on its role in developing the 21st century thinking, speaking, and writing skills essential for academic communication and required by the Common Core. \* How to plan, teach, and manage close reading sessions across the academic disciplines, including the kinds of questions to ask and the kinds of support to provide. \* How to assess close reading

and help all students—regardless of linguistic, cultural, or academic background—connect deeply with what they read and derive meaning from a complex text. Equipping students with the tools and process of close reading sets them on the road to becoming analytical and critical thinkers—and empowered and independent learners. In this comprehensive resource, you'll find everything you need to start their journey. *Self-Reliance* - Ralph Waldo Emerson 2018-01-16 The Extraordinary Manifesto of Independent Living -Newly Abridged and Introduced in this Powerful Condensation *Self-Reliance* is a life-changing experience-its message of nonconformity, self-expression, and personal independence can awaken you to a new, and better, way of living. Now, historian and New Thought scholar Mitch Horowitz has deftly and faithfully retained the most powerful ideas of Ralph Waldo Emerson's original classic, and reintroduced this work in this

one-of-a-kind condensation. Listenable within the space of an average commute or lunch hour, the experience of Self-Reliance may represent a true turning point in your life.

[Strategies for Student Support During a Global Crisis](#) -

Herron, Jeffrey D. 2021-06-25  
When a global crisis impacts nearly every industry, education is always one of the most impacted as students and faculty must frantically try to maintain their educational programs throughout uncertain times. Beyond the educational courses themselves being shifted online or to hybrid approaches, there must be a focus on the impact on students as well. With newfound ways of learning, new online environments, and new methods for teaching, students are greatly impacted by the changing face of

education. The traditional ways in which students have been served and assisted have changed rapidly, and to make matters even more challenging, students must handle both living in a time of crisis while adapting to swift educational transformations. The dissemination of best practices and maintaining student success during global crises is an area of research that is not only growing in interest but is critical in pandemic times. Strategies for Student Support During a Global Crisis reflects on how educational professionals have worked with students during global crises, how serving and teaching students have been impacted, and the best practices for student success in both online education and hybrid formats. The chapters will include topics such as mentoring models, teaching methods, educational technologies, teacher insights, academic support services, and more. This book is ideal for educational professionals, leaders, school administration, teachers, teacher educators,

Lord of the Flies - William Golding 2003-12-16  
Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being

rescued.

**Concepts of Biology** - Samantha Fowler 2018-01-07  
Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight

careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

The World Book Encyclopedia - 2002

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

Becoming a Whole Language School - Lois Bridges Bird 1989

*Cognitive Technology* - J.L. Mey 1995-12-01

In this book the editors have gathered a number of contributions by persons who have been working on problems of Cognitive Technology (CT). The present collection initiates explorations of the human mind via the technologies the mind produces. These explorations take as their point of departure the question What happens when humans produce new technologies? Two interdependent perspectives from which such a production can be approached are adopted: • How and why constructs that have their origins in human mental life are embodied in physical environments when people fabricate their habitat, even to

the point of those constructs becoming that very habitat • How and why these fabricated habitats affect, and feed back into, human mental life. The aim of the CT research programme is to determine, in general, which technologies, and in particular, which interactive computer-based technologies, are humane with respect to the cognitive development and evolutionary adaptation of their end users. But what does it really mean to be humane in a technological world? To shed light on this central issue other pertinent questions are raised, e.g. • Why are human minds externalised, i.e., what purpose does the process of externalisation serve? • What can we learn about the human mind by studying how it externalises itself? • How does the use of externalised mental constructs (the objects we call 'tools') change people fundamentally? • To what extent does human interaction with technology serve as an amplification of human cognition, and to what extent

does it lead to a atrophy of the human mind? The book calls for a reflection on what a tool is. Strong parallels between CT and environmentalism are drawn: both are seen as trends having originated in our need to understand how we manipulate, by means of the tools we have created, our natural habitat consisting of, on the one hand, the cognitive environment which generates thought and determines action, and on the other hand, the physical environment in which thought and action are realised. Both trends endeavour to protect the human habitat from the unwanted or uncontrolled impact of technology, and are ultimately concerned with the ethics and aesthetics of tool design and tool use. Among the topics selected by the contributors to the book, the following themes emerge (the list is not exhaustive): using technology to empower the cognitively impaired; the ethics versus aesthetics of technology; the externalisation of emotive and affective life

and its special dialectic ('mirror') effects; creativity enhancement: cognitive space, problem tractability; externalisation of sensory life and mental imagery; the engineering and modelling aspects of externalised life; externalised communication channels and inner dialogue; externalised learning protocols; relevance analysis as a theoretical framework for cognitive technology.

*The Complete Guide to Tutoring Struggling Readers—Mapping Interventions to Purpose and CCSS* - Peter J. Fisher  
2014-12-04

This authoritative, easy-to-use guide will help educators plan and implement intervention lessons for struggling readers that align with the English Language Arts Common Core State Standards. All three authors run successful summer reading programs and supervise tutors who are becoming reading specialists. In this comprehensive resource, they offer hands-on guidance for designing interventions across all grade levels, provide sample tutoring

plans and lessons, and describe procedures for teaching print skills, comprehension, vocabulary, fluency, and study skills. Including many user-friendly features, this book will help both new and experienced reading specialists ramp up instruction to assist all students in meeting the new standards. Book Features: A powerful set of field-tested tutoring activities for use with individual students and small groups. Student Profiles that include a matrix that matches interventions to the CCSS. Sidebars with examples of how particular methods have been used with students of varying ability. Discussion Questions and Things to Think About at the end of each chapter. And much more! “If you are looking for a book that translates research and theory into practical and effective interventions for struggling readers please consider *The Complete Guide to Tutoring Struggling Readers*. The authors have done a masterful job of guiding teachers in developing reading

interventions that are authentic, engaging, aligned to current standards as well as the instructional needs of students, and based on state-of-the-art knowledge of reading instruction.” —Timothy Rasinski, professor of Literacy Education, Kent State University “This book is the outgrowth of years of developing and fine tuning tutoring models that have helped thousands of students become capable and engaged readers. The authors share a deep understanding of research on literacy intervention along with a wealth of experience in translating this into effective, and reflective, practice. The Complete Guide to Tutoring Struggling Readers is a must for every educator who works with or designs programs for struggling readers.” —Camille Blachowicz, co-director, The Reading Leadership Institute, professor emeritus, National College of Education, National Louis University Peter J. Fisher is a professor of education at National College of Education

of National Louis University (NLU). Ann Bates is a literacy educator who has been a classroom teacher, reading specialist, and assistant professor of Reading and Language at NLU. Debra J. Gurvitz directs the NLU Chicago campus off-site summer reading improvement program.
