Racial Formation in the United States - Michael Omi 2014-06-20

Twenty years since the publication of the Second Edition and more than

thirty years since the publication of the original book, Racial Formation

in the United States now arrives with each chapter radically revised and

rewritten by authors Michael Omi and Howard Winant, but the overall

purpose and vision of this classic remains the same: Omi and Winant

provide an account of how concepts of race are created and transformed,

how they become the focus of political conflict, and how they come to

shape and permeate both identities and institutions. The steady journey

of the U.S. toward a majority nonwhite population, the ongoing

evisceration of the political legacy of the early post-World War II civil

rights movement, the initiation of the 'war on terror' with its attendant

Islamophobia, the rise of a mass immigrants rights movement, the

formulation of race/class/gender 'intersectionality' theories, and the

election and reelection of a black President of the United States are

some of the many new racial conditions Racial Formation now covers.

The Tenant Movement in New York City, 1904-1984 - Ronald

Lawson 1986

The Chicago Freedom Movement - Mary Lou Finley 2016-04-22

Six months after the Selma to Montgomery marches and just weeks after

the passage of the Voting Rights Act of 1965, a group from Martin Luther

King Jr.'s staff arrived in Chicago, eager to apply his nonviolent approach

to social change in a northern city. Once there, King's Southern Christian

Leadership Conference (SCLC) joined the locally based Coordinating

Council of Community Organizations (CCCO) to form the Chicago

Freedom Movement. The open housing demonstrations they organized

eventually resulted in a controversial agreement with Mayor Richard J.

Daley and other city leaders, the fallout of which has historically led

some to conclude that the movement was largely ineffective. In this

important volume, an eminent team of scholars and activists offer an

alternative assessment of the Chicago Freedom Movement's impact on

race relations and social justice, both in the city and across the nation.

Building upon recent works, the contributors reexamine the movement

and illuminate its lasting contributions in order to challenge conventional

perceptions that have underestimated its impressive legacy.

Everything in Its Place - David B. Audretsch 2015-03-02

Every city, region and state wants to do better---or at the very least, not do worse. Places have a strong and vigorous concern with and stake in generating a stronger economic performance. This concern spans a broad spectrum of constituents and interests, including business, labor, non-profit organizations, government, and private residents. However, such decision makers mandated with the strategic management of their place receive little guidance or insight from scholars in terms of a systematic framework for evaluating how to generate and sustain a competitive advantage for their place. While an entire academic field exists devoted to analyzing how firms and organizations can create and sustain a competitive advantage and ultimately a strong economic performance---the field of strategic management in business schools---no such analogous field exists which is devoted to guiding and informing decision makers mandated and concerned with the strategic management of their place. Everything in Its Place seeks to fill this intellectual void, explaining the underlying economic and social factors and the broad spectrum of policies and instruments that can actually influence and enhance economic performance in places. Several academic fields have generated a number of important theories, empirical findings, and case studies that shed considerable light on identifying and unraveling the underlying forces about what shapes this economic performance. Combined in this book with the actual experiences and instincts garnered from practitioners and policy makers, these insights are integrated together in into a coherent, inclusive framework to guide and inform thought leaders and scholars in the strategic management of places.

The Imagination of the New Left - George N. Katsiaficas 1987

"The Imagination of the New Left" brings to life the social movements and events of the 1960s that made it a period of world-historical importance: the Prague Spring; the student movements in Mexico, Japan, Sri Lanka, Italy, Yugoslavia, and Spain; the Tet Offensive in Vietnam and guerilla movements in Latin America; the Democratic Convention in Chicago; the assassination of Martin Luther King; the near-revolution in France of May 1968; and the May 1970 student strike in the United States. Despite its apparent failure, the New Left represented a global transition to a newly defined cultural and political epoch, and its impact continues to be felt today.

Poor People's Movements - Frances Fox Piven 2012-02-08

Have the poor fared best by participating in conventional electoral politics or by engaging in mass defiance and disruption? The authors of the classic *Regulating the Poor* assess the successes and failures of these two strategies as they examine, in this provocative study, four protest movements of lower-class groups in 20th century America: -- The mobilization of the unemployed during the Great Depression that gave rise to the Workers' Alliance of America -- The industrial strikes that resulted in the formation of the CIO -- The Southern Civil Rights Movement -- The movement of welfare recipients led by the National Welfare Rights Organization.
