The Feminine Mystique - Betty Friedan 2010
When Betty Friedan produced *The Feminine Mystique* in 1963, she could not have realized how the discovery and debate of her contemporaries' general malaise would shake up society. Victims of a false belief system, these women were following strict social convention by loyally conforming to the pretty image of the magazines, and found themselves forced to seek meaning in their lives only through a family and a home. Friedan's controversial book about these women - and every woman - would ultimately set Second Wave feminism in motion and begin the battle for equality. This groundbreaking and life-changing work remains just as powerful, important and true as it was forty-five years ago, and is essential reading both as a historical document and as a study of women living in a man's world. 'One of the most influential nonfiction books of the twentieth century.' New York Times 'Feminism began with the work of a single person: Friedan.' The Complete Trailer Sailor: How to Buy, Equip, and Handle Small Cruising Sailboats - Brian Gilbert 2007-06-22

A soup-to-nuts introduction to small, economical

sailing craft Trailer sailers--the smallest, most economical sailboats with sleeping accommodations--are a popular platform for learning the basics of sailing and are often considered to be the entry level to cruising under sail. Author Brian Gilbert shows how trailer sailers can be the ideal craft for a lifetime of enjoyment, including serious, long-distance cruising. This book covers all the bases, including how to inspect, buy, and equip a boat; how to trailer, sail, navigate, and cruise in small boats; how to use communications and navigation equipment; and more.

Advanced Automotive Fault Diagnosis - Tom Denton 2006-08-14

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. *Advanced Automotive Fault Diagnosis* is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added - On-board diagnostics and Oscilloscope diagnostics - and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA. **The New York Times Page One, 1851-2004 - 2004**

Nudge - Richard H. Thaler 2009-02-24
Now available: *Nudge: The Final Edition* The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make decisions—for fans of Malcolm Gladwell's *Blink*, Charles Duhigg's *The Power of Habit*, James Clear's *Atomic Habits*, and Daniel Kahneman's *Thinking, Fast and Slow* Named a Best Book of the Year by *The Economist* and the *Financial Times* Every day we make choices—about what to buy or eat, about financial investments or our children's health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. *Nudge* is about how we make these choices and how we can make better ones. Using dozens of eye-opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible “choice architecture” to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice.

Between the Rivers - John McGrath 2019-06-24
Making history useful to the reader - this is one of the missions of the Combat Studies Institute. We strive to produce works that recount historical events to inform decision makers and to enable experiential learning. This collection of events put together by John McGrath, which occurred in Iraq during the 2003-2005 timeframe, addresses that mission.

Narrative and Discursive Approaches in Entrepreneurship - Chris Steyaert 2005-01-01

. . . the four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, *International Journal of Entrepreneurial Behaviour and Research* The book delivers what it promises: a map of the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the field and an important methodological handbook for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with advantage by other researchers using ethnography as their main methodological approach to social studies. . . The aim of the book is to show how narratives can enrich entrepreneurship studies, a goal that in my opinion is aptly fulfilled. Monika Kostera, *Scandinavian Journal of Management* . . . the contributors in this text breathe fresh and imaginative linguistic resources and narrative/discursive frames of reference into the inquiry of entrepreneurial activities. The anecdote, the narrative, the metaphorical, the discursive and the dramaturgical are significant therefore, not only because they bring to the surface voices, emotions, processes and the relationality of (everyday) entrepreneurial activity that have possibly been previously silenced. But also, to paraphrase Steyaert, these approaches highlight the controversial and interactive aspects of the research process. . . The text is welcome because it treats narrative in a serious and scholarly way. Denise Fletcher, *International Small Business Journal* In their edited book *Narrative and Discursive Approaches in Entrepreneurship*, Daniel Hjorth and Chris Steyaert provide a fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many readers. Entrepreneurship authors typically talk about theory, methods, and data as if a straight-forward linear process united them all, and making sense of entrepreneurship was simply a matter of knowing how to interpret one's findings. By contrast, the authors in this volume propose narrative and discursive approaches in

which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as part of the story itself. They draw upon an international set of cases, including Russia, Sweden, Denmark, Norway, Venezuela, and North America. The cases themselves make for fascinating reading, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, taxi drivers in Caracas, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which to understand the entrepreneurial process. Unlike many edited books which have no plot, the editors have included opening and closing sections that link the chapters, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, University of North Carolina at Chapel Hill, US Daniel Hjorth and Chris Steyaert set out to advance the study of entrepreneurship by refocusing the lens of discovery from economics, management and marketing to other paradigmatic stances in social sciences and humanities like anthropology and literary studies. The result is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporate both the context and place of entrepreneurship. From the perceptive insights of the editors to the rigorous and provocative discourse of the chapters and thoughtful responses in the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can rouse new insights. The editors ask, how do these texts move you? they entice, provoke, challenge, stimulate and guide. Their implications should be far reaching and required reading for any student of t

On Point - Retired, Colonel Gregory, Gregory Fontenot, US Army, Retired 2013-12

On Point is a study of Operation IRAQI FREEDOM (OIF) as soon after the fact as feasible. The Army leadership chartered this effort in a message to the major commands on 30 April 2003. In his guidance, Army Chief of Staff General Eric K. Shinseki directed "a quick, thorough review that looks at the US Army's performance, assesses the role it played in the

joint and coalition team, and captures the strategic, operational, and tactical lessons that should be disseminated and applied in future fights." For those of us in the Operation IRAQI FREEDOM Study Group (OIF-SG), this translated into three separate products. A "quick look" lessons-learned briefing produced in July, less than 30 days after returning from the theater. On Point-this work-is the second product and was largely completed by mid-August 2003. Finally, the most significant product is the archive of 119,000 documents, some 2,300 interviews and 69,000 photos archived with the support and assistance of the Combined Arms Research Library at Fort Leavenworth, Kansas.

U.S. Marines in Afghanistan, 2001-2009 - U S Marine Corps History Division 2017-02-05
This volume presents a collection of 38 articles, interviews, and speeches describing many aspects of the U.S. Marine Corps' participation in Operation Enduring Freedom from 2001 to 2009. This work is intended to serve as a general overview and provisional reference to inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign. The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available. From the Preface - From the outset, some experts doubted that the U.S. Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield. Naval expeditionary Task Force 58 (TF-58) commanded by then-Brigadier General James N. Mattis silenced naysayers with the farthest ranging amphibious assault in Marine Corps/Navy history. In late November 2001, Mattis' force seized what became Forward Operating Base Rhino, Afghanistan, from naval shipping some 400 miles away. The historic assault not only blazed a path for follow-on forces, it also cut off fleeing al-Qaeda and Taliban elements and aided in the seizure of Kandahar. While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air-ground task force (MAGTF), deployments to Afghanistan often reflected what former Commandant General Charles C. Krulak coined as the "three-block war." Following TF-58's deployment during the initial take down of the Taliban regime, the MAGTF made few appearances in Afghanistan until 2008. Before then, subsequent Marine units often deployed as a single battalion under the command of the U.S. Army Combined Joint Task Force (CJTF) to provide security for provincial reconstruction teams. The Marine

Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police. Aviation assets sporadically deployed to support the U.S.-led coalition mostly to conduct a specific mission or to bridge a gap in capability, such as close air support or electronic warfare to counter the improvised explosive device threat. From 2003 to late 2007, the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency, largely centered in the restive al-Anbar Province. As a result of the North Atlantic Treaty Organization (NATO) taking over command of Afghan operations and Marine Corps' commitments in Iraq, relatively few Marine units operated in Afghanistan from late 2006 to 2007. Although Marines first advocated shifting resources from al-Anbar to southern Afghanistan in early 2007, the George W. Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H. Petraeus' "surge strategy" in Iraq. By late 2007, the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story "How We Lost the War We Won." In recognition of the shifting tides in both Iraq and Afghanistan, the Bush administration began to transfer additional resources to Afghanistan in early 2008. The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign, even proposing to take over the Afghan mission from the Army. . . .

Elements of Chemical Reaction Engineering - H. Scott Fogler 1999

"The fourth edition of *Elements of Chemical Reaction Engineering* is a completely revised version of the book. It combines authoritative coverage of the principles of chemical reaction engineering with an unsurpassed focus on critical thinking and creative problem solving, employing open-ended questions and stressing the Socratic method. Clear and organized, it integrates text, visuals, and computer simulations to help readers solve even the most challenging problems through reasoning, rather than by memorizing equations."--BOOK JACKET.
Kontum - Thomas P. McKenna 2011-09-09
In the spring of 1972, North Vietnam invaded

South Vietnam in what became known as the Easter Offensive. Almost all of the American forces had already withdrawn from Vietnam except for a small group of American advisers to the South Vietnamese armed forces. The 23rd ARVN Infantry Division and its American advisers were sent to defend the provincial capital of Kontum in the Central Highlands. They were surrounded and attacked by three enemy divisions with heavy artillery and tanks but, with the help of air power, managed to successfully defend Kontum and prevent South Vietnam from being cut in half and defeated. Although much has been written about the Vietnam War, little of it addresses either the Easter Offensive or the Battle of Kontum. In *Kontum: The Battle to Save South Vietnam*, Thomas P. McKenna fills this gap, offering the only in-depth account available of this violent engagement. McKenna, a U.S. infantry lieutenant colonel assigned as a military adviser to the 23rd Division, participated in the battle of Kontum and combines his personal experiences with years of interviews and research from primary sources to describe the events leading up to the invasion and the battle itself. *Kontum* sheds new light on the actions of U.S. advisers in combat during the Vietnam War. McKenna's book is not only an essential historical resource for America's most controversial war but a personal story of valor and survival.

Games, Norms and Reasons - Johan van Benthem 2011-03-30

Games, Norms, and Reasons: Logic at the Crossroads provides an overview of modern logic focusing on its relationships with other disciplines, including new interfaces with rational choice theory, epistemology, game theory and informatics. This book continues a series called "Logic at the Crossroads" whose

title reflects a view that the deep insights from the classical phase of mathematical logic can form a harmonious mixture with a new, more ambitious research agenda of understanding and enhancing human reasoning and intelligent interaction. The editors have gathered together articles from active authors in this new area that explore dynamic logical aspects of norms, reasons, preferences and beliefs in human agency, human interaction and groups. The book pays a special tribute to Professor Rohit Parikh, a pioneer in this movement.

The Dobe Ju/'Hoansi - Lee 2012-02-01

This classic, bestselling study of the !Kung San, foragers of the Dobe area of the Kalahari Desert describes a people's reactions to the forces of modernization, detailing relatively recent changes to !Kung rituals, beliefs, social structure, marriage and kinship system. It documents their determination to take hold of their own destiny, despite exploitation of their habitat and relentless development to assert their political rights and revitalize their communities. Use of the name Ju/'hoansi (meaning real people) acknowledges their new sense of empowerment. Since the publication of the Third Edition in 2003, Richard Lee has made eight further trips to the Kalahari, the most recent in 2010 and 2011. The Dobe and Nyae Nyae Areas have continued to transform and the people have had to respond and adapt to the pressures of capitalist economics and bureaucratic governance of the Namibian and Botswana states. This Fourth Edition chronicles and bears witness to these evolving social conditions and their impacts on lives of the Ju/'hoansi. Auto Repair For Dummies, 2nd Edition

(9781119543619) was previously published as *Auto Repair For Dummies*, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

[Resurrecting Bertha](#) - Rob Siegel 2019-09-15

To most people, cars are just appliances to be disposed of when they rust, become unreliable, or are outgrown. But to car people, it's different. Cars are like photographs that occupy physical space. They hold aromas that trigger memories, and remind us of who we once were. In addition, to some people, the relationship with the car itself is a real thing. Many enthusiasts pine for the cars of their youth, regret that they ever let them go, and yearn and search for them the way people do with old lovers, hoping to find them and rekindle that old spark. In *Resurrecting Bertha*, Rob Siegel assures you that this is normal (well, as normal as anything is with car

people), and embarks on this journey himself. Writing in his trademark Hack Mechanic voice that's enthralled readers for 35 years, Rob describes his original eight-year relationship with his highly-modified 1975 BMW 2002 "Bertha," selling the car to a dear friend, its 26 years of storage, and buying it back in a weak whisky-soaked moment only to experience the "oh dear God what did I just do" regret when he raises the long-closed garage door and comes face-to-face with the badly deteriorated car. The book details the steps Rob went through to get the car running, then driving, then sufficiently sorted to make a 2000-mile drive, and how the reconnection with the car was so much deeper than he expected. Resurrecting Bertha is about more than just the nuts and bolts; it's about

deciding what's important, the joy of doing good, and how, if you do it right, not only can you go home again, but you can do so in the same car.
