The Judgment Against Imperialism, Fascism and Racism Against Caliphate and Islam - Khondakar Golam Mowla 2008-10

This book is all about Caliphate and Islam which was destroyed in 1914 through first illegal invasion of Iraq and Caliphate was abolished on 29th October, 1923 by Ataturk, a secret Jew according to Joachim Prinz as he mentioned in his famous book, The Secret Jews (pg 122). Largest Muslims which more than total Arab Muslims live in Indonesia and Malaysia and part of Philippine where no Muslim or Arab invader invaded and the fact is Europeans and USA invaded this countries. Sufis from Iran and Arab world spread Islam in these countries. Muslims were in America before arrival of Europeans. October 21, 1492, Columbus admitted in his

papers that while his ship was sailing near Gibara on the northeast coast of Cuba, he saw a Mosque on the top of a beautiful mountain. Ruins of Mosques and minarets with inscriptions of Qur'anic verses have been discovered in Cuba, Mexico, Texas, and Nevada. In 1492, Columbus had two captains of Muslim origin during his first voyage, one named Martin Alonso Pinzon the captain of the Pinta, and his brother Vicente Yanex Pinzon the captain of the Nina. They were wealthy expert ship outfitters who helped organize Columbus' expedition and repaired the flagship Santa Maria. The Pinzon family was related to Abuzayan Muhammad III, the Moroccan Sultan of the Marinid Dynasty (1196-1465).[i] There is European Union for Europeans and same Europeans or Anglo Saxons who illegally occupied 4 continents of North America, South America, Australia and Antarctica and still today they are illegally occupying those 4 continents and sending powerful Navy, Air Force, Arm Force to Bahrain, Dhahrain, Iraq, Afghanistan and Persian Gulf and many part of this world. But why Europeans or Anglo Saxons are afraid of Caliphate on the model of European Union or USA? Has ever Hitler invaded 4 continents except his own Europe? The answer is no. So all must see their own face in the mirror before blaming any race or religion or individual. It has become every day habit to blame Islam and Muslims where as no Arab or Muslim invader ever went to Indonesia or Malaysia where largest Muslim group live and Indonesia is the Largest Muslim country though so called Europeans Christians invaded both Indonesia and Malaysia. So why has it become every day habit to blame Caliphate, Muslims and Arab? Have you ever heard that Muslim version of FBI or MI5 ever questioned Europeans in India or Arab World when Muslims were sole power in earth for over a thousand years and when Muslim rulers allowed Europeans to be immigrants in land of Caliphate or India for that greatness those Europeans became spies and occupied Muslim land? So why FBI or MI5 dare to harass Muslims? Why there is such cowardly behavior and attitude of FBI, MI5 or CIA and MI6 and other Western agencies? The way present genocide is going in Iraq, Afghanistan and it already started in northern Pakistan besides the threat of genocide against Iran with

same pretext of WMD in Iraq, we must be terrified. There was no limit of lies and deception in human history. There is no limit of genocide in human history too. During last European War over 70 million people, the majority of them civilians, were killed, making it the deadliest conflict in human history.[3] Muslims even did not kill 70 millions during last 1400 years.

Handbook for Light Artillery - A. B. Dyer
2022-01-05

From the PREFACE. In preparing this work it has been my endeavor to place in compact form all the data I could obtain that might prove of service to those persons interested in the subject of light artillery, both in the Regular Army and in the National Guard. I have held strictly to the lines laid down in Army Regulations, Drill Regulations, Official Reports, etc., as regards

the matter extracted from such sources; and such as has not been so obtained has been carefully selected from the best authorities I have been able to consult. I make no claim to originality in this work. It is drawn on the lines of similar handbooks in foreign services; and a great deal of the matter has been copied verbatim from the works consulted. To the writers and compilers of those works I hereby express my thanks. While I do not consider that machine-guns are proper weapons for the light artillerist, I feel that occasions may arise when knowledge regarding them may prove of service; hence the chapter pertaining to them. I express, with pleasure, my thanks to Lieut.-Colonel E. B. Williston, 3d T.J. S Artillery, for his assistance. I am particularly obliged to Captain L. L. Bruff, Ordnance Department, for having permitted me to copy from the manuscript of his work on Ordnance and Gunnery (now being published), and also for the use of many of his cuts. His friendly consideration in so doing is fully appreciated.... --A. B. Dyer, 1st Lieut., 4th Artillery, West Point, N. Y., March 1, 1896

2019-01-07

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is

the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Radio Frequency and Microwave Electronics Illustrated - Matthew M. Radmanesh 2001
Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly

graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.
