

Yukon Weekly Planner 2020

Thank you for downloading **Yukon Weekly Planner 2020** . Maybe you have knowledge that, people have search numerous times for their chosen books like this Yukon Weekly Planner 2020 , but end up in harmful downloads.

Rather than reading a good book with a cup of tea in the afternoon, instead they are facing with some infectious virus inside their computer.

Yukon Weekly Planner 2020 is available in our book collection an online access to it is set as public so you can download it instantly.

Our books collection hosts in multiple locations, allowing you to get the most less latency time to download any of our books like this one.

Merely said, the Yukon Weekly Planner 2020 is universally compatible with any devices to read

School Leadership in Malaysia

- Tony Bush 2021-11-30

This new book provides a comprehensive overview of school leadership in Malaysia, at a time when effective leadership is widely recognised to be an essential component of successful schools. It is also timely because leadership is regarded as a vital element in the Government's ambitious

educational reform agenda.

The book is edited by a world leader in this field and includes contributors with deeply embedded understanding of the Malaysian schools' context, based on engagement with policy, practice and research. The book addresses major aspects of school leadership, including instructional and distributed leadership, the role

*Downloaded from
latitudenews.com on by
guest*

of the principal, the work of senior and middle leaders, professional learning communities, leadership and student outcomes, and leadership preparation. This book is essential reading for postgraduate students and researchers interested in educational leadership and management, and school reform, in an Asian context. It is also recommended for school leaders wishing to engage with policy, practice and research.

The Milepost - Kris Valencia
2007-03-01

Traveler's Guide to Alaskan Camping - Mike Church
2008-04

Features camping options, campground lists, suggested sights, and easy to follow maps.

Canada Water Act Publications, 1970-1990 - Canada.
Environment Canada 1991

Bibliography of all items published under the Canada Water Act of 1970 listed by water management body, by policy inquiry and by river basin, including Northwest Territories and Yukon. Includes

map of current investigation, planning and management activities in Canada.

Advanced Power Generation Systems - Yatish T. Shah
2022-12-21

Advanced Power Generation Systems: Thermal Sources evaluates advances made in heat-to-power technologies for conventional combustion heat and nuclear heat, along with natural sources of geothermal, solar, and waste heat generated from the use of different sources. These advances will render the landscape of power generation significantly different in just a few decades. This book covers the commercial viability of advanced technologies and identifies where more work needs to be done. Since power is the future of energy, these technologies will remain sustainable over a long period of time. Key Features • Covers power generation and heat engines • Details photovoltaics, thermo-photovoltaics, and thermoelectricity • Includes discussion of nuclear and renewable energy as well as

waste heat This book will be useful for advanced students, researchers, and professionals interested in power generation and energy industries.

Assisting Care Leavers Time

for Action - OECD 2022-06-13
Young adults who have lived in out-of-home care at some point during their childhood often struggle to build stable lives. This is not surprising: typically young care leavers not only have to overcome a difficult childhood, but also tend to receive less support during the crucial years of early adulthood than youth living with their parents.

Drivers of Landscape Change in the Northwest Boreal Region

- Valerie Barber 2020-01-01
The northwest boreal region (NWB) of North America is a land of extremes. Extending more than 1.3 million square kilometers (330 million acres), it encompasses the entire spectrum between inundated wetlands below sea level to the tallest peak in North America. Permafrost gradients span from nearly continuous to absent. Boreal ecosystems are

inherently dynamic and continually change over decades to millennia. The braided rivers that shape the valleys and wetlands continually change course, creating and removing vast wetlands and peatlands. Glacial melt, erosion, fires, permafrost dynamics, and wind-blown loess are among the shaping forces of the landscape. As a result, species interactions and ecosystem processes are shifting across time. The NWB is a data-poor region, and the intention of the NWB Landscape Conservation Cooperative is to determine what data are not available and what data are available. For instance, historical baseline data describing the economic and social relationships in association with the ecological condition of the NWB landscape are often lacking. Likewise, the size and remoteness of this region make it challenging to measure basic biological information, such as species population sizes or trends. The paucity of weather and climate monitoring stations

*Downloaded from
latitudenews.com on by
guest*

also compound the ability to model future climate trends and impacts, which is part of the nature of working in the north. The purpose of this volume is to create a resource for regional land and resource managers and researchers by synthesizing the latest research on the historical and current status of landscape-scale drivers (including anthropogenic activities) and ecosystem processes, future projected changes of each, and the effects of changes on important resources. Generally, each chapter is coauthored by researchers and land and natural resource managers from the United States and Canada.

Fueling Resistance - Kate J. Neville 2021-01-18

A series of concurrent pressures in the early 2000s-- climate change, financial system crashes, economic development in rural regions, and shifts in geopolitics-- intensified interest in alternative energy production. At the same time, rising oil prices rendered alternative

fuels a more economically viable option. Among these energy sources, liquid biofuels (bioethanol and biodiesel) and natural gas derived from hydraulic fracturing ("fracking") took center stage as promising commodities and technologies. But controversy quickly erupted in surprisingly similar ways around both renewable fuels. Global enthusiasm for these fuels--and the widespread projections for their production around the world--collided with local politics in debates over "food versus fuel" and concerns over "land grabs." What seemed, from a global perspective, like empty lands ripe for development were, to rural communities, vibrant and already contested spaces. As proposals for biofuels and fracking landed in specific communities and ecosystems, they reignited and reshaped old disputes over land, water, and decision-making authority. Fueling Resistance offers an account of how and why controversies over these different fuels unfolded in

*Downloaded from
latitudenews.com on by
guest*

surprisingly similar ways in the global North and South. To explain these convergent dynamics of contention and resistance, Kate J. Neville argues that the emergence of grievances and the patterns of resistance to new fuel technologies depends less on the type of energy developed (renewable versus fossil fuel) than on intersecting elements of the political economy of energy: finance, ownership, and trade relations. As local commodities enter global supply chains and are integrated into existing corporate structures, opportunities arise to broker connections between otherwise disparate communities. Neville looks at biofuels in Kenya and fracking in the Canadian Yukon and shows how organizers connect specific energy projects to broader issues of globalization, climate, food, water, and justice. Taken together, the intersecting elements of the political economy of energy shape the contentious politics of biofuels and fracking at both local and

global scales, and help explain how and why particular mechanisms of contention emerge at different times and places.

Planning and Managing the Experience Economy in Tourism - Augusto Costa, Rui
2021-12-03

Tourism is facing a new paradigm that has been brought on by the introduction of experiences in the development, management, and promotion of tourism. Associating experiences to tourism destination and products allows tourists to relate to their vacations differently and helps to fuel a destination's competitiveness and compliance with new needs and motivations that are being driven by the tourists. When properly design, managed, and developed, tourism experiences can contribute to the destination's overall sustainability by maximizing tourism's positive impacts and fostering their spillover to local communities. Planning and Managing the Experience Economy in

Downloaded from
latitudenews.com on by
guest

Tourism is an essential reference book that seeks to advance research on tourism experience as well as investigate how tourism experiences can create and increase tourism competitiveness. The book explores how the experience concept has evolved in the last decade, alongside the needs and motivations of consumers, and how it can be conceptualized, designed, managed, and implemented both at the tourism firm and destination levels. Delving further into concepts like creative tourism, destination attributes, and smart experiences, this book serves as a dynamic resource for travel agencies, tourism managers, tourism professionals, marketers, destination managers, government officials, policymakers, academicians, students, tourism officials, planners, and researchers.

Cracking the China

Conundrum - Yukon Huang

2017-06-22

China's rise is altering global

power relations, reshaping economic debates, and commanding tremendous public attention. Despite extensive media and academic scrutiny, the conventional wisdom about China's economy is often wrong. Cracking the China Conundrum provides a holistic and contrarian view of China's major economic, political, and foreign policy issues. Yukon Huang trenchantly addresses widely accepted yet misguided views in the analysis of China's economy. He examines arguments about the causes and effects of China's possible debt and property market bubbles, trade and investment relations with the Western world, the links between corruption and political liberalization in a growing economy and Beijing's more assertive foreign policies. Huang explains that such misconceptions arise in part because China's economic system is unprecedented in many ways-namely because it's driven by both the market and state- which complicates the

*Downloaded from
latitudenews.com on by
guest*

task of designing accurate and adaptable analysis and research. Further, China's size, regional diversity, and uniquely decentralized administrative system poses difficulties for making generalizations and comparisons from micro to macro levels when trying to interpret China's economic state accurately. This book not only interprets the ideologies that experts continue building misguided theories upon, but also examines the contributing factors to this puzzle. Cracking the China Conundrum provides an enlightening and corrective viewpoint on several major economic and political foreign policy concerns currently shaping China's economic environment.

Perseverance - John R. Richardson 2020-06-17

In the summer of 2006, four old men began an adventure that took them from the suburbs of Washington State through British Columbia and Alberta to Great Slave Lake in Canada's Northwest Territories. In two canoes, they began a 900-mile (1,500 km)

journey down the Mackenzie River. One month later, they reached the town of Inuvik near the Arctic Ocean. Perseverance: One Month Canoeing on the Mackenzie River is a memoir of that journey told by one of the four paddlers, John Richardson. In this book, he captures the excitement and challenges of this exhausting voyage: battling the elements, missing and worrying about family, and navigating the second-largest river in North America. He tells stories of the First Nations and Inuit people who live in the wilderness and in villages along the river while also providing anecdotes of history, geography, topography, wildlife, natural resources, and much more. This book provides readers with an opportunity to explore a wild and remote river vicariously. For those interested in actually paddling the Mackenzie, the book also includes a mile guide with extensive information about the river, including the locations of various hazards as well as communities,

memorable sights, and prime camping spots.

To Build a Fire - Jack London 2008

Describes the experiences of a newcomer to the Yukon when he attempts to hike through the snow to reach a mining claim.

Tourism Marketing - Alastair M. Morrison 2022-03-30

Tourism Marketing: In the Age of the Consumer offers a fresh and contemporary approach as an introductory textbook on tourism marketing. Six major themes along with the traditional core marketing principles are blended together: Age of the consumer: This book places the customer at the heart of tourism marketing and not the sector's promotional apparatus.

Experiences: It highlights the growing consumer interest in the enjoyment of experiences and experiential marketing.

New media: Social media and e-marketing are given emphasis throughout.

Coverage of new media is present in all chapters. Global marketplace: Every chapter adopts a global outlook and

offers international perspectives. Environment and social responsibility: An emphasis is placed on the sustainability of tourism, including the concepts of ethical tourism and social responsibility. Events: This book treats events as a major tourism marketing topic and integrates events within the concept of experiential marketing. Written in an engaging and accessible style, Tourism Marketing: In the Age of the Consumer is richly illustrated and full of actual case studies and examples looking at a wide variety of topics such as slum tourism, the sharing economy, staycations, event bidding, coping with COVID-19, air travel emissions and many more. Four features add interest and bring greater pedagogical value - Quick Bytes, Case Studies, Industry Voices and Vignettes. This will be essential reading for all tourism marketing students.

Indigenous Empowerment through Co-management - Graham White 2020-02-01 Co-management boards, established under comprehensive land claims agreements, have become key players in land-use planning, wildlife management, and environmental regulation across Canada's North. This book provides a detailed account of the operation and effectiveness of these boards while addressing a central question: Have they been successful in ensuring substantial Indigenous involvement in policies affecting the land and wildlife in their traditional territories? While identifying constraints on the role Northern Indigenous peoples play in board processes, Graham White finds that overall they exercise extensive decision-

making influence. These findings are provocative and offer valuable insights into our understanding of the importance of land claims boards and the role they play in the evolution of treaty federalism in Canada.

Energy Policy Advancement

- Dmitry Kurochkin 2021

This book states that sustainable development has become an influential discourse worldwide. Climate change is not only an urgent problem, but it is also a fundamental spiritual question concerning social justice and sustainable peace development as well as solidarity among people of various religious backgrounds and different countries. Thus, this global problem must be faced and recognized for future actions and strategies.

However, the politics of fear must be replaced with a culture of peace, hope, and compassion, and this urgent problem must be faced with an optimistic attitude and a certain degree of preparedness. Climate change is evident in many forms, such

Downloaded from
latitudenews.com on by
guest

as, for example, the most obvious--recent weather fluctuations that happen around the world. Floods, droughts, and hurricanes are those visible signs of climate change. Human-caused climate change is projected to greatly impact marine, freshwater, and terrestrial life. Temperatures in Alaska and the Arctic have increased over the last 50 years at a rate more than twice as fast as the global average temperature. Poor people are vulnerable to man-made climate change and respond rapidly to its impacts. Diverse knowledge of and approaches to climate change help understand this growing problem; global average air temperature has increased in the recent past by approximately 1.0°C (1.8°F). According to the Climate Science Special Report, the last several years have been record-breaking, and the period of 1901-2016 is the warmest. Greenhouse gas (GHG) emissions are still rising, with damaging effects on the Earth's climate. At the

moment, the concentration of CO₂ is higher than at any point in time--at least the past 800,000 years. However, carbon dioxide (CO₂) is not the only GHG that impacts human-induced climate change.

Lessons for Education from COVID-19 A Policy Maker's Handbook for More Resilient Systems - OECD
2020-12-15

The COVID-19 pandemic has shaken long-accepted beliefs about education, showing that learning can occur anywhere, at any time, and that education systems are not too heavy to move. When surveyed in May 2020, only around one-fifth of OECD education systems aimed to reinstate the status quo. Policy makers must therefore maintain the momentum of collective emergency action to drive education into a new and better normal.

Handbook of Cumulative Impact Assessment - Jill A.E. Blakley 2021-05-28

This important Handbook is an essential guide to the state-of-the-art concepts, debates and innovative practices in the field of cumulative impact assessment. It helps to strengthen the foundations of this challenging field, identify key issues demanding solutions and summarize recent trends in forward progress, particularly through the use of illustrative case examples.

Regulation of Extractive Industries - Rachael Lorna Johnstone 2020-02-28

This book intends to inform the key participants in extractive projects - namely, the communities, the host governments and the investors - about good practice for effective community engagement, based on analysis

of international standards and expectations, lessons from selected case-studies and innovations in public participation. The extent of extractive industries varies widely around the Arctic as do governmental and social attitudes towards resource development. Whilst most Arctic communities are united in seeking investment to fund education, healthcare, housing, transport and other essential services, as well as wanting to benefit from improved employment and business opportunities, they have different views as to the role that extractive industries should play in this. Within each community, there are multiple perspectives and the goal of public participation is to draw out these perspectives and seek consensus. Part I of the book analyses the international standards that have emerged in recent years regarding public participation, in particular, in respect of indigenous peoples. Part II presents six case studies that aim to identify both good and bad practices and to

*Downloaded from
latitudenews.com on by
guest*

reflect upon the distinct conditions, needs, expectations, strategies and results for each community examined. Part III explores the importance of meaningful participation from a corporate perspective and identifies some common themes that require consideration if Arctic voices are to shape extractive industries in Arctic communities. In drawing together international law and standards, case studies and examples of good practice, this anthology is a timely and invaluable resource for academics, legal advisors and those working in resource development and public policy.

More than 'Nature' - Doris Friedrich

The Arctic is often associated with pristine wilderness, natural resources, and climate change. Yet settlements and infrastructure, which have received less attention, play a significant role in Arctic environments. Extractive industries, military activities, and scientific undertakings have driven the expansion of

infrastructures. This book presents current research on Northern towns and Arctic and Subarctic infrastructure. It examines historical developments, the shaping of environments, sustainability, future planning, and associated living conditions, mainly from a social science perspective.

Food Policy Environments: Discursive Effects, Material Consequences - Myriam Durocher 2022-07-26

[Planner's Estimating Guide](#) - Arthur Nelson 2018-01-03

The United States faces enormous changes in the next 25 years. Arthur C. (Chris) Nelson starts this book with a few projections: The population will grow by one-third to 375 million. We will need 60 million new housing units to house these people. There will be 60 percent more jobs, requiring 50 billion additional square feet of nonresidential space. The bottom line is that half of all development in 2030 will have been built since 2000. Nelson estimates the cost of new construction alone to be at

Downloaded from
latitudenews.com on by
guest

least \$20 trillion. This book gives planning practitioners a powerful tool to help decide where to put this new development. It does not advocate one development scenario over another, but it revolutionizes the job of estimating land-use and facility needs. Planner's Estimating Guide offers easy-to-use formulas and worksheets that are formatted in an Excel workbook on CD-ROM and carefully explained in the text. They make it easy to figure future requirements for countless scenarios. The workbook and text deal with a 20-year planning horizon for a fictitious county, but both the time projection and scale are entirely adaptable to myriad local circumstances. The program allows you to gather a first impression of future land-use needs, and revise it to reflect local limitations. For example, if the landscape in question won't support the land-use estimations, change the assumptions in the workbook to devise new estimates. The workbook shows

the implications of growth based on standard assumptions; you can change the assumptions as needed to reflect local conditions — including public input — to see how outcomes change. Use the workbook as a model for testing local sensitivities with respect to land supply constraints and changes in policy assumptions. The results won't tell you what to do, but will reveal the numerical implications of different scenarios. The book is written principally for practitioners, and also for planning students as a primary or supplementary text. Used creatively, the powerful tools in Planner's Estimating Guide will help you determine the numerical implications of an almost infinite number of future circumstances that may affect your community.

Sustainable Urbanism in China - Ali Cheshmehzangi
2021-08-17

Sustainable Urbanism in China explores the notion of "Sustainable Urbanism" by considering the role

*Downloaded from
latitudenews.com on by
guest*

sustainable neighborhood planning plays in the larger picture of sustainable urbanism and suggests innovations and best practices that are either developed or adopted by China. These are narrated as lessons learnt for other countries where we see similar trends of development patterns or emerging practices. Through various explorations of challenges, paradigms, and innovations of urban sustainability, this book highlights how planning, policy, and design are forming and reforming in the context of China. These are offered through a set of guidelines and pathways for urban sustainability at the scale of neighborhoods/communities or districts in a wider context of urban environments, as well as strategies for planners, developers, policy makers, and educators in the field of the built environment. Through a comprehensive overview of urban sustainability practices in China, this book investigates 12 case study projects. These comprehensive explorations

should in turn help construct the future directions of China's sustainable urban development and provide innovative pathways of sustainable urbanism in China and around the globe.

Urban Sustainability in the Arctic - Robert W. Orttung
2020-06-11

Urban Sustainability in the Arctic advances our understanding of cities in the far north by applying elements of the international standard for urban sustainability (ISO 37120) to numerous Arctic cities. In delivering rich material about northern cities in Alaska, Canada, and Russia, the book examines how well the ISO 37120 measures sustainability and how well it applies in northern conditions. In doing so, it links the Arctic cities into a broader

*Downloaded from
latitudenews.com on by
guest*

conversation about urban sustainability more generally. Arctic Tourism in Times of Change:: Dimensions of Urban Tourism - Müller, Dieter K. 2020-09-28

Available online: <https://pub.norden.org/temanord2020-529/> Tourism has grown in many Arctic peripheries of northern Europe and North America, particularly among international markets interested in unique Arctic nature and culture-based assets. In this context, urban places have remained relatively neglected. The report brings together case studies from several northern peripheries to illustrate the diversity of urban Arctic tourism and to identify implications for sustainable tourism development across the North. The case studies indicate that the Arctic dimensions of urban tourism are not always self-evident and tourism has not developed in relation to the northern culture of these places. However, in a global competition for capital and people, urban places seem to be increasingly using the

Arctic as a way to boost local economies and reimagine their places in order to achieve individual, local, regional, and national development goals.

The Routledge Handbook of Financial Literacy - Gianni Nicolini 2021-12-31

Financial literacy and financial education are not new topics, even though interest in these topics among policymakers, financial authorities, and academics continues to grow. The Routledge Handbook of Financial Literacy provides a comprehensive reference work that addresses both research perspectives and practical applications to financial education. This is the first volume to summarize the milestones of research in financial literacy from multiple perspectives to offer an overview. The book is organized into six parts. The first three parts provide a conceptual framework, which discusses what financial literacy is, how it should be measured, and explains why it represents a relevant topic and effective tool in enhancing

*Downloaded from
[latitudenews.com](https://www.latitudenews.com) on by
guest*

decision-making among consumers as well as consumer protection strategies. Part IV addresses the connection between financial education and financial literacy, with chapters about financial education in school settings as well as for adults. This part includes an analysis of the role of Fintech and the use of gamification in financial education. Part V is a collection of contributions that analyze financial literacy and financial education around the world, with a focus on geographical areas including the U.S., South America, Western Europe, Eastern Europe, Asia, and Africa. This part also considers how financial literacy should be addressed in the case of Islamic finance. The concluding part of the book examines how financial literacy is related to other possible approaches to consumer finance and consumer protection, addressing the relationships between financial literacy and behavioral economics, financial well-being, and financial inclusion. This volume is an

indispensable reference for scholars who are new to the topic, including undergraduate and graduate students, and for experienced researchers who wish to enrich their knowledge, policymakers seeking a broader understanding and an international perspective, and practitioners who seek knowledge of best practices as well as innovative approaches.

I Married the Klondike -

Laura Beatrice Berton

2018-03-12

First published in 1954, this is a true story of love and adventure which traces the history of Dawson City through the eyes of a young schoolteacher from Canada and the penniless Yukon miner she married... "This is a brave book. It is a record of a woman's courage and devotion in a hostile land. It is the story of a refined and sensitive girl who found happiness the hard way, and triumphed over conditions that would have driven most women to distraction. It is also a tribute to a husband who with hand, heart and head was

outstanding in a world of worthy men. "I have read many books on the Yukon, but this is different...It is the gallant personality of the author which shines on every page, and makes her chronicle a saga of the High North." (Robert W. Service, Preface)

Local Climate Action Planning -

Michael R. Boswell 2012-07-16

Climate change is a global problem, but the problem begins locally. Cities consume 75% of the world's energy and emit 80% of the world's greenhouse gases. Changing the way we build and operate our cities can have major effects on greenhouse gas emissions. Fortunately, communities across the U.S. are responding to the climate change problem by making plans that assess their contribution to greenhouse gas emissions and specify actions they will take to reduce these emissions. This is the first book designed to help planners, municipal staff and officials, citizens and others working at local levels to develop Climate Action Plans. CAPs are

strategic plans that establish policies and programs for mitigating a community's greenhouse gas (GHGs) emissions. They typically focus on transportation, energy use, and solid waste, and often differentiate between community-wide actions and municipal agency actions. CAPs are usually based on GHG emissions inventories, which identify the sources of emissions from the community and quantify the amounts. Additionally, many CAPs include a section addressing adaptation-how the community will respond to the impacts of climate change on the community, such as increased flooding, extended drought, or sea level rise. With examples drawn from actual plans, Local Climate Action Planning guides preparers of CAPs through the entire plan development process, identifying the key considerations and choices that must be made in order to assure that a plan is both workable and effective.

Capitalism and Dispossession -
David P. Thomas

Downloaded from
latitudenews.com on by
guest

2022-05-25T00:00:00Z

This edited collection brings together a broad range of case studies to highlight the role of Canadian corporations in producing, deepening and exacerbating conditions of dispossession both at home and abroad. Rather than presented as instances of exceptional greed or malice, the cases are described as expected and inherent consequences of contemporary capitalism and/or settler colonialism. A core purpose of the book is to combine and synthesize analyses of dispossession within and outside of Canada. While the literature tends to treat the two as distinct and unrelated phenomena, these processes are often connected, as the normalization of settler colonialism at home can lead to indifference and acceptance of dispossession caused by Canadian companies abroad. This book brings local and global cases together in order to present a rigorous analysis of the role of Canadian corporate activity in processes of dispossession. The book

includes a diversity of theoretical approaches related to the overarching theme of capitalism and dispossession; however, they share a critical analysis of capitalism and its implications on marginalized peoples at home and abroad. Included are political economy approaches that draw on the work of theorists such as David Harvey, important interventions from Indigenous and settler colonial studies, feminist approaches using the work of scholars such as Silvia Federici and the concept environmental racism, which draws on both critical race theory and environmental justice literature.

threat or invitation but leaves no listener unaffected. Toothsome fiends, interfering pests, or creatures wild and free, wolves have been at the heart of Canada's national story since long before Confederation. Villain, Vermin, Icon, Kin contends that the role in which wolves have been cast - monster or hero - has changed dramatically through time. Exploring the social history of wolves in Canada, Stephanie Rutherford weaves an innovative tapestry from the varied threads of historical and contemporary texts, ideas, and practices in human-wolf relations, from provincial bounties to Farley Mowat's iconic *Never Cry Wolf*. These examples reveal that Canada was made, in part, through relationships with nonhuman animals. Wolves have always captured the human imagination. In sketching out the connections people have had with wolves at different times, Villain, Vermin, Icon, Kin offers a model for more ethical ways of interacting with animals in the face of a global

biodiversity crisis.

Demystifying MTSS - Matt Navo 2022-07-14

Regional Water Security -

Robert C. Brears 2021-03-03
REGIONAL WATER SECURITY
Regional Water Security provides new research on policy innovations that promote the application of demand management and green infrastructure (GI) in managing water resources across regions sustainably. In particular, with regional water security around the world at risk from climatic and non-climatic challenges

impacting water quantity and water quality, this book, in addition to providing examples of demand management and GI being implemented in various locations globally, contains in-depth case studies that illustrate how regions, of differing climates, lifestyles, and income levels, have implemented policy innovations that promote the application of demand management and GI to achieve regional water security for humans while protecting and restoring the natural environment. Regional Water Security will be of interest to regional water resource managers, town and regional planners, resource conservation managers, policymakers, international companies, and organizations as well as environmental NGOs, researchers, and graduate and undergraduate students.

Yukon Quest - John Firth 1998

northern wilderness, over windswept mountains, in blizzards and bone-chilling cold. Yukon Quest shows in vivid detail the enormous commitment involved in caring for up to 14 dogs in a team. The book also includes anecdotes from all the races and a list of all the mushers who have ever participated, along with race results.

Worldwide Brochures - 1996

The Floor of Heaven -

Howard Blum 2012-03-27

New York Times bestselling author Howard Blum expertly weaves together three narratives to tell the true story of the 1897 Klondike Gold Rush. It is the last decade of the 19th century. The Wild West has been tamed and its fierce, independent and often violent larger-than-life figures--gun-toting wanderers, trappers, prospectors, Indian fighters, cowboys, and lawmen--are now victims of their own success. But then gold is discovered in Alaska and the adjacent Canadian Klondike and a new frontier suddenly

looms: an immense unexplored territory filled with frozen waterways, dark spruce forests, and towering mountains capped by glistening layers of snow and ice. In a true-life tale that rivets from the first page, we meet Charlie Siringo, a top-hand sharp-shooting cowboy who becomes one of the Pinkerton Detective Agency's shrewdest; George Carmack, a California-born American Marine who's adopted by an Indian tribe, raises a family with a Taglish squaw, and makes the discovery that starts off the Yukon Gold Rush; and Jefferson "Soapy" Smith, a sly and inventive conman who rules a vast criminal empire. As we follow this trio's lives, we're led inexorably into a perplexing mystery: a fortune in gold bars has somehow been stolen from the fortress-like Treadwell Mine in Juneau, Alaska. Charlie Siringo discovers that to run the thieves to ground, he must embark on a rugged cross-territory odyssey that will lead him across frigid waters and through a frozen wilderness to

face down "Soapy" Smith and his gang of 300 cutthroats. Hanging in the balance: George Carmack's fortune in gold. At once a compelling true-life mystery and an unforgettable portrait of a time in America's history, *The Floor of Heaven* is also an exhilarating tribute to the courage and undaunted spirit of the men and women who helped shape America.

The Good Life - Dorian Amos
2014-01-29

The absolutely inspiring true tale of a young couple who gave up the "good life" in England to start a new life in the wilderness of the Yukon Dorian Amos—a painter from Cornwall—and his wife decided that they were in need of adventure, so they gave up their comfortable life and traveled to Yukon Territory in the remote Canadian wilderness. Told by Dorian with warmth and humor, this is the compelling account of their adventures. Buying a piece of land in the forest just outside Dawson City, they revel in the stark beauty of the landscape

and the liberation they feel from the mundanity of their former home—crossing frozen rivers just to buy food, hunting caribou, coming face to face with bears, and building their own log cabin. The perfect tale for anyone feeling that there must be more to life, their story will convince readers to stop putting their dreams on hold.

Heritage Planning - Harold Kalman 2020-11-30

This new and substantially revised edition of *Heritage Planning: Principles and Process* offers an extensive overview of the burgeoning fields of heritage planning and conservation. Positioning professional practice within its broader applied and theoretical contexts, the authors provide a firm foundation for understanding the principles, history, evolution, debates, and tools that inform heritage planning, while also demonstrating how to effectively enact these processes. Few published works focus on the practice of heritage planning. The first edition of this book was

developed to fill this gap, and this second edition builds upon it. The book has been expanded in scope to incorporate new research and approaches, as well as a wide range of international case studies. New themes reflect the emerging recognition that sustainability, climate resilience, human rights, social justice, and reconciliation are fundamental to the future of planning. Heritage Planning is

indispensable reading, not only for professionals who transform the built environment, but for anyone who wants to understand the ideas and practices of heritage planning and conservation. For the benefit of student readers, twelve chapters—designed to accommodate the academic semester—are augmented with concise summaries, key terms and definitions, questions, and learning objectives.
