Some flames are eternal... As if being one of the few female Pterons wasn't hard enough, now Hailey is a hybrid. She doesn't have time to even accept her new lightness nature before she's tasked with saving the only world she's ever known. Wyatt will do anything to help Hailey— that is if he can adjust to major changes of his own. With the fate of humanity hanging in the balance they must accept a challenge beyond any they have ever faced. *New Adult Paranormal Romance*1

The Fundamental Principle of Fichte's Philosophy - Ellen Bliss Talbot 1906

Reason in a Dark Time - Dale Jamieson 2014-02-28

From the 1992 Rio Earth Summit to the 2009 Copenhagen Climate Conference there was a concerted international effort to stop climate change. Yet greenhouse gas emissions increased, atmospheric concentrations grew, and global warming became an observable fact of life. In this book, philosopher Dale Jamieson explains what climate change is, why we have failed to stop it, and why it still matters what we do. Centered in philosophy, the volume also treats the scientific, historical, economic, and political dimensions of climate change. Our failure to prevent or even to respond significantly to climate change, Jamieson argues, reflects the impoverishment of our systems of practical reason, the paralysis of our politics, and the limits of our cognitive and affective capacities. The climate change that is underway is remaking the world in such a way that familiar comforts, places, and ways of life will disappear in years or decades rather than centuries. Climate change also threatens our sense of meaning, since it is difficult to believe that our individual actions matter. The challenges that climate change presents go beyond the resources of common sense morality -- it can be hard to view such everyday acts as driving and flying as presenting moral problems. Yet there is much that we can do to slow climate change, to adapt to it and restore a sense of agency while living meaningful lives in a changing world.

Metrics That Matter for Population Health Action - National Academies of Sciences, Engineering, and Medicine 2017-01-28

In times of rapid change and constrained resources, measures that are important, focused, and reliable are vital. However there is an overabundance of measures available for evaluating various aspects of population health and previous efforts to simplify existing sets to meet the needs of all decision makers have been unsuccessful. The National Academies of Sciences, Engineering, and Medicine convened a workshop to explore the status and uses of measures and measurement in the work of improving population health. Participants explored existing and emerging population health metric sets and characteristics of metrics necessary for stakeholder action across multiple sectors. This report summarizes the presentations

and discussions from the workshop.

Unsettled - Steven E. Koonin 2021-04-27

"Unsettled is a remarkable book—probably the best book on climate change for the intelligent layperson—that achieves the feat of conveying complex information clearly and in depth." —Claremont Review of Books "Surging sea levels are inundating the coasts." "Hurricanes and tornadoes are becoming fiercer and more frequent." "Climate change will be an economic disaster." You've heard all this presented as fact. But according to science, all of these statements are profoundly misleading. When it comes to climate change, the media, politicians, and other prominent voices have declared that "the science is settled." In reality, the long game of telephone from research to reports to the popular media is corrupted by misunderstanding and misinformation. Core questions—about the way the climate is responding to our influence, and what the impacts will be—remain largely unanswered. The climate is changing, but the why and how aren't as clear as you've probably been led to believe. Now, one of America's most distinguished scientists is clearing away the fog to explain what science really says (and doesn't say) about our changing climate. In *Unsettled: What Climate Science Tells Us, What It Doesn't, and Why It Matters*, Steven Koonin draws upon his decades of experience—including as a top science advisor to the Obama administration—to provide up-to-date insights and expert perspective free from political agendas. Fascinating, clear-headed, and full of surprises, this book gives readers the tools to both understand the climate issue and be savvier consumers of science media in general. Koonin takes readers behind the headlines to the more nuanced science itself, showing us where it comes from and guiding us through the implications of the evidence. He dispels popular myths and unveils little-known truths: despite a dramatic rise in greenhouse gas emissions, global temperatures actually decreased from 1940 to 1970. What's more, the models we use to predict the future aren't able to accurately describe the climate of the past, suggesting they are deeply flawed. Koonin also tackles society's response to a changing climate, using data-driven analysis to explain why many proposed "solutions" would be ineffective, and discussing how alternatives like adaptation and, if necessary, geoengineering will ensure humanity continues to prosper. *Unsettled* is a reality check buoyed by hope, offering the truth about climate science that you aren't getting elsewhere—what we know, what we don't, and what it all means for our future.

Parliamentary Debates - New South Wales. Parliament 1908

What We Think About When We Try Not To Think About Global Warming - Per Espen Stoknes 2015

"Today, about 98 percent of scientists affirm that climate change is human made, and about 2 percent still question it. Despite that overwhelming majority, though, about half the population of rich countries, like ours, choose to believe the 2 percent. And, paradoxically, this large camp of deniers grows even larger as more and more alarming proof of climate change has cropped up over the last decades. This disconnect has both climate scientists and activists scratching their heads, growing anxious, and responding, usually, by repeating more facts to 'win' the argument. But, the more climate facts pile up, the greater the resistance to them grows, and the harder it becomes to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead. Is humanity up to the task? It is a catch-22 that starts, says psychologist and climate expert Per Espen Stoknes, from an inadequate understanding of the way most humans think, act, and live in the world around them. With dozens of examples, he shows how to

retell the story of climate change and apply communication strategies more fit for the task."--Publisher's description.

Intersectionality in Action - Peter Felten 2016-02-10

Colleges and universities silo diversity and inclusion by creating specific courses to address them, or programs to welcome and support people with a range of identities, whereas in reality students, faculty and staff do not encounter diversity in the fractured ways that match the organizational structures of our institutions. We all simultaneously embody a variety of identities with different saliency in different circumstances and times. This book offers models for institutions to move intentionally toward intersections - of study abroad and multiculturalism, of race and gender and religion, and of other essential aspects of our educational programs and our students' identities - to open doors to new possibilities that better prepare our students for life in a diverse world, and that allow our institutions to become more efficient and effective as we strive to not simply do things better in our own separate spheres, but to do better things by working together across difference. Each chapter offers action-oriented analysis focusing on particular campus intersections, rather than attending to specific demographic groups. Chapter authors also build on their own local expertise of doing this work on campuses that often do not have deep pockets or rich histories of such efforts. The book is organized into three sections: * People focuses on diversity broadly defined, considering questions about how we recruit and engage the students, faculty, and staff in the campus community, and how we work with governing boards and others to promote inclusive excellence. * Environment focuses on inclusion, including residence life, the local community, the working and learning environment, and external factors and events such as national and international news or town gown relationships. * Learning focuses on perspective taking and learning about difference in the core curriculum, the disciplines, and the co-curriculum, as well as professional development for faculty and staff. This ground reaking book helps readers, no matter what position they occupy on campus, to develop the knowledge and capacities necessary to create inclusive classrooms and is premised on the understanding that identity, oppression, power and marginalization cannot be addressed by looking solely at single identities.

The Matter of a Marquess - Jess Michaels 2020-08-18

The third in USA Today Bestselling Author Jess Michaels' latest series. Viscountess Aurora Lovell has been in love with one man her entire life, but life intruded and never allowed her to be with him. She came to accept it, marrying for title rather than love. Now a widow, she's busy trying to figure out how to manage a scandal about to destroy her world when she is invited to a country party. Desperate to escape the realities of her life, she accepts. Nicholas Gillingham has always lived his life between two worlds. Raised by a servant, but secretly the illegitimate son of the infamous Duke of Roseford, he never felt he belonged. Injured saving others, he is now a war hero and improbably in line to be gifted a title for his service. A way to never feel so helpless as he did when he lost Aurora the first time. But to influence the right people, he needs his brother's help and finds himself at a country party. Time and distance mean nothing when Aurora and Nicholas meet again. But can they overcome a tangled past filled with bitter betrayal, a scandal that could ruin the future AND a very intrusive dog in order to find their way back to each other? Or will love be just as painful the second time around? Length: full length book / 70,000 words Heat Level: Fire extinguishers at the ready. This is the third book in the Duke's By-Blows series, but can be read as a standalone novel.

Presbyterian Questions, Presbyterian Answers, Revised edition - Donald K. McKim 2017-09-20

Presbyterians often have questions about Presbyterian theology and beliefs that are basic to Christian faith itself. Featuring a unique question-and-answer format, Presbyterian Questions, Presbyterian Answers is an accessible and concise treatment that provides a sampling of these questions on important topics and brief but complete answers from a distinguished Presbyterian theologian. Fully updated for the changes to the Presbyterian new Form of Government, this revised edition also includes updated entries and six new questions and answers. Arranged according to doctrinal topics, the book is ideal for individual and group

study, church officer training, new member and confirmation classes, and all those who are interested in Presbyterian theology.

Strategic Communication for Sustainable Organizations - Myria Allen 2015-07-16

This is a seminal book for anyone who wants to understand, shape or study the communication surrounding sustainability in their interactions with colleagues, employees, supply chain partners and external stakeholders. It develops essential insights on the basis of an extensive review of relevant theories and research drawn from multiple disciplines. Interview data gathered from organization members who are currently communicating about sustainability in their cities, universities, nongovernmental organizations, small businesses and large for-profit organizations provide valuable insights from a practitioner's perspective. The interviewees represent organizations such as the Portland Trailblazers, Tyson Foods, the City and County of Denver and the Natural Resources Defense Council. Theory, research and interview comments combine in a reader-friendly way to provide practical insights and stimulate future research.

Boundaries Workbook - Henry Cloud 2018-02-27

The New York Times bestselling book Boundaries has already helped millions understand that being a loving Christian doesn't mean you always have to say yes. Designed to help you create your own life-giving boundaries, Boundaries Workbook provides practical wisdom for setting boundaries in a highly connected digital age. This companion guide to Boundaries by Drs. Henry Cloud and John Townsend provides practical readings and prompts that will encourage you and teach you how to set healthy, necessary boundaries with your parents, spouse, children, friends, bosses, coworkers, social media, and more in order to help you become the best version of yourself. Following the latest edition of Boundaries chapter-by-chapter, these interactive exercises are designed to help you take a closer look at your own life and ask yourself: Why do I feel guilty about setting clear boundaries? What if the boundaries I set hurt the other person? Why is it difficult for me to hear no from others? What are examples of legitimate boundaries I can set at work and at home? How can I have good boundaries online and with social media? Can I stay connected while still setting boundaries with my phone? Boundaries Workbook gives you the support and the Scripture you need to help others respect your boundaries--whether you want to improve your work-life balance or you're practicing saying no when someone asks you to volunteer for one more activity. Discover firsthand that having good, biblical boundaries gives you the freedom to live as the loving, generous, fulfilled person God created you to be.

Authentic Happiness in Seven Emails - Javy W. Galindo 2015-01-01

An Entire Psychology of Happiness Course Conveyed in Easy-to-Read Emails Understand the psychology of happiness. Discover why happiness is a choice. And, learn four simple ways of choosing happiness in this succinct guide that can easily be read over a weekend or long plane flight. "What a beautiful gift--a few simple steps that can end what is so often, and for so many, a futile quest for a truly happy life...This is a simple, practical guide for anyone who's searching for that elusive state called true happiness." - John McGrail, Ph.D. Clinical Therapist. "What a terrific text, especially for those who have yet to learn lessons of happiness, success, and their personal responsibility in making each happen. Definitely a must read for all!" - LaQuisha Beckum Ed.S. Professor of Psychology. About Authentic Happiness in Seven Emails Have you found yourself caught in the happiness trap: in the continual pursuit of happiness? After years of

pursuing happiness through money, relationships, and material possessions, Vickay found herself unfulfilled and unhappy. A college course on the psychology of happiness taught by a philosophy instructor piqued her curiosity. On a whim she was inspired to contact the professor for some insights on how to break out of her rut. His ideas forever changed her approach to finding happiness and started her on a path towards living life more skillfully. It all began with an email, containing a simple question, asked at the right time: How can I be happier? Authentic Happiness in Seven Emails is the answer to that question. Through these seven emails, the professor shares three key concepts and four critical skills for living a happy life: - What makes us happy? - If happiness is a choice, why don't we always choose it? - What is happiness anyway? - How can we experience more peace and less negativity? - How can we experience more joy? - How can we be more engaged and satisfied with our lives? - How can we live a meaningful life and rediscover our sense of purpose? Topics Include: the happiness equation; positive psychology; flow experiences; the hedonic treadmill; hedonic adaptation; cultural conditioning and the unconscious mind; mindfulness and meditation; gratitude; negative thinking and the negativity bias; internal locus of control, and much more. The professor draws on modern psychological research to provide practical tools for experiencing consistent, everyday happiness, but he also raises philosophical questions that will have you discovering your own unique insights on life. Authentic Happiness in Seven Emails is more than a collection of emails or an introductory textbook to positive psychology. It is an inspirational, thought-provoking guide to the science of happiness and to a life well lived. Whether over a week, weekend, or long plane flight, what better investment of your time than to learn the basics of the psychology of happiness? Why not learn how to be happy starting today?

Ethical and Legal Issues in Neurology - James L. Bernat 2014-01-09

Advances in our understanding of the brain and rapid advances in the medical practice of neurology are creating questions and concerns from an ethical and legal perspective. Ethical and Legal Issues in Neurology provides a detailed review of various general aspects of neuroethics, and contains chapters dealing with a vast array of specific issues such as the role of religion, the ethics of invasive neuroscience research, and the impact of potential misconduct in neurologic practice. The book focuses particular attention on problems related to palliative care, euthanasia, dementia, and neurogenetic disorders, and concludes with examinations of consciousness, personal identity, and the definition of death. This volume focuses on practices not only in North America but also in Europe and the developing world. It is a useful resource for all neuroscience and neurology professionals, researchers, students, scholars, practicing clinical neurologists, mental health professionals, and psychiatrists. A comprehensive introduction and reference on neuroethics Includes coverage of how best to understand the ethics and legal aspects of dementia, palliative care, euthanasia and neurogenetic disorders Brings clarity to issues regarding ethics and legal responsibilities in the age of rapidly evolving brain science and related clinical practice

Murder, Motherhood, and Miraculous Grace - Debra Moerke 2019

When Debra Moerke and her husband decided to become foster parents, they never imagined how their lives would change. Debra became especially close to one little girl: four-year-old Hannah. She loved her and did everything she could to help Hannah learn to trust and teach her to feel safe. But when Hannah went back to her birth mother, Karen, it wasn't long before one of Debra's worst fears came true. Overwhelmed with horror and grief, Debra didn't think she could take anymore, but then she received a phone call from prison. Karen, facing a life sentence, was pregnant, and she had a shocking question to ask ...

Drawdown - Paul Hawken 2017-04-18

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

My Actions Matter - Kayla J. W. Marnach 2018-02

My Actions Matter helps children learn life value skills, creating a foundation on how they can connect with others. Told through rhyme from a child's point of view this book provides strategies for the child to learn how their actions influence others. The questions at the end of the book provide an easy transition for counselors and parents to open a discussion assisting the child in exploring ways they can effectively correct their behavior and connect with others. In my professional counseling, I encourage caregivers to use My Actions Matter as a part of their everyday interaction. Kayla has written an easy to use tool that is foundational in implementing life value strategies for children and their ability to connect with others. With the sing-song rhythm and diverse characters, children can relate to and understand that their actions do matter. The Behaviors Display a Need and Explorations and Activities sections add a dimension making My Actions Matter a complete tool for caregivers to use easily, effectively, and with confidence. I delight in reading My Actions Matter in session and with my own children. - Brandi Winters, LCSW

Essays on Freedom of Action (Routledge Revivals) - Ted Honderich 2015-06-03

Essays on Freedom of Action, first published in 1973, brings together original papers by contemporary British and American philosophers on questions which have long concerned philosophers and others: the question of whether persons are wholly a part of the natural world and their actions the necessary effects of causal processes, and the question of whether our actions are free, and such that we can be held responsible for them, even if they are the necessary effects of casual processes. This volume will be of interest not only to those who are primarily concerned with philosophy but also to students in those many other disciplines in which freedom and determinism arise as problems.

Black Lives Matter at School - Denisha Jones 2020-12-01

Violence Against Latina Immigrants - Roberta Villalon 2010-06-07

"A meaningful documentation of the ways in which structural and cultural conditions in current immigration and violence against women laws in the United States reinforce the hierarchies and intersections of race, class, and heterosexuality that impact on the lives of battered Latina immigrants."--- Natalie J. Sokoloff, author of *Domestic Violence at the Margins: Readings in Race, Class, Gender, and Culture* "With great sensitivity to the plight of Latina immigrants who face partner abuse, Villalon has produced a beautifully crafted and finely grained ethnography. The book makes a major contribution to the analysis of violence against women, immigration and citizenship. It is a must read for anyone interested in understanding the complexities involved in those issues."---Mounira M. Charrad, author of *States and Women's Rights: The Making of Postcolonial Tunisia, Algeria and Morocco* "Many of us have been waiting for this book for a long time. It does not disappoint. By creating a dialogue between domestic violence research and immigration studies, Villalon puts into sharp relief the experiences of women rendered invisible in both research traditions. By locating the experiences of immigrant women and their advocates within a rich ethnographic study of state policies and organizational practices, Villalon paints a complex picture of the contradictions that contribute to the reproduction of inequality. This is activist scholarship at its best."---Nancy A. Naples, author of *Grassroots Warriors: Activist Mothering, Community Work and the War against Poverty*. Caught between violent partners and the bureaucratic complications of the U.S. immigration system, many immigrant women are particularly vulnerable to abuse. For two years, Roberta Villalon volunteered at a nonprofit group that offered free legal services to underprivileged immigrants who had been victims of intimate partner violence. Her innovative study of Latina survivors of domestic abuse explores the intersection of immigration, citizenship, and violence, and shows how inequality is perpetuated even through domestic violence-based immigration laws and the well-intentioned delivery of vital services. Villalon proposes an active advocacy agenda and suggests possible policy changes, revealing the complexities of the lives of battered Latina immigrants.
