Sustainable Use of Water Resources - Müfit Bahadır 2017-01-27

According to the Sustainable Development Goals (SDGs), water is the limiting agent in sustainable development and is critical to all socio-economic aspects of human welfare, including security, energy, food, and health issues. It is essential for the production and preservation of foodstuff, is a host of benefits and services for people, and plays a key role in strengthening the resilience of social, economic, and environmental systems in the light of rapid and unpredictable changes. However, water can also pose serious challenges to sustainable development if not managed efficiently and equitably. In the past, many water related workshops and conferences have been held all over the world, however, the here reported one is the first expert workshop integrating social-economic and engineering scientists, practitioners, and policy makers in in the field of sustainable water management in Sub-Saharan Africa region. In addition, the subject of the workshop "Sustainable Use of Water Resources" addresses the challenges outlined in the Kenyan Vision 2030 programs. Additionally, Africa's rising population is the driving force of the demand for water and accelerates the degradation of water resources in many countries on the continent. Current research has projected that almost all African countries will face either absolute or economic water scarcity by 2025. The main objective of the workshop was to share experiences, knowledge, and research outcomes among experts of water and environment, and to discuss major problems and challenges in the field of sustainable water management in Sub-Saharan Africa Region. It also aimed (i) to improve the understandings of the interrelationship between SDGs and the Integrated Water Resources Management (IWRM); to identify the current trends in water management practices and their shortcomings; (iii) to establish a Sub-Saharan Africa Network of water experts; and (iv) to identify promising areas of future research for the Sub-Saharan Africa Region.

African Successes - David K. Leonard 1991-03-14

"For the past twenty-five years Kenya has progressed while much of Africa has stagnated. Instead of the economic disasters, underdevelopment, and serious food shortages that have plagued its neighbors, Kenya has enjoyed an expanding economy and agriculture. And instead of a corrupt and incompetent public administration, Kenya has established several successful rural development programs run by public servants with integrity and professional commitment. What accounts for these Kenyan successes? In this innovative study, David Leonard illustrates the way public policy is made and implemented in Kenya by focusing on four public officials who have had a great impact on rural development. He skillfully weaves his analyses of Kenya's political, economic, and administrative systems into evocative biographical portraits of Charles Karanja, General Manager of the Kenya Tea Development Authority, Harris Mule, administrative head of Finance and Planning, Ishmael Muriithi, head of the Veterinary Department, and Simeon Nyachae, Cabinet Secretary and chief of the Civil Service. The result is a fascinating glimpse of Kenyan political life from the inside, set in the context of the historical and social forces that have shaped that country's government"--Publisher's description.

The Status of Student Involvement in University Governance in Kenya - Mulinge, Munyae M. 2017-05-05

This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making. Data were collected from members of the student community utilizing a structured self-administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University (representing the public sector) and the United States International University (representing the private sector). The guiding argument for the study was that shared governance, one of the principles of good governance, is critical in enabling the universities to deliver their visions and the missions effectively. The results revealed that while in principle, Kenyan universities have embraced democratic governance in which all stakeholders, including students, have a role to play, in practice they continue to violate the core principles of good governance, particularly shared governance. Specifically, students, who are major stakeholders in university education, are largely excluded from significant structures of governance thereby limiting their influence and participation. Although their representation is mainly provided via student self-governance organs (unions, associations and/or councils), their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors. Student active involvement in decision making is mainly confined to lower levels such as the school/faculty and departmental/programme. The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya.

Discourses of Globalisation and Higher Education Reforms - Joseph Zajda 2022-04-16

This book examines some of the major higher education reforms and policy shifts globally, particularly in the light of recent shifts in quality and standards-driven education and policy research. It critiques the neo-liberal ideological imperatives of current higher education and policy reforms, and illustrates the way that changes in the relationship between the state and higher education policy affect current trends in higher education reforms. Using diverse comparative education paradigms from critical theory to historical-comparative research, the chapters focus on globalisation, ideology and higher education reforms and examine both the reasons and outcomes of higher education reforms and policy change. The book analyses and evaluates the policy shifts in methodological approaches to globalisation and higher education reforms, and their impact on education policy and pedagogy. The book contributes in a very scholarly way, to a more holistic understanding of

the nexus between globalisation, comparative education research and higher education reforms.
