Experiments in Ethics - Kwame Anthony Appiah 2010-03-30

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of “experimental philosophy,” provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to

rethink the very nature of the philosophical enterprise.

Future Drive - Daniel Sperling 2013-02-22

In *Future Drive*, Daniel Sperling addresses the adverse energy and environmental consequences of increased travel, and analyzes current initiatives to suggest strategies for creating a more environmentally benign system of transportation. Groundbreaking proposals are constructed around the idea of electric propulsion as the key to a sustainable transportation and energy system. Other essential elements include the ideas that: improving technology holds more promise than large-scale behavior modification technology initiatives must be matched with regulatory and policy initiatives government intervention should be flexible and incentive-based, but should also embrace selective technology-forcing measures more diversity and experimentation is needed with regard to vehicles and energy technologies Sperling evaluates past and current attempts to influence drivers and vehicle use, and articulates a clear and compelling vision of the future. He formulates a coherent and specific set of principles, strategies, and policies for redirecting the United States and other countries onto a new sustainable pathway.

Southern Edwardseans - Obbie Tyler Todd 2022-01-17

The founders and forerunners of the Southern Baptist Convention were fundamentally shaped by the thought of Puritan theologian Jonathan Edwards and his theological successors. While Baptists in the antebellum South boasted a different theological pedigree than Presbyterians or Congregationalists, and while they inhabited a Southern landscape unfamiliar to the bustling cities and tall forests of New England, they believed their similarities with Edwards far outweighed their differences. Like Edwards, these Baptists were revivalistic, Calvinistic, loosely confessional, and committed to practical divinity. In these four things, Southern Edwardseanism lived, moved, and had its being. In the

nineteenth-century, when so many Presbyterians scoffed at Edwards's "innovation" and Methodists scorned his Calvinism, Baptists found in Edwards a man after their own heart. By 1845, at the first Southern Baptist Convention, Southern Edwardseans had laid the groundwork for a convention marked by the theology of Jonathan Edwards.

Organizational Decision Making - Zur Shapira 2002-03-25

Decision making in organizations is often pictured as a coherent and rational process in which alternative interests and perspectives are considered in an orderly manner until the optimal alternative is selected. Yet, as many members of organizations have discovered from their own experience, real decision processes in organizations only seldom fit such a description. This book brings together researchers who focus on cognitive aspects of decision processes, on the one hand, and those who study organizational aspects such as conflict, incentives, power, and ambiguity, on the other. It draws from the tradition of Herbert Simon, who studied organizational decision making's pervasive use of bounded rationality and heuristics of reasoning. These multiple perspectives may further our understanding of organizational decision making.

Organizational Decision Making is particularly well suited for students and faculties of business, psychology, and public administration.

Unpublished Fragments from the Period of Thus Spoke

Zarathustra (Spring 1884-Winter 1884/85) - Friedrich Nietzsche 2022-01-25

With this latest book in the series, Stanford continues its English-

language publication of the famed Colli-Montinari edition of Nietzsche's complete works, which include the philosopher's notebooks and early unpublished writings. Scrupulously edited so as to establish a new standard for the field, each volume includes an Afterword that presents and contextualizes the material therein. This volume provides the first English translation of Nietzsche's unpublished notebooks from 1882-1884, the period in which he was composing the book that he considered his best and most important work, Thus Spoke Zarathustra. Crucial transitional documents in Nietzsche's intellectual development, the notebooks mark a shift into what is widely regarded as the philosopher's mature period. They reveal his long-term design of a fictional tetralogy charting the philosophical, pedagogical, and psychological journeys of his alter-ego, Zarathustra. Here, in nuce, appear Zarathustra's teaching about the death of God; his discovery that the secret of life is the will to power; and his most profound and most frightening thought--that his own life, human history, and the entire cosmos will eternally return. During this same period, Nietzsche was also composing preparatory notes for his next book, Beyond Good and Evil, and the notebooks are especially significant for the insight they provide into his evolving theory of drives, his critical ideas about the nature and history of morality, and his initial thoughts on one of his best-known concepts, the superhuman (*bermensch*).

Jewish Exiles and European Thought in the Shadow of the Third Reich - David Weinstein 2017-07-06

Hans Baron, Karl Popper, Leo Strauss and Erich Auerbach were among the many German-speaking Jewish intellectuals who fled Continental Europe with the rise of Nazism in the 1930s. Their scholarship, though not normally considered together, is studied here to demonstrate how, despite their different disciplines and distinctive modes of working, they responded polemically in the guise of traditional scholarship to their shared trauma. For each, the political calamity of European fascism was a profound intellectual crisis, requiring an intellectual response which Weinstein and Zakai now contextualize, ideologically and politically. They exemplify just how extensively, and sometimes how subtly, 1930s and 1940s scholarship was used not only to explain, but to fight the political evils that had infected modernity, victimizing so many. An original perspective on a popular area of research, this book draws upon a mass of secondary literature to provide an innovative and valuable contribution to twentieth-century intellectual history.

The Gongsun Longzi and Other Neglected Texts - Rafael Suter 2020-04-06

The Gongsun Longzi is often considered the only extant work of the Classical Chinese "School of Names", an early intellectual tradition (trad. dated to the 4th cent. B.C.) mainly concerned with logic and the philosophy of language. The Gongsun Longzi is a heterogeneous collection of five chapters that include short treatises and largely fictive dialogues between an anonymous persuader and his opponent, which typically revolve around a paradoxical claim. Its value as a testimony to Early Chinese philosophy, however, is somewhat controversial due to the

intricate textual history of the text and our limited knowledge about its intellectual backgrounds. This volume gathers contributions by leading specialists in the fields of Classical Chinese philosophy, philology, logic, and linguistics. Besides an overview of the scholarly literature on the topic and a detailed account of the reception of the text throughout time, it presents fresh insights into philological and philosophical problems raised by the Gongsun Longzi and other closely-related texts equally attributed to the "School of Names".

Between Reason and Revelation - Eric Ormsby 2012-05-31

I.B.Tauris in association with the Institute of Ismaili Studies This is the first English translation of the final philosophical work of the great eleventh-century Ismaili thinker, poet, and Fatimid emissary, N?sir-i Khusraw. Appointed from Cairo by command of the Fatimid Imam-caliph al-Mustansir to serve first as a d?r, and then as the hujjat, for the entire region of Khur?s?n, he maintained his allegiance both to his mission and his Imam-caliph for the rest of his life, even when threatened and driven into exile. Written during his exile in Badakhsh?n in the year 1070, N?sir-i Khusraw here develops a powerful presentation of both Aristotelian philosophy and Ismaili exegesis, or ta'w?l, and strives to show that they are ultimately in harmony. The work is presented as a learned commentary on a long philosophical poem, written in the previous century and sent to N?sir by the am?r of Badakhsh?n, 'Al? b. al-Asad, who copied the poem out in his own hand from memory and asked the poet-philosopher to explicate it. In doing so, N?sir ranges over a huge span of topics from logic and language to the nature of the physical world, from the spheres of the highest heavens to the plants and animals of the earthly realm, and, most importantly, hidden spiritual realities: the esoteric (b?t) as well as the exoteric (z?hir) realms. He thus discusses the nature of God, the creation of human beings, and the mysteries concealed in the physical world, itself a reflection of a higher, transcendent realm. *Between Reason and Revelation: Twin Wisdoms Reconciled* is an annotated translation of the Persian text prepared by Henry Corbin and Mohammed Mu'?n based on the single surviving manuscript of the work, now in the Süleymaniye Mosque Library in

Istanbul. It is a work of great philosophical and spiritual insight, which is also a pioneering attempt to tackle difficult intellectual problems in the

Persian language; it is at once lucid and lyrical, precise and speculative. N?sir's influence has been immense as both a poet and a thinker, and the Kit?b-i J?mi' al-hikmatayn is his crowning work.
