Byzantine Diplomacy -
Jonathan Shepard 1992
This book brings together
papers arising from the 24th
Spring Symposium of
Byzantine Studies held in
Cambridge in 1990. It
represents a comprehensive
investigation of Byzantine

diplomacy from the emergence
of the empire in late antiquity
to its final throes as it fell to
the Ottoman Turks. This is not
just a narrow study of political
relations, but a broad sweep
from Italy to the steppes of
Central Asia, from the imperial
court to the marriage bed, from

the scriptorium to the barracks. The book also includes a mysterious communication from a long-dead emperor.

Art of the Armenian Diaspora - Waldemar Deluga
2020-12-31

This volume includes 10 studies on the history and art of the Armenian Diaspora from the Byzantine to the modern period. The authors of the articles represent the most important research centres where research in the history of Armenian art is conducted. In several articles we have a presentation of unknown monuments like a recently discovered manuscript (from 1352), belonging to the collection of a French collector Guillaume Aral or the Armenian Bible from the Gulbenkian Museum in Lisbon (17th Century). The book also includes historical articles about the Armenian Diaspora in Central Europe. The volume ends with articles on the present day.

A Byzantine Book on Dream Interpretation - Maria V. Mavroudi 2002

This volume discusses the so-called Oneirocriticon of Achmet, the most important Byzantine work on dream interpretation which was written in Greek in the 10th century and has greatly influenced subsequent dreambooks in Byzantine Greek, Medieval Latin, and modern European languages. By comparing the Oneirocriticon with the 2nd-century A.D. dreambook of Artemidoros (translated into Arabic in the 9th century) and five medieval Arabic dreambooks, this study demonstrates that the Oneirocriticon is a Christian Greek adaption of Islamic Arabic material and that the similarities between it and Artemidoros are due to the

influence of Artemidoros on the Arabic sources of the Byzantine work. The Oneirocriticons textual tradition, its language, the identities of its author and patron, and its position among other Byzantine translations from Arabic into Greek are also investigated.

Eastern Approaches to

Byzantium - Antony Eastmond
2017-03-02

The eastern frontier of Byzantium and the interaction of the peoples that lived along it are the themes of this book. With a focus on the ninth to thirteenth centuries and dealing with both art history and history, the essays provide reconsiderations of Byzantine policy on its eastern borders, new interpretations and new materials on Byzantine relations with the Georgians, Armenians and Seljuqs, as well as studies on the writing of history among these peoples. Presenting research from Russia and Georgia as well as Europe and the USA, the contributors stress the interaction and interdependence of all the

peoples along this frontier zone, and consider the different ways in which the political and cultural power of Byzantium was appropriated. They provide important comparative evidence for the relationship between local and Byzantine cultures, and open up new avenues for research into the history of eastern Anatolia and the Caucasus. The volume arises from the thirty-third Spring Symposium of Byzantine Studies held at the University of Warwick in March 1999.

The Armenians in the Byzantine Empire - Peter Charanis 1963

Change in Byzantine Culture in the Eleventh and Twelfth Centuries - A. P.

Kazhdan 1990-02

documenting the dynamic social changes that occurred during the eleventh and twelfth centuries.

Cartographies of Travel and Navigation - James R.

Akerman 2010-11-15

Finding one's way with a map is a relatively recent phenomenon. In premodern times, maps were used, if at all, mainly for planning journeys in advance, not for guiding travelers on the road. With the exception of navigational sea charts, the use of maps by travelers only became common in the modern era; indeed, in the last two hundred years, maps have become the most ubiquitous and familiar genre of modern cartography. Examining the historical

relationship between travelers, navigation, and maps, *Cartographies of Travel and Navigation* considers the cartographic response to the new modalities of modern travel brought about by technological and institutional developments in the twentieth century. Highlighting the ways in which the travelers, operators, and planners of modern transportation systems value maps as both navigation tools and as representatives of a radical new mobility, this collection brings the cartography of travel—by road, sea, rail, and air—to the forefront, placing maps at the center of the history of travel and movement. Richly and colorfully illustrated, *Cartographies of Travel and Navigation* ably fills the void in historical literature on transportation mapping.

Coptic Monasteries: Egypt's Monastic Art And Architecture - Gawdat Gabra Abdel Sayed 2002

"Coptic Monasteries takes the reader on a tour of the best preserved and most significant

of Egypt's ancient religious centers, documenting the richness and the glory of this country's Coptic heritage." "An informative introduction by Tim Vivian brings to life the early Christian era, with background information on the origins of the Coptic Church as well as its rites and ceremonies, sketches of some of monasticism's founding figures, and accounts of some of the difficulties they faced, from religious schism to nomadic attacks." "Gawdat Gabra's expert commentary, complemented by almost one hundred full-color photographs of wall paintings and architectural features, covers monasteries from Aswan to Wadi al-Natrun. Ranging across a thousand years of history, Gabra's observations will make any reader an expert on the composition and content of some of Egypt's most outstanding religious art and the salient architectural features of each monastery, as well as the ongoing process of restoration that has returned much of their original vibrancy

to some of these works."--

Tobias Smollett, Novelist - Jerry C. Beasley 1998

Tobias Smollett (1721-1771) was a man of letters in the fullest sense. He was not only a novelist but also a playwright, poet, journalist, historian, travel writer, critic, translator, and editor. Trained as a physician, he saw the world with acutely sensitive eyes, believing that what was externally visible signified and gave definition to what could be known about the private, interior life. His fiction is therefore distinguished by its intensely visual qualities. Tobias Smollett: Novelist goes beyond all previous critical studies in its attention to these qualities in Smollett's novels, reading them as exercises of a visual imagination. Along with Defoe, Richardson, Fielding, and Sterne, Smollett was one of the major British novelists of

his generation. Like his kindred spirit William Hogarth, he was both chronicler and interpreter of what he saw. His episodically structured narratives reflect his vision of a harsh and unpredictable world, while his unforgettable characters display his deep understanding of the individual as moral agent. Jerry C. Beasley's book is both focused and broad in its range, crossing disciplines and genres as it seeks to demonstrate intersections between the graphic and verbal arts, always with an eye to how Smollett crafted his stories. Seventeen illustrations, many of them from works by Hogarth, complement the argument. This book honors Smollett as an author who wrote in an unorthodox but compelling way and makes the complexities of his narratives more accessible than they have ever been before.

Architecture and Landscape in Medieval Anatolia, 1100-1500 - Patricia Blessing 2017-03-08
Anatolia was home to a large number of polities in the medieval period. Given its location at the geographical and chronological juncture between Byzantines and the Ottomans, its story tends to be read through the Seljuk experience. This obscures the multiple experiences and spaces of Anatolia under the

Byzantine empire, Turko-Muslim dynasties contemporary to the Seljuks, the Mongol Ilkhanids, and the various beyliks of eastern and western Anatolia. This book looks beyond political structures and towards a reconsideration of the interactions between the rural and the urban; an analysis of the relationships between architecture, culture and power; and an examination of the region's multiple geographies. In order to expand historiographical perspectives it draws on a wide variety of sources (architectural, artistic, documentary and literary), including texts composed in several languages (Arabic, Armenian, Byzantine Greek, Persian and Turkish). Original in its coverage of this period from the perspective of multiple polities, religions and languages, this volume is also the first to truly embrace the cultural complexity that was inherent in the reality of daily life in medieval Anatolia and surrounding regions.

[The Voyage of John Huyghen Van Linschoten to the East Indies](#) - Jan Huygen van Linschoten 1885

[Regimes of Description](#) - John B. Bender 2005

Regimes of Description responds to the perception of how however imprecise that forms of knowledge in every sector of contemporary culture are being fundamentally reshaped by the digital revolution: music, speech, engineering diagrams, weather reports, works of visual art, even the words most

of us write are now subject, as Lyotard points out in *The Inhuman*, to a logic of the bit, the elemental unit of electronic information. It is now possible to slice, graft, and splice this knowledge in ways never before imagined using technologies that treat vast bodies of information as a stream of data bits. Programs and technical algorithms specify the criteria for discriminating between the data stream of a Mozart string quartet and the CAT scan of a diseased organ. But are these machine instructions and design parameters descriptions, or merely mechanical filters? And if the latter, what constitutes a description of digitally encoded knowledge? As a group, the essays in this volume pose that question as a first attempt to write the archaeology of the nature and history of description in the digital age.

Hogarth and His Times - David Bindman 1997-01-01

The reputation of William Hogarth (1697-1764) rests largely on his pictorial stories,

a series of engravings that he called "modern Moral Subjects," the most famous being the Harlot's and the Rake's Progress. In this catalog, David Bindman works backward from Hogarth's reputation today--where he is seen by some as a conservative populist and by others as a political radical--and examines his impact on various artists over the past three centuries. Bindman also sets Hogarth's prints firmly in their historical context, discussing the artist's public and the different influences on his work, from Roman satire to the politics of the day. The result is an engaging and insightful portrayal not only of William Hogarth, but also of the middle years of the eighteenth century. Art lovers will enjoy this book, but so too will anyone with an interest in the literature and history of the mid-eighteenth century. The Armenian Gospel of the Infancy - 2008-07-03

The various versions of the Infancy Gospels illustrate how stories about the Virgin and Child lend themselves to be told and retold - much like the stories in the canonical Gospels. This first translation of the full text of the Armenian Gospel of the Infancy, itself derived from a sixth-century Syriac text that no longer exists, provides two variants of the famous narrative and several recensions or ancient editions. Stories about Jesus, many of them unique to this gospel, are included to show how he exercised his sovereign and divine will even as a child. This edition also contains three early Armenian versions of the Protevangelium of James,

which with other ancient sources dependent on it (like the Infancy Gospel of Thomas and the Gospel of Pseudo-Matthew) constitute the basic tradition in the formation of the later Infancy Gospels. These writings are our earliest sources about the parents of the Virgin Mary (Joachim and Anne) and her miraculous birth. They also form the basis for the dogma of her Immaculate Conception and perpetual virginity after the birth of Jesus, and lay the ground for certain of the Marian feasts celebrated since the fourth century. Terian's engaging introduction and annotation of the texts place this rare document clearly in its cultural and historical context and provide extensive references to the surrounding textual tradition. These extraordinary stories will appeal to all with an interest in the early church.
