**16 Cases of Mission Command** - Donald P., Donald Wright, Ph. D. 2013-12

For the US Army to succeed in the 21st Century, Soldiers of all ranks must understand and use Mission Command. Mission Command empowers leaders at all levels, allowing them to synchronize all warfighting functions and information systems to seize, retain, and exploit the initiative against a range of adversaries. This collection of historical vignettes seeks to sharpen our understanding of Mission Command philosophy and practice by providing examples from the past in which Mission Command principles played a decisive role. Some vignettes show junior officers following their commander's intent and exercising disciplined initiative in very chaotic combat operations. Others recount how field grade officers built cohesive teams that relied on mutual trust to achieve key operational objectives. Each historical account is complemented by an annotated explanation of how the six Mission Command principles shaped the action. For this reason, the collection is ideal for leader development in the Army school system as well as for unit and individual professional development. Mission Command places great responsibility on our Soldiers.

*Cuba's Car Culture* - Tom Cotter 2016-10-01

Cuba's Car Culture drives through Cuba's love of American cars of the '40s and '50s, and the ingenuity that keeps them running despite the U.S. embargo. 2017 Silver Medal Winner of the International Automotive Media Competition! The story of how Cuba came to be trapped in automotive time is a fascinating one. For decades, the island country had enjoyed healthy tourism trade and American outpost status, and by the 1950s it had the highest per capita automotive purchasing of any Latin American country. But when Cuba fell to communist rebels in 1959, so ended the inflow of new cars. Since then, trade embargo forced Cuba's car enthusiasts to develop a unique and insular culture, one marked by great creativity, such as: -Keeping a car alive with no opportunity to acquire replacement parts -Customizing a car with no access to aftermarket parts -Drag racing with no drag strip In many ways, Cuba is an automotive time warp, where the newest car is a 1959 Chevy or perhaps one of the Soviet Ladas. Cuba's Car Culture offers an inside look at a unique car culture, populated with cars that have been cut off from the world so long that they've morphed into something else in the spirit of automotive survival. Authors Tom Cotter and Bill Warner (founder of the Amelia Island Concours) take readers on a whirlwind tour of all things automotive, beginning with Cuba's pre-Castro car and racing

history, up to today's lost collector cars, street racing, and the challenges of keeping decades-old cars on the road. Cuba's Car Culture is illustrated throughout with rare historical photos as well as contemporary photos of Cuba's current car scene. For anyone who enjoys classic cars, whether they're old Chevy Bel-Airs, Studebakers, or Ford Fairlanes, a cruise around Cuba will make you feel like a kid in a candy store.

[The Harley-Davidson Story](#) - Aaron Frank 2018-11-20

The Harley-Davidson Story: Tales from the Archives is a fascinating, visually driven overview of the motor company's rich story, created in cooperation with the Harley-Davidson Museum. The story of Harley-Davidson is a classic American tale of spirit, invention, and the right idea at the right time. From its beginning in a small Milwaukee shed in 1903, William Harley and his cousins, the Davidson brothers, set in motion what would eventually become the world's most iconic motorcycle company. While other motorcycle companies rose and fell through the teens and 1920s, Harley went from strength to strength, whether introducing its first V-twin motor or dominating race tracks across America. The Milwaukee Miracle even prospered during WWII, building war bikes for the armed forces. By the 1950s, they'd buried their last American-built competitor, Indian, and gained a hold over the US market that they maintain to this day. A remarkable story deserves a remarkable space to recount it. Such is the Harley-Davidson Museum in Milwaukee, which opened in 2009. Harley-Davidson partnered with Motorbooks to create this book relaying Harley-Davidson's story, as told through the museum's displays and archive assets.

*Brough Superior* - Peter Miller 2009-10-15

George Brough started building motorcycles shortly after the First World War. The machines were named Brough Superior both to distinguish them from his father's Brough machines and to denote the highest levels of performance and quality of manufacture. Throughout the 1920s and 1930s, the name Brough Superior was synonymous with the very best in motorcycle design. The machines gained fame in the hands of riders such as Bert le Vack, Eric Fernihough, Noel Pope and, of course, T. E. Lawrence 'Lawrence of Arabia'. This book documents the full story of Brough and Brough Superior from the early years of the twentieth century through to the end of production in the Second World War, and post-war attempts at revival.

**Sicily and the Surrender of Italy** - Lieutenant Albert Garland 2015-07-16

(Includes maps) This volume, the second to be published in the Mediterranean Theater of Operations subseries, takes up where George F. Howe's Northwest Africa: Seizing the Initiative in the West left off. It integrates the Sicilian Campaign with the complicated negotiations involved in the surrender of Italy. The Sicilian Campaign was as complex as the negotiations, and is equally instructive. On the Allied side it included American, British, and Canadian soldiers as well as some Tabors of Goums; major segments of the U.S. Army Air Forces and of the Royal Air Force; and substantial contingents of the U.S. Navy and the Royal Navy. Opposing the Allies were ground troops and air forces of Italy and Germany, and the Italian Navy. The fighting included a wide variety of operations: the largest amphibious assault of World War II; parachute jumps and air landings; extended overland marches; tank battles; precise and remarkably successful naval gunfire support of troops on shore; agonizing struggles for ridge tops; and extensive and

skillful artillery support. Sicily was a testing ground for the U.S. soldier, fighting beside the more experienced troops of the British Eighth Army, and there the American soldier showed what he could do. The negotiations involved in Italy's surrender were rivaled in complexity and delicacy only by those leading up to the Korean armistice. The relationship of tactical to diplomatic activity is one of the most instructive and interesting features of this volume. Military men were required to double as diplomats and to play both roles with skill.

Volume 5, *Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations*, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

**The Planetary Clock** - Paul Giles 2021-02-11

The theme of *The Planetary Clock* is the representation of time in postmodern culture and the way temporality as a global phenomenon manifests itself differently across an antipodean axis. To trace postmodernism in an expansive spatial and temporal arc, from its formal experimentation in the 1960s to environmental concerns in the twenty-first century, is to describe a richer and more complex version of this cultural phenomenon. Exploring different scales of time from a Southern Hemisphere perspective, with a special emphasis on issues of Indigeneity and the Anthropocene, *The Planetary Clock* offers a wide-ranging, revisionist account of postmodernism, reinterpreting literature, film, music, and visual art of the post-1960 period within a planetary framework. By bringing the culture of Australia and New Zealand into dialogue with other Western narratives, it suggests how an antipodean impulse, involving the transposition of the world into different spatial and temporal dimensions, has long been an integral (if generally occluded) aspect of postmodernism. Taking its title from a Florentine clock designed in 1510 to measure worldly time alongside the rotation of the planets, *The Planetary Clock* ranges across well-known American postmodernists (John Barth, Toni Morrison) to more recent science fiction writers (Octavia Butler, Richard Powers), while bringing the US tradition into juxtaposition with both its English (Philip Larkin, Ian McEwan) and Australian (Les Murray, Alexis Wright) counterparts. By aligning cultural postmodernism with music (Messiaen, Ligeti, Birtwistle), the visual arts (Hockney, Blackman, Fiona Hall), and cinema (Rohmer, Haneke, Tarantino), this volume enlarges our understanding of global postmodernism for the twenty-first century.

**Getting the message through: A Branch History of the U.S. Army Signal Corps** - Rebecca Robbins Raines 1996

*Getting the Message Through*, the companion volume to Rebecca Robbins Raines' *Signal Corps*, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War,

through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

**Letters of William Gaddis** - William Gaddis 2013-03-14

Now recognized as one of the giants of postwar American fiction, William Gaddis (1922-98) shunned the spotlight during his life, which makes this collection of his letters a revelation. Beginning in 1930 when Gaddis was at boarding-school and ending in September 1998, a few months before his death, these letters function as a kind of autobiography, and are all the more valuable because Gaddis was not an autobiographical writer. Here we see him forging his first novel *The Recognitions* (1955) while living in Mexico, fighting in a revolution in Costa Rica, and working in Spain, France, and North Africa. Over the next twenty years he struggles to find time to write the National Book Award-winning *J R* (1975) amid the complications of work and family; deals with divorce and disillusionment before reviving his career with *Carpenter's Gothic* (1985); then teaches himself enough about the law to indite *A Frolic of His Own* (1994), which earned him another NBA. Returning to a topic he first wrote about in the 1940s, he finishes his last novel *Agape Agape* as he lay dying.
