Leadership for Learning - John MacBeath 2008

The impact of globalization is being felt in numerous spheres of educational policy and practice, in rapid growth of information and communication technologies, in economic transformation, and international market competition, all of which conspire to create new demands and place new pressures on school leadership. Drawing on examples from 12 countries in different parts of the world. The Editors have brought together 28 renowned scholars in Europe, Australia, North America, and Asia-Pacific countries to contribute to this book. The first six chapters address key themes and provide the framework for the 12 country reports which follow. With the aim of increasing international understanding and teasing out issues of transfer and application across cultural and linguistic boundaries, we have chosen national reports which cover a range of countries representing a diversity of culture and contextual backgrounds. We believe, these chapters and the book as a whole, can provide important theoretical, policy and practical implications that will inform the debate about the future of education and of schooling. While each of these country narratives underscore the importance of context, at the same time there are insights and values held in common.

Short-term Empires in World History - Robert Rollinger 2020-06-04

The volume will focus on a comparative level on a specific group of states that are commonly labelled as "empires" and that we encounter through all historical periods. Although they are very successful at the very beginning, like most empires are, this success is very ephemeral and transient. The era of conquest is never followed by a period of consolidation. Collapse and/or reduction to much smaller dimension run as fast as the process of wide-ranging conquest and expansion. The volume singles out a series of such "short-term empires" and aims to provide a methodologically clearly structured as well as a uniform and consistent approach by developing a general set of questions that guarantee the possibility to compare and distinguish. This way it intends to examine not only already well established empires but also to illuminate forgotten ones.

Über Die Sprache Der Jakuten - Otto Von Bohtlingk 1997-07-29

This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficult accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

Lines in the Sea - Giampiero Francalanci 1994-09-29

It is very hard for a lawyer to understand the complex scientific prerequisites that determine the drawing of a certain line, and very hard for a scientist to follow the juridical subtleties that arise once that line is embodied in a legal text. This is the reason why the editors have tried to pool their different experiences in this atlas. They have chosen some important cases and topics and produced the relevant maps and comments. In the commentary they have stressed either the scientific or the legal aspects of the subject, or both, as the case may require. The main aim of "Lines in the Sea" is to give a graphical representation of those provisions of the 1982 United Nations Convention on the Law of

the Sea that can be reproduced on maps. The previous 1958 Geneva Conventions have also been considered, together with the practice that has developed through agreements between the States concerned.

The Čakavian Dialect of Orbanici Near Žminj in Istria - Janneke Kalsbeek 1998

Čakavian dialects, the westernmost dialects of the South Slavic language area, have long attracted the attention of investigators, largely owing to the complexity of their prosodic systems. These prosodic systems are interesting not only from a typological point of view, but also contain material of great importance for the study of Slavic historical accentology. The description of a Čakavian dialect in Istria (Croatia) presented in this volume contributes data for South Slavic historical dialectology, and for historical accentology. The book includes an introduction on Čakavian and other South Slavic dialects, particularly those spoken in Istria, and chapters, based on fieldwork by the author, on the phonology, morphology and some syntactic phenomena of the dialect of Orbanici. In the chapters on morphology, special attention is paid to accentuation types. The book also contains dialect texts (70 pp.) and a lexicon, in which all attested forms are listed.

Eurythmy and the English Language - Annelies Davidson 2015-03-12

Since its first appearance in the study-edition of Rudolf Steiner's lecture-cycle *Eurythmy as Visible Speech* (Anastasi Ltd, 2005) this contribution "Eurythmy and the English Language" by Annelies Davidson has proved its value. Packed with useful observations, and above all, an examination of the living principles, this essay is recognised as the definitive introduction to an important area of eurythmy research and practice. The writer reflects on years of artistic exploration of the English language with Marguerite Lundgren and on her own extensive work. Marguerite Lundgren was a living example of how it is possible to develop an ear for the creative impulses available especially in music and the sounds of speech. Along with other authorities, mention is made here of Marguerite's respect for the sensitive scholarship of Adam Bittleston - particularly evident in the study of Shakespeare - and of the insights of the philosopher of language Owen Barfield. These scholars were profoundly aware of the work of the polymath and linguist Professor Hermann Bech, who, as a foremost pupil of Rudolf Steiner, followed up Novalis' claim for "genetic etymology," for the creative sounds of speech. This Mystery wisdom goes back to the first known theory of language in Plato's dialogue *Cratylus*. Eurythmists attempt to access the primal creativity still available, as Steiner points out, in the language we speak today. In this way, in pursuing their art eurythmists aim to contribute to the renewal of the word in our time. ANNELIES DAVIDSON was born and educated in Holland. In 1974 she graduated from the London School of Eurythmy, England, taught around London and performed with the London Stage Group which toured Europe and the USA. From 1986-2002 she taught in the Eurythmy School, Spring Valley, New York and performed with the Ensemble. She currently works freelance as a teacher and director, focussing on eurythmy in relation to the spoken word.

Pierer's Universal-Lexikon der Vergangenheit und Gegenwart oder neuestes encyclopädisches Wörterbuch der Wissenschaften, Künste und Gewerbe - Heinrich August Pierer 1862

Hitler - Benes - Tito - Arnold Suppan 2019-11-05

In the spring of 1945, Fuhrer and Reich Chancellor Adolf Hitler, President Edvard Benes, and Marshal Josip Broz Tito stood as examples of the complete rupture between the Germans and Austrians on the one hand, and the Czechs, Slovaks, Slovenes, Croats, Serbs, and Bosniaks on the other. The total break that occurred in World War II with war crimes, crimes against humanity, and even genocides (particularly against the Jews and "Gypsies") had a long pre-history, beginning with violent nationalist clashes in the Habsburg Monarchy during the revolutions of 1848/49. Therefore, this monograph - based on a broad range of international primary and secondary sources - explores the development of the political, legal, economic, social, and cultural "communities of conflict" within Austria-Hungary, especially in the Bohemian and South Slavic countries, the making of the Paris Peace Treaties in 1919/20 by violating President Wilson's principle of self-determination, particularly in drawing new borders and creating new economic units, and the perpetuated ethnic-national conflicts between Czechs and Germans, Slovaks and Magyars, Slovenes and Germans, Croats and Serbs as well as Serbs and Germans in the successor states, deepening the differences between the nations of East-Central Europe. Although many kings, presidents, chancellors, ministers, governors, diplomats, business tycoons, generals, Nazi-Gauleiter, higher SS and police leaders, and Communist functionaries have appeared as historical actors in the 170 years of East-Central and Southeastern European history, Hitler, Benes, and Tito remain especially present in historical memory at the beginning of the twenty-first century.

The Kajkavian Dialect of Hidegség and Fertóhomok - H. Peter Houtzagers 1999

Houtzagers, for whom no credentials are cited, offers a synchronic description of a Croatian immigrant dialect spoken in and around the Austrian-Hungarian border region, specifically in the two villages of the title. The dialect is unique in being the only surviving Kajkavian dialect that was separated from its original surroundings as early as the 16th century, and there are indications that these original surroundings were located somewhat east of where Kajkavian dialects are spoken today. The study contributes to the understanding not only of Serbo-Croatian dialects, but also of how newcomers and natives impact each other's speech, and of how dialects die. There is no index. Die Slavischen Sprachen - Sebastian Kempgen 2009

This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. To attain these objectives, the series will aim for a standard comparable to that of the leading handbooks in other disciplines, and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings, and up-to-date methodology. The editors, both of the series and of the individual volumes, and the individual contributors, are committed to this aim. The languages of publication are English, German, and French. The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks; however no inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended, and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set time-table for the publication of the whole series. Each volume will be a self-contained work, complete in itself. The order in which the handbooks are published does not imply any rank ordering, but is determined by the way in which the series is organized; the editor of the whole series enlist a competent editor for each individual volume. Once the principal editor for a volume has been found, he or she then has a completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervene where questions of delineation between individual volumes are concerned. It is felt that this (modus operandi) is best suited to achieving the objectives of the series, namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume.

Bilingual - François Grosjean 2010-08-15

Whether in family life, social interactions, or business negotiations, half the people in the world speak more than one language every day. Yet many myths persist about bilingualism and bilinguals. Does being bilingual mean you are equally fluent in two languages, or that you belong to two cultures, or even that you have multiple personalities? Can you become bilingual only as a child? Why do bilinguals switch from one language to another in mid-sentence? Will raising bilingual children confuse and delay their learning of any language? In a lively and often entertaining book, an international authority on bilingualism, son of an English mother and a French father, explores the many facets of bilingualism. In this book, François Grosjean draws on research, interviews, autobiographies, and the engaging examples of bilingual authors. He describes the various strategies—some useful, some not—used by parents raising bilingual children, explains how children easily pick up and forget languages, and considers how bilingualism affects the experience and expression of emotions, thoughts, and dreams. This book shows that speaking two or more languages is not a sign of intelligence, evasiveness, cultural alienation, or political disloyalty. For millions of people, it's simply a way of navigating the complexities of life.

The Palgrave Handbook of Slavic Languages, Identities and Borders - Tomasz Kamusella 2016-04-29

This book analyzes the creation of languages across the Slavophone areas of the world and their deployment for political projects and identity building, mainly after 1989. It offers perspectives from a number of disciplines such as sociolinguistics, socio-political history and language policy. Languages are artefacts of culture, meaning they are created by people. They are often used for identity building and maintenance, but in Central and Eastern Europe they became the basis of nation building and national statehood maintenance. The recent split of the Serbo-Croatian language in the wake of the break-up of Yugoslavia amply illustrates the highly politicized role of languages in this region, which is also home to most of the world's Slavic-speakers. This volume presents and analyzes the creation of languages across the Slavophone areas of the world and their deployment for political projects and identity building, mainly after 1989. The overview concludes with a reflection on the recent rise of Slavophone speech communities in Western Europe and Israel. The book brings together renowned international scholars who offer a variety of perspectives from a number of disciplines and sub-fields such as sociolinguistics, socio-political history and language policy, making this book of great interest to historians, sociologists, political scientists and anthropologists interested in Central and Eastern Europe and Slavic Studies.

Language and Identity in the Balkans - Robert D. Greenberg 2004-03-25
Language rifts in the Balkans are endemic and have long been both a symptom of ethnic animosity and a cause for inflaming it. But the break-up of the Serbo-Croatian language into four languages on the path towards mutual unintelligibility within a decade is, by any previous standard of linguistic behaviour, extraordinary. Robert Greenberg describes how it happened. Basing his account on first-hand observations in the region before and since the communist demise, he evokes the drama and emotional discord as different factions sought to exploit, prevent, exacerbate, accelerate or just make sense of the chaotic and unpredictable language situation. His fascinating account offers insights into the nature of language change and the relation between language and identity. It also provides a uniquely vivid perspective on nationalism and identity politics in the former Yugoslavia.
