Mazda MX-5 Miata - Thomas Bryant 2014-11-01

Celebrating a quarter century of the car that redefined its genre. [apply edits made above] The Mazda MX-5, (known as Miata in North America and Eunos Roadster in Japan), revolutionized the lightweight two-seater roadster market. By taking the front-engine, rear-wheel-drive layout of traditional British and Italian roadsters and combining it with the modern function and reliability for which Japanese cars were justly famous, Mazda created what many consider the perfect sports car. The MX-5 became the best-selling sports car of all time, selling over a million units worldwide. Customers proved that they hadn't lost their desire for simple, lightweight two-seat convertibles; they had simply lost their desire for unreliable, archaic European anachronisms that caught on fire as part of their charm. In 2009, English automotive critic Jeremy Clarkson wrote: "The fact is that if you want a sports car, the MX-5 is perfect. Nothing on the road will give you better value. Nothing will give you so much fun. The only reason I'm giving it five stars is because I can't give it 14." Mazda MX-5 Miata: Twenty-Five Years is a handsomely-illustrated coffee-table book celebrating Mazda's ground-breaking MX-5 Miata, the car that revolutionized the lightweight two-seater roadster market.

Forests and Globalization - William Nikolakis 2014-09-19

The overarching contribution of this book is a review and assessment of the current and future impacts of globalization on the world's forests. The work has been developed by the "Resources for the Future" Task Force for the International Union of Forest Research Organizations (IUFRO). Four key themes are addressed: the effect of globalization on forests (including future trade flows); plantations as the primary source of forest products and its consequences, including plant breeding and forest health; the effect of new products such as bio-products and markets on forests; and the emergence of forest ecosystem services and their impact on the landscape and human communities. These four themes are examined in detail to map out the impacts of these trends for forests throughout the world and at multiple scales, and how forest research needs to be adapted to address these trends. Overall, the volume provides a major synthesis of current thinking and knowledge on the topic for advanced students, as well as policy-makers and professionals in the forest sector.

Putin's People - Catherine Belton 2020-06-23

A New York Times and Sunday Times bestseller | A New York Times Book Review Editors' Choice Named a best book of the year by The Economist | Financial Times | New Statesman | The Telegraph "[Putin's People] will surely now become the definitive account of the rise of Putin and Putinism." —Anne Applebaum, The Atlantic "This riveting, immaculately researched book is arguably the best single volume written about Putin, the people around him and perhaps even about contemporary Russia itself in the past three decades." —Peter Frankopan, Financial Times Interference in American elections. The sponsorship of extremist politics in Europe. War in Ukraine. In recent years, Vladimir Putin's Russia has waged a concerted campaign to expand its influence and undermine Western institutions. But how and why did all this come about, and who has orchestrated it? In Putin's People, the investigative journalist and former Moscow correspondent Catherine Belton reveals the untold story of how Vladimir Putin and the small group of KGB men surrounding him rose to power and looted their country. Delving deep into the workings of Putin's Kremlin, Belton accesses key inside players to reveal how Putin replaced the freewheeling tycoons of the Yeltsin era with a new generation of loyal oligarchs, who in turn subverted Russia's economy and legal system and extended the Kremlin's reach into the United States and Europe. The result is a chilling and revelatory exposé of the KGB's revanche—a story that begins in the murk of the Soviet collapse, when networks of operatives were able to siphon billions of dollars out of state enterprises and move their spoils into the West. Putin and his allies subsequently completed the agenda, reasserting Russian power while taking control of the economy for themselves, suppressing independent voices, and launching covert influence operations abroad. Ranging from Moscow and London to Switzerland and Brooklyn's Brighton Beach—and assembling a colorful cast of characters to match—Putin's People is the definitive account of how hopes for the new Russia went astray, with stark consequences for its inhabitants and, increasingly, the world.

The Swiss Alps Travel Adventures - Kimberly Rinker 2014-06-30

The Valais region encompasses Switzerland's most rugged terrain. Our coverage extends from the gateway city of Geneva to the upper reaches of the Walliser Alps along the Italian frontier. Visitors are apt to enter the region in Geneva, a small, cosmopolitan city between the border of France and the western end of Lake Geneva, known in French as Lac Lemman. The city bustles with the business of international organizations, plays along a garden-lined lakefront, and harbors a pleasant pedestrian old town. The city of Lausanne lies across the lake, drawing visitors for

its own pleasant lakefront and the Olympic Games History Museum. Beyond, in the Valais region, protrudes the magnificent Matterhorn Peak, with famed Zermatt at its foot and secluded Saas-Fee just over the hill. In southeastern Switzerland next to the border of Italy, Zermatt reclines amid a cluster of 38 4,000-m peaks. Above the town towers the distinctive hook of the Matterhorn crest. For most visitors, Zermatt isn't a place to relax; it's a place to play, and play hard. About 400 km of hiking paths wind through the mountains above Zermatt, most areas well-served by cableway or mountain train. The most spectacular of the trails run through the Sunnegga and Rothorn areas, winding around lakes, skirting glaciers, and all within view of the Matterhorn across the valley. One of these, the Marmot Trail, leads from mid-mountain Rothorn at Blauherd down to Sunnegga via a path lined with several marmot family groups. Walkers wanting a closer look at the majestic mountain should try the new Matterhorn Trail. It drops from the lift station at Schwarzsee, along the foot of the Matterhorn to Stafel, to the lake at Zmutt, and then down to the lift station at Furi OCo passing several inviting mountain huts along the way. Saas-Fee lies to the east of Zermatt, on the opposite side of the towering Dom. Like Zermatt, the resort is reached via a climb up the forked valley south of Visp OCo to reach Saas-Fee, drivers at Stalden take the left fork toward Saastal instead of the right fork toward Tnsch. (Although only a few km apart as-the-crow-flies, the drive between Saas-Fee and Zermatt takes around an hour.) Also like Zermatt, the village of Saas-Fee is technically car-free, served only by a swarm of electric taxi carts. The swarm here, however, is considerably smaller and less menacing. Drivers park in the nine-story cliff-side garage on the village edge and, from the garage loading bays, telephone hotels for pickup. (Visitors arriving by train must bus in from Brig or Visp.) Guests here split into two distinct camps OCo those who've come for the small-resort exclusivity, and those who've come for the big-mountain recreation. Both camps enjoy the views from the Allalin, where the world's highest revolving restaurant, the Drehrestaurant Metro-Alpin, does a full rotation each hour. Steps away, adventurers stroll through the largest ice pavilion in the world (the Mittelallin Eis pavillon), a cave carved out of the glacier and embellished with sculptures and a chapel. At the heart of the Alps lies Switzerland; at the heart of Switzerland lies the Jungfrau region; and at the heart of the Jungfrau lies Interlaken. Tucked away in what is arguably the most spectacular Alpine scenery in the world, Interlaken enjoys renown for its diversity of outdoor adventures and its role as the Jungfrau region's mountain transportation hub. It's an inviting town OCo a busy, bustling place with back alleys few tourists take time to explore. These are just a few of the Swiss gems explored in this guide, equivalent to 160 print pages and loaded with detail on all the restaurants, hotels, shops and activities you'll want to know about. Plus, there are maps and photos throughout. This is an excerpt from the much larger Adventure Guide to the Alps, which runs 500 pages in print, and covers the German, French, Austrian and Italian Alps as well."

Intelligent Transportation Systems - Muhammad Alam 2016-01-20

This book presents cutting-edge work on the most challenging research issues concerning intelligent transportation systems (ITS), introducing selected, highly relevant advanced research on scheduling and real-time communication for vehicular networks, as well as fault tolerance, test beds and simulations for ITS. The authors define new architectures that support cooperative sensing in ITS and offer guidance for the development of a reference end-to-end implementation. The presented results allow advanced traffic and travel management strategies to be formulated on the basis of reliable and real-time input data. The effectiveness of these new strategies, together with the proposed systems, is assessed in field trials and via simulations. The chapters in this book detail new research findings, algorithms, protocols, and the development of an implementation platform for ITS that merges and integrates heterogeneous data sources into a common system. In addition, they provide a set of advanced tools for the control, monitoring, simulation, and prediction of traffic that result in safer, more sustainable, and less congested roads. Work undertaken within the framework of the FP7 project ICSI (Intelligent Cooperative Sensing for Improved traffic efficiency) is also included in the research activities addressed.

Creative Intelligence in the 21st Century - Don Ambrose 2016-07-15

How can creative individuals and societies adapt to complex 21st-century conditions? Will civilizations thrive or collapse in the decades to come if they are not creative enough, or if they are too creative? Interest in these questions is growing; however, until now there has been inadequate understanding of the socioeconomic and cultural trends and issues that influence creativity. This book provides that understanding while yielding insights from many of the world's leading creativity researchers and educational experts. The book begins with a big-picture, interdisciplinary overview of the socioeconomic, cultural, and technological pressures emerging from 21st-century globalization and describes some ways in which those pressures simultaneously suppress, distort, and invigorate creativity in general, and creative education in particular. After that, prominent scholars of creativity and education use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world. "The world's problems are complex, messy, and seemingly intractable, but history tells us that human creativity finds solutions to even the most daunting problems. This book collects perspectives on creative development from many of the most respected scholars and educators working in creativity and innovation today, helping chart a path forward for creativity in the 21st century." - Jonathan Plucker, Julian C. Stanley Endowed Professor of Talent Development, Johns Hopkins University "A volume taking on macro-opportunities and macroproblems by editors Ambrose and Sternberg is a treat for readers who want to think 'big' and think 'forward.' Kick back for an imaginative journey that reaches back to early global insights but propels us solidly into the 21st century and beyond." - Ann Robinson, Past President, National Association for Gifted Children
