

Images Numa C Riques Et Formats Graphiques

Thank you very much for reading **Images Numa C Riques Et Formats Graphiques** . Maybe you have knowledge that, people have search hundreds times for their chosen readings like this Images Numa C Riques Et Formats Graphiques , but end up in infectious downloads. Rather than enjoying a good book with a cup of tea in the afternoon, instead they cope with some infectious bugs inside their computer.

Images Numa C Riques Et Formats Graphiques is available in our digital library an online access to it is set as public so you can download it instantly.

Our books collection saves in multiple locations, allowing you to get the most less latency time to download any of our books like this one. Merely said, the Images Numa C Riques Et Formats Graphiques is universally compatible with any devices to read

Minerva's Message - Martin S. Staum 1996-10-17

In theory the CMPS was set up to enshrine the human and social studies that were at the heart of Enlightenment culture. Staum illustrates, however, that the Institute helped transform key ideas of the Enlightenment in order to maintain civil rights while upholding social stability, and that the social and political assumptions on which it was based affected notions of social science. He traces the careers of individual members and the factions within the Institute, arguing that the discord within the CMPS reflects the unravelling of Enlightenment culture. *Minerva's Message* presents a valuable overview of the intellectual life of the period and brings together new evidence about the social sciences in their nascent period.

Women in Dada - Naomi Sawelson-Gorse 2001

This book is the first to make the case that women's changing role in European and American society was critical to Dada. Debates about birth control and suffrage, a declining male population and expanding female workforce, the emergence of the New Woman, and Freudianism were among the forces that contributed to the dadaist enterprise. Among the female dadaists discussed are the German émigré Baroness Elsa von Freytag-Loringhoven; Berlin dadaist Hannah Höch; expatriate poet and artist Mina Loy; the "Queen of Greenwich Village," Clara Tice; Margaret Anderson and Jane Heap, the lesbian couple who ran the *Little Review*; and Beatrice Wood, who died in 1998 at the age of 105. The book also addresses issues of colonialist racism, cross-dressing and dandyism, and the gendering of the machine.

The Republican Alternative - André Holenstein 2008

The *Republican Alternative* seeks to move beyond the mere notion of scholarly inquiry into the republic—the subject of recent rediscovery by political historians interested in Europe's intellectual heritage—by investigating the practical similarities and differences between two early modern republics, as well as their self-images and interactions during the turbulent seventeenth and eighteenth centuries. Among the world's most economically successful societies, Switzerland and the Netherlands laid much of the foundation for their prosperity during the early modern period discussed here. This volume attempts to clarify the special character of these two countries as they developed, including issues of religious plurality, the republican form of government, and an increasingly commercially-driven agrarian society.

Walled Towns and the Shaping of France - M. Wolfe 2009-08-31

This book focuses on the development of towns in France, taking into account military technology, physical geography, shifting regional networks tying urban communities together, and the emergence of new forms of public authority and civic life.

Performing Death - Nicola Laneri 2007

This volume represents a collection of contributions presented by the authors during the Second Annual University of Chicago Oriental Institute Seminar *Performing Death: Social Analyses of Funerary Traditions in the Ancient Mediterranean*, held at the Oriental Institute, February 17-18, 2006. The principal aim of the two-day seminar was to interpret the social relevance resulting from the enactment of funerary rituals within the broad-reaching Mediterranean basin from prehistoric periods to the Roman Age. Efforts were concentrated on creating a panel composed of scholars with diverse backgrounds - anthropologists, historians, archaeologists, art historians, and philologists - and the knowledge and expertise to enrich the discussion through the presentation of case-studies linked to both textual and archaeological evidence from the Mediterranean region. Fundamental to the successful realisation of this research process was the active dialogue between scholars of different backgrounds. These communicative exchanges provided the opportunity to integrate different approaches and interpretations concerning the role played by the performance of ancient

funerary rituals within a given society and, as a result, helped in defining a coherent outcome towards the interpretation of ancient communities' behaviours.

bookdown - Yihui Xie 2016-12-12

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The *bookdown* package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with *bookdown*. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but *bookdown* is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with *bookdown* and R Markdown, and its source is fully available on GitHub.

Religion and Power - Nicole Maria Brisch 2008

This volume represents a collection of contributions presented during the Third Annual University of Chicago Oriental Institute Seminar *Religion and Power: Divine Kingship in the Ancient World and Beyond*, held at the Oriental Institute, February 23-24, 2007. The purpose of this conference was to examine more closely concepts of kingship in various regions of the world and in different time periods. The study of kingship goes back to the roots of fields such as anthropology and religious studies, as well as Assyriology and Near Eastern archaeology. More recently, several conferences have been held on kingship, drawing on cross-cultural comparisons. Yet the question of the divinity of the king as god has never before been examined within the framework of a cross-cultural and multi-disciplinary conference. Some of the recent anthropological literature on kingship relegates this question of kings who deified themselves to the background or voices serious misgivings about the usefulness of the distinction between divine and sacred kings. Several contributors to this volume have pointed out the Western, Judeo-Christian background of our categories of the human and the divine. However, rather than abandoning the term divine kingship because of its loaded history it is more productive to examine the concept of divine kingship more closely from a new perspective in order to modify our understanding of this term and the phenomena associated with it.

Bio-optical Modeling and Remote Sensing of Inland Waters -

Deepak R. Mishra 2017-04-28

Bio-optical Modeling and Remote Sensing of Inland Waters presents the latest developments, state-of-the-art, and future perspectives of bio-optical modeling for each optically active component of inland waters, providing a broad range of applications of water quality monitoring using remote sensing. Rather than discussing optical radiometry theories, the authors explore the applications of these theories to inland aquatic environments. The book not only covers applications, but also discusses new possibilities, making the bio-optical theories operational, a concept that is of great interest to both government and private sector organizations. In addition, it addresses not only the physical theory that makes bio-optical modeling possible, but also the implementation and

applications of bio-optical modeling in inland waters. Early chapters introduce the concepts of bio-optical modeling and the classification of bio-optical models and satellite capabilities both in existence and in development. Later chapters target specific optically active components (OACs) for inland waters and present the current status and future direction of bio-optical modeling for the OACs. Concluding sections provide an overview of a governance strategy for global monitoring of inland waters based on earth observation and bio-optical modeling. Presents comprehensive chapters that each target a different optically active component of inland waters Contains contributions from respected and active professionals in the field Presents applications of bio-optical modeling theories that are applicable to researchers, professionals, and government agencies

The Literary Genres in the Flavian Age - Federica Bessone 2017-11-07

The construction of a new Latin library between the end of the Republic and the Augustan Principate was anything but an inhibiting factor. The literary flourishing of the Flavian age shows that awareness of this canon rather stimulated creative tension. In the changing socio-cultural context, daring innovations transform the genres of poetry and prose. This volume, which collects papers by influential scholars of early Imperial literature, sheds light on the productive dynamics of the ancient genre system and can also offer insightful perspectives to a non-classicist readership.

History of the Rise and Influence of the Spirit of Rationalism in Europe - William Edward Hartpole Lecky 1865

Being an autograph manuscript which includes a Table of Contents and an Introduction with substantial additions and revisions throughout.

Social Networks and Music Worlds - Nick Crossley 2014-09-19

Social networks are critical for the creation and consumption of music. This edited collection, *Social Networks and Music Worlds*, introduces students and scholars of music in society to the core concepts and tools of social network analysis. The collection showcases the use of these tools by sociologists, historians and musicologists, examining a variety of distinct 'music worlds', including post-punk, jazz, rap, folk, classical music, Ladyfest and the world of 'open mic' performances, on a number of different scales (local, national and international). In addition to their overarching Introduction, the editors offer a very clear and detailed introduction to the methodology of social network analysis for the uninitiated. The collection builds upon insights from canonic texts in the sociology of music, with the crucial innovation of examining musical network interaction via formal methods. With network analysis in the arts and humanities at an emergent stage, *Social Networks and Music Worlds* highlights its possibilities for non-scientists. Contributions hail from leading and emerging scholars who present social network graphs and data to represent different music worlds, locating individuals, resources and styles within them. The collection sits at the nexus of sociological, musicological and cultural studies traditions. Its range should ensure a large scholarly readership.

Leviathan - Thomas Hobbes 2021-02-09

Written by one of the founders of modern political philosophy, Thomas Hobbes, during the English civil war, *Leviathan* is an influential work of nonfiction. Regarded as one of the earliest examples of the social contract theory, *Leviathan* has both historical and philosophical importance. Social contract theory prioritizes the state over the individual, claiming that individuals have consented to the surrender of some of their freedoms by participating in society. These surrendered freedoms help ensure that the government can be run easily. In exchange for their sacrifice, the individual is protected and given a place in a steady social order. Articulating this theory, Hobbes argues for a strong, undivided government ruled by an absolute sovereign. To support his argument, Hobbes includes topics of religion, human nature and taxation. Separated into four sections, Hobbes claims his theory to be the resolution of the civil war that raged on as he wrote, creating chaos and taking causalities. The first section, *Of Man* discusses the role human nature and instinct plays in the formation of government. The second section, *Of Commonwealth* explains the definition, implications, types, and rules of succession in a commonwealth government. *Of a Christian Commonwealth* imagines the religion's role government and societal moral standards. Finally, Hobbes closes his argument with *Of the Kingdom of Darkness*. Through the use of philosophical theory and historical study, Thomas Hobbes attempts to convince citizens to consider the cost and reward of being governed. Without an understanding of the sociopolitical theories that keep government bodies in power, subjects can easily become complicit or allow society to slip into anarchy. Created during a brutal civil war, Hobbes hoped to educate

and persuade his peers. Though *Leviathan* was a work of controversy in its time, Hobbes' theories and prose has survived centuries, shaping the ideas of modern philosophy. This edition of *Leviathan* by Thomas Hobbes is now presented with a stunning new cover design and is printed in an easy-to-read font. With these accommodations, *Leviathan* is accessible and applicable to contemporary readers.

Natural Stone and Architectural Heritage - Giovanna Antonella Dino 2019-09-23

This book is made up of contributions dealing with heritage stones from different countries around the world. The stones are described, as well as their use in vernacular and contemporaneous architecture. Heritage stones are those stones that have special significance in human culture. Examples include some very important stones that have been either neglected because they are no longer extracted, or stones that have great significance in commercial terms but knowledge of their national and/or international heritage has not been well documented. In this collection of articles, we have tried to spread awareness of architectural heritage around the world, the natural stones that have been used in its construction, and the need to preserve historical quarries that once provided the source of such stones. Historical quarries are linked to regional culture and tradition. Because of the specific technical and aesthetical characteristics of heritage stones, which have lasted for centuries, these historical quarries should be preserved to be able to use the stones for the proper restoration of monuments and historical buildings to avoid negative actions that can be observed in many places in the restoration of buildings, which are some times part of World Heritage sites. The final intention of this book is to continuously grow the interest on this fascinating subject of heritage stones.

A Belle Epoque? - Diana Holmes 2006-01-30

The Third Republic, known as the 'belle époque', was a period of lively, articulate and surprisingly radical feminist activity in France, borne out of the contradiction between the Republican ideals of liberty, equality and fraternity and the reality of intense and systematic gender discrimination. Yet, it also was a period of intense and varied artistic production, with women disproving the critical nearconsensus that art was a masculine activity by writing, painting, performing, sculpting, and even displaying an interest in the new "seventh art" of cinema. This book explores all these facets of the period, weaving them into a complex, multi-stranded argument about the importance of this rich period of French women's history.

Smallville Season 11 Vol. 4: Argo - Bryan Q. Miller 2014-03-18

The first time in print for these digital-first stories, the hit CW series *Smallville* continues! Clark Kent finds himself transported to the future, where he meets the greatest heroes of the 31st Century: Booster Gold and the Legion of Super-Heroes! However, it's not a mere social call: Superman must stop war between Earth and a stunning villain! Collects issues #13-15 and *SMALLVILLE SEASON ELEVEN SPECIAL #2*.

Geopolitical Traditions - David Atkinson 2002-09-26

Condemned as an intellectual poison by the late American geographer Richard Hartshornem geopolitics has confounded its critics. Today it remains a popular and important intellectual field despite the persistent allegations that geopolitics helped to legitimate Hitler's policies of spatial expansionism and the domination of place. Using insights from critical geopolitics and cultural history, the contributors focus on how geopolitics has been created, negotiated and contested within a variety of intellectual and popular contexts. *Geopolitical Traditions* argues that geopolitics has to take responsibility for the past whilst at the same time reconceptualising geopolitics in a manner which accounts for the dramatic changes in the late twentieth century. The book is divided into three sections: firstly *Rehtinking Geopolitical Histories* concentrates on how geopolitical conversations between European scholars and the wider world unfolded; secondly *Geopolitics, Nationa and Spirituality* considers how geopolitical writings have been strongly influenced by religions, iconography adn doctrine with examples drawn from Catholicism, Judaism and Hinduism; and thirdly *Reclaiming and Refocusing Geopolitics* contemplates how geopolitics has been reformulated in the post-war period with illustrations from France and the United States. *Geopolitical Traditions* brings together scholars working in a variety of disciplines and locations in order to explore a hundred years of geopolitical thought. Sanjay Chaturedi Punjab University, India. Paul Claval, Eaubonne, France . Michael J. Heffernan Notingham University, UK, Les Hepple University of Bristol.

Prometheus Tamed - Cornel Zwierlein 2021

"Over 8,200 large city fires broke out between 1000 and 1939 CE in Central Europe. *Prometheus Tamed* inquires into the long-term history of

that fire ecology, its local and regional frequencies, its relationship to climate history. It asks for the visual and narrative representation of that threat in every-day life. Institutional forms of fire insurance emerged in the form of private joint stock companies (the British model, starting in 1681) or in the form of cameralist fire insurances (the German model, starting in 1676). They contributed to shape and change society, transforming old communities of charitable solidarity into risk communities, finally supplemented by networks of cosmopolite aid. After 1830, insurance agencies expanded tremendously quickly all over the globe: Cultural clashes of Western and native perceptions of fire risk and of what is insurance can be studied as part of a critical archaeology of world risk society and the plurality of modernities"--

Sukuma Labor Songs from Western Tanzania - Frank D. Gunderson 2010

This volume is an interpretive analysis of a collection of 335 song texts treated as primary historical sources. The collection highlights the cultural practices that link music with labor in Sukuma communities in northwestern Tanzania. These linkages are evident in the music of the elephant, snake, and porcupine hunting associations that flourished in the precolonial epoch, in the nineteenth-century regional and long-distance porter associations, and in the farmer associations that have proliferated since the beginning of the twentieth century. Acting primarily as an interpretive editor, the author collaborated with several Tanzanian scholars and translators towards fine-tuning the translation of these texts into English, and gathered testimonies in order to create succinct interpretive statements about the songs.

High & Low - Kirk Varnedoe 1990

Readings in high & low

Installation guide - 1992

Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Margaret of York, Simon Marmion, and The Visions of Tondal - Thomas Kren 1992-07-16

Presented at a symposium held in 1990 to celebrate the Getty Museum's acquisition of the only known illuminated copy of *The Visions of Tondal*, twenty essays address the celebrated bibliophilic activity of Margaret of York; the career of Simon Marmion, a favorite artist of the Burgundian court; and *The Visions of Tondal* in relation to illustrated visions of the Middle Ages. Contributors include Maryan Ainsworth, Wim Blockmans, Walter Cahn, Albert Derolez, Peter Dinzelbacher, Rainald Grosshans, Sandra Hindman, Martin Lowry, Nigel Morgan, and Nigel Palmer.

Ancestral Fault in Ancient Greece - Renaud Gagné 2013-11-07

Ancestral fault is a core idea of Greek literature. 'The guiltless will pay for the deeds later: either the man's children, or his descendants thereafter', said Solon in the sixth century BC, a statement echoed throughout the rest of antiquity. This notion lies at the heart of ancient Greek thinking on theodicy, inheritance and privilege, the meaning of suffering, the links between wealth and morality, individual responsibility, the bonds that unite generations and the grand movements of history. From Homer to Proclus, it played a major role in some of the most critical and pressing reflections of Greek culture on divinity, society and knowledge. The burning modern preoccupation with collective responsibility across generations has a long, deep antecedent in classical Greek literature and its reception. This book retraces the trajectories of Greek ancestral fault and the varieties of its expression through the many genres and centuries where it is found.

Evolution of Marine Coastal Ecosystems under the Pressure of Global Changes - Hubert-Jean Ceccaldi 2021-06-16

Coastal and estuarine environments at the interface of terrestrial and marine areas are among the most productive in the world. However, since the beginning of the industrial era, these ecosystems have been subjected to strong anthropogenic pressures intensified from the second half of the 20th century, when there was a marked acceleration in the warming (climate change) of the continents, particularly at high latitudes. Coastal ecosystems are highly vulnerable to alteration of their physical, chemical and biological characteristics (marine intrusion, acidification of marine environments, changes in ecosystems, evolution and artificialization of the coastline, etc.). In contact with heavily populated areas, these environments are often the receptacle of a lot of

chemical and biological pollution sources that significantly diminish their resilience. In this context of accelerated evolution and degradation of these areas important for food security of many populations around the world, it is necessary to better identify the factors of pressure and understand, at different scales of observation, their effects and impacts on the biodiversity and on the socio-eco-systems, in order to determine the degree of vulnerability of these coastal ecosystems and the risks they face. A transdisciplinary and integrated approach is required to prevent risks. Within this framework, operational coastal oceanography occupies an important place but also the implementation of a true socio-eco-system approach in order to set up an environmentally friendly development.

Acta Conventus Neo-Latini Torontonensis - International Congress of Neo-Latin Studies (7, 1988, Toronto) 1991

The World Through Picture Books - Annie Everall 2013

Time Perspective Theory: Review, Research and Application - Maciej Stolarski 2014-11-05

This book is about time and its powerful influence on our personal and collective daily life. It presents the most comprehensive and up-to-date overview of contemporary knowledge on temporal psychology inspired by Zimbardo's work on Time Perspective (TP). With contributions from renowned and promising researchers from all over the globe, and at the interface of social, personality, cognitive and clinical psychology, the handbook captures the breadth and depth of the field of psychological time. Time perspective, as the way people construe the past, the present and the future, is conceived and presented not only as one of the most influential dimensions in our psychological life leading to self-impairing behaviors, but also as a facet of our person that can be de-biased and supportive for well-being and happiness. Written in honor of Philip G. Zimbardo on his 80th birthday and in acknowledgement of his leading role in the field, the book contains illustrations of the countless studies and applications that his theory has stimulated, and captures the theoretical, methodological and practical pathways he opened by his prolific research.

Ancient and Medieval Greek Etymology - Arnaud Zucker 2021-01-18

This volume on Greek synchronic etymology offers a set of papers evidencing the cultural significance of etymological commitment in ancient and medieval literature. The four sections illustrate the variety of approaches of the same object, which for Greek writers was much more than a technical way of studying language. Contributions focus on the functions of etymology as they were intended by the authors according to their own aims. (1) "Philosophical issues" addresses the theory of etymology and its explanatory power, especially in Plato and in Neoplatonism. (2) "Linguistic issues" discusses various etymologizing techniques and the status of etymology, which was criticized and openly rejected by some authors. (3) "Poetical practices of etymology" investigates the ubiquitous presence of etymological reflections in learned poetry, whatever the genre, didactic, aetiological or epic. (4) "Etymology and word-plays" addresses the vexed question of the limit between a mere pun and a real etymological explanation, which is more than once difficult to establish. The wide range of genres and authors and the interplay between theoretical reflection and applied practice shows clearly the importance of etymology in Greek thought.

Smallville Season 11 Vol. 1: The Guardian - Bryan Q. Miller 2013-08-20

A New York Times Bestseller! When we left Clark Kent at the end of *Smallville* Season 10, he had finally donned the iconic Superman suit and set out to defend Earth from Apokolips. Picking up six months later, *Smallville* Season 11 explores Clark's understanding of the true power of his Superman identity, its effect on those close to him and its ability to inspire the people of Earth. *Smallville* Season 11 features Clarke as well as fan-favorite characters including Oliver Queen/Green Arrow, Chloe Sullivan-Queen, Lois Lane, Lex Luthor, and General Lane.

Health and Social Care Systems of the Future: Demographic Changes, Digital Age and Human Factors - Teresa Patrone Cotrim 2019-06-25

This book discusses how digital technology and demographic changes are transforming the patient experience, services, provision, and planning of health and social care. It presents innovative ergonomics research and human factors approaches to improving safety, working conditions and quality of life for both patients and healthcare workers. Personalized medicine, mobile and wearable technologies, and the greater availability of health data are discussed, together with challenges and evidence-based practice. Based on the Healthcare Ergonomics and

Patient Safety conference, HEPS2019, held on July 3-5, 2019, in Lisbon, Portugal, this book offers a timely resource for graduate students and researchers, as well as for healthcare professionals managing service provision, planners and designers for healthcare buildings and environments, and international healthcare organizations.

The Oxford Handbook of Material Culture Studies - Dan Hicks 2010-09-02

Written by an international team of experts, the Handbook makes accessible a full range of theoretical and applied approaches to the study of material culture, and the place of materiality in social theory, presenting current thinking about material culture from the fields of archaeology, anthropology, geography, and science and technology studies.

Frantz Fanon, Psychiatry and Politics - Nigel C. Gibson 2017-09-25
Frantz Fanon was a foundational figure in postcolonial and decolonial thought, yet his medical work has only been studied peripherally. With a focus on Fanon's key psychiatry texts, *Frantz Fanon: Psychiatry and Politics* considers Fanon's medical writings as materials anticipating as well as accompanying Fanon's better known work.

Tsunami Events and Lessons Learned - Y.A. Kontar 2013-11-04
This book is a collective effort by world experts, bringing together assorted contributions presented during the Ocean Science Session OS-017, of the AOGS-AGU Joint Assembly held in Singapore in 2012 (the Asia Tsunami and Great East Japan Earthquake and Tsunami events). The chapters cover assessment, evaluation, forecast and lessons learned as well as environmental and societal impacts of the latest tsunamis that occurred in the Indian Ocean in 2004 and the Pacific Ocean in Japan 2011. The book is aimed at experts, scientists and decision makers seeking recent updated information, knowledge and experiences to better understand, quantify, forecast and protect coastal water resources, ecosystems, communities and human settlements which are often affected by tsunamis.

The Latin Sexual Vocabulary - J. N. Adams 1990-10
Like other languages, Latin contained certain words its speakers considered obscene as well as a rich stock of sexual euphemism and metaphor. Our sources for this information range from surviving graffiti to literary works with a marked sexual content. Yet despite its manifest literary and linguistic interest, the sexual vocabulary of Latin has remained uninvestigated by scholars. J. A. Adams's pioneering and unique reference work collects for the first time evidence of Latin obscenities and sexual euphemisms drawn from both literary and nonliterary sources from the early Republic to about the fourth century A.D. Separate chapters treat each of the sexual parts of the body and the terminology used to describe sexual acts. General topics include the influence of Greek language on Latin, changes in the Latin vocabulary over time (including the evolution of sexual words into general terms of abuse), and lexical differences among various literary genres.

Lucretius Poet and Philosopher - Philip R. Hardie 2020-07-06

Six hundred years after Poggio's retrieval of the *De rerum natura*, and with the recent surge of interest in Lucretius and his influence, there has never been a better time to fully assess and recognize the shaping force of his thought and poetry over European culture from antiquity to modern times. This volume offers a multidisciplinary and updated overview of Lucretius as philosopher and as poet, with special attention to how these two aspects interact. The volume includes 18 contributions by established as well as early career scholars working on Lucretius' philosophical and poetic work, and his reception both in ancient and early modern times. All the chapters present new and original research. Section I explores core issues of Epicurean-Lucretian epistemology and ethics. Section II expounds much new material on ancient response to and reception of Lucretius. Section III presents new material and analysis on the immediate, fraught early modern reception of the poem. Section IV offers a wide collection of new and original papers on Lucretius' fortunes in the period from Machiavelli up to Victorian times. Section V explores little known aspects of the iconographical and biographical motifs related to the *De rerum natura*.

55 Ways to Have Fun with Google - Philipp Lenssen 2006

You probably use Google everyday, but do you know... the Google Snake Game? Googledromes? Memecodes? Googlesport? The Google Calculator? Googlepark and Google Weddings? Google hacking, fighting and rhyming? In this book, you'll find Google-related games, oddities, cartoons, tips, stories and everything else that's fun. Reading it, you won't be the same searcher as before! No programming skills needed. (From the author of *Google Blogscoped*.)

Manual of Romance Sociolinguistics - Wendy Ayres-Bennett 2018-06-11
The Romance languages offer a particularly fertile ground for the exploration of the relationship between language and society in different social contexts and communities. Focusing on a wide range of Romance languages - from national languages to minoritised varieties - this volume explores questions concerning linguistic diversity and multilingualism, language contact, medium and genre, variation and change. It will interest researchers and policy-makers alike.

Deep Vein Thrombosis and Pulmonary Embolism - Edwin J. R. van Beek 2009-03-12

Dedicated to dealing with a challenging disease, previously thought to be incurable, but with the advent of new drugs, now amenable to management and a much improved prognosis for patients. - Latest publication in a fast-moving area of keen clinical interest - Authored by leading international authorities - Builds on success of a respected first edition - Incorporates new data on latest imaging technologies and therapies - Covers both the science and clinical aspects, including presentation, surgical intervention and drug therapy - Includes coverage of both Pulmonary Embolism and Deep Vein Thrombosis

Days Near Rome - Augustus J. C. Hare 1875

Druidism, the Ancient Faith of Britain - Dudley Wright 1924
