Critical Issues in the History of Spaceflight - Steven J. Dick 2006

In March 2005, the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history. This volume is a collection of essays based on those deliberations. The meeting took place at a time of extraordinary transformation for NASA, stemming from the new Vision of Space Exploration announced by President George W. Bush in January 2004: to go to the Moon, Mars, and beyond. This Vision, in turn, stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board. The new goals were seen as initiating a "New Age of Exploration" and were placed in the context of the importance of exploration and discovery to the American experiences. (Amazon).

I Am Crying All Inside - Clifford D. Simak 2015-10-20

From the Nebula Award-winning author of *Way Station*: Ten stories—including one never before published—of mystery and imagination in a world that cannot be. People work; folk play. That is how it has been in this country for as long as Sam can remember. He is happy, and he understands that this is the way it should be. People are bigger than folk. They are stronger. They do not need food or water. They do not need the warmth of a fire. All they need are jobs to do and a blacksmith to fix them when they break. The people work so the folk can drink their moonshine, fish a little, and throw horseshoes. But once Sam starts to wonder why the world is like this, his life will never be the same. Along with the other stories in this collection, "I Am Crying All Inside" is a compact marvel—a picture of an impossible reality that is not so different from our own. Also included in this volume is the newly published "I Had No Head and My Eyes Were Floating Way Up in the Air," originally written for Harlan Ellison's *The Last Dangerous Visions*.™ Each story includes an introduction by David W. Wixon, literary executor of the Clifford D. Simak estate and editor of this ebook.

Shuttle-Mir - Clay Morgan 2001

Where We Come From - Oscar Cásares 2020-04-07

ONE OF KIRKUS REVIEWS' BEST BOOKS OF THE YEAR "A richly conceived and devastating book about the border." —Houston Chronicle From a distance, the towns along the U.S.-Mexican border have dangerous reputations, and Brownsville is no different. But to twelve-year-old Orly, it's simply where his godmother Nina lives—and where he is being forced to stay the summer after his mother's sudden death. Nina, however, has a secret: she's providing refuge for a young immigrant boy named Daniel, for whom traveling to America has meant trading one set of dangers for another. Separated from the violent human traffickers who brought him across the border and pursued by the authorities, Daniel must stay completely hidden. And Orly's arrival threatens to put them all at risk of exposure. Tackling the crisis of U.S. immigration policy from a deeply human angle, *Where We Come From* explores through an intimate lens the ways that family history shapes us, how secrets can burden us, and how finding compassion and understanding for others can ultimately set us free.

The Stars Between Us - Cristin Terrill 2022-08-02

Bridgerton meets *Illuminae* in this explosive, romantic space opera where danger and deception lurk behind glamour and wealth. Vika Hale longs for a better life than that of a barmaid on a struggling planet, but her dreams have always seemed out of reach despite the mysterious benefactor who bankrolled her education. When the elusive billionaire dies and names Vika in his will, she's whisked away to a glittering and glamorous new world as the ward of his heir. Suddenly, her wildest dreams don't seem so impossible. But when someone targets the will's heirs in a series of terrifying bombings, Vika's new life is thrown into uncertainty. Knowing that she may be next, Vika teams up with the one person she'd rather keep at arm's length—her guardian's mysterious new assistant, Sky Foster. She doesn't trust Sky, but he may be the only one who can help her discover the bomber's identity before she becomes the next victim. As Vika grows closer to Sky, she realizes she may not escape these new threats unscathed. Sky is keeping a secret and it's one that could unravel everything. In *The Stars Between Us*, Cristin Terrill sweeps readers away to a world where secrets are currency and love is the most dangerous risk of all.

All Flesh Is Grass - Clifford D. Simak 2015-07-21

Long before *Under the Dome*, this novel of a town trapped within an invisible force field earned a Nebula Award nomination for the author of *Way Station*. Nothing much ever happens in Millville, a small, secluded Middle-American community—until the day Brad Carter discovers he is unable to leave. And the nearly bankrupt real estate agent is not the only one being held prisoner; every resident is confined within the town's boundaries by an invisible force field that cannot be breached. As local tensions rapidly reach breaking point, a set of bizarre circumstances leads Brad to the source of their captivity, making him humanity's reluctant ambassador to an alien race of sentient flora, and privy to these jailers' ultimate intentions. But some of Millville's most powerful citizens do not take kindly to Carter's "collaboration with the enemy," even under the sudden threat of global apocalypse. Decades before Stephen King trapped an entire town in *Under the Dome*, science fiction Grand Master Clifford D. Simak explored the shocking effects of communal captivity on an unsuspecting population. Nominated for the Nebula Award, *All Flesh Is Grass* is a riveting masterwork that brilliantly reinvents the alien invasion story.

The Beginning - Melvin Duncan 2006-03

A(c)TX 939-582 John Blake first has memories of a cave in the distant past. He grew up with a tribe of cave dwellers and then moved out on to the Steps of what would become Russia. He met the plains raiders and wared against them. They killed his first love and he tried to destroy them all. He continued to move South until nations started to form. He fought wars for control of the land until the industrial revolution at which time he started to invest in new ideas. Many of these investments paid off. One investment took man to the stars where John Blake founded an empire. He has to fight the dreaded Wolfen and the swarm to protect the Empire. Come along as he explores ancient civilizations. Meet the computer being, ONE, who is much more than one may think a computer capable of being, one of them, a beautiful woman. Read and suffer the pain as his friends and loved ones die and leave him to carry on.

Way Station - Clifford D. Simak 2015-07-21

An ageless hermit runs a secret way station for alien visitors in the Wisconsin woods in this Hugo Award-winning science fiction classic Enoch Wallace is not like other humans. Living a secluded life in the backwoods of Wisconsin, he carries a nineteenth-century rifle and never seems to age—a fact that has recently caught the attention of prying government eyes. The truth is, Enoch is the last surviving veteran of the American Civil War and, for close to a century, he has operated a secret way station for aliens passing through on journeys to other stars. But the gifts of knowledge and immortality that his intergalactic guests have bestowed upon him are proving to be a nightmarish burden, for they have opened Enoch's eyes to humanity's impending destruction. Still, one final hope remains for the human race . . . though the cure could ultimately prove more terrible than the disease. Winner of the Hugo Award for Best Novel, *Way Station* is a magnificent example of the fine art of science fiction as practiced by a revered Grand Master. A cautionary tale that is at once ingenious, evocative, and compassionately human, it brilliantly supports the contention of the late, great Robert A. Heinlein that "to read science-fiction is to read Simak."

Star Trek FAQ - Mark Clark 2012-04-01

(FAQ). *Star Trek FAQ* tells the complete story of *Star Trek*, from the before the beginning (the books, films, and TV shows that inspired producer Gene Roddenberry to create *Star Trek*) until after the end (when the show emerged as a cultural phenomenon in syndication), and including dramatic behind-the-scenes stories (e.g., Leonard Nimoy's struggle with alcoholism and actress Grace Lee Whitney's controversial firing) often omitted from "authorized" histories of the program. Along with in-depth looks at the pre- and post- *Trek* careers of the show's iconic leads, *Star Trek FAQ* includes profiles of guest stars and "redshirt" extras alike, as well as the many writers, technicians, and artisans whose efforts enabled *Star Trek* to take flight. The book also explores the show's unprecedented resurgence in the 1970s with chapters devoted to early *Star Trek* fiction, merchandising, and the short-lived animated series. Combining a wealth of fascinating information about every facet of the show's production with original analysis of *Star Trek*'s enduring appeal and cultural influence, *Star Trek FAQ* goes where no *Star Trek* book has gone before.

Space Physiology - Jay C. Buckey Jr., M.D. 2006-02-09

The success of any space flight mission depends not only on advanced technology but also on the health and well-being of crew members. This book, written by an astronaut physician, is the first practical guide to maintaining crew members health in space. It combines research results with practical advice on such problems as bone loss, kidney stones, muscle wasting, motion sickness, loss of balance, orthostatic intolerance, weight loss, and excessive radiation exposure. Additional topics include pre-flight preparation, relevant gender differences, long-duration medical planning, post-flight rehabilitation, and the physiology of extra-vehicular activity. Designed as a handbook for space crews, this text is also an invaluable tool for all the engineers, medical personnel, and scientists who plan and execute space missions.

Skylab - David J. Shayler 2001-05-28

Between May 1973 and February 1974 three teams of astronauts increased the American space endurance record from 14 days, set in 1965, to three months aboard the Skylab space station in missions lasting 28, 59 and 84 days. American astronauts did not surpass these records for over 20 years until the NASA Mir missions began in 1995. In "Skylab - America's space station", David Shayler chronicles the evolution of the station, its infrastructure on the ground including astronaut training, each of the three manned missions, summary of results, achievements and the lessons learned. The creation of the International Space Station is the real legacy of Skylab as American astronauts once again embark on extended missions around the

Earth.

The History of Science Fiction - Xavier Dollo 2021-11-09

For the first time in illustrated form, this comprehensive history of sc-fi traces its origins and charts its history from its humble beginnings to its respected status today.

Time Is the Simplest Thing - Clifford D. Simak 2015-07-21

A telepath acquires a powerful alien consciousness—and must run to escape corporate assassins and angry mobs—in this novel by the author of *Way Station*. Space travel has been abandoned in the twenty-second century. It is deemed too dangerous, expensive, and inconvenient—and now the all-powerful Fishhook company holds the monopoly on interstellar exploration for commercial gain. Their secret is the use of "parries," human beings with the remarkable telepathic ability to expand their minds throughout the universe. On what should have been a routine assignment, however, loyal Fishhook employee Shepherd Blaine is inadvertently implanted with a copy of an alien consciousness, becoming something more than human. Now he's a company pariah, forced to flee the safe confines of the Fishhook complex. But the world he escapes into is not a safe sanctuary; its people have been taught to hate and fear his parapsychological gift—and there is nowhere on Earth, or elsewhere, for Shepherd Blaine to hide. A Hugo Award nominee, *Time Is the Simplest Thing* showcases the enormous talents of one of the true greats of twentieth-century science fiction. This richly imagined tale of prejudice, corporate greed, oppression, and, ultimately, transcendence stands tall among Simak's most enduring works.

Russia in Space - Brian Harvey 2000-12-21

Until the Apollo-Soyuz flight of 1972, the Russian Space Program was shrouded in such complete secrecy that only rumors of failures (or catastrophes) reached the West. This comprehensive history of the Russian Space Program, from its Sputnik origins to the privatized Mir Space Station, addresses the technical, political, historical, human, and organizational issues and provides a balanced focus on the manned and unmanned programs. It is the first book to assess the Russian Space Program including the 10-year period since the fall of communism.

Shakespeare's Planet - Clifford D. Simak 2015-07-21

A human space traveler trapped on a remote planet must somehow unravel a confounding alien technology—or else surrender himself to a host of incomprehensible horrors For thousands of years, Carter Horton has been traveling across the galaxy toward a distant world capable of supporting human life. At journey's end, awakened from his millennia-long sleep by a curiously adaptive android, he is informed that his crewmates have all perished due to a system malfunction. But worse is yet to come: Horton's sentient ship is refusing to return him to Earth, and a strangely cordial predator is waiting for him on the planet's surface. The repulsive creature, Carnivore, arrived here via a tunnel across the universe, as did his late companion—a human dubbing himself William Shakespeare—whom Carnivore just recently devoured. But the tunnel moves in only one direction, and if Carter is unable to reverse it, he will find himself marooned forever in this incomprehensible world, at the mercy of monsters and a terrifying, mind-freezing alien anomaly that occurs every evening in the "God-hour." With unparalleled verve, award-winning science fiction Grand Master Clifford D. Simak performs a truly astonishing feat of world-creation in *Shakespeare's Planet*. Bursting with intelligence, imagination, and breathtaking invention, this is a gem of speculative fiction from one of the genre's most revered and innovative artists.

When the Fires Burn High and The Wind is From the North - Robert J. Ewald 2006-04-01

Born in 1904, Clifford D. Simak sold his first science fiction story in 1930, and was soon publishing widely in the pulp magazines. He also pursued a separate career as a journalist and writer on science and other popular topics. He gained widespread fame in the SF world with the first of his series of "City" stories, published in *Astounding Science Fiction* in 1944; these were collected together in the book of the same title, which has remained almost continuously in print ever since. Simak was best known for his pastoral and humanitarian themes, as exemplified in his Hugo Award-winning novel, *Way Station* (1963). In later years he wrote both fantasy and SF stories and novels, winning many additional accolades for his work. He died in 1988. Robert J. Ewald provides the first extended look at Simak's writing, from his earliest pulp stories to the sophisticated fiction of his later years. Complete with Chronology, Notes, Primary and Secondary Bibliographies, and detailed Index.

Chez TJ: The story of one of California's first Michelin Star restaurants - Melissa St. Aude

From the day it opened, Chez TJ was destined for greatness. With business partners George Aviet and Chef Thomas McCombie at the helm, Chez TJ was a sensation from the moment its doors opened in Mountain View, California. The restaurant received rave reviews from food buffs and within its first few years, earned a glowing review in a Gourmet Magazine article. In 2005, Chez TJ became one of the first California restaurants to earn a Michelin Star. Over four decades of serving gourmet French fare to customers, the restaurant had its ups and downs and amassed lots of unique stories. This is the story of Chez TJ and what made the restaurant a success. Also included are a few recipes from the restaurant's early days

Incoming Asteroid! - Duncan Lunan 2013-10-17

'Incoming Asteroid!' is based on a project within ASTRA (the Association in Scotland to Research into Astronautics) to provide scientific answers to the question - what would we do if we knew there was going to be an asteroid impact in ten years' time or less? Clearly there are many things humanity can do nothing about, for example an unseen object traveling towards us so fast that we have no time to prepare, or an object so large it may be unstoppable. A realistic hazard model was decided upon, and the scenario developed from that: an incoming object about 1 kilometer in diameter, in an orbit ranging from the outer rim of the Asteroid Belt to within that of Earth's. Three basic possibilities are considered in this book. The first is the deflection of the asteroid, using remote probes along with a number of possible technologies to change the asteroid's course. Second is the attempt of a manned mission, in order to plant a propulsion system on the asteroid to push it into a different orbit. Third is the nuclear option, a last-ditch attempt to break up and then disperse the asteroid using nuclear weapons. (A rather impractical combination of these second and third options were used as the plot of the popular 1998 Bruce Willis feature film, Armageddon.) Although the cost of developing the technology needed to protect the Earth would be substantial, there would certainly be spin-off benefits. These could eventually result in practical small-scale atomic energy sources, new propulsion systems that could make extraterrestrial mining within the solar system a possibility, and other as-yet unforeseen benefits. And finally, Incoming Asteroid! considers the political implications - how governments across the world should best react to the threat with a view to minimizing loss of life, and in the weeks running up to the possible impact, preventing panic in the population.

Transitions and Transformations in the History of Religions - Joseph Mitsuo Kitagawa 1980-01-01

The Continuing Story of The International Space Station - Peter Bond 2002-05

In this fascinating and well-written text Peter Bond describes the development and evolution of space stations. Particular emphasis is placed on the International Space Station, beginning with the revolution that began in 1970, when Salyut 1, the world's first space station was sent into orbit by the Soviet Union. Defeated in the race to the Moon, the Soviets redirected their efforts towards the conquest of near-Earth space. In the next three decades, their increasingly large and sophisticated structures rewrote the history books as cosmonauts continued to push back all space endurance records. In clear and concise language the book explains how the human exploitation of low-Earth orbit is about to change.

A Heritage of Stars - Clifford D. Simak 2015-07-21

A man hunts for lost knowledge in a future society that's reverted to a primitive tribal state in this novel by the author of Way Station. More than a thousand years have passed since humankind intentionally destroyed its treacherous technology, choosing to revert back to a primitive tribal state. In this society the rusting brain cases of long-inert robots are considered trophies, and the scant knowledge that has survived is doled out to an inquisitive few in monastery-like "universities." It is at one such center of learning that young Tom Cushing first reads of the legendary "Place of Going to the Stars," rumored to exist on a high butte somewhere in the western part of the land. Driven by enthusiasm and an insatiable need to track the myth to its source, Tom sets out on an amazing trek across what was once called "America," teaming up with a witch, the world's last remaining robot, and other odd companions. But all the astonishing discoveries and dangers they encounter along the way will pale before the revelations that await them at journey's end. Clifford D. Simak, award-winning science fiction Grand Master, offers a breathtaking vision of the future that is both dystopian and hopeful in equal measure. In A Heritage of Stars, he boldly displays the heart, intelligence, and awesome imaginative powers that have established him as one of the all-time

greatest authors of speculative fiction.

Those Left Behind - N. C. Scrimgeour 2021-11-16

A dying planet. A desperate mission. A crew facing impossible odds. Humanity's last hope lies with them... Time is running out for the people of New Pallas. Nobody knows that better than Alvera Renata, a tenacious captain determined to scout past the stars with nothing but a handpicked crew and a promise: to find a new home for humanity. But when a perilous journey across dark space leads to first contact with a galactic civilisation on the brink of war, Alvera soon realises keeping her word might not be as easy as she thought. Her only hope lies with the secrets of the ancient alien waystations scattered across the galaxy. The mysterious technology could be the key to humanity's survival-or bring unwanted attention from the long-forgotten beings who built them. But remaining united in the face of annihilation is a lot to ask from a crew already splintering under the weight of their differences. A jaded pilot looks for a place he can start over. A young translator searches for meaning out in the galaxy's lawless frontier. And Alvera reckons with the aftermath of betrayal as she fights for a way to save them all. As they break apart to forge their own paths, Alvera and her crew all face the same question: what are they willing to sacrifice to save those left behind?

North American Lake Monsters - Nathan Ballingrud 2013-06-28

Nathan Ballingrud's Shirley Jackson Award winning debut collection is a shattering and luminous experience not to be missed by those who love to explore the darker parts of the human psyche. Monsters, real and imagined, external and internal, are the subject. They are us and we are them and Ballingrud's intense focus makes these stories incredibly intense and irresistible. These are love stories. And also monster stories. Sometimes these are monsters in their traditional guises, sometimes they wear the faces of parents, lovers, or ourselves. The often working-class people in these stories are driven to extremes by love. Sometimes, they are ruined; sometimes redeemed. All are faced with the loneliest corners of themselves and strive to find an escape. Nathan Ballingrud was born in Massachusetts but has spent most of his life in the South. He worked as a bartender in New Orleans and New York City and a cook on offshore oil rigs. His story "The Monsters of Heaven" won the inaugural Shirley Jackson Award. He lives in Asheville, North Carolina, with his daughter.

Toward a History of the Space Shuttle: 1992-2011 - Roger D. Launius 1992

Architecture for Astronauts - Sandra Häuplik-Meusburger 2011-10-18

Living and working in extra-terrestrial habitats means being potentially vulnerable to very harsh environmental, social, and psychological conditions. With the stringent technical specifications for launch vehicles and transport into space, a very tight framework for the creation of habitable space is set. These constraints result in a very demanding "partnership" between the habitat and the inhabitant. This book is the result of researching the interface between people, space and objects in an extra-terrestrial environment. The evaluation of extra-terrestrial habitats in comparison to the user's perspective leads to a new framework, comparing these buildings from the viewpoint of human activity. It can be used as reference or as conceptual framework for the purpose of evaluation. It also summarizes relevant human-related design directions. The work is addressed to architects and designers as well as engineers.

All He Knew - Helen Frost 2020-08-11

A novel in verse about a young deaf boy during World War II, the sister who loves him, and the conscientious objector who helps him. Inspired by true events. Henry has been deaf from an early age—he is intelligent and aware of language, but by age six, he has decided it's not safe to speak to strangers. When the time comes for him to start school, he is labeled "unteachable." Because his family has very little money, his parents and older sister, Molly, feel powerless to help him. Henry is sent to Riverview, a bleak institution where he is misunderstood, underestimated, and harshly treated. Victor, a conscientious objector to World War II, is part of a Civilian Public Service program offered as an alternative to the draft. In 1942, he arrives at Riverview to serve as an attendant and quickly sees that Henry is far from unteachable—he is brave, clever, and sometimes mischievous. In Victor's care, Henry begins to see how things can change for the better. Heartbreaking and ultimately hopeful, Helen Frost's All He Knew is inspired by true events and provides sharp insight into a little-known element of history.

NASA 50th Anniversary Proceedings: NASA's First 50 Years: Historical Perspectives - Steven J. Dick

2010-07-07

On 29 July 1958, President Dwight D. Eisenhower signed the National Aeronautics and Space Act, creating the National Aeronautics and Space Administration (NASA), which became operational on 1 October of that year. Over the next 50 years, NASA achieved a set of spectacular feats, ranging from advancing the well-established field of aeronautics to pioneering the new fields of Earth and space science and human spaceflight. In the midst of the geopolitical context of the Cold War, 12 Americans walked on the Moon, arriving in peace “for all mankind.” Humans saw their home planet from a new perspective, with unforgettable Apollo images of Earthrise and the “Blue Marble,” as well as the “pale blue dot” from the edge of the solar system. A flotilla of spacecraft has studied Earth, while other spacecraft have probed the depths of the solar system and the universe beyond. In the 1980s, the evolution of aeronautics gave us the first winged human spacecraft, the Space Shuttle, and the International Space Station stands as a symbol of human cooperation in space as well as a possible way station to the stars. With the Apollo fire and two Space Shuttle accidents, NASA has also seen the depths of tragedy. In this volume, a wide array of scholars turn a critical eye toward NASA’s first 50 years, probing an institution widely seen as the premier agency for exploration in the world, carrying on a long tradition of exploration by the United States and the human species in general. Fifty years after its founding, NASA finds itself at a crossroads that historical perspectives can only help to illuminate.

Clifford Donald Simak - An Affectionate Appreciation - Francis Lyall 2020-01-17

A professional newspaperman, Clifford Donald Simak was a major figure both in and beyond the ‘Golden Age’ of science fiction. Active for more than fifty years, he published some 140 short stories and (depending on how you count) at least 27 novels. The many Awards he received – three Hugos, a Nebula, a Jupiter, a Locus, an Analog, and an International Fantasy Award – to say nothing of many nominations, show that his contemporaries recognised his qualities. It is no surprise that the Science Fiction Writers of America elected him as their third SWFA Grand Master. This book considers what he achieved. CDS grew up in Grant County, Wisconsin, just south of where the Wisconsin flows into the Mississippi. Many of his tales reflect the ‘Simak country’ of his youth, regularly drawing on the characteristics of the residents of that area. They are high value entertainment. Some are extremely amusing. Others lead you on to explore many ideas: what does it mean to be sentient, to be human, how should/can we cope with technology, has life a purpose, and if so what, and, what about aliens? Francis Lyall, a retired academic lawyer, has been enjoying Simak stories since he was a teenager. Waystation to the Stars - Foale 2000-08-01

WAYSTATION TO THE STARS is the exclusive story of British astronaut Michael Foale, the hero of the Mir space station crisis of 1997. Told by Michael's father Colin Foale, this is a gripping account of a real-life space adventure, as the ageing Russian station underwent a series of crises from a horrific collision to a potentially fatal computer crash. Michael - whose quick thinking and natural leadership saved the day - was in close contact with his father during his ordeal and Colin Foale has painted a moving portrait of courage in the most hostile environment imaginable. Through Michael's early interest in space, family tragedy, NASA selection and training, this is Michael's extraordinary story as told by the one man who knows him best.

The Way Station - Stephen King 2019-05-07

Enter once more the world of Roland Deschain—and the world of the Dark Tower—presented in a stunning graphic novel form unlocking the doorways to terrifying secrets and bold storytelling as part of the dark fantasy masterwork and magnum opus from #1 New York Times bestselling author Stephen King. “The man in black fled across the desert, and the gunslinger followed.” With these unforgettable words, millions of readers were introduced to Stephen King’s iconic character Roland Deschain of Gilead. Roland is the last of his kind, a “gunslinger” charged with protecting whatever goodness and light remains in his world—a world that “moved on,” as they say. In this desolate reality—a dangerous land filled with ancient technology and deadly magic, and yet one that mirrors our own in frightening ways—Roland is on a spellbinding and soul-shattering quest to locate and somehow save the mystical nexus of all worlds, all universes: the Dark Tower. Now, in the graphic novel series adaptation Stephen King's The Dark Tower: The Gunslinger, originally published by Marvel Comics in single-issue form and creatively overseen by Stephen King himself, the full story of Roland’s troubled past and ongoing saga is revealed. Sumptuously drawn by Richard Isanove, Sean Phillips, Luke Ross, Michael Lark, and Laurence Campbell, plotted by longtime Stephen King expert Robin Furth, and scripted by New York Times bestselling author Peter David, The Gunslinger adaptation is an extraordinary and terrifying journey—ultimately serving as the perfect introduction for new readers to Stephen King’s modern literary classic The Dark Tower, while giving longtime fans thrilling adventures transformed from his blockbuster novels. Roland has barely escaped the frightening and deadly trap set for him by the elusive Man in Black in the sleepy little town of Tull—a place centered in the apotheosis of all deserts, and where the sinister sorcerer’s power had taken hold. Leaving death and despair in his wake, Roland soon arrives at a mysterious way station...and meets a young boy, Jake Chambers, who has seemingly appeared out of nowhere from another place and time. But who is this sophisticated child, and what is his connection to Roland’s quest and the Man in Black himself?

Way Station - Clifford D. Simak 2015-07-21

Hugo Award Winner: In backwoods Wisconsin, an ageless hermit welcomes alien visitors—and foresees the end of humanity . . . Enoch Wallace is not like other humans. Living a secluded life in the backwoods of Wisconsin, he carries a nineteenth-century rifle and never seems to age—a fact that has recently caught the attention of prying government eyes. The truth is, Enoch is the last surviving veteran of the American Civil War and, for close to a century, he has operated a secret way station for aliens passing through on journeys to other stars. But the gifts of knowledge and immortality that his intergalactic guests have bestowed upon him are proving to be a nightmarish burden, for they have opened Enoch’s eyes to humanity’s impending destruction. Still, one final hope remains for the human race . . . though the cure could ultimately prove more terrible than the disease. Winner of the Hugo Award for Best Novel, Way Station is a magnificent example of the fine art of science fiction as practiced by a revered Grand Master. A cautionary tale that is at once ingenious, evocative, and compassionately human, it brilliantly supports the contention of the late, great Robert A. Heinlein that “to read science-fiction is to read Simak.”

The Curse of Gurs - Werner L. Frank 2012-06-01

Gauleiters Robert Wagner and Joseph Buerckel, the German administrative heads of the States of Baden and the Pfalz/Saar, sought to be the first to make their territories Judenrein (free of Jews). They engineered a massive westward expulsion of over 6,500 Jews to Camp de Gurs, located in unoccupied Vichy France. The event became known as the Wagner-Buerckel Aktion and was offered by the Gauleiters as their gift to the Fuehrer in October 1940. The relocation of Jews to the Gurs internment camp became an intermediate step when the infamous ‘Final Solution’ was pronounced at the Wannsee Conference in January 1942. This Nazi annihilation program triggered yet a second round of transports that would move the incarcerated Jews from Gurs to the Parisian suburb of Drancy, an assembly point where the victims faced a final

deportation to the death camp of Auschwitz. The story of this little known tragedy is told by the author who delves into the background of the historical events that led to the Aktion. He recounts the impact of this cataclysm on the area surrounding his boyhood residence in Germany and relates the tribulations and ultimate fate encountered by nearly seven-hundred members of his widely located family in the State of Baden.
