Soil Nitrogen Ecology - Cristina Cruz 2021-05-24

This book highlights the latest discoveries about the nitrogen cycle in the soil. It introduces the concept of nitrogen fixation and covers important aspects of nitrogen in soil and ecology such as its distribution and occurrence, soil microflora and

fauna and their role in N-fixation. The importance of plant growth-promoting microbes for a sustainable agriculture, e.g. arbuscular mycorrhizae in N-fixation, is discussed as well as perspectives of metagenomics, microbe-plant signal transduction in N-ecology and related aspects. This book enables the reader to bridge the main gaps in knowledge and carefully presents perspectives on the ecology of biotransformations of nitrogen in soil.

The Night Land Annotated - William Hope Hodgson
2021-05-05

The Night Land is a horror/fantasy novel by English writer William Hope Hodgson, first published in 1912. As a work of fantasy it belongs to the Dying Earth subgenre. Hodgson also published a much shorter version of the novel, entitled The Dream of X (1912). The Night Land was revived in paperback by Ballantine Books, which republished the work in two parts as the 49th and 50th volumes of its Ballantine Adult Fantasy series in July 1972. H. P. The Chemistry of Silica - Ralph K. Iler 1979-06-06
Surfactants and Interfacial Phenomena Milton J. Rosen
Bridging the gap between purely theoretical aspects of surface chemistry and the purely empirical experience of the industrial technologist, this book applies theoretical surface chemistry to understanding the action of surfactants in modifying interfacial phenomena. It surveys the structural types of commercially available surfactants and discusses interfacial phenomena, the physicochemical principles underlying the action of surfactants in each phenomenon, and the effect of structural changes in the surfactants and environmental changes on their action. Tables of data on various interfacial properties of surfactants,

compiled and calculated from the latest scientific literature, are included. 1978 304 pp. An Introduction to Clay Colloid Chemistry, 2nd Ed. H. van Olphen This book provides valuable guidance in research and design efforts by giving a clear understanding of principles and concepts of colloid chemistry as applied to clay systems. Updated and enlarged, this edition includes new information on surface characterization and adsorption mechanisms; recent results in the area of clay-organic interaction--the intercalation and intersalation of kaolinite minerals; and increased attention to the possible role of clays in biological evolution. 1977 318 pp. Physicochemical Processes for Water Quality Control Walter J. To make the unequivocal identification of a person easier, year and

place of birth and death are provided where available, as are profession, nationality, the pseudonym under which the person was known, and finally, the sources used. The names of professions given in the source material have been translated into English especially for this encyclopaedia. In the second part, covering the volumes 10 to 16, the pseudonyms are listed alphabetically and the real names provided. Approx. 500,000 pseudonyms of about 270,000 persons First encyclopedia including pseudonyms from all over the world, all times and all occupations Essential research tool for anyone wishing to identify persons and names for his research within one single work

The Political Economy of Automotive Industrialization in East Asia - Richard F. Doner

2021-04-21

East Asia is a powerhouse of automobile production. Yet, across the region, national automobile industries have had strikingly different patterns of development. Despite starting from equally low levels of performance and initially similar strategies, countries have experienced vastly different results. From Thailand's success as an assembly hub for foreign automakers and China's unexpected achievements in building its own car industry, to South Korea's impressive development of an integrated industry, to the Philippines' persistent weakness, these divergent paths offer a

fascinating window into the determinants of economic growth. The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world's most important regions. Utilizing interviews and original-language research from multiple nations, this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development. Richard F. Doner, Gregory W. Noble, and John Ravenhill instead highlight the significance of two sets of factors: countries' very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions. Through cross-national analyses of China, Taiwan, South Korea, Indonesia, Malaysia, the Philippines, and Thailand, the book sets up a clear structure for understanding industrial development and how it

enables or constrains the capabilities of domestic firms. Brief comparisons with Brazil, Mexico, and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science, which fail to give sufficient emphasis to the role of public and public-private institutions, or provide an explanation of the political bases of those institutions. In a world where auto assemblers and suppliers are facing new challenges in an ever-evolving industry--such as the transition to electric and autonomous vehicles--this book offers a crucial perspective on the centrality of institutional capacities and political economy. By tracing the divergent trajectories of seven nations, *The Political Economy of Automotive Industrialization in East Asia* offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth.

The Case of the Poisonous Socks - William H Brock

2015-11-09

In 1868, The Times reported that poisons contained in dyes were affecting the public's health. A doctor informed a London magistrate that brilliantly coloured socks had caused severe "constitutional and local complaint" to several of his patients. In one case, a patient's foot had become so swollen that his boots had to be cut off. Respected chemist, William Crookes, offered to identify the poison if doctors would send him samples of the deadly socks. The story of how he solved the mystery gives this book its title and forms the basis of the first chapter.

Written by a respected science historian and established author, this collection of essays contains 42 tales of chemists and their discoveries from the nineteenth and twentieth centuries. Other topics covered include: the quirky beliefs of American philanthropist, George Hodgkins; the

development of the chemical laboratory since the 1830s, and the career of C.P. Snow before he became a novelist. Its broad coverage and modern approach makes it of interest to chemists, teachers, historians and laypeople with an interest in science. Written with a light style and presented in a series of unconnected vignettes the book is easy to dip into at leisure.

Object-Oriented Technology. ECOOP '98 Workshop Reader - Serge Demeyer
2003-07-31

At the time of writing (mid-October 1998) we can look back at what has been a very successful ECOOP'98. Despite the time of the year - in the middle of what is traditionally regarded as a holiday period - ECOOP'98 was a record breaker in terms of number of participants. Over 700 persons found their way to the campus of the Brussels Free University to participate in a wide range of activities. This 3rd ECOOP workshop reader reports on many of these activities. It contains a careful selection of the input and a cautious summary of the outcome for the numerous discussions that happened during the

workshops, demonstrations and posters. As such, this book serves as an excellent snapshot of the state of the art in the field of object oriented programming. About the diversity of the submissions A workshop reader is, by its very nature, quite diverse in the topics covered as well as in the form of its contributions. This reader is not an exception to this rule: as editors we have given the respective organizers much freedom in their choice of presentation because we feel form follows content. This explains the diversity in the types of reports as well as in their lay out.

Dieselmotor-Management -

Robert Bosch GmbH
2004-11-15

Der Dieselmotor und die Einspritzanlage bilden eine untrennbare Einheit. In zunehmendem Maß gewinnt die Elektronik an Bedeutung, um die wachsenden Forderungen nach geringem Schadstoffausstoß und

geringem Kraftstoffverbrauch zu erfüllen. Jüngste Beispiele hierfür sind das Unit Injector System UIS und das Speichereinspritzsystem Common Rail, das mit dem Piezo-Inline-Injektor die Möglichkeiten zur Verbrauchsreduzierung noch mal entscheidend verbessert. Die aktuellen Maßnahmen zur innermotorischen Emissionsminderung, aber auch zur nachträglichen Schadstoffreduzierung wie Partikelfilter, SCR-Katalysator, Speicherkatalysator und Oxidationskatalysator werden ausführlich erklärt.
