*Italy and Early Medieval Europe - Ross Balzaretto 2018-07-26*

A comprehensive survey of recent work in Medieval Italian history and archaeology by an international cast of contributors, arranged within a broader context of studies on other regions and major historical transitions in Europe, c.400 to c.1400CE. Each of the contributors reflect on the contribution made to the field by Chris Wickham, whose own work spans studies based on close archival work, to broad and ambitious statements on economic and social change in the transition from Roman to medieval Europe, and the value of comparing this across time and space.

**Treaty Series 1583** - United Nations Office of Legal Affairs 1999-12-31

In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately.

The Politics and Ethics of Contemporary Work - Keith Breen 2021-07-09

Bringing together leading international scholars within the fields of social and political theory and philosophy, this book explores how we should understand work and its role(s) in our lives and wider society. What challenges are posed by work in our changing economy and the new economic forms that are beginning to emerge, and how can we best address these challenges? In what ways do patterns of working, as well as work technologies, shape people's lives within and outside work, in particular their life opportunities and their social and natural environment? How might we organize—or seek to reorganize—workplaces so that the experience of work better reflects our shared ethical ideals and normative principles? This volume examines these vital questions in a comprehensive and systematic manner in order to provide much needed theoretical insight and practical guidance in reflecting on the nature, problems, and possibilities of work currently. This book will be of interest to undergraduate and postgraduate students and established academics in the areas of contemporary political theory and philosophy, social theory, legal philosophy, labour studies, the sociology of work, practical ethics, critical theory, and political activism.

**What Works for Crime Victims** - Alline Pedra Jorge 2021-01-26

After the Second World War, the role of the victim in criminal conflict became an object of interest for academics. But it was only in the 1960s that the importance of providing protection and assistance to crime victims was highlighted in particular by the victims' movement, which inaugurated a new era of criminal justice in systems throughout the world. Moving beyond just the role of controlling crime and punishing the offender, the criminal justice system also began to contribute to the victims' rehabilitation and to help the victim to move on from the event

psychologically and emotionally. Although some criminological research was conducted on this topic, the effect that the criminal justice system and victim support services have on the well-being of crime victims is still uncertain. The current study sought to understand the healing process of victims of crime, the potential consequences of their participation on the criminal justice system, and the support of victim centers. Moreover, it aimed to find out whether the existence of a Victim Support Act would change the treatment that the victim receives in the criminal justice system. Thus this research was conducted based in two countries - Switzerland and Brazil - where the outcome of the victims' movement on the criminal justice system was different, as was the participation of the victim in the criminal justice system and the government's provision of support. In order to conduct this research the qualitative method was employed, which is the most efficient to gather sensitive information. Interviews with crime victims were the main source of information. Hearing observation and document research were used as complementary sources. The results of this research show that victims who have contact with the criminal justice system and victim services are not more likely to recover than those who had no contact. This is to say, the support offered has no major effects; the influence of the criminal justice system and the victim support services in the emotional well-being of crime victims is rather neutral. However, considering that the sample is not representative, findings are not expected to be generalized. Instead, findings may give insight to practitioners or to future criminal justice policy makers, suggesting what may work to improve the emotional well-being of crime victims, as well as suggesting further studies.

Water Saving Techniques for Plant Growth - H. Verplancke 2012-12-06

Large areas of crops are now grown under water-stressed conditions on non-irrigated and under limited irrigation in semi-arid and arid regions. In the future, this area of water-stressed crops will increase as a result of increasing competition from other water users, declining ground water levels, and the bringing into production of fragile lands that have low water-holding capacity, such as sandy desert soils. Consequently, strategies and practices to increase total yields and efficient water use must be improved. After the introductory material and keynotes, the book is divided into four parts. Part I covers soil water management, Part II deals with model approaches to evaluate the soil-water-atmosphere interactions, Part III treats water saving techniques through soil conditioning, and Part IV discusses case studies of water management systems. Water Saving Techniques for Plant Growth thus represents a general account of interest and activities of the various scientific disciplines which are concerned in desert encroachment as part of global change.

**General Reports of the XXth General Congress of the International Academy of Comparative Law - Rapports généraux du XXème Congrès général de l'Académie internationale de droit comparé** - Katharina Boele-Woelki 2020-12-17

This book explores convergences of legal doctrine despite jurisdictional, cultural and political barriers, as well as divergences due to such barriers, examining topics that are of vital importance to contemporary legal scholars. Written by leading experts from all continents, its 26 chapters present a comparative analysis of cutting-edge legal issues of the 21st century. While each of the countries covered stands alone as a sovereign state, in a technologically advanced world their disparate systems nonetheless show comparable strategies in dealing with complex legal issues. Several of the chapters show how, in addition to state normative production and state adjudication, a growing panoply of non-state instruments and non-state adjudication are becoming more and more central to the legal field. This book is a key addition to the library of any scholar wanting to keep abreast of the major trends in contemporary law. Representing the current state of law in a vast range of areas, it covers each topic from a comparative perspective. Cet ouvrage, en examinant des sujets d'une importance vitale pour les juristes contemporains, traite des convergences de la doctrine juridique malgré les barrières juridictionnelles, culturelles et politiques ainsi que des divergences dues à ces barrières. Écrits par d'éminents universitaires de tous les continents, ses 26 chapitres présentent une analyse comparative de sujets juridiques majeurs du 21e siècle. Dans un monde technologiquement avancé, bien que chaque pays analysé dans cet ouvrage demeure autonome en tant qu'État souverain, l'ensemble des systèmes disparates présente néanmoins des stratégies comparables pour traiter des questions juridiques complexes. En outre, plusieurs chapitres montrent comment, en plus de la production normative et de la résolution des différends étatiques, la panoplie croissante de différents types d'instruments non étatiques et de résolution non étatique des différends devient de plus en plus centrale dans la sphère juridique. Cet ouvrage est un ajout essentiel à la bibliothèque de tout universitaire souhaitant se tenir au courant des principales tendances du droit contemporain. Il couvre un vaste domaine de sujets traités d'un point de vue comparatif et représente l'état actuel du droit dans chaque domaine.
