Occupational Labor Shortages - Burt S. Barnow 2013

"Barnow, Trutko, and Piatak focus on whether persistent occupation-specific labor shortages might lead to inefficiencies in the U.S. economy. They describe why shortages arise, the difficulty in ascertaining that a shortage is present, and how to assess strategies to alleviate the shortage. Four occupations are used as test cases: 1) special education teachers, 2) pharmacists, 3) physical therapists, and 4) home health and personal care aides. For each of these occupations the authors summarize evidence that reveals whether it is currently or has recently experienced a labor shortage and suggest possible ways to alleviate the shortage if it is present. The authors close with a chapter discussing their conclusions and potential uses for occupational shortage data, including in helping determine immigration policy. They also discuss the limited nature of the occupational data currently collected by the Bureau of Labor Statistics and how the federal and state governments could expand their data collection efforts to assist policy formation."--Publisher's website.

Tax Fairness and Folk Justice - Steven M. Sheffrin 2013-10-31

Much of the discussion of tax fairness today focuses on distribution - who gets what. But this is too limited a focus. To the average person, tax fairness means something else: primarily receiving benefits commensurate with the taxes one pays, being treated with basic respect by the law and the tax authorities, and respecting legitimate efforts to earn income. The average person is not totally indifferent to inequality, but concerns for redistribution are moderated by the extent to which income and wealth have been perceived to be earned through honest effort. This book demonstrates how an understanding of "folk justice" can deepen our understanding of how tax systems actually work and how they might potentially be reformed.
