Birds by Behaviour - Dominic Couzens 2003

Covering the birds of Britain and northern Europe, this field guide allows readers not only to identify birds by their colour and other physical features, but also by the way in which they fly, feed and flock. Divided by bird families and featuring original, lively illustrations by Philip Snow and Tony Disley, the book is designed to illustrate birds as readers will actually see them in the field, enabling them to distinguish between different species by their size, shape, where they can be found and how they behave. Self-Confidence - Charles Pépin 2019-12-31
Inspired by great figures from Emerson and Nietzsche to Madonna and Serena Williams, this engaging philosophical essay explores the workings of self-confidence and how to develop it. Where does self-confidence come from? How does it work? What makes it stronger or weaker?

Why are some people more confident than others? Is it only a question of temperament or the result of conscious self-improvement? How do you get closer to those who stand out thanks entirely to their confidence in themselves?

Drawing on philosophical texts, ancient wisdom, positive psychology, and a wide range of case studies that feature famous thinkers, artists, and athletes, but also unsung heroes such as a fighter pilot and an urgent-care doctor, Charles Pépin brings to light the strange alchemy that is self-confidence. In doing so, he gives us the keys to having more confidence in ourselves.

Ways of Sensing - David Howes 2013-10-30

Ways of Sensing is a stimulating exploration of the cultural, historical and political dimensions of the world of the senses. The book spans a wide range of settings and makes comparisons between different cultures and epochs, revealing the power and diversity of sensory expressions across time and space. The chapters reflect on topics such as the tactile appeal of medieval art,

the healing power of Navajo sand paintings, the aesthetic blight of the modern hospital, the role of the senses in the courtroom, and the branding of sensations in the marketplace. Howes and Classen consider how political issues such as nationalism, gender equality and the treatment of minority groups are shaped by sensory practices and metaphors. They also reveal how the phenomenon of synaesthesia, or mingling of the senses, can be seen as not simply a neurological condition but a vital cultural mode of creating social and cosmic interconnections. Written by leading scholars in the field, Ways of Sensing provides readers with a valuable and engaging introduction to the life of the senses in society.

Psychopharmacology of Animal Behaviour Disorders

- Nicholas H. Dodman 1998-04-15

Increasingly, veterinarians are called on to treat behavioural disorders in companion pets such as cats, dogs and horses, which can often develop aggressive compulsive or other antisocial habits. In America, veterinarians are beginning to treat these disorders with psychotropic drugs such as Prozac, which have already been shown to yield good results in humans. In the UK, these drugs cannot yet be used on animals, but a number of pharmaceutical companies are developing derivatives for use in animal practice and these products are eagerly awaited. The effects are

expected to be as far-reaching as tranquillisers and antidepressants were when they were introduced into human medicine.

The Burgess Shale - Margaret Atwood

2017-03-17

“Atwood provides a window into her own early writing days . . . a treasure for readers interested in Canadian literature because this is where it all began.” —Prairie Fire Review of Books “The outburst of cultural energy that took place in the 1960s was in part a product of the two decades that came before. It’s always difficult for young people to see their own time in perspective: when you’re in your teens, a decade earlier feels like ancient history and the present moment seems normal: what exists now is surely what has always existed.” In this short work, Margaret Atwood, author of *The Handmaid’s Tale* and “Canada’s most famous writer” (*The New Yorker*), compares the Canadian literary landscape of the 1960s to the Burgess Shale, a geological formation that

contains the fossils of many strange prehistoric life forms. The Burgess Shale is not entirely about writing itself, however: Atwood also provides some insight into the meager writing infrastructure of that time, taking a lighthearted look at the early days of the institutions we take for granted today—from writers' organizations, prizes, and grant programs to book tours and festivals. "Allows the reader a brief glimpse into the mind of a great writer and her perspective and experience living through what would now seem to many the Stone Age of the Canadian writing scene . . . invaluable and very readable." —Canadian Literature

English Pastoral - James Rebanks 2020-09-03
THE SUNDAY TIMES NATURE BOOK OF THE YEAR The new bestseller from the author of The Shepherd's Life 'A beautifully written story of a family, a home and a changing landscape' Nigel Slater As a boy, James Rebanks's grandfather taught him to work the land the old way. Their family farm in the Lake District hills was part of an ancient agricultural landscape: a patchwork of crops and meadows, of pastures grazed with

livestock, and hedgerows teeming with wildlife. And yet, by the time James inherited the farm, it was barely recognisable. The men and women had vanished from the fields; the old stone barns had crumbled; the skies had emptied of birds and their wind-blown song. English Pastoral is the story of an inheritance: one that affects us all. It tells of how rural landscapes around the world were brought close to collapse, and the age-old rhythms of work, weather, community and wild things were lost. And yet this elegy from the northern fells is also a song of hope: of how, guided by the past, one farmer began to salvage a tiny corner of England that was now his, doing his best to restore the life that had vanished and to leave a legacy for the future. This is a book about what it means to have love and pride in a place, and how, against all the odds, it may still be possible to build a new pastoral: not a utopia, but somewhere decent for us all. 'A heartfelt book and one that dares to hope' Alan Bennett 'A wonder of a book, fierce,

tender, and beautiful' Helen Macdonald Winner of the Wainwright Prize Winner of the Fortnum & Mason Food Book of the Year Shortlisted for the Orwell Prize Shortlisted for the Ondaatje Prize Longlisted for the Rathbones Folio Prize **Surgery of Exotic Animals** - R. Avery Bennett 2022-02-23

Throughout the book, hundreds of high-quality clinical photographs show the appearance of complications and demonstrate each step of the corrective procedure. The Paris System for Reporting Urinary Cytology

- Dorothy L. Rosenthal 2022

The first edition of The Paris System for Reporting Urinary Cytology introduced a completely new paradigm for detecting bladder cancer by urine cytology. This system concentrated on defining morphological characteristics of the most clinically significant form of bladder cancer, High Grade Urothelial Carcinoma. This new approach has been widely accepted throughout the world, and has become part of the daily practice of cytology.

Considering that the first edition of The Paris System (TPS) introduced a new model of urinary cytodiagnosis, verification and expansion of initial material and data were anticipated. Based on evolving knowledge and readership requests,

the group of highly experienced authors have created a new edition of TPS. This second edition includes areas and issues not originally covered. A new chapter on urine cytology of the upper tract, a rarely addressed topic, has been introduced. Furthermore, the issue of cellular degeneration is discussed in the criteria of all diagnostic categories. Examples of standardized reports are included in each chapter. Most importantly, a separate chapter presents data defining the risk of malignancy (ROM) for each diagnostic category to inform clinical management. New high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls. In addition to chapters on diagnostic criteria, current concepts of pathogenesis of bladder cancer, specimen adequacy and preparation, and ancillary tests are covered in separate chapters. A bonus to the volume is a comprehensive history of urine as the earliest diagnostic sample of human disease, richly illustrated with

artworks from major museums. Written by internationally recognized authorities, this comprehensive and evidence-based guide to urine cytology is supported by the newest data confirming the original concept and significance of diagnostic criteria defining High Grade Urothelial Carcinoma. TPS is an essential tool for anyone who is practicing urinary cytology, including cytotechnologists, pathologists-in-training and practicing pathologists. This book should find a place in every cytology laboratory throughout the world. The Concept has been endorsed by the American Society of Cytopathology, and the International Academy of Cytology.

Andalous & Lusitaniens - Gabriele Boiselle
2019-07

This book is intended as a tribute to the baroque horses of Spain and Portugal. For centuries impressive Andalusian stallions have enchanted human beings and held them spellbound. They exude a beautiful compact elegance and a royal aura. Whether in harness, under the saddle or running wild and free - their magnificence is unique and infinite. These horses were considered an important status symbol and even used to be weighed in terms of gold. Their legacy is immortal and is passed down throughout the generations in the bloodlines of the Pura Raza Española. The horses of the Puro Sangre Lusitano from Portugal, with their unique character and noble appearance, are of the same origin as their Spanish relatives. At the beginning of the 18th century the Sun King João V. celebrated the heyday of equestrianism at his

court in Lisbon. Lusitanos were much prized and sought after by all the European royal courts.

They exude a very special charisma, are extremely impressive and truly magnificent.
