The Combover - Adrián N. Bravi 2016-06-13

‘A fierce, formidable writer ... The Combover is a small masterpiece’ Alberto Manguel Arduino Gherarducci is the latest in the family line of bald men with ornate combovers. Some combed their hair from one side of the head to the other, some weaved the remnants of their hair together in the middle, but Arduino favors the imperial style of Julius Caesar: forwards, with a fringe. Although fiercely proud of his combover, it has some serious drawbacks. A sudden gust of wind, or a malevolent prankster, could ruin it at any moment. When the worst happens, Arduino decides to abandon his comfortable university life, as a professor of bibliographic data exchange formats, and he heads toward freedom: Lapland. But he only makes it as far as a mountaintop in Le Marche, where he sets himself up as a hermit and his life takes an unexpected turn... A hilariously dark tale, The Combover confirms Bravi’s unique and privileged status among Italian contemporary writers. Adrián N. Bravi was born in San Fernando, Buenos Aires, and lives in Italy. He works as both a librarian and writer, and he has published a number of successful novels in both Spanish and Italian. He also contributes to various literary magazines and has co-hosted Fahrenheit, a popular Italian radio show. ‘With the skill of a spider, Bravi weaves stories that appear translucent; readers fall into them like flies, finding that there is a fierce, formidable writer at their center. The Combover is a small masterpiece.’ Alberto Manguel ‘Bravi’s book is quizzical in the best sense of the word; its intrigue as a novel lies in its un-decidability: it is both light and grim. Its sheer neuroticism and darkness are sometimes masked by its humour, but if they are behind trees on your first read, they will surely trail you out of it, loop back, snarl, and stalk you brazenly in the second.’ Numéro Cinq

Nonlinear Equations: Methods, Models and Applications - Daniela Lupo 2003-09-25

A collection of research articles originating from the Workshop on Nonlinear Analysis and Applications held in Bergamo in July 2001. Classical topics of nonlinear analysis were considered, such as calculus of variations, variational inequalities, critical point theory and their use in various aspects of the study of elliptic differential equations and systems, equations of Hamilton-Jacobi, Schrödinger and Navier-Stokes, and free boundary problems. Moreover, various models were focused upon: travelling waves in supported beams and plates, vortex condensation in electroweak theory, information theory, non-geometrical optics, and Dirac-Fock models for heavy atoms.

Agile Software Development in the Large - Jutta Eckstein 2013

Who Says Large Teams Can't Handle Agile Software Development? Agile or "lightweight" processes have revolutionized the software development industry. They're faster and more efficient than traditional software development processes. They enable developers to embrace requirement changes during the project deliver working software in frequent iterations focus on the human factor in software development Unfortunately, most agile processes are designed for small or mid-sized software development projects-bad news for large teams that have to deal with rapid changes to requirements. That means all large teams! With Agile Software Development in the Large, Jutta Eckstein-a leading speaker and consultant in the agile community-shows how to scale agile processes to teams of up to 200. The same techniques are also relevant to teams of as few as 10 developers, especially within large organizations. Topics include the agile value system as used in large teams the impact of a switch to agile processes the agile coordination of several sub-teams the way project size and team size influence the underlying architecture Stop getting frustrated with inflexible processes that cripple your large projects! Use this book to harness the efficiency and adaptability of agile software development. Stop getting frustrated with inflexible processes that cripple your large projects! Cosmetics and Dermatologic Problems and Solutions, Third Edition - Zoe Diana Draelos 2011-09-01

Cosmetics for skin, hair, and nails play a vital part in the management and treatment of many dermatological conditions; unfortunately, they may also at times be the cause of some dermatological problems. They are therefore subjects where dermatologists need to be aware of the major commercial developments taking place, in addition to the many common Over The Counter products already available, in order to be vigilant in checking the possible benefits or disadvantages for patients. This text takes a serious look at the integration of skin care products, cosmetics, hair adornments, and nail cosmetics in the daily practice of dermatology, expanding the realm of disease treatment beyond diagnosis and treatment into the maintenance phase of healthy skin, hair, and nails.

Berufsideal und moderner Arbeitsmarkt - Dietmar Heisler 2015-09-11

The post-doctoral thesis examines if and how changes to the job market influence occupational structures, creating increasing numbers of precarious forms of employment. The author uses the occupation examples hairdresser and beautician to examine the genesis of beauty care professions, their societal and social positioning, the current training regulations and organisation and the life situation of employed professionals. The vocational research results show that guilds and trade associations show too little interest in changed work situations. Instead, trade associations align their policies with traditional trade structures, which poses a direct conflict with the work and life situations of most of these professionals. This conclusion is exemplary for the entire trade, which suffers in particular due to the changes in the job market, demographic change and the lack of skilled workers.

Experiments in Ethics - Kwame Anthony Appiah 2010-03-30

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Best Shots for Vocational Schools - Brigitte Gottinger 2017

Baldness - Kerry Segrave 1996-01-01

Each year, men spend an enormous amount of time and money searching for a cure to male pattern baldness. Numerous psychological assessments indicate that the reasons behind their futile efforts are sound: attitudes toward bald men are overwhelmingly negative. From the first torturous attempts at hair implants early in this century to the faddish, well-hyped drug treatments of today, the extremes to which men have gone in an effort to regrow hair or cover their bald scalps are examined in this work. The various causes for baldness advanced by credible members of the medical establishment over the years are detailed, as well as instances of outright quackery prompted by numerous individuals and companies. Wigs, weaving, transplants, flaps and scalp reduction are among the techniques explained.

Contributions to Nonlinear Analysis - Thierry Cazenave 2007-08-10

This paper is concerned with the existence and uniform decay rates of solutions of the wave equation with a source term and subject to nonlinear boundary damping $u_t = |u| u$ in $x(0, +\infty)$ $u = 0$ on $x(0, +\infty)$ $u + g(u) = 0$ on $x(0, +\infty)$ $u = u(x)$; $u(x, 0) = u(x)$, $x \geq 0$, $t \geq 0$ where Ω is a bounded domain of \mathbb{R}^n , $n \geq 1$, with a smooth boundary $\partial\Omega = \Gamma \cup \Sigma$. Here, Γ and Σ are closed and disjoint and ν represents the unit outward normal to Ω . Problems like (1.1), more precisely, $u_t = f(u)$ in $x(0, +\infty)$ $u = 0$ on $x(0, +\infty)$ $u = g(u)$ $f(u)$ on $x(0, +\infty)$ $u = u(x)$, $x \geq 0$, $t \geq 0$ were widely studied in the literature, mainly when $f = 0$, see [6, 13, 22] and a long list of references therein. When $f = 0$ and $f = 0$ this kind of problem was well studied by Lasiecka and Tataru [15] for a very general model of nonlinear functions $f(s)$, $i = 0, 1$, but assuming that $f(s) \leq 0$, that is, f represents, for $i = 1$, an attractive force.

Arbeitsblätter für Friseure 1 - Hanna Lipp-Thoben 2013-08-13

Die Arbeitsblätter für Friseure sind ein effizientes Arbeitsmittel und eine ideale Ergänzung zum Fachkundeunterricht. Sie sind exakt auf die bewährte Friseurfachkunde von Lück/Lipp-Thoben abgestimmt. Der Einsatz dieser Arbeitsblätter fördert die Motivation und Lernbereitschaft und erlaubt in Form von methodisch unterschiedlichen Aufgabenstellungen eine schülergerechte und übersichtliche Lernzielsicherung. Übungen und Aufgaben des Teil 1 sind für die erste Hälfte der Berufsausbildung ausgewählt worden.

Ausführlicher Unterrichtsentwurf zum Thema London Sights. Präsentationen im Englischunterricht - 2019-03-28

Lesson Plan from the year 2012 in the subject English - Applied Geography, grade: 1,5, University of Education in Schwäbisch Gmünd, course: Präsentationen im Englischunterricht der Realschule, language: English, abstract: London ist der Kern einer Unterrichtsreihe, der im Buch der 7. Klasse der Realschule vorgegeben ist. Das Buch wird in der Unterrichtseinheit über Londons Sehenswürdigkeiten nicht zum Einsatz kommen, da es dafür zu wenige Informationen enthält. Das Thema „Sights in London“ bietet sich darüber hinaus sehr gut für das Üben von Präsentationen an, da es in London viele verschiedene und vor allem interessante Sehenswürdigkeiten gibt. Das Thema wird durch den Reisebericht am Anfang der Stunde für die Schüler und Schülerinnen interessant gestaltet. Nachdem der Text vorgelesen wurde, sind die Schüler und Schülerinnen neugierig geworden und beschäftigen sich anschließend in ihren Kleingruppen intensiver mit ihren Sehenswürdigkeiten. Da London sehr viele Sehenswürdigkeiten bietet, wird die heutige Stunde in Kleingruppen bzw. in Partnergruppen eingeteilt. Jede Schülergruppe soll sich mit zwei bis drei Sehenswürdigkeiten Londons beschäftigen und diese anschließend präsentieren. Die Einteilung und Präsentationsphase wird so aufgebaut sein, dass anhand eines Stadtplans von London jede Sehenswürdigkeit der Reihe nach, in einer Art „Sightseeing-Tour through London“, eingeteilt und vorgestellt wird. Jede Gruppe gestaltet ein kleines Plakat (Muster s. Anhang) zu ihren Sehenswürdigkeiten. Die Schüler und Schülerinnen, die der Präsentation zuhören, bearbeiten eine „while listening“-Aufgabe (s. Anhang). Bevor die SuS mit der Arbeit beginnen, wird ihnen eine Musterpräsentation vorgestellt.

Male Alopecia - Ralph M. Trüeb 2014-02-13

This monograph provides specialists and primary care physicians who are interested in hair with the practical know-how needed to achieve successful management of male alopecia. Guidance is first provided on the examination of hair loss in men, covering such aspects as clinical examination, the role of trichoscopy and the trichogram, laboratory work-up and scalp biopsy. Diagnosis and treatment are then described in depth for a diverse range of conditions involving alopecia. Expert opinion is combined with the results of evidence-based medicine to provide the best current advice, highlighting the synergistic action of combination regimens and adjuvant treatments and explaining the concept of multitargeted treatment. All aspects of follow-up are covered, including compliance issues and expectation management. The role of hair care and cosmetics is also considered, with identification of potential adverse effects as well as benefits.

Evolution Equations, Semigroups and Functional Analysis - Alfredo Lorenzi 2012-12-06

Brunello Terreni (1953-2000) was a researcher and teacher with vision and dedication. The present volume is dedicated to the memory of Brunello Terreni. His mathematical interests are reflected in 20 expository articles written by distinguished mathematicians. The unifying theme of the articles is "evolution equations and functional analysis", which is presented in various and diverse forms: parabolic equations, semigroups,

stochastic evolution, optimal control, existence, uniqueness and regularity of solutions, inverse problems as well as applications. Contributors: P. Acquistapace, V. Barbu, A. Briani, L. Boccardo, P. Leather - Josephine Barbe 2013

Humans are the only species known to adorn themselves with a second skin. This extra hide, leather, can be smooth, soft, and cosmetic, or robust, resistant, and protective. For thousands of years this versatile material has provided the foundation for the manufacture of clothing, jewellery, and accessories. Josephine Barbe encourages the reader to use this all-purpose material in a variety of ways. Thirty-five projects include a fancy book cover, a comfortable pair of moccasins, a handbag guaranteed to attract admiring eyes, and many more. Valuable tips for purchasing and assembling leather are also provided. Written for artisans and aspiring designers as well as history buffs, it traces the development of three major tanning methods in ancient and modern cultures, including Egyptian, Moroccan, and North American, and teaches essential skills along the way including dyeing, embossing, and stamping. All the projects can be completed with a sewing machine and a few simple tools.
