*The Auto Pact* - Maureen Irish 2004-01-01

Canada and the United States signed the Automotive Products Trade Agreement (Auto Pact) in 1965, thus resolving a competitive crisis in Canada's auto industry and extending that industry's vitality for another 35 years, until a decision of the World Trade Organization (WTO) in February 2000 determined that the Pact violated international trading rules. Following an unsuccessful appeal by Canada to the WTO's Appellate Body, the pact formally came to an end in February 2001. For policymakers and scholars concerned with international trade, the story of the Pact presents a fascinating case in its own right. The great value of this remarkable book, however, is its elucidation of the main issue underlying the Pact and its forced ending: the relationship between international trade rules on the one hand and investment measures intended to encourage local economic activity on the other. In this connection the Canadian auto industry and centered in Windsor, Ontario, directly across the river from Detroit, the heart of the industry in the U.S. and offers an intensely concentrated sample of the triple nexus of investment, labour and trade that lies at the core of economic development worldwide. Sixteen expert authors, both practitioners and academics, here open perspectives on this nexus that are of profound significance for the future of international trade. These encompass such matters as the following; and the vulnerabilities of a local community dependent on trade and open borders; and labour union tensions engendered by trade rule 'levelling' that takes little or no account of national or local economic realities; and implications for developing countries of the WTO finding that a production-to-sales ratio is a prohibited export subsidy; and the impact of Mexico's role under NAFTA on the Canadian auto industry; national and local regulation of government subsidies intended to attract investment; and ongoing multinational efforts to create a multilateral regime to protect and regulate foreign direct investment; and the persistent failure of the WTO to reach a consensus on labour standards despite the clear provisions of major international law instruments. All these issues and more are brought into sharp focus by the history of the Auto Pact and the implications of its demise. For this reason, this collection of insightful essays will be of incomparable value to professionals in every area of international trade. The Auto Pact: Investment, Labour and the WTO was produced with the support of the Canadian-American Research Centre for Law and Policy at the Faculty of Law, University of Windsor.

**Turning Point** - Darrell M. West 2021-10-19

Artificial Intelligence is here, today. How can society make the best use of it? Until recently, "artificial intelligence" sounded like something out of science fiction. But the technology of artificial intelligence, AI, is becoming increasingly common, from self-driving cars to e-commerce algorithms that seem to know what you want to buy before you do. Throughout the economy and many aspects of daily life, artificial intelligence has become the transformative technology of our time. Despite its current and potential benefits, AI is little understood by the larger public and widely feared. The rapid growth of artificial intelligence has given rise to concerns that hidden technology will create a dystopian world of increased income inequality, a total lack of privacy, and perhaps a broad threat to humanity itself. In their compelling and readable book, two experts at Brookings discuss both the opportunities and risks posed by artificial intelligence--and how near-term policy decisions could determine whether the technology leads to utopia or dystopia. Drawing on in-depth studies of major uses of AI, the authors detail how the technology actually works. They outline a policy and governance blueprint for gaining the benefits of artificial intelligence while minimizing its potential downsides. The book offers major recommendations for actions that governments, businesses, and individuals can take to promote trustworthy and responsible artificial intelligence. Their recommendations include: creation of ethical principles, strengthening government oversight, defining corporate culpability, establishment of advisory boards at federal agencies, using third-party audits to reduce biases inherent in algorithms, tightening personal privacy requirements, using insurance to mitigate exposure to AI risks, broadening decision-making about AI uses and procedures, penalizing malicious uses of new technologies, and taking pro-active steps to address how artificial intelligence affects the workforce. Turning Point is essential reading for anyone concerned about how artificial intelligence works and what can be done to ensure its benefits outweigh its harm.

**Muckraker** - W. Sydney Robinson 2012-05-12

A major work by a brilliant young biographer, Muckraker details the tenacity and verve of one of Victorian Britain's most compelling characters. Credited with pioneering investigative reporting, W. T. Stead made a career of 'muckraking': revealing horrific practices in the hope of shocking authorities into reform. As the editor of the Northern Echo, he won the admiration of the Liberal statesman William Gladstone for his fierce denunciation of the Conservative government; at the helm of London's most influential evening paper, the Pall Mall Gazette, he launched the career-defining Maiden Tribute campaign. To expose the scandal of child prostitution, Stead abducted thirteen-year-old Eliza Armstrong (thought by many to be the inspiration behind Eliza Doolittle, from friend George Bernard Shaw's Pygmalion), thrusting him into a life of notoriety. Labelled a madman in later life for dabbling in the occult, W. T. Stead conducted his life with an invincible zeal right up until his tragic demise aboard the Titanic. Revealing a man full of curious eccentricities, W. Sydney Robinson charts the remarkable rise and fall of a true Fleet Street legend in this enthralling biography.
