scientists and educators have struggled to teach this discipline more effectively. *Science Teaching Reconsidered* provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

The result of a multiyear collaboration between the Greater Good Science Center and Robert Emmons of the University of California, Davis, *The Gratitude Project* explores gratitude's deep roots in human psychology—how it evolved and how it affects our brain—as well as the transformative impact it has on creating a meaningful life and a better world. With essays based on new findings from this original research and written by renowned positive psychologists and public figures, this important book delves deeply into the neuroscience and psychology of gratitude, and explores how thankfulness can be developed and applied, both personally and in communities large and small, for the benefit of all. With contributions from luminaries such as Sonja Lyubomirsky, W. Kamau Bell, Van Jones, and many more, this edited volume offers more than just platitudes—it offers a blueprint for a new and better world.

The Zones of Regulation - Leah M. Kuypers 2011

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

If the Tomb Is Empty - Joby Martin 2022-02-08

A NATIONAL BESTSELLER A beloved pastor and a New York Times

bestselling author examine scripture and share inspiring personal stories to help show the important role that Jesus' resurrection plays in our everyday lives. The Son of God was crucified, died and buried, and He lay in the tomb for three days—until He walked out shining like the sun. In a culture in which history is erased or rewritten at will, the existence of an empty tomb matters. Why? Because if the tomb is empty—then anything is possible. In his first book, *Joby Martin*, Lead Pastor of The Church of Eleven22, dives deep into scripture and traces the story of salvation by highlighting the seven mountains throughout scripture where God manifests himself. As he describes each encounter with God, Martin shows us how the interaction on each mountain laid the groundwork for the sacrifice of Christ on Calvary, and shows what God revealed about Himself in the process. He illuminates seven familiar passages, unveiling how God's plan for Christ's sacrifice is threaded throughout scripture, and shows why Christ's resurrection—impossible, unbelievable—means that nothing is too hard for our God. Ultimately, he asks readers, Do you live every day of your life as if the tomb is empty—or as though Jesus is still hanging on that cross? Written with New York Times bestselling author Charles Martin, *If the Tomb is Empty* is an insightful and spiritually rich examination of what the miracle of Christ's resurrection means for all of us.

When hearing this story being read aloud by their teacher, students are sure to feel like they are part of a special family. The Knowledge Gap - Natalie Wexler 2020-08-04

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring

the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.
