Principles and Practice in Second Language Acquisition - Stephen D. Krashen 1982

The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

How The Other Half Learns - Robert Pondiscio 2020-06-02

An inside look at America's most controversial charter schools, and the moral and political questions around public education and school choice. The promise of public education is excellence for all. But that promise has seldom been kept for low-income children of color in America. In *How the Other Half Learns*, teacher and education journalist Robert Pondiscio focuses on Success Academy, the network of controversial charter schools in New York City founded by Eva Moskowitz, who has created something unprecedented in American education: a way for large numbers of engaged and ambitious low-income families of color to get an education for their children that equals and even exceeds what wealthy families take for granted. Her results are astonishing, her methods unorthodox. Decades of well-intended efforts to improve our schools and close the "achievement gap" have set equity and excellence at war with each other: If you are wealthy, with the means to pay private school tuition or move to an affluent community, you can get your child into an excellent school. But if you are poor and black or brown, you have to settle for "equity" and a lecture--about fairness. About the need to be patient. And about how school choice for you only damages public schools for everyone else. Thousands of parents have chosen Success Academy, and thousands more sit on waiting lists to get in. But Moskowitz herself admits Success Academy "is not for everyone," and this raises uncomfortable questions we'd rather not ask, let alone answer: What if the price of giving a first-rate education to children least likely to receive it means acknowledging that you can't do it for everyone? What if some problems are just too hard for schools alone to solve?

Nikola Tesla and the Philadelphia Experiment - Alun J. Blackwell
2013-02-06

Dr Bradley Lewton, an happy-go-lucky academic chancer who has an unfortunate way with women, knows a lot about the theory of physics and weapons systems but very little about how to make a living. Meet him in *Nikola Tesla and the Philadelphia Experiment*, an action packed, science based, thriller that will tell you all you ever wanted to know about Tesla's more out-outrageous ideas, some of which Dr Lewton discovers to be true and dangerous. The drowsy life of this unworldly academic researcher is shaken up when he is hired by top-notch lawyer Liz O'Hare, as an expert witness in a Gulf War Syndrome investigation. What seems a simple way to earn some extra cash soon becomes a matter of life and death. The combination of bizarre science, a pushy woman and a secret spy agency results in a fast moving plot which will suck you into its strange world. Facts In 1899 the scientist Nikola Tesla set up an experimental station to broadcast wireless electrical power in Colorado and succeeding in transmitting power over 200 miles, created artificial ball lightning and measured the resonant frequency of the Earth's atmosphere. He also claimed to have created a device which could split the Earth in two using mechanical resonance. On 24 February, 1901 Tesla announced he had discovered a way to communicate with other worlds On 23 July 1901 Tesla started work on his 'World System' which was to be based on a transmitting station at Wardencliff, New York. In February 1905, banker J. P. Morgan, who held a controlling interest in Tesla's patents, closed down Tesla's World System, the Wardencliff site was sold to settle Tesla's hotel bill. During the Second World War Tesla was evicted from a number of New York Hotels for keeping pigeons in his room. The exact date of Nikola Tesla's death is unknown. He died alone between 5 Jan and 8 Jan, 1943, immediately after offering to construct a Secret Weapon for the US Navy. After his death all Tesla's surviving work was declared TOP SECRET by the FBI. J. Edgar Hoover issued a memo saying. 'All matters connected with the late Nikola Tesla are to be handled in a most secret fashion to avoid publicity in respect of Tesla's inventions', and 'that every precaution be taken to preserve the secrecy of those inventions.' In June 1943, six months after Tesla's death, the US High Court ruled that the Marconi Company had infringed Tesla patents concerning radio transmission. In Oct 1943, the US Navy carried out a series of experiments in a Philadelphia dockyard. They used an electrical force field, to make the destroyer the USS Eldridge invisible. Many of the crew ended up in mental institutions. In 1993 the US department of Defence announced it was starting to build an experimental ionospheric research facility in Gakona, Alaska. The principle patents are improvements on patents first held by Tesla. These patents are for: "a method and apparatus for altering a region in the Earth's atmosphere, ionosphere and/or magnetosphere; a method and apparatus for creating an artificial electron cyclotron heating region of plasma; and a method for producing a shell of relativistic particles at an altitude above the Earth's surface." This book is a work of fiction.

The Brain That Changes Itself - Norman Doidge 2007-03-15

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

The Man Within - Graham Greene 2018-05-15

The "strikingly original" debut novel by the masterful British author is "a perfect adventure" of love and smuggling on the English coast (*The Nation*). Francis Andrews is a reluctant smuggler living in the shadow of his brutish father's legacy. To exorcise the ghosts of the man he loathes, Andrews betrays his colleagues to authorities and takes flight across the downs. It's here that he stumbles upon the isolated cottage of a beguiling stranger named Elizabeth—an empathetic young woman who is just as lonely, every bit the outsider as he, and reconciling a troubling past of her own. Andrews, a man on the run from those he exposed, believes he's found refuge and salvation. But when Elizabeth encourages him to return to the courts of Lewes and give evidence against his accomplices, the treacherous and deadly repercussions may be beyond their control. "The ultimate strengths of [Graham] Greene's books is that he shows us the hazards of compassion," a theme that would find its earliest expression in *The Man Within*, his first published novel (Pico Iyer).

No More Reading Instruction Without Differentiation - Lynn Geronemus Bigelman 2016-05-26

The research is compelling: when teachers differentiate reading instruction, students learn more. But teachers are too often given the expectation of differentiation without the details on how to make it work. In *No More Reading Instruction Without Differentiation*, Debra Peterson and Lynn Bigelman offer an instructional framework that adapts instruction based on individual students needs and interests. Peterson unpacks the research that supports differentiated instruction. Then veteran school principal Bigelman shows how to implement differentiation using: - Learning Targets & Performance Tasks - Student Self-Assessment - Talk to Assess & Deepen Student Understanding - Workshop: A Daily Structure for Differentiation - Project-Based Learning - Conferring - Individual Learning Goals - Intervention Planning Differentiation doesn't mean creating separate lesson plans for each student every day. Differentiation is responsive teaching that identifies what each student knows and can do and what can happen next to move that student forward in her learning. In this book, you'll find the tools and strategies to better meet the needs of the children in your classroom right now.

Understanding Multimodal Discourses in English Language Teaching Textbooks - Christopher A. Smith 2022-08-11

Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook

choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.
