Brand Sense - Martin Lindstrom 2010-02-02

The definitive book on sensory branding, shows how companies appeal to consumers' five senses to sell products. Did you know that the gratifying smell that accompanies the purchase of a new automobile actually comes from a factory-installed aerosol can containing "new car" aroma? Or that Kellogg's trademarked "crunch" is generated in sound laboratories? Or that the distinctive click of a just-opened jar of Nescafé freeze-dried coffee, as well as the aroma of the crystals, has been developed in factories over the past decades? Or that many adolescents recognize a pair of Abercrombie & Fitch jeans not by their look or cut but by their fragrance? In perhaps the most creative and authoritative book on how our senses affect our everyday purchasing decisions, global branding guru Martin Lindstrom reveals how the world's most successful companies and products integrate touch, taste, smell, sight, and sound with startling and sometimes even shocking results. In conjunction with renowned research institution Millward Brown, Lindstrom's innovative worldwide study unveils how all of us are slaves to our senses—and how, after reading this book, we'll never be able to see, hear, or touch anything from our running shoes to our own car doors the same way again. An expert on consumer shopping behavior, Lindstrom has helped transform the face of global marketing with more than twenty years of hands-on experience. Firmly grounded in science, and disclosing the secrets of all our favorite brands, Brand Sense shows how we consumers are unwittingly seduced by touch, smell, sound, and more.

The Service-Dominant Logic of Marketing - Robert F. Lusch

2014-12-18

Expanding on the editors' award-winning article "Evolving to a New Dominant Logic for Marketing," this book presents a challenging new paradigm for the marketing discipline. This new paradigm is service-oriented, customer-oriented, relationship-focused, and knowledge-based, and places marketing, once viewed as a support function, central to overall business strategy. Service-dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision, rather than the exchange of goods, as the proper subject of marketing. It moves the orientation of marketing from a "market to" philosophy where customers are promoted to, targeted, and captured, to a "market with" philosophy where the customer and supply chain partners are collaborators in the entire marketing process. The editors elaborate on this model through an historical analysis, clarification, and extension of service-dominant logic, and distinguished marketing thinkers then provide further insight and commentary. The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice.

Marketing and the Common Good - Patrick E. Murphy 2013-07-24

Marketing is among the most powerful cultural forces at work in the contemporary world, affecting not merely consumer behaviour, but almost every aspect of human behaviour. While the potential for marketing both to promote and threaten societal well-being has been a perennial focus of inquiry, the current global intellectual and political climate has lent this topic extra gravitas. Through original research and scholarship from the influential Mendoza School of Business, this book looks at marketing's ramifications far beyond simple economic exchange. It addresses four major topic areas: societal aspects of marketing and consumption; the social and ethical thought; sustainability; and public policy issues, in order to explore the wider relationship of marketing within the ethical and moral economy and its implications for the common good. By bringing together the wide-ranging and interdisciplinary contributions, it provides a uniquely comprehensive and challenging exploration of some of the most pressing themes for business and society today.

Villányból Tokióba. Egy külkereskedő - diplomata - egyetemi professzor kalandos élete - Rekettye Gábor 2020-09-30

Hogyan jut el Villányból Tokióba egy okleveles közgazda, hogy aztán milliók szeme láttára adjon át egy szumóbajnoknak járó herendi vázát? Rekettye Gábor egyetemi tanár, a Pécsi Tudományegyetem Közgazdaságtudományi Kara dékánjának saját fotókkal is gazdagon illusztrált, személyes hangvételű visszaemlékezésében számos ehhez hasonlóan meglepő fordulattal találkozhatunk, miközben megelevenednek előttünk életének legfontosabb állomásai. Az életrajz regényes megjelenítésén – iskolák, ifjúkori szerelmek, a nagyszülők Jugoszláviából való átcsempészése, egyetemi élet, Európa körbejárása, a tenisz – azonban jócskán túlmutat az írás, hiszen családjának a második világháború utáni küzdelmeibe, a Pécsi Kesztyűgyár, az MKKE KNT, a Tannimpex külkereskedelmi vállalat életébe, valamint a Japánban diplomataként, a magyar kereskedelmi kirendeltség vezetőjeként eltöltött öt év különleges eseményeibe is betekintést nyerhetünk általa. „Rekettye Gábort régóta ismerem, sok szakmai együttműködésünk volt a múltban, sőt még a tenispályán is gyakran találkoztunk. Biztos vagyok benne, hogy személyes és szórakoztató történeteiből az olvasó képet kaphat az adott időszak külkereskedelméről, diplomáciai módszereiről, valamint a rendszerváltást követően az egyetemi élet változásairól. A könyvet jó szívvel ajánlom minden érdeklődőnek.” Martonyi János egyetemi professzor volt külügyminiszter

Marketing Places - Philip Kotler 2002-01-15

Today's headlines report cities going bankrupt, states running large deficits, and nations stuck in high debt and stagnation. Philip Kotler, Donald Haider, and Irving Rein argue that thousands of "places" -- cities, states, and nations -- are in crisis, and can no longer rely on national industrial policies, such as federal matching funds, as a promise of jobs and protection. When trouble strikes, places resort to various palliatives such as chasing grants from state or federal sources, bidding for smokestack industries, or building convention centers and exotic attractions. The authors show instead that places must, like any market-driven business, become attractive "products" by improving their industrial base and communicating their special qualities more effectively to their target markets. From studies of cities and nations throughout the world, Kotler, Haider, and Rein offer a systematic analysis of why so many places have fallen on hard times, and make recommendations on what can be done to revitalize a place's economy. They show how "place wars" -- battles for Japanese factories, government projects, Olympic Games, baseball team franchises, convention business, and other economic prizes -- are often misguided and end in wasted money and effort. The hidden key to vigorous economic development, the authors argue, is strategic marketing of places by rebuilding infrastructure, creating a skilled labor force, stimulating local business entrepreneurship and expansion, developing strong public/private partnerships, identifying and attracting "place compatible" companies and industries, creating distinctive local attractions, building a service-friendly culture, and promoting these advantages effectively. Strategic marketing of places requires a deep understanding of how "place buyers" -- tourists, new residents, factories, corporate headquarters, investors -- make their place decisions. With this understanding, "place sellers" -- economic development agencies, tourist promotion agencies, mayor's offices -- can take the necessary steps to compete aggressively for place buyers. This straightforward guide for effectively marketing places will be the framework for economic development in the 1990s and beyond.

The Fall of Advertising and the Rise of PR - Al Ries 2009-03-17

Bestselling authors and world-renowned marketing strategists Al and Laura Ries usher in the new era of public relations. Today's major brands are born with publicity, not advertising. A closer look at the history of the most successful modern brands shows this to be true. In fact, an astonishing number of brands, including Palm, Starbucks, the Body Shop, Wal-Mart, Red Bull and Zara have been built with virtually no advertising. Using in-depth case histories of successful PR campaigns coupled with those of unsuccessful advertising campaigns, *The Fall of Advertising* provides valuable ideas for marketers -- all the while demonstrating why advertising lacks credibility, the crucial ingredient in brand building, and how only PR can supply that credibility; the big bang approach advocated by advertising people should be abandoned in favor of a slow build-up by PR; advertising should only be used to maintain brands once they have been established through publicity. Bold and accessible, *The Fall of Advertising* is bound to turn the world of marketing upside down.

Relationship Marketing - Steve Baron 2010-04-20

Confronting Capitalism - Philip Kotler 2015-04-15

With one side of the political aisle proposing increasingly more socialistic and anti-capitalistic ideas, the other side has been quick to defend our country's great economic model, with good reason. Capitalism--spanning a spectrum from laissez faire to authoritarian--shapes the market economies of all the wealthiest and fastest-growing nations. But does that mean it is perfect as is, and that we would not all benefit from an honest evaluation and reconstruction of the free market system that has shaped our country's way of economic growth?The truth is, trouble is cracking capitalism's shiny veneer. In the US, Europe, and Japan, economic growth has slowed down. Wealth is concentrated in the hands of a few; natural resources are exploited for short-term profit; and good jobs are hard to find. In *Confronting Capitalism*, business expert Philip Kotler explains 14 major problems undermining capitalism, including: • Persistent and increasing poverty • Automation's effects on job creation • High debt burdens • Steep environmental costs • Boom-bust economic cycles • And moreBut this landmark book does not stop with merely revealing the problems. It also delivers a heartening message: We can turn things around! Movements toward shared prosperity and a higher purpose are reinvigorating companies large and small, while proposals abound on government policies that offer protections without stagnation. Kotler identifies the best ideas, linking private and public initiatives into a force for positive change, and offers suggestions for returning to a healthier, more sustainable capitalism that works for all.

Flock and Flow - Grant David McCracken 2006

Is it possible any longer to "read" markets fast enough to respond to them? A world of discrete parts is now one interconnected web of ceaseless calculation and response. Marketing has become a thing of speed and turbulence, with all the players moving simultaneously. For marketing guru Grant McCracken, the key to success in this dynamic new marketplace is to find a way to slow the world down. And McCracken believes he has the solution. It begins with understanding the mechanics at work today. He says, "Complexity has a theory. Commotion has a pattern. Dynamism has a system. We can continue to live by damage control, or we can change the way we play the game." To survive our own world of collision and speed, marketers need to see the world as "flocks and flows." In this exciting new book, McCracken deploys "complex adaptive theory" to track the movement of trends and new groupings of consumers. He shows how to monitor new trends, whether and when to introduce new brands and brand extensions, how to speak to niche markets, and how to avoid costly mistakes. McCracken's sage and witty advice could not come at a better time. His book will be a valuable aid for anyone trying to keep up with marketplace changes in our rapidly evolving world.

A NASDAQ Market Simulation - Vincent Darley 2007

This pioneering book describes the applications of agent-based modeling to financial markets. It presents a new paradigm for finance, where markets are treated as complex systems whose behavior emerges as a result of interactions of market participants, market institutions, and market rules. This includes both a presentation of the conceptual model and its software implementation. It also summarises the result of the profound research on the successful practical application of this new approach to answer questions regarding the NASDAQ Stock Market's decimalization that was implemented in 2001. The book presents conceptual foundations for modeling markets as complex systems. It describes the agent-based model of the NASDAQ stock market, including strategies used by market-makers and investors, market participants interactions, and impacts of rules and regulations. It includes analyses of simulation behavior, comparison with the behaviors observed in the real-world markets (existence of fat tails, spread clustering, etc.), and predictions about possible outcomes of decimalization. A framework for calibrating the market behavior and individual market-makers strategies to historical data is also presented.

Weaponized Marketing - Lisa Merriam 2020-04-29

Islamic jihadists win with marketing. Terrorism is a form of marketing; an act of communication as much as it is an act of violence. While much has been written about the growing sophistication of marketing by Islamic jihadists, what is missing is a solution. Today, the Middle East is going through tectonic change with a promising new generation hungry for a different world. We need a better approach. We must fight back with a marketing battle plan. *Weaponized Marketing: Defeating Islamic Jihad with Marketing That Built the World's Top Brands* offers a blueprint for success in the marketplace of ideas. This book breaks new ground by applying proven business methods to intractable military and diplomatic problems. It provides a comprehensive understanding of how marketing works and how terrorists use it. Most importantly, it presents an effective alternative to the failing efforts to argue through a "counter-narrative" and spread through social media. Where bullets, bombs, policy papers, and press releases have failed, a marketing approach—radical for government—has a solid track record for businesses that built the world's most successful brands.

Handbook of Marketing and Society - Paul N. Bloom 2001

Marketing scholars have a long history of conducting research on how marketing affects the welfare of society. A significant body of knowledge has developed to look beyond marketing's impact on the corporate bottom line towards the affects of marketing on consumer sovereignty, public health, economic growth, and other aspect of societal welfare. The large and growing amount of research has become fragmented and diverse. There is a need for a volume to pull all of this research together to facilitate the assessment of what we have learned and what we need to study further. This volume fills that need! *Handbook of Marketing and Society* presents the first comprehensive, in-depth examination of scholarly research on how marketing affects societal welfare. Drawing on the talents of a distinguished group of contributors, the editors have assembled key reviews, analyses, and perspectives on a broad range of research topics including deceptive advertising, warning labels, trademark infringement, antitrust enforcement, environmental labels, privacy protection, social marketing, and corporate societal marketing. An unifying model is presented in the introduction that illustrates the linkage of marketing knowledge, marketing decisions, and societal welfare. Each chapter covers, in a purposeful way, a different link or path through which marketing can affect societal welfare. Future research needs are identified in each chapter in order to help focus marketing thinking and marketing practice serve society more effectively. Academics, graduate students, and others interested in marketing's role in society will find this a valuable resource and an excellent guidebook for future research.

The Circle of Innovation - Tom Peters 2010-09-08

Tom Peters--brilliant, original, and perhaps the most inspiring and listened-to business thinker of our time--has a lot on his mind these days. And he wants to share it in *The Circle of Innovation*. The world of business is in a permanent state of flux, he argues, a state of chaos in which constant innovation is the only survival strategy--for the individual and for the organization. And he presents here a lifesaving handbook--both provocative and practical--designed to turn any organization into a perpetual innovation machine. In 400 seminars in 47 states and 22 countries in the last five years, Peters has reexamined, refined, and reinvented his views on innovation. Now he brings those seminars--and his passion--to the reader in a landmark book. It is meant, he writes, to both "terrify" and "enlighten." These are "times of matchless peril for those who fail to grasp the nettle...and times of matchless opportunity for those who do." To keep us alert, limber, and ready for action, he provokes and cajoles in chapter after chapter. Among his institutions and revelations: *We Are All Michelangelos*. He shows how to transform every "jobholder" into a full-fledged businessperson. *All Value Comes from the Professional Services*. How to convert sluggish staff units into Vital Centers of Intellectual Capital Accumulation. *The System is the Solution*. How to build great systems--which go far beyond nuts and bolts. *Create Waves of Lust*. Quality is not the automatic advantage it recently was. There is a pressing need to reverse the rising tide of product and service "commoditization." *Tommy Hilfiger Knows*. In a crowded marketplace, branding is far more important than ever before. *It's a Woman's World*. How to capitalize on the fact that women purchase/are purchasing agents for well over half of U.S. commercial and consumer goods. *Little Things Are the Only Things*. As the Blight of Sameness encroaches on market after market, design is often the best tool in services or manufacturing for sustainable differentiation. *We're Here to Live Life Out Loud*. Why transformational leaders of the future must have laser-like focus, tell the truth, and live on the lunatic fringe. The hallmarks of Tom Peters legend are an insatiable curiosity, an agile intellect, a pragmatic perspective, and an uncanny ability to gauge the global zeitgeist. These qualities are all brought to bear as Peters sets out to engage, enrage, and ultimately empower his readers, amid forces that are reshaping not only business but every aspect of human experience.
