**Essays on the Spread of Humanistic and Renaissance Literary Civilization in the Slavic World (15th-17th Century)** - Giovanna Siedina

The essays gathered in this volume are devoted to different aspects of the reception of Humanism and the Renaissance in Slavic countries. They mark the beginning of a dialogue among scholars of different Slavic languages and literatures, in search of the ways in which the entire Slavic world – albeit to varying degrees – has participated from the very beginning in European cultural transformations, and not simply by sharing some characteristics of the new currents, but by building a new identity in

harmony with the changes of the time. By overcoming the dominant paradigm, which sees all cultural manifestations as part of a separate 'national' linguistic, literary and artistic canon, this volume is intended to be the first step in outlining some ideas and suggestions in view of the creation, in the future, of an atlas that maps the relevance of Humanism and the Renaissance in the Slavic world.

**CCSS and UDL: Common Core State Standards and Universal Design for Learning** - Joseph Casbarro 2013-01-01  
Given the prevalence of student diversity, schools are struggling to find ways to help with

the implementation of CCSS. With the wide range of student learning styles, socioeconomic backgrounds and life experiences, one key to meeting this challenge is the use of Universal Design for Learning (UDL). Originally developed to address the instructional needs of students with disabilities, UDL is now being embraced as an answer to creating learning environments where all students, regardless of their individual differences, can meet the CCSS. Designed for classroom teachers, this guide provides practical strategies and best practices for utilizing UDL as a means to help students successfully access and achieve the CCSS.

Character Strengths and Virtues - Christopher Peterson 2004-04-08

"Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be

simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which exists in degrees. Character Strengths and Virtues classifies

twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life.

*Modeling Communication with Robots and Virtual Humans* - Ipke Wachsmuth 2008-04-03

Embodied agents play an increasingly important role in cognitive interaction technology. The two main types of embodied agents are virtual humans inhabiting simulated environments and humanoid robots inhabiting the real world. So far research on embodied communicative agents has mainly explored their potential for practical applications. However, the design of communicative artificial agents can also be of great heuristic value for the scientific study of communication. It allows researchers to isolate, implement, and test essential properties of inter-

agent communications in operational models. Modeling communication with robots and virtual humans thus involves the vision of using communicative machines as research tools. Artificial systems that reproduce certain aspects of natural, multimodal communication help to elucidate the internal mechanisms that give rise to different aspects of communication. In short, constructing embodied agents who are able to communicate may help us to understand the principles of human communication. As a comprehensive theme, “Embodied Communication in Humans and Machines” was taken up by an international research group hosted by Bielefeld University’s Center for Interdisciplinary Research (ZiF - Zentrum für interdisziplinäre Forschung) from October 2005 through September 2006. The overarching goal of this research year was to develop an integrated perspective of embodiment in communication, establishing bridges between lower-level, sensorimotor functions and a range

of higher-level, communicative functions involving language and bodily action. The present volume grew out of a workshop that took place during April 5–8, 2006 at the ZiF as a part of the research year on embodied communication.

### **Guide to Standard Floras of the World** -

David G. Frodin 2001-06-14

This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century, and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions, with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras, and general principles and current trends, plus an appendix on bibliographic searching, a

lexicon of serial abbreviations, and author and geographical indexes.

*Computers Helping People with Special Needs, Part II* - Klaus Miesenberger 2010-07-05  
Welcome to the Proceedings of ICCHP 2010! We were proud to welcome participants from more than 40 countries from all over the world to this year's ICCHP. Since the late 1980s, it has been ICCHP's mission to support and reflect

development in the field of "Assistive Technologies," eAccessibility and eInclusion. With a focus on scientific quality, ICCHP has become an important reference in our field. The 2010 conference and this collection of papers once again fulfilled this mission. The International Programme Committee, comprising 106 experts from all over the world, selected 147 full and 44 short papers out of 328 abstracts submitted to ICCHP. This acceptance ratio of about half of the submissions demonstrates our strict pursuit of scientific quality both of the programme and in particular of the proceedings in your hands. An impressive number of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2010. These STS help to bring the meeting into sharper focus in several key areas. In turn, this deeper level of focus helps to collate a state of the art and mainstream technical, social, cultural and political developments.

Using Developmentally Appropriate Practices to Teach the Common Core - Lisa S. Goldstein  
2015-07-16

Using Developmentally Appropriate Practices to Teach the Common Core: Grades PreK-3 provides current and prospective primary grade teachers with an understanding of the CCSS-ELA and CCSS-M that highlights their compatibility with developmentally appropriate practices (DAP), the instructional approach generally preferred by teachers of young

children. The book begins by framing the CCSS as a distinct improvement over lengthy lists of academic content standards and as a carefully conceptualized and DAP-friendly set of curriculum guidelines. Next, the CCSS-ELA and CCSS-M for Grades K-3 are unpacked, analyzed, synthesized, and cross-referenced to key features of DAP. Finally, several "hot topic" issues—differentiating instruction to meet the needs of all learners, ensuring equitable access to the curriculum for English Language Learners, addressing assessment and accountability expectations, and educating parents and families about the CCSS and DAP—are prioritized and examined in depth. Using Developmentally Appropriate Practices to Teach the Common Core: Grades PreK-3 is a highly useful guide for both pre-service and in-service early childhood education teachers.

**Spatial Literary Studies** - Robert T. Tally Jr.  
2020-10-21

Following the spatial turn in the humanities and social sciences, *Spatial Literary Studies: Interdisciplinary Approaches to Space, Geography, and the Imagination* offers a wide range of essays that reframe or transform contemporary criticism by focusing attention, in various ways, on the dynamic relations among

space, place, and literature. These essays reflect upon the representation of space and place, whether in the real world, in imaginary universes, or in those hybrid zones where fiction meets reality. Working within or alongside related approaches, such as geocriticism, literary geography, and the spatial humanities, these essays examine the relationship between

literary spatiality and different genres or media, such as film or television. The contributors to Spatial Literary Studies draw upon diverse critical and theoretical traditions in disclosing, analyzing, and exploring the significance of space, place, and mapping in literature and in the world, thus making new textual geographies and literary cartographies possible.
