Homo Ex Data: Design Age Big Data - Burkhard Jacob 2020-03-06

- The symposium Homo ex Data - Design in the Age of Big Data and this publication mark the launch of the Red Dot Network pilot project on topical issues such as Big Data, the Internet of Things, Artificial Intelligence, Augmented Reality and Virtual Reality from a design perspective The development of social media,

online services, smartphones and devices, autonomous vehicles and robots has meant that both software and hardware, programs and products, as well as computers and machines are increasingly participating in human communication. A new artificial intelligence is evolving that no longer tries to copy natural human intelligence, but incessantly collects data we make available to it by using the Internet and owning smart and mobile appliances. With the help of algorithms, behavior patterns are identified, and predictions made whose significance increase with the amount of data we supply. The articles in this book, which have been written for the symposium Homo ex Data - Design in the Age of Big Data, also show that we have more decisions to make about the subject of artificial intelligence than just those about 0 and 1. Designers whose views are expressed in this anthology and who are closely involved with the design of digital media and products will have to make further decisions if they wish to shape human activity, behavior and experience. This realization is reflected in the breadth and scope of the various contributions. Ecologies Design - Maibritt Pedersen Zari 2020-07-07

The notion of ecology has become central to contemporary design discourse. This reflects contemporary concerns for our planet and a new understanding of the primary entanglement of

the human species with the rest of the world. The use of the term 'ecology' with design tends to refer to how to integrate ecologies into design and cities and be understood in a biologically-scientific and technical sense. In practice, this scientific-technical knowledge tends to be only loosely employed. The notion of ecology is also often used metaphorically in relation to the social use of space and cities. This book argues that what it calls the 'biological' and 'social' senses of ecology are both important and require distinctly different types of knowledge and practice. It proposes that science needs to be taken much more seriously in 'biological ecologies', and that 'social ecologies' can now be understood non-metaphorically as assemblages. Furthermore, this book argues that design practice itself can be understood much more rigorously, productively and relevantly if understood ecologically. The plural term 'ecologies design' refers to these three types of ecological design. This book is unique in bringing these three perspectives on ecological design together in one place. It is significant in proposing that a strong sense of ecologies design practice will only follow from the interconnection of these three types of practice. *Ecologies Design* brings together leading international experts and relevant case studies in the form of edited research essays, case studies and project work. It provides an overarching critique of current ecologically-oriented approaches and offers evidence and exploration of emerging and effective methods, techniques and concepts. It will be of great interest to academics, professionals and students in the built environment disciplines.

TransArea - Ottmar Ette 2016-07-11

Ottmar Ette's *TransArea* proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge

of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

Popular Music and Public Diplomacy - Mario Dunkel 2019-03-31

In the early years of the Cold War, Western nations increasingly adopted strategies of public diplomacy involving popular music. While the diplomatic use of popular music was initially limited to such genres as jazz, the second half of the 20th century saw a growing presence of various popular genres in diplomatic contexts, including rock, pop, bluegrass, flamenco, funk, disco, and hip-hop, among others. This volume illuminates the interrelation of popular music and public diplomacy from a transnational and transdisciplinary angle. The contributions argue that, as popular music has been a crucial factor in international relations, its diplomatic use has substantially impacted the global musical landscape of the 20th and 21st centuries.

Materialist Feminism - Rosemary Hennessy 1997
During the 1980s, capitalism triumphantly secured its global reach, anti-communist ideologies hammered home socialism's inherent

failure, the New Left increasingly moved into the professional middle class--and many of feminism's earlier priorities were marginalized. "Identity politics", often formulated in terms of social reconstructionism or multiculturalism, has increasingly suppressed materialist feminism's systematic perspective, replacing it with discourse analysis or cultural politics.

Materialist Feminism: A Reader argues against the retreat to multiculturalism for keeping invisible the material links among the explosion of meaning-making practices in highly industrialized social sectors, the exploitation of women's labor, and the appropriation of women's bodies that continues to undergird the scramble for profits and state power in multinational capitalism.

International Relations, Music and Diplomacy - Frédéric Ramel 2018-01-22

This volume explores the interrelation of international relations, music, and diplomacy from a multidisciplinary perspective. Throughout history, diplomats have gathered for musical events, and musicians have served as national representatives. Whatever political unit is under consideration (city-states, empires, nation-states), music has proven to be a component of diplomacy, its ceremonies, and its strategies. Following the recent acoustic turn in IR theory, the authors explore the notion of "musical diplomacies" and ask whether and how it differs from other types of cultural diplomacy.

Accordingly, sounds and voices are dealt with in acoustic terms but are not restricted to music per se, also taking into consideration the voices (speech) of musicians in the international arena. Read an interview with the editors here:

Theodor Fontane and the European Context - 2021-12-28

On the centenary of Fontane's death and at the turn of the century these essays take a new look at this supreme chronicler of Prussia and of the Germany that emerges after 1871. Written by scholars from different countries and disciplines, they focus on novels and theatre reviews from the perspectives of philosophy, sociology, comparative literature and translation theory, and in the contexts of topography and painting.

Connections and crosscurrents emerge to reveal new aspects of Fontane's poetics and to produce contrasting but complementary readings of his novels. He appears in the company of predecessors and contemporaries, such as Scott, Thackeray, Saar, Ibsen, Turgenev, but also in that of writers he has rarely, if ever, been seen beside, such as E.T.A. Hoffmann, Stendhal, Trollope, Henry James and Edith Wharton, Beckett and Faulkner. The historical novel and the social position of women are each a recurring focus of interest. Fontane emerges as receptive to other voices, as a precursor of developments in modern narrative, and confirmed as the novelist who brings the nineteenth-century German novel closest to the broad traditions of European realism.

Why She Buys - Bridget Brennan 2011-09-13

If the consumer economy had a sex, it would be female. If the business world had a sex, it would be male. And therein lies the pickle. Women are the engine of the global economy, driving 80 percent of consumer spending in the United States alone. They hold the purse strings, and when they've got a tight grip on them as they do now, companies must be shrewder than ever to win them over. Just when executives have mastered becoming technology literate, they find there's another skill they need: becoming female literate. This isn't always easy. Gender is the most powerful determinant of how a person views the world and everything in it. It's stronger than age, income, or race. While there are mountains of research done every year segmenting consumers and analyzing why they buy, more often than not it doesn't factor in the one piece of information that trumps them all: the sex of the buyer. It's stunning how many companies overlook the psychology of gender when we all know that men and women look at the world so differently. Bridget Brennan's *Why She Buys* shows decision makers how to bridge this divide and capture the business of the world's most powerful consumers just when they need it most. • *No Matter Where You Live, Women Are a Foreign Country: You'll discover the value in studying women with the same intensity that you would a foreign market. Women grow up within a culture of their own gender, which is often invisible to men. Brennan dissects this female culture and explains the important brain differences between men and women that may cause your female customers to notice things about your products, marketing campaigns, or sales environment that you might have overlooked.* • *The High Fives: There are five major trends driving the global female population that are key to determining their wants and needs. These global shifts are just beginning to be tapped by businesses, and learning about them can provide you with an*

invaluable blueprint for long-range planning. • *The Good, the Bad, and the Ugly: Find out how the best and brightest companies have cracked the female code, and hear horror stories about those that haven't. Through instructive case studies and interviews, Why She Buys provides practical, field-proven techniques that you can apply to your business immediately, from giants like Procter & Gamble and Toyota to upstarts like Method home-care products and lululemon athletica apparel. At a time when every company is looking for a competitive advantage, Bridget Brennan offers a new and effective lens for capturing market share.*

A Critical History of German Film - Stephen Brockmann 2010

A history of German film dealing with individual films as works of art has long been needed. Existing histories tend to treat cinema as an economic rather than an aesthetic phenomenon; earlier surveys that do engage with individual films do not include films of recent decades. This book treats representative films from the beginnings of German film to the present. Providing historical context through an introduction and interchapters preceding the treatments of each era's films, the volume is suitable for semester- or year-long survey courses and for anyone with an interest in German cinema.
