The Occupation of Iraq - Ali A. Allawi 2008-10-01

Involved for over thirty years in the politics of Iraq, Ali A. Allawi was a long-time opposition leader against the Baathist regime. In the post-Saddam years he has held important government positions and participated in crucial national decisions and events. In this book, the former Minister of Defense and Finance draws on his unique personal experience, extensive relationships with members of the main political groups and parties in Iraq, and deep understanding of the history and society of his country to answer the baffling questions that persist about its current crises. What really led the United States to invade Iraq, and why have events failed to unfold as planned? The Occupation of Iraq examines what the United States did and didn't know at the time of the invasion, the reasons for the confused and contradictory policies that were enacted, and the emergence of the Iraqi political class during the difficult transition process. The book tracks the growth of the insurgency and illuminates the complex relationships among Sunnis, Shias, and Kurds. Bringing the discussion forward to the

reconfiguration of political forces in 2006, Allawi provides in these pages the clearest view to date of the modern history of Iraq and the invasion that changed its course in unpredicted ways.

Bootleg! The Rise And Fall Of The Secret Recording Industry - Clinton Heylin 2010-03-04

An absorbing account of the record industry's worst nightmare. In the summer of 1969, Great White Wonder, a collection of unreleased Bob Dylan recordings appeared in Los Angeles. It

was the first rock bootleg and it spawned an entire industry dedicated to making unofficial recordings available to true fans. Bootleg! tells the whole fascinating saga, from its underground infancy through the CD 'protection gap' era, when its legal status threatened the major labels' monopoly, to the explosion of trading via Napster and Gnutella on MP-3 files. Clinton Heylin provides a highly readable account of the busts, the defeats and victories in court; the personalities - many interviewed for the first time for this book. This classic history has now been updated and revised to include today's digital era and the emergence of a whole new bootleg culture.

The Digital Person - Daniel J Solove 2004

Nudge - Richard H. Thaler 2009-02-24
Now available: Nudge: The Final Edition The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make decisions—for fans of Malcolm Gladwell's Blink, Charles Duhigg's The Power of Habit, James Clear's Atomic Habits, and Daniel Kahneman's Thinking, Fast and Slow Named a Best Book of the Year by The Economist and the Financial Times Every day we make choices—about what to buy or eat, about financial investments or our children's health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. Nudge is about how we make these choices and how we can make better ones. Using dozens of eye-opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School

professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible "choice architecture" to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice.

Debt - David Graeber 2012

Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.

Orientalism - Edward W. Said 2014-10-01

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.

Psychology of Intelligence Analysis - Richards J Heuer 2020-03-05

In this seminal work, published by the C.I.A. itself, produced by Intelligence veteran Richards Heuer discusses three pivotal points. First, human minds are ill-equipped ("poorly wired") to cope effectively with both inherent and induced uncertainty. Second, increased knowledge of our inherent biases tends to be of little assistance to the analyst. And lastly, tools and techniques that apply higher levels of critical thinking can substantially improve analysis on complex problems.

Mysteries of Police and Crime - Arthur

George Frederick Griffiths 2015-09-16

It may be said that society itself creates the crimes that most beset it. If the good things of life were more evenly distributed, if everyone had his rights, if there were no injustice, no oppression, there would be no attempts to readjust an unequal balance by violent or flagitious means. There is some force in this, but it is very far from covering the whole ground, and it cannot excuse many forms of crime. Crime, indeed, is the birthmark of humanity, a fatal inheritance known to the theologians as original sin. Crime, then, must be constantly present in the community, and every son of Adam may, under certain conditions, be drawn into it. To paraphrase a great saying, some achieve crime, some have it thrust upon them; but most of us (we may make the statement without subscribing to all the doctrines of the criminal anthropologists) are born to crime. The assertion is as old as the hills; it was echoed in the fervent cry of pious John Bradford when he pointed to the man led out to execution, "There goes John Bradford but for the grace of God!" Criminals are manufactured both by social cross-purposes and by the domestic neglect which fosters the first fatal predisposition. Assuredly external factors and circumstances count for much in the causation of crime," says Maudsley. The preventive agencies are all the more necessary where heredity emphasises the universal natural tendency. The taint of crime is all the more potent in those whose parentage is evil. The germ is far more likely to flourish into baleful vitality if planted by congenital depravity. This is constantly seen with the offspring of criminals. But it is equally certain that the poison may be eradicated, the evil stamped out, if better influences supervene betimes. Even the most ardent supporters of the theory of the "born criminal" admit that this, as some think, imaginary monster, although possessing all the fatal characteristics, does not necessarily commit crime. The bias may be checked; it may lie latent through life unless called into activity by certain unexpected conditions of time and chance. An ingenious refinement of the old

adage, "Opportunity makes the thief," has been invented by an Italian scientist, Baron Garofalo, who declares that "Opportunity only reveals the thief"; it does not create the predisposition, the latent thievish spirit.

Ubiquity - Jacob W. Lewis 2021-12-15

From its invention to the internet age, photography has been considered universal, pervasive, and omnipresent. This anthology of essays posits how the question of when photography came to be everywhere shapes our understanding of all manner of photographic media. Whether looking at a portrait image on the polished silver surface of the daguerreotype, or a viral image on the reflective glass of the smartphone, the experience of looking at photographs and thinking with photography is inseparable from the idea of ubiquity—that is, the apparent ability to be everywhere at once. While photography's distribution across cultures today is undeniable, the insidious logics and pervasive myths that have governed its spread demand our critical attention, now more than ever.

(From the Playboy interview with Jay-Z, April 2003)
PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.
