Knowing What Students Know - National Research Council 2001-10-27
Education is a hot topic. From the stage of presidential debates to tonight's dinner table, it is an issue that most Americans are deeply concerned about. While there are many strategies for improving the educational process, we need a way to find out what works and what doesn't work as well. Educational assessment seeks to determine just how well students are learning and is an integral part of our quest for improved education. The nation is pinning greater expectations on educational assessment than ever before. We look to these assessment tools when documenting whether students and institutions are truly meeting education goals. But we must stop and ask a crucial question: What kind of assessment is most effective? At a time when traditional testing is subject to increasing criticism, research suggests that new, exciting approaches to assessment may be on the horizon. Advances in the sciences of how people learn and how to measure such learning offer the hope of developing new kinds of assessments-assessments that help students succeed in school by making as clear as possible the nature of their accomplishments and the progress of their learning. Knowing What Students Know essentially explains how expanding knowledge in the scientific fields of human learning and educational measurement can form the foundations of an improved approach to assessment. These advances suggest ways that the targets of assessment-what students know and how well they know it-as well as the methods used to make inferences about student learning can be made more valid and instructionally useful. Principles for designing and using these new kinds of assessments are presented, and examples are used to illustrate the principles. Implications for policy, practice, and research are also explored. With the promise of a productive research-based approach to assessment of student learning, Knowing What Students Know will be important to education administrators, assessment designers, teachers and teacher educators, and education advocates.

The Evolution of Human Cooperation and Community Development - August John Hoffman 2021-02-12
Communities today face unprecedented racial tension, conflict, and turmoil. Social unrest, political rhetoric, authoritarian rulers, and economic disparities contribute to unprecedented levels of community violence and extremism. The Evolution of Human Cooperation and Community Development: A Greener Approach to Understanding the Dynamics of Conflict proposes a more comprehensive and community-oriented approach to address conflict through the development of community resources and ecologically sustainable green space programs, such as community gardening programs. The authors draw on empirical research to identify how resources may be utilized to promote increased positive intergroup contact and provide greater collaboration among community residents. This book provides the essential interpersonal mechanisms to achieve a more resilient, empowered, and peaceful community.

Handbook of Technical and Vocational Education and Training Research - Felix Rauner 2008-12-16
Technical and vocational education and training (TVET) research has become a recognized and well-defined

area of interdisciplinary research. This is the first handbook of its kind that specifically concentrates on research and research methods in TVET. The book's sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy, planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a cutting-edge resource and reference.

The Architecture of Innovative Apprenticeship - Ludger Deitmer 2012-12-14
Benefiting from the support and involvement of two major international research networks, this collection features the latest research findings in TVET. Members of INAP, the International Network on Innovative Apprenticeship, and VETNET, the Vocational Education and Training Network, have contributed key research findings to this detailed survey of the field. Featuring the inclusion of the internationally recognized memorandum released in April 2012 by the INAP Architecture Apprenticeship Commission, the volume covers a wealth of issues relating to technical and vocational education and training, including exemplar architectures such as successful school-to-work transitions, competence assessment and development models, and governance, including the role of stakeholders. The book provides many opportunities to explore in depth the scholarly debate on TVET, as well as to learn from positive international experiences. It aims to inform the practice of TVET professionals as much as the decision making of administrators.

Farewell to Matters of Principle - Odo Marquard 1989-12-28
This book is the latest addition to the Odéon series, a multidisciplinary series devoted to original works and translations by European writers in the areas of literature, criticism, philosophy, history and politics. An English translation of the German best-seller Abschied vom Prinzipiellen, the book offers a series of essays that present a philosophy of human morality critical of philosophical utopianism. Marquard, widely considered the heir of Gadamer, Habermas, and Blumenberg, describes his role as "skeptical philosopher"

and discusses the 18th-century formation of such themes and disciplines as aesthetics, philosophical anthropology, philosophy of history, the nature of myth and attempts to account for it, and hermeneutics.

System Lifecycle Management - Martin Eigner 2021-08-19
Years of experience in the area of Product Lifecycle Management (PLM) in industry, research and education form the basis for this overview. The author covers the development from PDM via PLM to SysLM (System Lifecycle Management) in the form commonly used today, which are necessary prerequisites for the sustainable development and implementation of IoT/IoS, Industry 4.0 and Engineering 4.0 concepts. The building blocks and properties of future-proof systems for the successful implementation of the concepts of Engineering 4.0 are thereby dedicated to holistic considerations, which also inform in detail. SysLM functions and processes in mechatronic development and design as well as across the entire product lifecycle - from requirements management to the Digital Twin - are covered as examples. SysLM trends such as low code development, cloud, disruptive business models, and bimodality provide an outlook on future developments. The author dedicates the treatment of the agile SysLM introduction to the implementation in the enterprise. The basics are deepened with examples of a concrete SysLM system.

The Body Impolitic - Michael Herzfeld 2004
The Body Impolitic is a critical study of tradition, not merely as an ornament of local and national heritage,

but also as a millstone around the necks of those who are condemned to produce it. Michael Herzfeld takes us inside a rich variety of small-town Cretan artisans' workshops to show how apprentices are systematically thwarted into learning by stealth and guile. This harsh training reinforces a stereotype of artisans as rude and uncultured. Moreover, the same stereotypes that marginalize artisans locally also operate to marginalize Cretans within the Greek nation and Greece itself within the international community. What Herzfeld identifies as "the global hierarchy of value" thus frames the nation's ancient monuments and traditional handicrafts as evidence of incurable "backwardness." Herzfeld's sensitive observations offer an intimately grounded way of understanding the effects of globalization and of one of its most visible offshoots, the heritage industry, on the lives of ordinary people in many parts of the world today.
