Str8ts (also known as "Straights") is a logic puzzle, invented by Jeff Widderich (Canada). It is a grid, partially divided by black cells into compartments. Each compartment, vertically or horizontally, must contain a straight - a set of consecutive numbers, but in any order (for example: 2-1-3-4). The aim is to fill all white cells with the numbers from 1 to N (where N is the size of the grid). No single number can repeat in any row or column. Clues in black cells remove that number as an option in that row and column, and are not part of any straight. brain

**Difficult Riddles for Smart Kids** - Digital Books 2020-09-18

Riddles will help children create connections, link ideas and emotions, be imaginative, and draw conclusions that are all positive ways to learn and remember things quickly and easily. Riddles are good for all ages! They teach us so many lessons regarding life, vocabulary, wordplay, problem-solving, and comprehension. Riddles are fun and easy to remember; kids also share the riddles they learn, which encourages them to become social. Riddles are usually told creatively using more technical vocabulary. If children want to exchange riddles, it is after they understand the entire meaning. Riddles often inspire children to think about terms that they do not yet understand. When it comes to funny things, you know-how are most kids. Kids seem to enjoy comedy with slapstick and juvenile jokes. To enhance the taste of a child in comedy, you should give them imaginative riddles. Riddles will amuse a kid, and at the same time, get his brain to work. Want a little break for some fun brain teasers to unwind? Find out a list of all-time great riddles. Guaranteed holding children happy for hours! Hold and engage the minds of your children involved even though it's not their bodies. Riddle books are a perfect hands-on, screen-free activity to get children to learn while having fun. They begin easily, and some are perfect riddles for children. But some are difficult and can require you to be a careful whiz. Many are letter and wordplay, so if you're undeterred, keep going. Now, if you're going to make it to the end, you should try the others, but be careful: the hard ones will test you! In these riddles, puzzles, and verbal conundrums, the difficulty level varies from 1 to 3. That is typically tweens and up in children's ages. This will develop insight, imagination, and critical

thought. Every kid is fond of riddles - the sillier, the better. This one keeps them occupied. A parent would need to read the riddle, which sets out which items to find hidden in plain sight. Kids of all ages enjoy this riddle book series. The riddles range includes some dumb ones, some old classics, and some that make kids spend some time thinking. Many of the riddles have given answers. Find some that you love, and share with your mates. As mentioned in the above chapter, there are three types of riddles according to difficulty, included in this book, which are easy, medium, and hard. Stars are used to represent the difficulty level of each riddle. With each difficulty level, the points awarded to them changes. The hint system will also change accordingly. Following is a brief explanation of the three types of levels of difficulty: 1. Easy riddles: These riddles are labeled as 1 star (\*). When children select a low difficulty level riddle and solve it, they will be awarded 1 point. This type of riddles will include two hints to help and encourage the children. 2. Medium riddles: These riddles are labeled as two stars (\*\*). When children select a medium difficulty level riddle and solve it, they will be awarded 2 points. This type of riddles will include one hint to make it easier for the children. 3. Hard riddles: These riddles are labeled as three stars (\*\*\*). When children select a hard difficulty level riddle and solve it, they will be awarded 3 points. This type of riddles will include no hints and challenge the children a bit harder. When a child cannot solve a riddle, the score will be zero. The person asking the riddle can and will read the hints, and he can deliver the hints to the children in any way according to their understanding level.

Don't think too hard or you'll never solve these logic puzzles and riddles. The answers to all 187 are easy once you catch the tricky wording. How can you tie a knot in a napkin by holding one end

in each hand without letting go of it? Impossible, you say (or your friends will say, if you bet them). But: Cross your arms and hold a tip of the napkin in each hand. When you uncross your arms, the knot will be formed! Now try this riddle: I climbed up a cherry tree, where I found cherries. I did not pick cherries, nor did I leave cherries. How can you explain this? Answer: I climbed up a cherry tree with two cherries in my hand. I picked only one. I left the other one on the tree. I did not "pick cherries," because I "picked a cherry." Take this dare: My bird can fly faster than any supersonic plane. Here's how: If you put my bird inside any plane and make it fly in the same direction as the plane, it will go faster than the plane. 96 pages, 52 b/w illus., 5 3/8 x 8 1/4.
