European Politics - Jan-Erik Lane 1996-08-19

This comprehensive textbook is the first to go beyond a West European perspective and provide a clear overview of the whole of European politics. Jan-Erik Lane and Svante Ersson address the similarities of key political features among states in Western, Central, Eastern, Northern and Southern Europe and

look forward to political developments at the turn of the century. Traditionally, books have polarized Europe by focusing on points of divergence. European Politics provides a thoroughgoing analysis of several converging themes, including political culture, the nature of the state, party systems, and the formation of government and public policies. With this approach to economic, social and political aspects of politics in Europe this major text presents a Europe that, within the context of reform, transition and integration, has more in common in the early 1990s than ever before. With a clear thematic structure and helpful discussions of data drawn from some 30 countries European Politics offers both an accessible and genuinely comparative text which will be essential reading for student and researcher alike.

European Union Public Health Policy - Scott L. Greer 2013-02-11

Ranging from influence over world trade laws affecting health to population health issues such as obesity to the use of comparative data to affect policy, the EU's public health policies are increasingly important, visible, expensive and effective. They also provide an invaluable case study for those who want to understand the growth and impact of the EU as well as how states can affect their populations' lives and health. *European Union Public Health Policy* capitalizes on extensive new research, providing an introduction to the topic and indicating new intellectual directions surrounding the topic. An introductory section and extended conclusion explore the meaning of public health, the relationship of EU public health policy to health care policy, and the place of public health in the study of European integration and Europeanization. Focusing on health system transformation, global health governance and population health, the chapters address: Relevant policy issues and EU policies; Effects of the EU policies on practice or outcomes; An explanation of the policy trajectory; Current issues and likely future directions or conflicts. Drawing together an international and multidisciplinary selection of experts, this volume is an important contribution for all those interested in public health policy, EU health policy and EU governance.

New Challenges for the Eurozone

Governance - José Caetano 2021-02-22

This book adopts a comprehensive approach, combining the views of economists and political scientists, to assess the threats of maintaining the non-collaborative stance that prevailed in the response to past crises, and to explore new solutions to the present emergency. The coronavirus pandemic represents a serious test for the continued existence of the European Monetary Union. It has worsened pre-existing divisions among its members and highlighted the urgent need to address institutional and governance problems that were already apparent in the aftermath of the financial crisis and sovereign debt crisis, but have now gained in relevance following the more widespread impact of the disease across the European Union. This book discusses concrete strategies

to overcome the current challenges, focusing on the need to build an effective economic and monetary union. It also reflects on ways of pursuing conformity with discipline and coordination rules while also adopting a more collaborative stance that has so far been absent in the Eurozone and has consistently undermined the political and social dimensions of the common currency project.

Europe - On Air - Suzanne Lommers 2012

During the interwar years, broadcast radio became a popular way for Europeans to consume local, national, and international news. The medium not only began to shape European policy and politics, but also laid the foundation for European unification and global interconnectedness. In *Europe On Air*, Suzanne Lommers has documented the rich and often underexposed history of broadcast radio through the lens of international European relations. She specifically explores the roles of Radio Moscow, Radio Luxembourg, Vatican Radio, and the International Broadcasting Union as institutions that played an important role in national identities and establishing standards for broadcasting. The radio also offered new opportunities to politicians, who seized upon a vibrant and more direct way to communicate with their constituents. Essential reading for scholars of technology and European history, *Europe-On Air* reveals broadcast radio to be a technology that revolutionized international relations during the brief respite between the chaos of war in Europe.

The New Member States and the European Union - Michael Baun 2013-03-05

This book examines the impact of EU membership on the foreign policies of the 12 new member states that joined the EU in 2004 and 2007. Among scholars of European politics there is a general consensus that membership in the European Union changes the countries that join. Yet considerable debate remains over what exactly changes, to what extent, how or why these changes happen, and why some countries, policies, and institutions change more than

others. Expert contributors examine the impact of EU integration and membership, with chapters on the 12 new EU entrants since 2004: Poland, Czech Republic, Hungary, Slovakia, Slovenia, Estonia, Latvia, Lithuania, Cyprus, Malta, Bulgaria, and Romania. Utilizing a common analytical framework, each of the country case studies examines the impact of EU membership on the foreign policies of the new member states in three key areas: foreign policy making institutions and procedures, interests and preferences, and strategies and actions. The New Member States and the European Union will be of interest to students and scholars of European Studies and European Union Politics.

Politics of Religion in Western Europe -

François Foret 2013-06-17

Religion is becoming increasingly important to the study of political science and to re-examine key concepts, such as democracy, securitization, foreign policy analysis, and international

relations. The secularization of Europe is often understood according to the concept of 'multiple modernities'—the idea that there may be several roads to modernity, which do not all mean the eradication of religion. This framework provides support for the view that different traditions, societies and groups can come to terms with the components of modernity (capitalism, democracy, human rights, science and reason) while keeping in touch with their religious background, faith and practice. Contributors examine the interaction between EU-integration processes and Western European countries, such as Belgium, France, Luxembourg, Austria, Scandinavia, Italy, and the UK, and shine fresh light on the economic and cultural contexts brought about by relationships between politics and religion, including immigrant religions and new religious movements. This volume combines theoretical perspectives from political sociology and international relations to consider the role of religion as a source of power, identity and ethics in institutions and societies. Politics of Religion in Western Europe will be of interest to scholars of politics, religion, the European Union and political sociology.

The aim is to strive to present new approaches as well as detailed background studies in analyzing the EU as a global actor. Volume 1: The first volume "Theoretical and Institutional Approaches to the EU's External Relations" addresses the EU's overall external post-Lisbon Treaty presence both globally and regionally (e.g. in its "neighborhood"), with a special

emphasis on the EU's institutional framework. It also offers fresh and innovative theoretical approaches to understanding the EU's international position. - With a preface by Alvaro de Vasoncelos (former Director European Union Institute for Security Studies) Volume 2: The second volume "Policies, Actions and Influence of the EU's External Relations", examines in both quantitative and qualitative contributions the EU's international efficacy from a political, economic and social perspective based on a plethora of its engagements.

European Labour Law - Brian Bercusson
2009-07-09

European Labour Law explores how individual European national legal systems, in symbiosis with the European Union, produce a transnational labour law system that is distinct and genuinely European in character. Professor

Brian Bercusson describes the evolution of this system, its national, transnational and global contexts and its institutional and substantive structures. The collective industrial-relations dimension of employment is examined, and the labour law of the EU as manifested in, for example, European works councils is analysed. Important subjects which have traditionally received little attention in some European labour law systems are covered, for example, the fragmentation of the workforce into atypical forms of employment. Attention is also given to the enforcement of European labour law through administrative or judicial mechanisms and the European social dialogue at intersectoral and sectoral levels. This new edition has been extensively updated, as the EU's influence on this area of social policy continues to grow.

The European Convention on Human Rights

- William A. Schabas 2015-09-24

The European Convention on Human Rights: A Commentary is the first complete article-by-article commentary on the ECHR and its Protocols in English. This book provides an entry point for every part of the Convention: the substance of the rights, the workings of the Court, and the enforcement of its judgments. A separate chapter is devoted to each distinct provision or article of the Convention as well as to Protocols 1, 4, 6, 7, 12, 13, and 16, which have not been incorporated in the Convention itself and remain applicable to present law. Each chapter contains: a short introduction placing the provision within the context of international

human rights law more generally; a review of the drafting history or preparatory work of the provision; a discussion of the interpretation of the text and the legal issues, with references to the case law of the European Court of Human Rights and the European Commission on Human Rights; and a selective bibliography on the provision. Through a thorough review of the ECHR this commentary is both exhaustive and concise. It is an accessible resource that is ideal for lawyers, students, journalists, and others with an interest in the world's most successful human rights regime.

The International Legal System in Quest of Equity and Universality -

Laurence Boisson de Chazournes 2021-10-18

Georges Abi-Saab began his writing and teaching at a time when the process of decolonization, and thereafter the quest for emancipation, began to make its far-reaching impact on the international scene, producing significant changes in the international environment, both quantitatively in increasing the number of nation-States and qualitatively in changing patterns of interests and claims. This was bound to result in new pressures on the international legal system itself and in a questioning of the traditional Eurocentric content of international law. In his work and teaching Professor Abi-Saab viewed the dynamics of international law as a function of two driving forces: the emergence of the third world and the sense of injustice. In his view, the first driving force - the emergence of the third world - raised the problem of exclusion: exclusion from participation in the elaboration of international law and the decision-making process, and exclusion as beneficiaries of the resulting rules of international law. At the same time, this new force introduced diversity into the international scene, reflecting the richness of the international community in its different facets. This process remains relevant today, reflecting the contemporary problem of exclusion of new actors as well as their quest for participation. The second driving force - the sense of injustice - posed a teleological problem

for him, that of defining community values in order that they capture the different facets of justice, whether formal or distributive. So long as there is no effective organic structure, international law in his view will continue to remain effectiveness-oriented, reflecting rather than impacting on the structures of power. Nevertheless, it is undeniable that there is an on-going process of development of community values and interests; as Georges Abi-Saab wrote with reference to international crimes: 'law, like all social phenomena, is a continuous unfolding, a continuous process of elaboration'. He has also considered that the dynamics of the international legal process itself can be captured from the perspective of international organizations as vehicles for change in the international system. From his early writings, Georges Abi-Saab approached the United Nations Charter as a blueprint - both normative and institutional - for a certain type of international society. International institutions with all their imperfections, continue for him to be the means of realization of the law of cooperation which lies at the heart of his concept of the international system. The themes selected for this volume in honour of Professor Georges Abi-Saab are intended to reflect his unique and pioneering contribution to the field of international law. The contributors are drawn from what he has always considered to be his large 'family' of former students: in his forty years of teaching, Georges Abi-Saab has acted as mentor to generations of students from all over the world who have benefited from his vision, insights, originality and creative and stimulating use of language. The contributors also include colleagues and friends who share a similar vision of the international legal system.

Who's who in European Institutions and Organizations - 1982

Contesting Europe - Pieter De Wilde 2013

This book investigates the way politicians and citizens evaluated the European Union and the process of European integration in public debates during the 2009 European Parliament elections. It presents detailed and rigorous content analysis of online media where citizens directly and voluntarily responded to news stories posted by journalists. New evidence is

presented about the dynamic nature of contestation about Europe on the internet and the degree of convergence towards Euroscepticism across EU member states. Such convergence poses new challenges for democratic representation in the EU and provides insight into the public basis for a legitimate European Union. 'In this book European contestation has come of age. Pieter de Wilde, Asimina Michailidou and Hans-Jorg Trezn deliver a tour de force in mapping the multifaceted debate about Europe among parties and citizens in twelve countries. Informed by rich media data they convincingly argue that opposition as well as support for Europe comes in different shades: it can be partial, conditional, or temporal. This is a wonderfully nuanced book for scholars, students and policy makers concerned about Europe's future.' Liesbet Hooghe, W. R. Kenan, Jr. Distinguished Professor, University of North Carolina and Chair in Multilevel Governance, VU University of Amsterdam

Human Rights and Taxation in Europe and the World - Georg Kofler 2011

Resumen del editor: "The increasing globalization and the restructuring of the European legal framework by the Treaty of Lisbon are important factors to suggest that the traditional separation of spheres between taxation and human rights should be revisited. This book examines the issues surrounding the impact of the Lisbon Treaty on the guarantee and enforcement of human rights in the area of EU (tax) law and explores the possible

development and potential impact of human rights in the field of taxation in this age of global law."

Migration and Organized Civil Society - Dirk Halm 2013-05-07

Migrant organizations are of vital importance for countries of residence and countries of origin, but the empirical and theoretical knowledge of the cross-border character of migrant organizations remains incomplete. It is clear that migrant transnationalism challenges the governance of nation-states on the local and national levels. This book, the outcome of an ECPR joint session, systematically and empirically analyzes the differing roles that transnational migrant organizations play in their countries of residence and origin. Drawing on research conducted in Belgium, England, Germany, Holland, Poland and Portugal, it focuses on the relations between migrant organizations and the state. Offering an opportunity for comparative analysis, it also examines why migrants and their organizations engage in different forms of border crossing activities, and how various political systems influence, and are influenced by these forms of engagement. *Migration and Organized Civil Society* will be of strong interest to students and researchers of political science, political sociology, migration studies, transnationalism, and Diaspora studies.
