Innovation for Water Infrastructure Development in the Mekong Region - Organisation for Economic Co-operation and Development 2020

Water-related infrastructure could contribute significantly to the development of the Mekong region. At the same time, poor water infrastructure could lead to development challenges for the countries in the region.

Innovation for Water Infrastructure Development in the Mekong Region discusses the challenges facing the region as well as the possible innovative policy options, including those used in Emerging Asian countries, and with reference to the experiences of OECD member countries. It provides analysis and

recommendations for the region's policy makers to consider in their efforts to improve water infrastructure. The report first provides an overview of the socio-economic contributions and environmental challenges of the Mekong River. It then presents some potential new financing options for the development of water infrastructure, using digital tools such as Fintech and blockchain. It also examines the potential of using the spillover effect of tax revenues to attract private finance. It then goes on to discuss the importance of strengthening water infrastructure resilience against natural disasters, including the current COVID-19 pandemic, and finally analyses the challenges of water regulations in the Mekong region.

Corporate Practices and Conduct - 1991 Booklet outlining the duties of company directors and their ethical and legal responsibilities. Produced by eight business organisations concerned about recent corporate practices, with a working group chaired by

Henry Bosch, former head of the National Companies and Securities Commission.

Human Resource Management in South Africa - P. A. Grobler 2005-11

Grobler and Wörnich's market-leading text has long been regarded as the most comprehensive and user-friendly book available for those studying Human Resource Management in South Africa. Written from a business management perspective, it not only addresses the traditional core Human Resource activities but also provides the reader with insight into future Human Resource challenges.

Drawing from an extensive review of 14 regions across 12 countries, this book considers the

regional engagement of higher education regarding teaching, research and service to the local community.

Talent Management in Emerging Markets - Steve Bluen 2012-10-01

While much has been written on talent management in the global context, talent management in emerging markets and the unique challenges and opportunities it presents has received little attention in the literature. This book explores these issues through theory, practice and case studies with contributions from scholars and practitioners based both in emerging markets and in Canada, the United Kingdom and The United States. The book provides the reader with a guide to setting up a talent management function in a multinational operating in emerging markets, including some 70 learnings and a set of key performance indicators with indicative targets to achieve when managing talent effectively in emerging markets. Throughout the book, talent

management examples are drawn from diverse emerging markets across Asia (especially India and China), Africa, Central and Eastern Europe, the Middle East, and South America.

Architecture in the Netherlands - Kirsten Hannema 2017-08-22

Each year an editorial team selects noteworthy architectural projects in Dutch architecture, with particular attention to commissionership, architecture policy and projects that have achieved spectacular results with limited resources. We are proud that 'Amsterdam Oersoep', the artwork by artists Arno Coenen, Iris Roskam and Hans van Bentem, has been included in this year's edition!

Handbook of the International Comparison Programme - United Nations. Statistical Division 1992

This publication is the first attempt in the 25-year history of the International Comparison Programme (ICP) to provide participating countries with practical instructions in a

handbook format as to what tasks they should carry out in order to achieve a successful application of the general methods of international comparison of prices and volumes, and offers guidance for related country operations. It describes in detail the requirements of the expenditure data, item selection, and price collection. The procedures of price estimation and adjustments and the processing of basic data are also presented.

Reviews of National Policies for Education - Organisation for Economic Co-operation and Development 1984

A team of examiners from the Organisation for Economic Cooperation and Development (OECD) reviews Portugal's education system in a three-part report. Part One begins with the consequences of the 1974 revolution, Portugal's economic problems, its impending attachment to the European Economic Community, and rising

public expectations about education. It continues with criticism of the Ministry of Education, which is overstaffed and has duplicate functions. The examiners propose reduction of branches and suggest the establishment of a national education advisory council and closer relations with other government agencies. A high priority for the compulsory school-level education (four primary and two preparatory grades) is improvement of standards in rural areas. Accepting the future extension of compulsory schooling from 6 to 9 years, the examiners counsel step-by-step reform of the school structure and curriculum. Education of 16-to-19 year olds is a problematic issue since upper-secondary schools are not providing adequate vocational courses. The examiners feel a solution is for Portugal to adopt a comprehensive education and training policy for that age group implemented jointly by the Ministries of Education and Labor. Part Two of the report includes a record of the review meeting between

the OECD examiners and the Minister of Education and his delegates and addresses five areas of concern. The third part is a summary of the Ministry of Education's Background Report of the education system in Portugal. (MD)

physical, social, political and managerial sciences. A broad range of concerns fall under modern forestry such as multiple use management, wildlife habitat, natural water quality management, landscape and community protection, biodiversity management, etc. Since forest ecosystem is seen as the most important component of the biosphere, forestry has emerged as a craft, technology and a vital applied science. This book unravels the recent studies in the field of forestry and environment. It traces the progress of this field and highlights some of its key concepts and applications. This book will serve as a reference to a broad spectrum of readers.

Intergovernmental Fiscal Relations - Ronald C. Fisher 2012-12-06

The main objective of this book is to restate the important theories and evidence from economic analysis concerning intergovernmental fiscal issues. More importantly, the second objective of the book is to identify gaps in knowledge, empirical uncertainties, and missing theoretical structures and then to establish a preliminary agenda for new research on this topic. The book is organized in two sections. The first covers the core body of intergovernmental fiscal relations, including optimal size for jurisdictions and assignment of public sector functions, the formulation and execution of tax policy in an intergovernmental setting, and the appropriate structure and use of intergovernmental transfers. In the second section, the core knowledge is applied to four major policy areas:

education, welfare, fiscal interaction in urban areas, and economic development. In thinking about a new research agenda, the authors call for more current and authoritative estimates of fiscal incidence, including interjurisdictional spillovers, for more fundamental research about the federation process and effects of

consolidation, for new evidence about the long run, general equilibrium effects of interjurisdictional competition, and for basic research about the choice process and establishment of intergovernmental fiscal institutions and policies by federal and subnational governments.
