Increasingly, adults do not see the church as a credible provider of quality religious education. This revision by R. Michael Harton of the classic work by Leon McKenzie addresses the foundational issues of what constitutes such an education for adults and how ministers and teachers can determine and understand the needs of learners. It also offers ways to involve learners in the planning and execution of their own religious education. A must-read for ministers and seminarians who care about the religious education of adults. Leon McKenzie is a retired professor of adult education at Indiana University, where he also served as Director of Human Resource Development for Indiana University Hospital. **Professional Development of Teacher Educators in Further Education** - Sai Loo  
2019-12-20

Professional Development of Teacher Educators in Further Education critically analyses the specific challenges relating to teacher educators in the English further education (FE), such as the diverse nature of learners and the variety of educational contexts. It focuses on the journeys to becoming teacher educators, their

relevant teaching know-how and professional needs. This book combines theoretical frameworks with both qualitative and quantitative data to outline the pathways, professional identities, knowledge, and continuous professional development of teacher educators. This data is used to discuss the four main themes. The first deals with the teacher educators' initial disciplinary areas, journey-making to be educators, and the current titles/positions. The next one delineates the know-how (knowledge, experiences, capacities and skill sets) to perform as teacher educators. The third one relates to their professional identities and the final topic, their professional requirements as FE teacher educators. Contributing to the field of further and vocational education, this book will be of great interest for researchers, academics, and postgraduate students in the field of education, specifically FE and teacher educators.

### Challenges and Opportunities in Health Professions

Education - Mora Claramita  
2022-02-22

This book addresses health professions educational challenges specific to non-Western cultures, implementing a shifting paradigm for educating future health professionals towards patient-centered care. While health professions education has received increasing attention in the last three decades, promoting student-centered learning principles pioneered by leaders in the medical community has, for the most part, remain rooted in the Western context. Building from Hofstede's analysis of the phenomena of cultural dimensions, which underpin the way people build and maintain their relationships with others and influence social, economic, and political well-being across nations, this book demarcates the different

cultural dimensions between East and West, applied to medical education. The respective 'hierarchical' and 'collectivist' cultural dimensions are unpacked in several studies stemming from non-western countries, with the capacity to positively influence healthcare education and services. The book provides new insights for researchers and health professional educators to understand how cultural context influences the input, processes, and output of health professionals' education. Examples include how cultural context influences the ways in which students respond to teachers, how teachers giving feedback to students, and the challenges of peer feedback and group work. The authors also examine causes for student hesitation in proposing ideas, the pervasive cultural norm of maintaining harmony, the challenges of teamwork in clinical settings, the need to be sensitive to community health needs, the complexity of clinical decision making, and

the challenge of how collectivist cultural values play into group dynamics. This book aims to advocate a more culturally-sensitive approach to educating health professionals, and will be relevant to both students and practitioners in numerous areas of public health and medical education.

### **International Handbook of Research on Environmental Education** - Robert B.

Stevenson 2014-06-20

The environment and contested notions of sustainability are increasingly topics of public interest, political debate, and legislation across the world. Environmental education journals now publish research

from a wide variety of methodological traditions that show linkages between the environment, health, development, and education. The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education (EE) field. The purpose of this 51-chapter handbook is not only to illuminate the most important concepts, findings and theories that have been developed by EE research, but also to critically examine the historical progression of the field, its current debates and controversies, what is still missing from the EE research agenda, and where that agenda might be headed. Published for the American Educational Research Association (AERA). processes, technology, practice, and anything else of value and benefit including learning, teaching, instructing, guiding, leading, and modeling/exemplifying a way of life that would help to facilitate and bring adults to their full degree of humaneness. Andragogy is one part of the broader international field of adult education, human resource development, and lifelong learning, thus serving the advancement and connection needs of adult learners, organizational development, and lifelong learning in areas such as higher education, business, military, corporate training, healthcare, executive leadership, courtroom practice, religious life, and human resource development. Facilitating Adult and Organizational Learning Through Andragogy: A History, Philosophy, and Major Themes investigates the history, philosophy, and major themes of andragogy and how they may contribute to helping practitioners to design and

facilitate adult and organizational learning. The book presents more than 500 documents that are examined through two different lenses. The first lens is the history and philosophy (or a chronological approach) of andragogy while the second lens takes a look at the major themes as categories of what the documents express. While encompassing the background, uses, and future of andragogy, this book is ideally intended for teachers, administrators, practitioners, stakeholders, researchers, academicians, and students. **Inclusive Early Childhood Education: Development, Resources, and Practice** - Penny Deiner 2012-01-01 INCLUSIVE EARLY CHILDHOOD EDUCATION: DEVELOPMENT, RESOURCES, AND PRACTICE, Sixth Edition, is a comprehensive special education resource book that provides essential information on a variety of early childhood learning disabilities, as well as strategies for including children with these special needs in regular educational

### **Understanding Adult Education and Training -**

Griff Foley 2020-07-25

'This is an impressive book that will be of wide interest to adult educators everywhere. Many of the book's contributors work at the University of Technology,

Sydney - surely the world's pre-eminent institution for the study of adult learning, and the most open and generous location for debate. Its virtues are the book's.' Alan Tuckett, National Institute of Adult Continuing Education, UK 'I am happy to endorse this book enthusiastically as being appropriate for a North American audience of adult educators. Though it's an intentionally introductory survey, it never talks down to readers, never condescends. On the other hand, it's not so intentionally erudite that it collapses into theoretical posturing; it stays firmly grounded in and connected to practice.' Stephen Brookfield, University of St. Thomas, USA Understanding Adult Education and Training offers a broad overview of the field for adult educators and workplace trainers. It introduces the key issues, debates and theories in a way which is relevant to practice. Its aim is to deepen readers' understanding of adult learning and education so that they can be better

practitioners. Adult education is a diverse field so there is no single body of knowledge which is appropriate for all adult educators. Understanding Adult Education and Training introduces a wide range of formal theory from adult education and associated fields, and shows readers how they can use it their own circumstances. The first edition of this book has become a standard reference for students and professionals in Australia. This edition is fully revised and updated for an international readership.

### **Social Theory for Teacher Education Research -**

Kathleen Nolan 2019-09-05

Traditionally, teacher education research theory and practice have had a technical-rational focus on productions of knowledge, skills, performance and accountability. Such a focus

serves to (re)produce current educational systems instead of noticing and critiquing the wider modes of domination that permeate schools and school systems. In *Social Theory for Teacher Education Research*, Kathleen Nolan, Jennifer Tupper and the contributors make arguments for drawing on social theories to inform research in teacher education - research that moves the agenda beyond technical-rational concerns toward building a critically reflexive stance for noticing and unpacking the socio-political contexts of schooling. The theories discussed include Actor-Network Theory (ANT), Cultural Historical Activity Theory (CHAT) and la didactique du plurilinguisme, and social theorists covered include Barad, Bernstein, Bourdieu, Braidotti, Deleuze, Foucault, Heidegger, and Nussbaum. The chapters in this book make explicit how innovative social theory-driven research can challenge and change teacher education practices and the learning

experiences of students.
