[The Most Dangerous Game](#) - Richard Connell 2020-04-21  
From one of America's most popular short story writers and an Academy Award nominee: the O. Henry Award-winning tale that inspired the movie The Hunt. A subject of mysterious rumors and superstition, the deserted

Caribbean Island was shrouded in an air of peril. To Sanger Rainsford, who fell off a yacht and washed up on its shores, the abandoned isle was a welcome paradise. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more dangerous than any he had

ever encountered: a human. First published in 1924, this suspenseful tale “has inspired serial killers, films and stirred controversy in schools. A century on, the story continues to thrill” (The Telegraph). “[A] tense, relentless story of man-against-man adventure, in which the hunter Sanger Rainsford learns, at the hands of General Zaroff, what it means to be hunted.”

**The Secret Teachings of All Ages** - Manly P. Hall

2021-11-11

Originally published in 1928, The Secret Teachings of All Ages is Manly P. Hall's celebrated 20th century tome, where readers delight in discussions about ancient symbolism, rituals, and mythology. Manly P. Hall was a Canadian Author of over 150 published works, the best known of which are Initiates of the Flame, The Story of Healing, The Divine Art, Aliens Magic and Sorcery The Secret Teachings of All Ages, and An Encyclopedic Outline of Masonic, Hermetic, Qabbalistic Rosicrucian Symbolical Philosophy. Symbolism is the language of the Mysteries; in fact it is the language not only of mysticism and philosophy but of all Nature, for every law and power active in universal procedure is manifested to the limited sense perceptions of man through the medium of

symbol. Every form existing in the diversified sphere of being is symbolic of the divine activity by which it is produced. By symbols men have ever sought to communicate to each other those thoughts which transcend the limitations of language. This book is often hailed as an encyclopedia for all things hidden, ancient, and arcane, and it explores a vast array of topics, from secret societies and the Zodiac to Mystic Christianity and William Shakespeare's identity. Despite some of the outdated and controversial ideas it poses now in the 21st century, it continues to fascinate students of the cryptic and mysterious.

**The Death and Life of Great American Cities** - Jane Jacobs

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

**Lost Enlightenment** - S.

Frederick Starr 2015-06-02

The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing

accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. Lost Enlightenment recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that

later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. Lost Enlightenment chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

**Firstborn of Venice** - James S. Grubb 2019-12-01

**Her Every Fear** - Peter Swanson 2017-01-10

An NPR Best Book of the Year The author of the wildly popular *The Kind Worth Killing* returns with an electrifying and downright Hitchcockian psychological thriller—as tantalizing as the cinema classics *Rear Window* and *Wait Until Dark*—involving a young woman caught in a vise of voyeurism, betrayal, manipulation, and murder. The danger isn't all in your head . . . Growing up, Kate Priddy was always a bit neurotic, experiencing momentary bouts of anxiety that exploded into full blown panic attacks after an ex-boyfriend kidnapped her and nearly ended her life.

When Corbin Dell, a distant cousin in Boston, suggests the two temporarily swap apartments, Kate, an art student in London, agrees,

hoping that time away in a new place will help her overcome the recent wreckage of her life. But soon after her arrival at Corbin's grand apartment on Beacon Hill, Kate makes a shocking discovery: his next-door neighbor, a young woman named Audrey Marshall, has been murdered. When the police question her about Corbin, a shaken Kate has few answers, and many questions of her own—curiosity that intensifies when she meets Alan Cherney, a handsome, quiet tenant who lives across the courtyard, in the apartment facing Audrey's. Alan saw Corbin surreptitiously come and go from Audrey's place, yet he's denied knowing her. Then, Kate runs into a tearful man claiming to be the dead woman's old boyfriend, who insists Corbin did the deed the night that he left for London. When she reaches out to her cousin, he proclaims his innocence and calms her nerves . . . until she comes across disturbing objects hidden in the apartment—and accidentally learns that Corbin is

not where he says he is. Could Corbin be a killer? And what about Alan? Kate finds herself drawn to this appealing man who seems so sincere, yet she isn't sure. Jetlagged and emotionally unstable, her imagination full of dark images caused by the terror of her past, Kate can barely trust herself . . . So how could she take the chance on a stranger she's just met? Yet the danger Kate imagines isn't nearly as twisted and deadly as what's about to happen. When her every fear becomes very real. And much, much closer than she thinks. Told from multiple points of view, *Her Every Fear* is a scintillating, edgy novel rich with Peter Swanson's chilling insight into the darkest corners of the human psyche and virtuosic skill for plotting that has propelled him to the highest ranks of suspense, in the tradition of such greats as Gillian Flynn, Paula Hawkins, Patricia Highsmith, and James M. Cain.

**Exhibiting War** - Jennifer Wellington 2017-09-21 What does it mean to display war? Examining a range of different exhibitions in Britain, Canada and Australia, Jennifer Wellington reveals complex imperial dynamics in the ways these countries developed diverging understandings of the First World War, despite their cultural, political and institutional similarities. While in Britain a popular narrative developed of the conflict as a tragic rupture with the past, Australia and Canada came to see it as engendering national birth through violence. Narratives of the war's meaning were deliberately constructed by individuals and groups pursuing specific agendas: to win the war and immortalise it at the same

Emphasising the contingent development of national and imperial war museums, it illuminates the way they acted as spaces in which official, academic and popular representations of this violent past intersect.

*Scientific Babel* - Michael D. Gordin 2015-04-13

English is the language of science today. No matter which languages you know, if you want your work seen, studied, and cited, you need to publish in English. But that hasn't always been the case. Though there was a time when Latin dominated the field, for centuries science has been a polyglot enterprise, conducted in a number of languages whose importance waxed and waned over time—until the rise of English in the twentieth century. So how did we get from there to here? How did French, German, Latin, Russian, and even Esperanto give way to English? And what can we reconstruct of the experience of doing science in the polyglot past? With

*Scientific Babel*, Michael D. Gordin resurrects that lost world, in part through an ingenious mechanism: the pages of his highly readable narrative account teem with footnotes—not offering background information, but presenting quoted material in its original language. The result is stunning: as we read about the rise and fall of languages, driven by politics, war, economics, and institutions, we actually see it happen in the ever-changing web of multilingual examples. The history of science, and of English as its dominant language, comes to life, and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices, but also of the possibilities of the polyglot, and the losses that the dominance of English entails. Few historians of science write as well as Gordin, and *Scientific Babel* reveals his incredible command of the literature, language, and

intellectual essence of science past and present. No reader who takes this linguistic journey with him will be disappointed.

*Culture and Imperialism* -

Edward W. Said 2012-10-24

A landmark work from the author of *Orientalism* that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from *Mansfield Park* to *Heart of Darkness* and *Aida*. Yet most

cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.
