Costume, Makeup, and Hair - Adrienne L. McLean 2016-10-07

Movie buffs and film scholars alike often overlook the importance of makeup artists, hair stylists, and costumers. With precious few but notable exceptions, creative workers in these fields have received little public recognition, even when their artistry goes on to inspire worldwide fashion trends. From the acclaimed *Behind the Silver Screen* series, *Costume, Makeup, and Hair* charts the development of these three crafts in the American film industry from the 1890s to the present. Each chapter examines a different era in film history, revealing how the arts of cinematic costume, makeup, and hair, have continually adapted to new conditions, making the transitions from stage to screen, from monochrome to color, and from analog to digital. Together, the book's contributors give us a remarkable glimpse into how these crafts foster creative collaboration and improvisation, often fashioning striking looks and ingenious effects out of limited materials. *Costume, Makeup, and Hair* not only considers these crafts in relation to a wide range of film genres, from sci-fi spectacles to period dramas, but also examines the role they have played in the larger marketplace for fashion and beauty products. Drawing on rare archival materials and lavish color illustrations, this volume provides readers with both a groundbreaking history of film industry labor and an appreciation of cinematic costume, makeup, and hairstyling as distinct art forms. Wes Craven - John Kenneth Muir 2004-02-24
Filmmaker Wes Craven has consistently and imaginatively scared movie audiences since the early 1970s. His films encompass a variety of styles, elements and themes, from the nihilistic existentialism of *The Last House on the Left* to the successful *A Nightmare on Elm Street* (which sent horror in a bold new direction), to the hallucinatory dreamscapes of *The Serpent and the Rainbow*. And in the nineties, Craven returned with the *Scream* films, which were simultaneously funny, clever and scary films that overturned the horror cliches of the eighties. The present work provides a history of Craven's film career since 1972, examining all the themes and techniques the filmmaker explored. For each film, a synopsis, cast and credits, historical context, and critical commentary are provided. Also covered in detail are Craven's forays into television, including movies such as *Stranger in the House* and work on such series as *The New Twilight Zone*.

2017-03-01

In this lively, entertaining, and informative book, Dean K. Fueroghne guides readers through the complex laws governing the creation of advertising, illuminating a heavily regulated arena at the intersection of free enterprise and consumer protection. Is it acceptable to use images of real people, famous or not? Can Nike talk about Adidas in its promotional campaign? When can money be shown? What constitutes puffery, or deceptive truth, or bait-and-switch advertising? What are the specific rules pertaining to professional businesses, political advertising, or the marketing of alcohol or tobacco? What is the difference between copyright and trademark? Fueroghne answers these questions and more as he covers the complex laws relevant to advertising in all its guises. In addition to discussing specific cases, he explains the reasoning behind the court's decisions and how it affects the business of advertising. Students of strategic communication as well as advertising professionals—from agency account executives and copywriters to art directors and freelance designers—will learn to anticipate when proposed advertising may cause legal problems and how to avoid costly mistakes. Advertising lawyers will also appreciate the book as a handy reference that gathers in one place the many disparate laws affecting marketing and promotion in the United States today.

The Los Angeles Times Bestseller A Tor.com Most Anticipated Book of 2019 A PureWow "Book We Can't Wait to Read in 2019" A Bustle

Nonfiction Book Coming Out In 2019 To Start Getting Excited About The Lady from the Black Lagoon uncovers the life and work of Milicent Patrick—one of Disney's first female animators and the only woman in history to create one of Hollywood's classic movie monsters As a teenager, Mallory O'Meara was thrilled to discover that one of her favorite movies, Creature from the Black Lagoon, featured a monster designed by a woman, Milicent Patrick. But for someone who should have been hailed as a pioneer in the genre, there was little information available. For, as O'Meara soon discovered, Patrick's contribution had been claimed by a jealous male colleague, her career had been cut short and she soon after had disappeared from film history. No one even knew if she was still alive. As a young woman working in the horror film industry, O'Meara set out to right the wrong, and in the process discovered the full, fascinating story of an ambitious, artistic woman ahead of her time. Patrick's contribution to special effects proved to be just the latest chapter in a remarkable, unconventional life, from her youth growing up in the shadow of Hearst Castle, to her career as one of Disney's first female animators. And at last, O'Meara discovered what really had happened to Patrick after The Creature's success, and where she went. A true-life detective story and a celebration of a forgotten feminist trailblazer, Mallory O'Meara's The Lady from the Black Lagoon establishes Patrick in her rightful place in film history while calling out a Hollywood culture where little has changed since.

Creating Together - Diane Conrad 2015-03-20

Creating Together explores an emerging approach to research that combines arts practices and scholarship in participatory, community-based, and collaborative contexts in Canada across multiple disciplines. Looking at a variety of art forms, from photography and mural painting to performance art and poetry,

the contributors explore how the process of creating together generates and disseminates collective knowledge. The artistic processes and works in an arts-based approach to scholarship make use of aesthetic, experiential, embodied, and emotional ways of knowing and creating knowledge in addition to traditional intellectual ways. The anthology also addresses the growing trend in arts-based research that takes a participatory, community-based, or collaborative focus, and encourages scholars to work together, with other professionals, and with community groups to explore questions, create knowledge, and express shared understandings. The collection highlights three forms of research: participatory arts-based research that engages participants in all stages of the inquiry and aims to produce practical knowing to benefit the community; community-based arts research that has community/public space at the heart of practice; and collaborative arts approaches involving multi-levelled, multi-layered, and interdisciplinary collaboration from diverse perspectives. To illustrate how such innovative work is being accomplished in Canada, the collection includes examples from British Columbia to Newfoundland and across disciplines, including the fine arts, education, the health sciences, and social work.

Comprehensive content provides a complete foundation in the primary care of children from the unique perspective of the Nurse Practitioner and covers the full spectrum of health conditions seen in the primary care of children, emphasizing both prevention and management. In-depth guidance on assessing and managing pediatric health problems covers patients from infancy through adolescence. Four-part organization includes 1) an introductory unit on the foundations of global pediatric health, child and family health assessment, and cultural perspectives for pediatric primary care; 2) a unit on managing child development; 3) a unit on health promotion and management; and 4) a unit on disease management. Content devoted to issues of daily living covers issues that are a part of every child's growth — such as nutrition and toilet training — that could lead to health problems unless appropriate education and guidance are given. Algorithms are used throughout the book to provide a concise overview of the evaluation and management of common disorders. Resources for providers and families are also included throughout the text for further information. Expert editor team well is well-versed in the scope of practice and knowledge base of Pediatric Nurse Practitioners (PNPs) and Family Nurse Practitioners (FNPs).
