On the Elements of Ontology - D. W. Mertz
2016-02-12

Central to Elements is an essay of the attributional union properties and relations have with their subjects, a topic historically left

metaphorical. The work critiques eight Aristotelian assumptions concerning attribute dependence and 'inherence', per se subjects ('substances'), attributes as agent-organizers, and unity-by-a-shared-one. Groups of these

assumptions are seen to yield contradiction, vicious regress, or other problems. This analysis, joined with insights from an essay of ubiquitous structure, motivate ten theses explicating attribution and its primary ontic status. The theses detail: attributes proper as individuated instances, structure as instance-generated facts and their two forms of composition, the conditioning role and universal nature of instances' component intensions, the primacy of attribute instances for generating all forms of composition and complex entities, and identity and indiscernibility criteria for the latter. Principal is the insight that attribution is intension-determined combinatorial agency. It is its systematizing implications that provide solutions to classic problems, e.g., Composition, Individuation, and Universals, and in net generate a comprehensive one-category structuralist ontology.

Taking the Fear Out of the Night: Coping with Nightmares - Renate Daniel 2017-01-11

Anyone who is plagued by nightmares night after night knows what a heavy burden these nocturnal apparitions represent: one is unable to resume sleep, often lies awake for a long time, and feels fearful, irritable or depressed the next day. What can help to take the fear out of the night? Understanding the message of nightmares is a first step toward relief. These energy-laden images can represent urgent questions stemming from the depth of the psyche. In this book, experienced Jungian analyst Renate Daniel demonstrates how one can

succeed in finding appropriate answers to help understand and cope with nightmares. Renate Daniel, M.D., a specialist in psychiatry, psychotherapy and psychoanalysis and Director of Programs at the C.G. Jung Institute in Zürich, has been a psychotherapist in private practice for many years. She is the author of *Nur Mut! Die Kunst, schwierige Situationen zu meistern* (2011) as well as numerous published articles. Contents: 1. What are Dreams? The Waking, Sleeping and Dreaming Worlds 2. Why do we Dream - and What for? Dreams and Mental Health 3. What are Nightmares? Ancient Myths and Neurobiological Insights 4. Dealing with Nightmares: Discovering, Exploring and Understanding Yourself 5. Nature as a Nightmare Motif: Natural Forces, Dangerous Animals and Plant Life 6. Human Beings as a Nightmare Motif: Aggressive People and Vulnerable People 7. Nightmare Motifs from Culture and Technology: When Objects Become Broken or Dangerous

Stress and Freedom - Peter Sloterdijk
2018-03-15

In this short book Peter Sloterdijk offers a genealogy of the concept of freedom from Ancient Greece to the present day. This genealogy is part of a broader theory of the large political body, according to which Sloterdijk argues that political communities arise in response to a form of anxiety or stress. Through a highly original reading of Rousseaus late *Reveries of a Solitary Walker*, Sloterdijk shows that, for Rousseau, the modern subject emerges as a subject free of all stress, unburdened by the cares of the world. Most of modern philosophy, and above all German Idealism, is an attempt to reign back Rousseaus useless and anarchical subject and anchor it in the cares of the world, in the task of having to produce both the world and itself. In the light of this highly original account, Sloterdijk develops his own distinctive account of freedom, where freedom is conceptualized as the availability for

the improbable. This important text, in which Sloterdijk develops his account of freedom and the modern subject, will be of great interest to students and scholars in philosophy and the humanities and to anyone interested in contemporary philosophy and critical theory.

Wittgenstein's Antiphilosophy - Alain Badiou
2019-07-23

Alain Badiou takes on the standard bearer of the “linguistic turn” in modern philosophy, and anatomizes the “anti-philosophy” of Ludwig Wittgenstein, in his *Tractatus Logico-Philosophicus*. Addressing the crucial moment where Wittgenstein argues that much has to be passed over in silence—showing what cannot be said, after accepting the limits of language and meaning—Badiou argues that this mystical act reduces logic to rhetoric, truth to an effect of language games, and philosophy to a series of esoteric aphorisms. In the course of his interrogation of Wittgenstein’s anti-philosophy, Badiou sets out and refines his own definitions of

the universal truths that condition philosophy. Bruno Bosteels’ introduction shows that this encounter with Wittgenstein is central to Badiou’s overall project—and that a continuing dialogue with the exemplar of anti-philosophy is crucial for contemporary philosophy.

Animal Beauty - Christiane Nusslein-Volhard
2019-05-14

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as “beauty”? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function

in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to

production of colors in animal skin and its appendages and control its pattern and distribution.

The Miracle Problem Solver - Kira Klenke
2016-10-11

The Miracle Problem Solver provides the key to solving every problematic situation in your life, quite literally with a stone’s throw. For those familiar with systemic constellation work or crystal grids, some elements in Kira’s work will seem like old friends, but prior knowledge of the method is not required. This book is for all those wanting to connect to universal wisdom and heal their lives in a few simple steps. Kira received this method directly from the 'source' during a meditation on one of the most powerful places on this earth, the Bell Rock in Sedona. The name used throughout her work (the ‘SOURCE’ method) is therefore both a perfect fit and an acronym for its essence: Sedona Stone Oracle Unity-Recreating Constellation Experience. • An ingenious, simple method • The perfect answer

for those seeking a new kind of constellation work • Everything falls into place by itself • All you need is a handful of crystals or stones The solutions lies within the problem!

New international studies on religions and dialogue in education - Martin Ubani 2018

What are the key questions highlighted in religious and spiritual education today? Many global processes such as migration, pluralism and the redefinition of citizenship challenge the traditional notions of borders concerning cultures, states and nationalities, ethnicities and even religions. Consequently, in societies today, the distinction in religions or identities between global and local or inside and outside no longer functions well. As the many borders in our world are becoming again more transparent and cultures blended, there is an increasing and constant need to re-examine the conceptions and theories concerning religion, dialogue and education. This volume brings together 14 new international studies based on selected

presentations from the 14th Nordic Conference on Religious Education. The topics of the articles include studies on religion, dialogue and education in different contexts ranging from policy studies and higher education to home education, and research on education about religions to confessional education. The volume serves the interests of researchers, policymakers, practitioners and students of religious and spiritual education.

Head in the Clouds - Karen Witemeyer

2010-10-01

Adelaide Proctor is a young woman with her head in the clouds, longing for a real-life storybook hero to claim as her own. But when a husband-hunting debacle leaves her humiliated, she interviews for a staid governess position on a central Texas sheep ranch and vows to leave her romantic yearnings behind. When Gideon

Westcott left his privileged life in England to make a name for himself in America's wool industry, he never expected to become a father overnight. And five-year-old Isabella hasn't uttered a word since she lost her mother. The unconventionality of the new governess concerns Gideon--and intrigues him at the same time. But he can't afford distractions. He has a ranch to run, a shearing to oversee, and a suspicious fence-cutting to investigate. When Isabella's uncle comes to claim the child--and her inheritance--Gideon and Adelaide must work together to protect Isabella from the man's evil schemes. And soon neither can deny their growing attraction. But after so many heartbreaks, will Adelaide be willing to get her head out of the clouds and put her heart on the line?

The Couple - Ferdinand Fellmann 2016

The mating couple is considered as both the origin and the foundation of a strong social self. Despite increasing self-realization, the individual always is in need of being justified through an intimate relationship in which both partners

accept one another such as they are. In view of the process of global urbanization, this book shows how empathy and reliability are the royal road to overcoming existential loneliness.

[The Vaulted Room](#) - Daniele Iozzia 2018-04-20

This collection of essays deals with various issues related to the history of aesthetics from antiquity to the modern day, with a view to focusing on scholarly research through a specific aesthetic lens. The highly original approach of the analysis combines philological and philosophical knowledge of ancient, medieval, renaissance and modern culture. These notions form the background to a reconstruction of the aesthetic attitudes of different ages not only philosophically, but also with an eye to the results of artistic production. The essays consider various subjects, all linked by their aesthetic relevance: Callimachus' position on poetry and his use of Plato's and Aristotle's writings is discussed in connection to his likely knowledge of the Socratic school of Cyrene. The issue of when a work of art should be considered

finished is linked to the creative process from antiquity to Renaissance, when artists and thinkers reflected on the efficacy of the artistic results and engaged with Neoplatonic ideas and culture. Plotinus' views on the ethical response to human beauty shed light on man's individual responsibility within the erotic and aesthetic experience. The last essay brings the perspective of aesthetic discussion right up to date with interior design, focusing on the classically inspired interiors of Renzo Mongiardino. From poetry to philosophy, from Renaissance artistic practice to contemporary interior design and decoration, this book presents innovative points of view together with fascinating insights into the creative process and its protagonists.

Husserl and Analytic Philosophy - Guillermo E. Rosado Haddock 2016-10-24

The book contributes to the refutation of the separation of philosophy in the 20th century into analytic and continental. It is shown that

Edmund Husserl was seriously concerned with issues of so-called analytic philosophy, that there are strict parallelisms between Husserl's treatment of philosophical subjects and those of authors in the analytic tradition, and that Husserl had a strong influence on Rudolf Carnap's 'Aufbau'.

The Laboratory Concept - 2015-10-13

Philosophical Introductions - Jürgen Habermas 2018-08-08

On the occasion of Habermas's 80th birthday, the German publisher Suhrkamp brought out five volumes of Habermas's papers that spanned the full range of his philosophical thought, from the theory of rationality to the critique of metaphysics. For each of these volumes, Habermas wrote an introduction that crystallized, in a remarkably clear and succinct way, his thinking on the key philosophical issues that have preoccupied him throughout his long career. This new book by Polity brings together these five introductions and publishes them in translation for the first time. The resulting volume provides a unique and comprehensive overview of Habermas's philosophy in his own words. In the five chapters that make up this volume, Habermas discusses the concept of communicative action and the grounding of the social sciences in the theory of language; the relationship between rationality and the theory

of language; discourse ethics; political theory and problems of democracy and legitimacy; and the critique of reason and the challenge posed by religion in a secular age. The volume includes a substantial introduction by Jean-Marc Durand-Gasselino, which offers a synoptic view of the development of Habermas's thought as a whole followed by concise accounts of his contributions in each of the areas mentioned. Together they provide the reader with the necessary background to understand Habermas's distinctive and original contribution to philosophy. Philosophical Introductions will be an indispensable text for students and scholars in philosophy and in the humanities and social sciences generally, as well as anyone interested in the most important developments in philosophy and critical theory today.

Heart of Fire - Linda Howard 2011-08-09

A fabulous lost Amazon city once inhabited by women warriors and containing a rare red diamond: it sounded like myth, but archeologist Jillian Sherwood believed it was real, and she was willing to put up with anything to find it -- even Ben Lewis. Ruffian, knock-about, and number one river guide in Brazil, Ben was all man -- over six feet of rock-hard muscles that rippled under his khakis, with lazy blue eyes that taunted her from his tanned face. Jillian watched him come to a fast boil when she refused to reveal their exact destination upriver in the

uncharted rain forests -- and resolved to stand her ground. Neither of them could foresee what the days ahead promised: an odyssey into the fiery heart of passion and betrayal, and a danger that would force them to cast their fates together, immersed in the eternal, unsolved mysteries of love....

Tales from Concrete Jungles - David Lindo 2015-06-18

Born and raised in London, David Lindo's

passionate interest in the natural world, especially birds, began at an early age. His thriving curiosity opened a door for him into an unexplored world of urban birding. Years later he decided to champion the delights of birding in cities and reinvented himself as the Urban Birder. Using this illustrious alias David Lindo has brought urban birding back into the public consciousness, promoting its virtues at every opportunity and writing about it in the birding press. He urges people to look up when walking around in cities, or to stop and close your eyes in a busy street just to listen to the birds that may be singing. In his second book, David visits some of the world's most unnatural environments, revealing the astonishingly diverse range of wildlife that can be found when you take the time to look. Much more than a compendium of birding sites, each tale follows the Urban Birder in his enthralling pursuit of city birding. Accompanied by dedicated local conservationists and renowned birders, David gives a deeper

insight into the true nature of each city. Featuring 70 locations to explore, *Tales from Concrete Jungles* is the perfect book to dip in to when on the move, or to hide away with on a rainy afternoon. Join David in his celebration of nature, pick up travel inspiration, and immerse yourself in his captivating quest for urban birding.

The Ways Things Are - Christian Kanzian
2013-05-02

This book is a collection of essays in systematic ontology. The parts of its title - "Things" and "Ways They Are" - are indicative of two broadly and intensively discussed issues in current ontology, namely, what categories of entities there are and in what ways they are relevant for our discourses. The three sections of the volume correspond to focuses of ontological research: "Before Ontology" is dedicated to conceptual, methodological, and meta-ontological issues; "Ontology at Work" raises general topics of categorial ontology, and the final section

“Ontology in Application” discusses questions such as those relating to free will and our conception of the human being. The book is a tribute to Edmund Runggaldier on the occasion of his 65th birthday. Its seventeen papers are authored by such distinguished scholars as Lynne Rudder Baker, Franz von Kutschera, E. J. Lowe, Otto Muck, Paul Weingartner, Timothy Williamson, and many others.

Character as Moral Fiction - Mark Alfano
2013-02-14

Everyone wants to be virtuous, but recent psychological investigations suggest that this may not be possible. Mark Alfano challenges this theory and asks, not whether character is empirically adequate, but what characters human beings could have and develop. Although psychology suggests that most people do not have robust character traits such as courage, honesty and open-mindedness, Alfano argues that we have reason to attribute these virtues to people because such attributions function as

self-fulfilling prophecies - children become more studious if they are told that they are hard-working and adults become more generous if they are told that they are generous. He argues that we should think of virtue and character as social constructs: there is no such thing as virtue without social reinforcement. His original and provocative book will interest a wide range of readers in contemporary ethics, epistemology, moral psychology and empirically informed philosophy.

Detailing Reviews and Ratings for Trust-Enhanced Composition - Florian Volk
2015-12-15

The Internet has developed from an information platform to a business platform. Fostered by the Internet of Things, the Internet of Services is the "new economy" in the Internet. Business providers compose Internet services offered by other parties to value-added, composite services. A new business model has evolved from the possibility to combine independent services to

new ones. This book contributes new methods and approaches to stakeholders in the setting of composite services in the Internet of Services. Providers and customers often encounter situations in which information on the quality of offered services is scarce and subject to uncertainty. Deciding for one service or the other includes the possibility of unwittingly paying for a service of low quality while another, better, service is readily available.

Distinguishing between good and bad services is both difficult and important for successful business activities in this setting. While trust is a well-known concept in human interaction, it has long been neglected in technical settings. Since the introduction of computational trust, researchers are working on making mechanisms of human trust usable in technical settings. This book applies and evolves computational trust for the application in composite service settings.
