'Electronics-I' is intended to be used as a text book for II Semester Diploma in Electrical and Electronics Engineering. The motivation for writing this book came when I felt the absence

of a suitable text for Polytechnic students. This book is meant to fill the void. It is designed for comprehensively covering all topics relevant to the subject. Each and every topic has been explained in a very simple language as per the syllabus prescribed by the Board of Technical Education. To enhance the utility of the book, important points and review questions (Fill in the blank and descriptive type) have been included at the end of each chapter. Model question papers have been provided to help students prepare better for the semester examinations. It is hoped that this book will be of immense use to teachers and students of Polytechnics. Any constructive suggestions from teachers and students for improving the contents will be warmly appreciated.

BUILDING MATERIALS - P.C. VARGHESE
2015-02-26

This practice-oriented book, now in its second edition, presents a lucid yet comprehensive coverage of the engineering properties and uses of the materials commonly used in building construction in India. Profusely illustrated with tables and diagrams, the book brings into light the basics of building materials and their specifications. Besides giving information regarding the traditional building materials, the text now acquaints the reader with up-to-date and in-depth information pertaining to modern materials available in the market. The references to IS codes and standards make this text suitable for further study and field use. The second edition possesses some substantial changes in Chapters 12, 13, 14 and 20. Now, the book offers a new section on durability of concrete in Chapter 12; a modified section regarding revision of IS 10262 (1982) code on concrete mix design to IS 10262 (2009) and a new section on classification of exposure conditions in Chapter 13; and a new section relating to large advances made in concrete construction and repair chemicals in Chapter 14.

Besides, the content of Chapter 20 has been completely updated, with a particular emphasis on the extensive use of aluminium in building construction. Primarily intended for the students pursuing undergraduate degree (B.E./B.Tech.) and diploma courses in civil engineering and architecture, the book, on account of lecture-based presentation of the subject, should also prove eminently utilitarian for the young teachers to use it in their classroom lectures as well as for practising engineers to get a clear understanding of the fundamentals of the subject. NEW TO THE SECOND EDITION Review questions at the end of each chapter enable the reader to recapitulate the topics Considerable attention is given on field practice Syllabus of laboratory work on construction materials and a model question paper (Anna University) are given in appendices to guide the reader.

BUSINESS ENVIRONMENT - Dr.Rekha Shivajirao Jadhav I 2022-10-08

About the Book Nothing but the change is constant—goes a well-known saying. The quote holds true for all spheres & aspects of human life & business environment. The onset of the 21st Century brought itself the turbulence in the business environment that had far reaching effects. The subprime crises that originated in the USA took its toll on many financial giants & the ripples created are yet to calm down. Hence in this scenario no student of management can afford to remain oblivious of the factors that determine & affect the business environment. The students hence should be well versed with the background of the world economy now & then. Another important highlight of this era has been the process of liberalisation, privatisation & globalisation which have brought about wide challenges & opportunities in most of the countries. The emergence of China & India has been phenomenon & is expected to take over the United States as the largest economy of the world. The organisations have to retune their strategies & ways of doing business in order to take the advantage of these developments. It is because of these reasons that the Universities & Institutes have incorporated the subject of Business environment to be taught to the management students. An attempt is made here by the authors to assist the students by way of providing Study Material as per the curriculum with non-commercial considerations. However, it
