The Age of Reason - Thomas Paine 2021-01-30

"The Age of Reason" is an influential work by Thomas Paine that follows in the tradition of eighteenth-century British deism, and challenges institutionalized religion and the legitimacy of the Bible. It presents common deistic arguments; for example, it highlights what Paine saw as corruption of the Christian Church and criticizes its efforts to acquire political power. Paine advocates reason in the place of revelation, leading him to reject miracles and to view the Bible as "an ordinary piece of literature rather than as a divinely inspired text". It promotes natural religion and argues for the existence of a creator-God. The Age of Reason is divided into three sections. In Part I, Paine outlines his major arguments and personal creed. In Parts II and III he analyzes specific portions of the Bible in order to demonstrate that it is not the revealed word of God. Most of Paine's arguments had long been available to the educated elite, but by presenting them in an engaging and irreverent style, he made deism appealing and accessible to a mass audience.

The Brain That Changes Itself - Norman Doidge 2007-03-15

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of The Man Who Mistook His Wife for a Hat What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more. An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

His days are occupied by an unfulfilling insurance job; his nights spent worrying about his mortgage, marriage, expanding waistline, and what seems to be a certain prospect of World War II looming on the horizon. So when George unexpectedly hits it big on a lucky horse, he spends the windfall on the only thing he ever knew to make him happy: his childhood. George travels back to his boyhood home of Lower Binfield, swimming in vivid memories of worry-free bliss, sights, sounds, smells, and emotions of a pre-war world. But while the idyllic village in George's head may not have seen battle, the reality may be more sobering than he is prepared to deal with. John Dowell narrates the events of Florence's affair with Edward, the "good soldier," and her subsequent suicide. Through Dowell's confused and perhaps unreliable narrative, Ford attempted to recreate real thoughts. This literary technique was a forerunner to literary techniques employed by such later writers as Samuel Beckett and J.M. Coetzee. Ford Maddox Ford (Ford Maddox Hueffer) was born in 1873. He was a novelist, poet, literary critic, editor, and one of the founding fathers of English Modernism. He published over eighty books, including two collaborations with Joseph Conrad (Inheritors in 1901 and Romance in 1903). He died in 1939.
