Gender and Assimilation in Modern Jewish History - Paula E. Hyman 2017-05-01

Paula Hyman broadens and revises earlier analyses of Jewish assimilation, which depicted the Jews as though they were all men,

by focusing on women and the domestic as well as the public realms. Surveying Jewish accommodations to new conditions in Europe and the United States in the years between 1850 and 1950, she retrieves the experience of women as reflected in their writings--memoirs, newspaper and journal articles, and texts of speeches--and finds that Jewish women's patterns of assimilation differed from men's and that an examination of those differences exposes the tensions inherent in the project of Jewish assimilation. Patterns of assimilation varied not only between men and women but also according to geographical locale and social class. Germany, France, England, and the United States offered some degree of civic equality to their Jewish populations, and by the last third of the nineteenth century, their relatively small Jewish communities were generally defined by their middle-class characteristics. In contrast, the eastern European nations contained relatively large and overwhelmingly non-middle-class Jewish population. Hyman considers how these differences between East and West influenced gender norms, which in turn shaped Jewish women's responses to the changing conditions of the modern world, and how they merged in the large communities of eastern European Jewish immigrants in the United States. The book concludes with an exploration of the sexual politics of Jewish identity. Hyman argues that the frustration of Jewish men at their feminization in societies in which they had achieved political equality and economic success was manifested in their criticism of, and distancing from, Jewish women. The book integrates a wide range of primary and secondary sources to incorporate Jewish women's history into one of the salient themes in modern Jewish history, that of assimilation. The book is addressed to a wide audience: those with an interest in modern Jewish history, in women's history, and in ethnic studies and all who are concerned with the experience and identity of Jews in the modern world.

Must We Divide History Into Periods? - Jacques Le Goff 2015-09-08
We have long thought of the Renaissance as a luminous era that marked a decisive break with the past, but the idea of the Renaissance as a distinct period arose only during the nineteenth century. Though the view of the Middle Ages as a dark age of unreason has softened somewhat, we still locate the advent of modern rationality in the Italian thought and culture of the fifteenth and sixteenth centuries. Jacques Le Goff pleads for a strikingly different view. In this, his last book, he argues persuasively that many of the innovations we associate with the Renaissance have medieval roots, and that many of the most deplorable aspects of medieval society continued to flourish during the Renaissance. We should instead view Western civilization as undergoing several "renaissances" following the fall of Rome, over the course of a long Middle Ages that lasted until the mid-eighteenth century. While it is indeed necessary to divide history into periods, Le Goff maintains, the meaningful continuities of human development only become clear when historians adopt a long perspective. Genuine revolutions—the shifts that

signal the end of one period and the beginning of the next—are much rarer than we think.

Lo spazio della doula - Brenda Benaglia 2022-05-10T00:00:00+02:00
La doula è una figura che offre supporto emotivo e accudimento pratico alle madri, ma non è un'ostetrica e nemmeno una psicologa. Lo spazio della doula offre una cartografia nazionale di un fenomeno sociale in emersione. Muovendo dall'osservazione etnografica e dall'ascolto delle voci di decine di doule e madri, Brenda Benaglia allarga lo sguardo al rapporto fra donne, corpi, cura e società nell'Italia contemporanea. Quali bisogni accoglie la doula? Quali vuoti personali, familiari, sociali e istituzionali denuncia? Quali solitudini? Il volume restituisce un panorama in cui risuona l'eredità femminista che ha teorizzato il valore della parola, del rispecchiamento fra donne, delle pratiche di condivisione simbolica e materiale, dell'importanza di pronunciare i propri bisogni e di riconoscere le proprie vulnerabilità. Oggi, l'esistenza stessa della doula tradisce tutta l'ambivalenza tipica della più audace contemporaneità occidentale in cui i confini fra individualità e

individualismo, responsabilità e colpa, autodeterminazione e solitudine sono sempre più sfumati.

Taddeo Alderotti and His Pupils - Nancy G. Siraisi 2019-02-19

Taddeo Alderotti was the most celebrated professor of medicine at Bologna in the late thirteenth century. His teaching involved close attention not merely to medicine itself but to all the scientific and philosophical learning of the time. His pupils, in turn, included some of the leading learned physicians in Italy in the early fourteenth century. In a study of the professional thought and practice of these physicians, Nancy Siraisi shows how their intellectual and medical achievements were integrated with the social and institutional context within which they lived. Focusing specifically on Taddeo Alderotti and six of his pupils, the author treats what is known of their lives, their teaching activities, their learned writings, their medical practice, and their broader moral outlook. She pays particular attention to the theoretical concepts of medical learning, the relationship of medicine to natural philosophy, the correlation of medical theory to medical practice, and the role of the physician as a citizen. Nancy G. Siraisi is Professor of History at Hunter College of the City University of New York. Originally published in 1981.
