Visible Language -

Christopher Woods 2010

This unique exhibit is the result of collaborative efforts of more than twenty authors and loans from five museums. It focuses on the independent invention of writing in at least four different places in the Old world and Mesoamerica with the earliest texts of Uruk, Mesopotamia (5,300 BC) shown in the United States for the first time. Visitors to the exhibit and readers of this catalog can see and compare the parallel pathways by which writing came into being and was used by the earliest kingdoms of Mesopotamia, Egypt, China, and the Maya world.

Aerial Geology - Mary Caperton Morton 2017-10-04

“Get your head into the clouds with *Aerial Geology*.” —The New York Times Book Review
Aerial Geology is an up-in-the-sky exploration of North America's 100 most spectacular geological formations. Crisscrossing the continent from the Aleutian Islands in Alaska to the Great Salt Lake in Utah and to the Chicxulub Crater in Mexico, Mary Caperton Morton brings you on a fantastic tour, sharing aerial and satellite photography, explanations on how each site was formed, and details on what makes each landform noteworthy. Maps

and diagrams help illustrate the geological processes and clarify scientific concepts. Fact-filled, curious, and way more fun than the geology you remember from grade school, *Aerial Geology* is a must-have for the insatiably curious, armchair geologists, million-mile travelers, and anyone who has stared out the window of a plane and wondered what was below.

Flowers in the World's Most Beautiful Gardens - Yves-Marie Allain 2012-10-01

Flowers in the World's Most Beautiful Gardens puts the spotlight on the star of the garden—the flower. Tracing the history of flower gardens from the Middle Ages to today, the book discusses the types of flowers commonly planted, the landscape designs, the advances in technology, and how these practices have changed throughout the centuries. Each chapter also focuses on a significant type of bloom—the rose, iris, and tulip, among others. Illustrated with more than 180 exquisite photographs by Alain Le

Toquin, this book features the world's most extraordinary flower gardens, showcasing gardens in countries such as the United Kingdom, France, Germany, Italy, Belgium, New Zealand, Russia, the United States, Thailand, and many more.

The Jungle Garden - Philip Oostenbrink 2021-12

This book takes the "houseplant look" outside by exploring the wonders of lush, green, foliage plants that are hardy in the garden to -10F. Unlike flowers that fade, these big-leaved, larger-than-life plants provide year-round impact for decades and small, urban gardens that are well protected are the perfect home for them. Expert horticulturist Philip Oostenbrink has been an enthusiastic grower for years and in this book recommends the best hardy, foliage plants for texture, leaf shape, and color. Jungle gardens can be shady and immersive, sunny and open or somewhere in between and there are plants suited to all these environments including purple-

leaved bananas, desert-island palms, spiky agaves, architectural Pseudopanax, and succulents such as Echeveria and Aeonium. Beautiful special photography by Sarah Cuttle features standout jungle gardens that demonstrate how to combine foliage plants effectively and create backdrops and container displays that make the plants pop. This book is the irresistible next step for all houseplant addicts and for all who are ready to embark on their very own jungle adventure.

Modern Thai House - Robert Powell 2012-10-10

With rich photography and insightful commentary, this Thai architecture and interior design book showcases some of the finest modern masterpieces in Southeast Asia. A tremendous body of sophisticated and sensitively designed architectural work has been produced in Thailand in the first decade of the 21st century. The 25 houses in The Modern Thai House illustrate the radical new ideas coming

from a dynamic younger generation of architects who are producing work comparable with and sometimes even surpassing the very best architecture in the world. Most of these architects were trained in the U.S. or U.K. and reflect not only American and European sensibilities but also affinities with their contemporaries in Asia—including Japan, China, Singapore, and Bali—all hotbeds for innovation in modern design. The houses in this book are readily accessible from Bangkok, Phuket, and Chiangmai. They reflect a wide variety of concerns and solutions, such as: sustainability; responses to climate; strategies for cooling with minimal electricity; openness versus security in a large metropolis such as Bangkok; cultural sensitivity and responsiveness, as evidenced in a "three-generation house," built for a society in which the extended family is still prevalent; and cultural memory, as in the use of elements such as pilings,

verandahs, and steeply pitched roofs with large overhangs that echo traditional Thai designs. Nurtured by an increasingly knowledgeable and wealthy clientele, modern architecture in Thailand is emerging with a variety of innovative architectural expressions.

The View from Federal Twist

- James Golden 2022-03

Federal Twist is set on a ridge above the Delaware River in western New Jersey. It is a naturalistic garden that has loose boundaries and integrates closely with the natural world that surrounds it. It has no utilitarian or leisure uses (no play areas, swimming pools, or outdoor dining) and the site is not an obvious choice for a garden (heavy clay soil, poorly drained: quick death for any plants not ecologically suited to it). The physical garden, its plants and its features, is of course an appealing and pleasant place to be but Federal Twist's real charm and significance lie in its intangible aspects: its changing qualities and views, the moods and emotions it

evokes, and its distinctive character and sense of place. This book charts the author's journey in making such a garden. How he made a conscious decision not to "improve the land", planted large, competitive plants into rough grass, experimented with seeding to develop sustainable plant communities. And how he worked with light to provoke certain moods and allowed the energy of the place, chance, and randomness to have its say. Part experimental horticulturist and part philosopher, James Golden has written an important book for naturalistic and ecological gardeners and anyone interested in exploring the relationship between gardens, nature, and ourselves.

New Directions in Garden

Tourism - Richard W. Benfield
2020-12-08

Following on from the success of *Garden Tourism*, this book provides an update on the statistics and growth of the global phenomenon of garden visitation. It delves into new themes and contemporary

trends, from art and culture to psychographic profiling of visitors and how social media and semiotics are used to enrich visitor experience and fuel motivation. In addition to these new topics, the book also expands on important areas such as the continued rise of urban gardens, garden events, historic gardens and garden economics.

Under Western Skies -

Jennifer Jewell 2021-05-11
“Atkinson and Jewell invite each of us to reimagine one’s connection to the land while cultivating nature close to home. A must-read for anyone searching for inspired solutions for designing or refining a garden.” —Emily Murphy, founder of Pass the Pistil From windswept deserts to misty seaside hills and verdant valleys, the natural landscapes of the American West offer an astounding variety of climates for gardens. Under Western Skies reveals thirty-six of the most innovative designs—all embracing and celebrating the

very soul of the land on which they grow. For the gardeners featured here, nature is the ultimate inspiration rather than something to be dominated, and Under Western Skies shows the strong connection each garden has with its place. Packed with Atkinson’s stunning photographs and illuminated by Jewell’s deep interest in the relationships between people and the spaces they inhabit, Under Western Skies offers page after page of encouraging ingenuity and inventive design for passionate gardeners who call the West home.

The Fate of Food - Amanda Little 2019-06-04

WINNER OF THE 2019 NAUTILUS BOOK AWARD In the fascinating story of the sustainable food revolution, an environmental journalist and professor asks the question: Is the future of food looking bleak—or better than ever? “In *The Fate of Food*, Amanda Little takes us on a tour of the future. The journey is scary, exciting, and, ultimately, encouraging.”—Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction* Climate models show that global crop production will decline every decade for the rest of this century due to drought, heat, and flooding. Water supplies are in jeopardy. Meanwhile, the world's population is expected to grow another 30 percent by midcentury. So how, really, will we feed nine billion people sustainably in the coming decades? Amanda Little, a professor at Vanderbilt University and an award-winning journalist, spent three years traveling through a

dozen countries and as many U.S. states in search of answers to this question. Her journey took her from an apple orchard in Wisconsin to a remote control organic farm in Shanghai, from Norwegian fish farms to famine-stricken regions of Ethiopia. The race to reinvent the global food system is on, and the challenge is twofold: We must solve the existing problems of industrial agriculture while also preparing for the pressures ahead. Through her interviews and adventures with farmers, scientists, activists, and engineers, Little tells the fascinating story of human innovation and explores new and old approaches to food production while charting the growth of a movement that could redefine sustainable food on a grand scale. She meets small permaculture farmers and “Big Food” executives, botanists studying ancient superfoods and Kenyan farmers growing the country's first GMO corn. She travels to places that might seem irrelevant to the future of food

yet surprisingly play a critical role—a California sewage plant, a U.S. Army research lab, even the inside of a monsoon cloud above Mumbai. Little asks tough questions: Can GMOs actually be good for the environment—and for us? Are we facing the end of animal meat? What will it take to eliminate harmful chemicals from farming? How can a clean, climate-resilient food supply become accessible to all? Throughout her journey, Little finds and shares a deeper understanding of the threats of climate change and encounters a sense of awe and optimism about the lessons of our past and the scope of human ingenuity.

Making Comics - Lynda Barry
2019-09-10

The idiosyncratic curriculum from the Professor of Interdisciplinary Creativity will teach you how to draw and write your story Hello students, meet Professor Skeletor. Be on time, don't miss class, and turn off your phones. No time for introductions, we start drawing right away. The goal is more rock, less talk, and we communicate only through images. For more than five years the cartoonist Lynda Barry has been an associate professor in the University of Wisconsin-Madison art department and at the Wisconsin Institute for Discovery, teaching students from all majors, both graduate and undergraduate, how to make comics, how to be creative, how to not think.

There is no academic lecture in this classroom. Doodling is enthusiastically encouraged. Making Comics is the follow-up to Barry's bestselling Syllabus, and this time she shares all her comics-making exercises. In a new hand-drawn syllabus detailing her creative curriculum, Barry has students drawing themselves as monsters and superheroes, convincing students who think they can't draw that they can, and, most important, encouraging them to understand that a daily journal can be anything so long as it is hand drawn. Barry teaches all students and believes everyone and anyone can be creative. At the core of Making Comics is her certainty that creativity is vital to processing the world around us.
