Hearing Health Care for Adults - National Academies of Sciences, Engineering, and Medicine 2016-09-06

The loss of hearing - be it gradual or acute, mild or severe, present since birth or acquired in older age - can have significant effects on one's communication abilities, quality of life, social participation, and health. Despite this, many people with hearing loss do not seek or receive hearing health care. The reasons are numerous, complex, and often interconnected. For some, hearing health care is not affordable. For others, the appropriate services are difficult to access, or individuals do not know how or where to access them. Others may not want to deal with the stigma that they and society may associate with needing hearing health care and obtaining that care. Still others do not recognize they need hearing health care, as hearing loss is an invisible health condition that often worsens gradually over time. In the United States, an estimated 30 million individuals (12.7 percent of Americans ages 12 years or older) have hearing loss. Globally, hearing loss has been identified as the fifth leading cause of years lived with disability. Successful hearing health care enables individuals with hearing loss to have the freedom to communicate in their environments in ways that are culturally appropriate and that preserve their dignity and function. Hearing Health Care for Adults focuses on improving the accessibility and affordability of hearing health care for adults of all ages. This study examines the hearing health care system, with a focus on non-surgical technologies and services, and offers recommendations for improving access to, the affordability of, and the quality of hearing health care for adults of all ages.

Registries for Evaluating Patient Outcomes - Agency for Healthcare Research and Quality/AHRQ 2014-04-01

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their

populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Washington Pharmacy Law - William E. Fassett 2017-02-17

This book, newly revised and expanded for 2017, provides pharmacists, pharmacy technicians, and owners or managers of pharmacies with the information they need to know about the law that affects the practice of pharmacy in the State of Washington. Readers will use it not only to prepare for licensure, but to help assure that as licensees of the Pharmacy Quality Assurance Commission they will enjoy long and successful careers without unnecessary legal entanglements. Others who have found this book useful are attorneys, paralegals, compliance officers, and regulators whose professional responsibilities encompass pharmacy practice or pharmaceuticals in Washington State. Each of the chapters covers a particular topic area, and combines in one place the related state and federal law and regulations, as well as decisions by state and federal courts that are not readily found in normal state pharmacy law sources. References to other hard to locate material include Commission policies, meeting minutes, and guidelines published by other agencies, commissions, or boards. For those who are using the book as a textbook, each chapter includes a list of ACPE Guidelines and MPJE Competencies that are covered therein. Chapter 1 - Introduction to the law, courts, and laws, and the structure of state and federal

government. Chapter 2 - How to become a pharmacist, intern, pharmacy technician, or pharmacy assistant. Chapter 3 - How to establish, operate, or close a practice site or pharmacy business. Chapter 4 - How to legally and safely provide drugs and devices to patients. Chapter - How to deal with controlled substances and the DEA. Chapter 6 - How to obtain and use patient information to improve patient care, and when and when not to disclose protected health information. Chapter 7 - How to avoid discipline, civil lawsuits, and how to deal with employer-employee relationships and conflicts. Chapter 8 - How to avoid legal difficulties when dealing with Medicaid, Medicare, and 3rd party payers.
