The Future of Nursing - Institute of Medicine 2011-02-08

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Documentation for Rehabilitation - Lori Quinn 2015-12-11

Better patient management starts with better documentation!

Documentation for Rehabilitation: A Guide to Clinical Decision Making in Physical Therapy, 3rd Edition shows how to accurately document treatment progress and patient outcomes. Designed for use by rehabilitation professionals, documentation guidelines are easily adaptable to different practice settings and patient populations. Realistic examples and practice exercises reinforce concepts and encourage you to apply what you've learned. Written by expert physical therapy educators Lori Quinn and James Gordon, this book will improve your skills in both documentation and clinical reasoning. Coverage of practice settings includes documentation examples in acute care, rehabilitation, outpatient, home care, and nursing homes, as well as a separate chapter on documentation in pediatric settings. Guidelines to systematic documentation describe how to identify, record, measure, and evaluate treatment and therapies - especially important when insurance companies require evidence of functional progress in order to provide reimbursement. Workbook/textbook format uses examples and exercises in each chapter to reinforce your understanding of concepts. NEW Standardized Outcome Measures chapter leads to better care and patient management by helping you select the right outcome measures for use in evaluations, re-evaluations, and discharge summaries. UPDATED content is based on data from current research, federal policies and APTA guidelines, including incorporation of new terminology from the Guide to Physical Therapist 3.0 and ICD-10 coding. Understanding Medicare MDS 3.0 for the Rehabilitation

Professional - Caroline Joy Co 2011-05-01

There is a newer version of this book. You are viewing the first edition of this title. Check out the second edition for more up to date information. On August 8, 2011, the Centers for Medicare & Medicaid Services released the final ruling and commentary for the new implementation of the MDS changes set to take effect on Oct. 1, 2011. The Reimbursable Therapy Minutes will be the deciding factor in determining whether a Change of Therapy (COT) OMRA (Other Medicare Required Assessment) will be required, if at all. Most of our skilled nursing facilities are using some type of tracking tool for managing the prospective payment system minutes. Some are computerized, while others are still using paper

forms. The Change of Therapy (COT) observation week must be scheduled exactly seven days following the previous MDS or observation week. If there has been a change in RUG category, then a Change of Therapy (COT) OMRA must be done and the reimbursement will drop or increase to the new RUG until another change occurs. CMS decided to assume all SNFs should offer seven-day rehab options, so facilities that traditionally offered Monday through Friday services will face immense challenges with the new Change of Therapy (COT) OMRAs. This book has been updated to discuss the new MDS assessment schedule, the allocation of group therapy minutes, the revised student supervision provisions, the End of Therapy (EOT) Other Medicare Required Assessment (OMRA) and new resumption items, and the new PPS assessment- Change of Therapy (COT) OMRA (Other Medicare Required Assessment). The long term care industry has anticipated the new MDS 3.0. RUG IV coding requires the therapist to specifically account for the time captured during the look back period. This book could help occupational therapists, physical therapists and speech therapists understand Medicare standards for subacute care programs to be compliant with Medicare MDS 3.0 standards and state regulations. Documenting and billing strategies are also discussed in this book to attain maximum reimbursement. A list of commonly used ICD-9 codes is also provided. Appropriate billing and documentation should be present in the medical record. Medicare is increasingly reviewing therapy claims to ensure that the therapy provided required the skills of a therapist. The Mandated program, Recovery Audit Contractions, recovered 1 billion dollars during their 3 year demonstration project. This book covers establishing medical necessity, refusing to care for a resident, restraints, safety, creating incident reports, supervising assistive personnel and resident privacy. Coding and billing for subacute and long term care settings are also encompassed in this book, along with denial and appeal management, regulatory guidelines for insurers and improving cash flow with denial management strategies. Proper coding and documentation ensures that facilities will keep their money upon a post payment medical record audit.
