The Hellfest - A Pilgrimage for Metalheads - Corentin CHARBONNIER

The study presented here shows, through the analysis of the Hellfest, an annual metal music festival held in Clisson in the Loire-Atlantique region of France, that this music constitutes a true culture. To understand the current position the Hellfest holds for the metal community, it is necessary to know its evolution since its creation, to examine the relationships it promotes between the festivalgoers themselves, and between the festivalgoers and the artists, and to examine its role as a place where a community with no real geographical foothold can be united during a given period of time. The various sociabilities that are experienced at the Hellfest cannot be understood without taking an interest in the particular economy set

up by the organisers, an economy that contributes to the recognition of the event and influences its sociabilities. The organisers have had and are committed to addressing the wishes of the festivalgoers of all subgenres of metal music, making them actors and not just mere consumers and involving local economic actors as well. The Hellfest allows each metalhead to take a break from his or her life in a particular space, for a defined period of time, offering everyone the opportunity to assert or reassert his or her identity through different rituals. It is thus the pilgrimage of the entire metal community

The Aesthetics of Everyday Life - Andrew Light 2005-02-23

The aesthetics of everyday life, originally developed by Henri Lefebvre and other modernist theorists, is an extension of traditional aesthetics, usually confined to works of art. It is not limited to the study of humble objects but is rather concerned with all of the undeniably aesthetic experiences that arise when one contemplates objects or performs acts that are outside the traditional realm of aesthetics. It is concerned with the nature of the relationship between subject and object. One significant aspect of everyday aesthetics is environmental aesthetics, whether constructed, as a building, or manipulated, as a landscape. Others, also discussed in the book, include sport, weather, smell and taste, and food.

Self-Reference in Literature and Music - Walter Bernhart 2010

This volume contains a selection of nine essays with an interdisciplinary perspective. They were originally presented at the Sixth International Conference on Word and Music Studies, which was held at Edinburgh University in June 2007 and was organized by the International Association for Word and Music Studies (WMA). The contributions to this volume focus on self-reference in various systematic, historical and intermedial ways. Self-reference - including, as a special case, metareference (the self-conscious reflection on music, literature and other medial concerns) - is explored, among others, in instrumental music by Mozart, Mahler and Satie, in the structure and performance of (meta-)operas, in operatic adaptations of drama and filmic adaptations of opera, as well as in intermedial novelistic references to music. The essays cover a historical range from the 18th century to the present and are of interest to literary and opera scholars and students, musicologists as well as all readers generally interested in medial self-reference and intermediality studies.

[In Praise of Antiheroes](#) - Victor Brombert 2001-11

In an age of upheaval and challenged faith, traditional heroes are hard to come by, and harder still to love, with their bloodstained hands and backs unbowed by the consequences of their actions. Through penetrating readings of key works of modern European literature, Victor Brombert shows how a new kind of hero—the antihero—has arisen to replace the toppled heroic model. Though they fail, by design, to live up to conventional expectations of mythic heroes, antiheroes are not necessarily "failures." They display different kinds of courage more in tune with our time and our needs: deficiency translated into strength,

failure experienced as honesty, dignity achieved through humiliation. Brombert explores these paradoxes in the works of Büchner, Gogol, Dostoevsky, Flaubert, Svevo, Hašek, Frisch, Camus, and Levi. Coming from diverse cultural and linguistic traditions, these writers all use the figure of the antihero to question handed-down assumptions, to reexamine moral categories, and to raise issues of survival and renewal embodying the spirit of an uneasy age.

A *Supernatural* novel that reveals a previously unseen adventure for the Winchester brothers, from the hit TV series!

[Opening and Closing](#) - Klapp 1978-09-29

In this original application of information theory to social analysis, Orrin Klapp examines how and why societies are producing more stress than they ever can handle. He argues that the reduction of 'social noise', the chaos from which we try to construct meaning is a major goal of individuals and groups alike. Individuals, groups, even entire societies normally cycle rhythmically between two basic modes of adaptation to the constant communication flow: opening, or scanning for desired information; and closing, or defending against noise. For example, in a society functioning in the opening mode, movements like ecumenicism and expansionism achieve momentum. Extreme reactions in either mode lead to an opposite swing, according to Professor Klapp's model. His wide-ranging conceptual scheme incorporates hypotheses about the variety and redundancy of information, as well as about human channel capacities and the need for homeostasis. His research reveals intriguing relationships among such phenomena as the concern about industrial population and the search for ethnic roots.

[Christianity, Book-Burning and Censorship in Late Antiquity](#) - Dirk Rohmann 2016-07-25

It is estimated that only a small fraction, less than 1 per cent, of ancient literature has survived to the present day. The role of Christian authorities in the active suppression and destruction of books in Late Antiquity has received surprisingly little sustained consideration by academics. In an approach that presents evidence for the role played by Christian institutions, writers and saints, this book analyses a broad range of literary and legal sources, some of which have hitherto been little studied. Paying special attention to the problem of which genres and book types were likely to be targeted, the author argues that in addition to heretical, magical, astrological and anti-Christian books, other less obviously subversive categories of literature were also vulnerable to destruction, censorship or suppression through prohibition of the copying of manuscripts. These include texts from materialistic philosophical traditions, texts which were to become the basis for modern philosophy and science. This book examines how Christian authorities, theologians and ideologues suppressed ancient texts and associated ideas at a time of fundamental transformation in the late classical world.

The Necronomicon - Simon 1980-03-01

In the past 31 years, there has been a lot of ink—actual and virtual—spilled on the subject of the

Necronomicon. Some have derided it as a clumsy hoax; others have praised it as a powerful grimoire. As the decades have passed, more information has come to light both on the book's origins and discovery, and on the information contained within its pages. The Necronomicon has been found to contain formula for spiritual trans-formation, consistent with some of the most ancient mystical processes in the world, processes that were not public knowledge when the book was first published, processes that involve communion with the stars. In spite of all the controversy, the first edition sold out before it was published. And it has never been out of print since then. This year, the original designer of the 1977 edition and the original editor have joined forces to present a new, deluxe hardcover edition of the most feared, most reviled, and most desired occult book on the planet.

The City Crown by Bruno Taut - Matthew Mindrup 2016-03-09

This book is the first English translation of the German architect Bruno Taut's early twentieth-century anthology *Die Stadtkrone* (The City Crown). Written under the influence of World War I, Taut developed The City Crown to promote a utopian urban concept where people would live in a garden city of 'apolitical socialism' and peaceful collaboration around a single purpose-free crystalline structure. Taut's proposal sought to advance the garden city idea of Ebenezer Howard and rural aesthetic of Camillo Sitte's urban planning schemes by merging them with his own 'city crown' concept. The book also contains contributions by the Expressionist poet Paul Scheerbarth, the writer and politician Erich Baron and the architectural critic Adolf Behne. Although the original German text was republished in 2002, only the title essay of The City Crown has previously been translated into English. This English translation of Taut's full anthology, complete with all illustrations and supplementary texts, fills a significant gap in the literature on early modern architecture in Germany and the history of urban design. It includes a translators' preface, introduction and afterword to accompany the original composition of essays, poems, designs and images. These original texts are accompanied by illustrations of Taut's own designs for a utopian garden city of 300,000 inhabitants and over 40 additional historic and contemporary examples. The new preface to The City Crown explains the premise for the English translation of Taut's anthology, its organization and the approaches taken by the translators to maintain the four different voices included in the original work. Matthew Mindrup's introduction critically examines the professional and intellectual developments leading up to and supporting Bruno Taut's proposal to advance the English garden city concept with a centralized communal structure of glass, the city crown. Through the careful examination of original
